RE: *In the Matter of the Application of BellSouth BSE, Inc. and BellSouth Long Distance, Inc. for Authority to Transfer Control, Case No. LM-2004-0552; Tariff Tracking No. YX-2004-1298.*

Dear Mr. Roberts:

Enclosed for filing in the above-referenced matter are substitute pages for Original Pages 2-3, and 27-57, inclusive of Missouri Tariff No. 3 of the tariff of BellSouth Long Distance, Inc. This filing is intended to modify the original tariffs to address the Staff's concerns. A copy of the attached Tariff has been emailed, hand-delivered or mailed this date to each party of record.

Thank you for your attention to this matter.

Sincerely,

James M. Fischer

Enclosures

Dana K. Joyce, General Counsel

 COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

BellSouth Long Distance, Inc. is classified as a competitive telecommunications company, and has been granted standard waivers of the following statutes and regulatory rules:

Statutes

392.210.2	-	uniform system of accounts
392.240.1	-	just and reasonable rates
392.270	-	valuation of property (ratemaking)
392.280	-	depreciation accounts
392.290	-	issuance of securities
392.300.2	-	acquisition of stock
392.310	-	stock and debit issuance
392.320	-	stock dividend payment
392.330	-	issuance of securities, debts and notes
392.340	-	reorganization(s)

Commission Rules

4 CSR 240-10.020	-	depreciation fund income
4 CSR 240-3.545(2)(C)	-	rate schedules posted in central office
4 CSR 240-3.550(5)(C)	-	file exchange boundary maps
4 CSR 240-30.040	-	uniform system of accounts
4 CSR 240-33.030	-	inform customers of lowest price

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 - DATA SERVICES, (CONT'D.)**3.1 Calculation of Distance, (Cont'd.)****3.1.1 Calculation Method for Private Line Services**

The following steps describe the procedure for calculating mileage distances for private line services:

- Step 1 Obtain the "V" and "H" coordinates for the Company access points serving the originating and terminating locations.
- Step 2 Obtain the difference between the "V" coordinates. Obtain the Difference between the "H" coordinates. The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.
- Step 3 Square the differences obtained in Step 2.
- Step 4 Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5 Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6 Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the wire centers and/or access points.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3 - DATA SERVICES, (CONT'D.)

3.2 Frame Relay Service

3.2.1 General

- (A) Frame Relay service, as provided for in this Tariff section, is offered for intrastate use only.
- (B) The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this Tariff of the Company.
- (C) Frame Relay Service is offered where facilities are available.
- (D) The rates and charges set forth for Frame Relay service provide for the furnishing of service where suitable facilities are available.
- (E) Suspension of service is not allowed.
- (F) The minimum service period is one month.
- (G) Frame Relay services will only be offered on an Individual Case Basis ("ICB").

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 – DATA SERVICES, (CONT'D.)**3.2 Frame Relay Service, (Cont'd.)****3.2.2 Explanation of Terms****(A) Customer Connection to Frame Relay Service**

The Customer Connection (or Port) provides the Customer with the standard interface to the Frame Relay service network. This interface receives the data frame from the Customer's network or device and verifies that the DLCI is valid before relaying the frame to the destination. Included in the Customer Connection are the Customer's termination on the Frame Relay service switching equipment, the transport from the Serving Area Point to the switching equipment, and the first DLCI. These interfaces connect the Frame Relay service network with the digital facilities operating at transmission speeds of 56 Kbps, 64 Kbps, 1.536 Mbps, or 44.210 Mbps.

(B) Frame Relay Service Network Serving Area

Certain serving wire centers are designated Serving Area Points. A Frame Relay Service Network Serving Area is comprised of all the Serving Area Points in a geographic area.

(C) Permanent Virtual Circuit (PVC)

A software defined path transporting data within the Frame Relay service network between two Customer Connections. This data path, once defined in the network software, does not have to be established again. PVCs are end-to-end, bi-directional channels that are established via the service provisioning process.

(D) Data Link Connection Identifier (DLCI)

The Frame Relay standard specifies an address field called the Data Link Connection Identifier. The DLCI specifies a connection. A PVC is created when any two DLCI's are mapped together.

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 - DATA SERVICES, (CONT'D.)**3.2 Frame Relay Service, (Cont'd.)****3.2.2 Explanation of Terms, (cont'd.)****(E) Committed Information Rate (CIR)**

Committed Information Rate is a feature that enables the Customer to select a sustained throughput under normal conditions. A CIR must be selected for each DLCI. Frames submitted at a rate above the subscribed CIR will be marked "discard eligible" (DE) and should network congestion occur, are subject to being dropped by the network. If CIR is set equal to zero, then all frames will be marked DE. However, in the absence of network congestion, DE marked frames will be transported with the same reliability as frames not marked DE within a single, Company Frame Relay Switch. The CIR value selected cannot exceed the minimum transmission speed of the link at either end of the PVC.

