Subject: RE: Meeting Follow-up 061505

We would like to proceed with the entire relocation on 26th Street and that is what I meant by stating Option A for both systems. It is fine with us if KCPL wants to separate these into two distinct projects. The most time critical of the two projects is the Bellevue work as it impacts our parking situation and paving operations. We want to complete the 26th Street work before we commence operations in the new brewhouse, which will be April 2006.

Give me a call if you have any other questions.

Mike

Importance: High

Mike,

I am getting ready to enter the job for this and I need to know if you are wanting the 26th street option done now or later when the warehouse project starts?? Depending on the time I will need to enter either 1 or 2 jobs. Please let me know ASAP, so I can get things entered.

Lori

Lori,

We would like to proceed with Option A below for both systems. I understand that there will be a number of weeks involved in the engineering and planning phases of this project but would like to have detailed cost estimates in our hands as soon as possible. I also need a schedule for the work as soon as you can get it to us.

3/1/2006

Please call me if you have any questions and to update me on the status of these projects when you have a few minutes.

Regards,

Mike Utz

I would like to see B under Bellevue eliminated. It is really contained within A. I think it would make things more clear to do that.

Subject: Meeting Follow-up 061505

Here is a follow-up on our meeting today:

Bellevue Options

- A - Underground feed from switchgear to new terminal pole at Clarkson, clean-up overhead from 25th Street to 26th Street, eliminate old terminal pole (\$35,000 KCPL, \$3,100 Westhues)
- B - Clean-up existing terminal pole and all other overhead lines and poles
- C - All underground feed from existing manhole to 26th Street and 25th Street, overhead feed to new transformer pole at Clarkson, underground secondaries (1), overhead secondaries (2) (\$135,000 KCPL, \$45,000 Westhues)

26th Street Options

- A - Move all overhead lines to south side of street; re-feed Output Technologies underground at SW Blvd (already have this price) (\$75,000 KCPL, \$0 Westhues)
- B - Move only portion of overhead from alley to SW Blvd to south side of street; re-feed Output Technologies underground (\$40,000 KCPL, \$0 Westhues)

Please let me know if I've missed anything. We will have an answer back to KCPL by June 24th, 2005.