(F) Service Area Point (SAP)

A Company serving wire center that is designated as a member of the Frame Relay Service Network Serving Area. (See the definition of Frame Relay Service Network Serving Area preceding).

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 - DATA SERVICES, (CONT'D.)

3.2 Frame Relay Service, (Cont'd.)

3.2.3 Obligations of Customer

- (A) The Customer is responsible for the provision and maintenance of all Customer Provided Equipment (CPE) and to ensure that the operating characteristics of this equipment are compatible with and do not interfere with the service offered by the Company.

- (B) The maximum number of DLCIs per Customer Connection is subject to the characteristics of the Customer's data traffic. Thus, the number of DLCIs per Customer Connection must be negotiated between the Customer and the Company at the establishment of the Customer Connection and subsequent to the establishment should the traffic characteristics change. A maximum of 250 DLCIs may be established across a single Customer Connection.

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 - DATA SERVICES, (CONT'D.)

3.2 Frame Relay Service, (Cont'd.)

3.2.4 Responsibility of the Company

- (A) The Company is not responsible for the installation, operation, or maintenance of any equipment provided by the Customer.

- (B) In order to maintain the quality of Frame Relay service, the Company reserves the right to perform preventive maintenance or software updates to the network. This could result in Frame Relay service being unavailable during the time period between 2:00 A.M. and 4:00 A.M. Eastern Time on any given Wednesday or Sunday morning. However, the Company only expects to utilize this maintenance window for any given switch on the average of once a quarter. This maintenance may be adjusted by the Company as deemed necessary to maintain the quality of the service.

SECTION 3 - DATA SERVICES, (CONT'D.)**3.2 Frame Relay Service, (Cont'd.)****3.2.5 Provision of Service**

- (A) Certain Company serving wire centers are designated by the Company as Service Area Points (SAP's) for the Frame Relay service Network Serving Area. A Customer accessing the Frame Relay service network via a Packet Service Line and whose serving wire center is designated as SAP, will only require a Packet Service Line as described in Section 3.3 of this Tariff. A Frame Relay Service Customer, whose serving wire center is not designated as a SAP and who access the Frame Relay service network via a Packet Service Line, will require a Packet Service Line to the serving wire center, as well as, a Packet Service Line Extension (also described in Section 3.3) to gain access to the closest designated SAP.
- (B) The Customer Connection rate element includes the Customer's transport from a Serving Area Point to the Frame Relay Service switching equipment and the Customer's termination on the Frame Relay Service switching equipment.

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 - DATA SERVICES, (CONT'D.)**3.2 Frame Relay Service, (Cont'd.)****3.2.5 Provision of Service, (cont'd.)**

(C) Should a Customer having locations in more than one Frame Relay Network Serving Area within a LATA, desire to send data traffic between these locations, the Customer can interconnect these locations through the following two options:

(1) **Dedicated Connection:**

The Customer subscribes to additional Customer Connections (or Ports) in each Network Serving Area which are enabled to support inter-serving area connectivity and Packet Service Line Extensions to connect them. These additional rate elements will be used solely to transport this Customer's data traffic between affected Frame Relay Network Serving Areas. Feature Charges apply for CIR's associated with PVCs through each connection.

(2) **Shared Connection:**

The Company may establish facilities between Frame Relay Service switching equipment in different Network Serving Areas in the same LATA and may allow Customers to share bandwidth on these facilities; where these shared facilities are available to Customers, a shared connection is an option. The Customer must establish one or more Inter-Network Service Area Links that extend between Frame Relay switches. Each of these links has an associated CIR. One PVC exists between both Customer premises through each link. All CIR's on this PVC must have the same value. Charges for the Inter-Network Serving Area Link are applied as follows:

- (1) the Inter-Network Serving Area Link Establishment is charged at each end of the link,
- (2) the Inter-Network Serving Area Link CIR is charged at each end of the link.

3.2.6 Rates and Charges

Rates and charges for Frame Relay Service consist of the following elements:

- (i) Customer Connection (or Port) to Frame Relay Service
- (ii) Frame Relay Service Features
- (iii) Inter-Network Service Area Links

Frame Relay service provided by the Company is available in an Integrated Package price plan. "Integrated Package" pricing will be applied to Customers who purchase Frame Relay service in conjunction with a BellSouth® Business Class Family of Services contract.

SECTION 3 - DATA SERVICES, (CONT'D.)**3.3 Packet Service Line****3.3.1 General**

- (A) Packet Service Line service provides the Customer with a local connection to high speed frame or cell-based switched services.
- (B) Packet Service Line service provides a connection from the Customer's premises to a Company-provided data service over digital facilities operating at transmission speeds of 56 Kbps, 64 Kbps, 1.536 Mbps, or 44.210 Mbps,
- (C) Packet Service Line service, as provided for in this Tariff section, is offered for intraLATA use only.
- (D) The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this Tariff.
- (E) The rates and charges set forth for Packet Service Line service provide for the furnishing of service where suitable facilities are available. Where special construction of facilities is necessary, special construction charges may apply and will be determined on an individual case basis.
- (F) Packet Service Line service is only available when provided in conjunction with Frame Relay service as contained in Section 3.2 of this Tariff.
- (G) Suspension of service is not allowed.
- (H) The minimum service period is one month.
- (I) Packet Service Line services will only be offered on an Individual Case Basis ("ICB").

SECTION 3 - DATA SERVICES, (CONT'D.)**3.3 Packet Service Line, (Cont'd.)****3.3.1 General, (cont'd.)****(I) Fast packet Option (FPO)**

- (1) The Fast Packet Option (FPO) of Packet Service Line service is only available when used in conjunction with Frame Relay service as described in Section 3.2 of this Tariff. The Fast Packet Option is used to connect a Customer premises with the Company's Frame Relay service network Serving Area Point.
- (2) The Fast Packet Option is designed to transmit digital data signals at speeds of 56 Kbps, 64 Kbps, 1.536 Mbps and 442.10 Mbps.
- (3) The Fast Packet Option operating at a transmission speed of 1.536 Mbps must be provisioned with Bipolar with 8 Zero Substitution (B8ZS) and Extended Superframe (ESF) if such service is to support a Customer connection that is 64 Kbps or a higher speed that is multiple of 64 Kbps.
- (4) Nonrecurring charge(s) for the applicable rate elements apply if the Customer requests a change in transmission speed on a Fast Packet Option to a higher or lower speed.

COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

SECTION 3 – DATA SERVICES, (CONT'D.)**3.3 Packet Service Line, (Cont'd.)****3.3.2 Explanation of Terms****(A) Packet Service Line**

The link from the Customer's premises to the Customer's serving wire center.

(B) Packet Service Line Extension

When a Customer's serving wire center is not a Serving Area Point, a Packet Service Line Extension is used to connect the serving wire center to the closest Serving Area Point. The Packet Service Line Extension is associated with a Packet Service Line.

The Packet Service Line Extension is measured on a per mile basis in airline miles from a serving wire center that is not a Service Area Point to a Serving Area Point.

(C) Network Serving Area

Certain serving wire centers are designated Service Area Points. A Network Serving Area is comprised of all the Serving Area Points in geographic area.

(D) Service Area Point

A Company serving wire center that is designated as a member of the Network Serving Area.

SECTION 3 - DATA SERVICES, (CONT'D.)

3.3 Packet Service Line, (Cont'd.)

3.3.3 Obligations of Customer

- (A) When Customer provided Equipment (CPE) is connected with Packet Service Line service, the Customer or authorized user must provide equipment to perform the function of the Digital Terminating Equipment (DTE). The DTE provided by the Customer is required at a Customer's premises to perform such functions as:
- Proper termination of service
 - Amplification
 - Signal Shaping
 - Remote Loopback
- (B) Where Packet Service Line service is available under this Tariff for use in connection with Customer provided equipment (CPE), the operating characteristics of such equipment shall be such as not to interfere with any of the services offered by the Company. Such use is subject to the further provisions that the CPE does not endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's service. Upon notice from the Company that the equipment provided by a Customer is causing or is likely to cause such hazard or interference, the Customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.

SECTION 3 - DATA SERVICES, (CONT'D.)**3.3 Packet Service Line, (Cont'd.)****3.3.4 Responsibility of the Company**

- (A) The Company shall not be responsible for installation, operation, or maintenance of any CPE. Where such CPE is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for Packet Service Line service and to the maintenance and operation of such facilities in a manner proper for such service. Subject to this responsibility, the Company shall not be responsible for:
- (1) The through transmission signals generated by such equipment, or for the quality of, or defects in, such transmission,
 - (2) The reception of signals by such equipment, or
 - (3) Damage to CPE provided by a Customer to an authorized user during testing.
- (B) The Company shall not be responsible to the Customer, if changes in any of the facilities, operations, or procedures of the Company utilized in provisioning of Packet Service Line service render any facilities provided by a Customer obsolete or require modifications or alteration of such equipment or otherwise affect its use or performance.
- (C) The Company undertakes to maintain and repair the facilities which it furnishes. The Customer may not rearrange, disconnect, remove, or attempt to repair any equipment installed by the Company without prior written consent of the Company.

SECTION 5 - PROMOTIONS AND OPTIONAL CALLING PLANS

5.1 Promotions - General

From time to time, the Company shall, at its option, promote subscription or stimulate network usage by offering to waive some or all of the nonrecurring or recurring charges for the Customer (if eligible) of target services for a limited duration. Such promotions shall be made available to all similarly situated Customers in the target market area, and will comply with all applicable Commission regulations. All promotions will be filed with and acknowledged by the Commission prior to offering.
