

**Exhibit No.**

**Issue:** Accounting, Corporate  
Services & Cost  
Allocations

**Witness:** Steven R. Weafer

**Type of Exhibit:** Direct Testimony

**Sponsoring Party:** Veolia Energy Kansas  
City, Inc.

**Case No.** HR-2011-0241

**Date Testimony Prepared:** April 22, 2011

**BEFORE THE PUBLIC SERVICE COMMISSION**

**STATE OF MISSOURI**

**DIRECT TESTIMONY**

**OF**

**STEVEN R. WEAFER**

**VEOLIA ENERGY KANSAS CITY, INC.**

**BEFORE THE PUBLIC SERVICE COMMISSION  
OF THE STATE OF MISSOURI  
DIRECT TESTIMONY OF STEVEN R. WEAVER  
ON BEHALF OF VEOLIA ENERGY KANSAS CITY, INC.  
CASE NO. HR-2011-0241**

1   **Q.     Please state your name and business address.**

2   **A.**My name is Steven R. Weaver. My business address is 99 Summer Street, Suite  
3           900, Boston, MA 02110.

4  
5   **Q.     What is your present occupation?**

6   **A.**I am presently employed by Veolia Energy North America, LLC (“VENA LLC”)  
7           headquartered in Boston, Massachusetts, as Controller and am responsible for all  
8           accounting functions performed for Veolia Energy North America Holdings, Inc.  
9           (“VENAH”) and its subsidiaries.

10

11   **Q.     Please summarize the purpose and content of your testimony.**

12   **A.**The purpose of my testimony is to sponsor the unadjusted financial results for  
13           Veolia Energy Kansas City, Inc. (“VEKC”) for the period January 1, 2010  
14           through December 31, 2010. Further, I will address the accounting separation  
15           between VEKC and Veolia Energy Missouri Corporation (“VEMO”), describe the  
16           intercompany transactions that exist between VEKC, VEMO, VENA LLC,  
17           VENAH, Thermal North America Inc. (“TNAI”) and any of its subsidiaries.

1    **Q.     What is your educational background?**

2    **A.     I received a Bachelor of Science degree in Accountancy in 1999 from Bentley**  
3       College in Waltham, Massachusetts.

4

5    **Q.     Please summarize your professional experience.**

6    **A.     My professional career began in public accounting in 1999 with**  
7       PricewaterhouseCoopers LLP in Boston, Massachusetts. In 2001, I left to accept  
8       a position with an energy company, Calpine Corporation, located in its Boston  
9       regional office. I served as the Accounting Manager with Calpine Corporation  
10      until 2006, when I assumed the role of Accounting Manager at Health Dialog, Inc.  
11      in Boston, Massachusetts. I left Health Dialog, Inc. in 2006 to join VENA LLC  
12      (formerly known as ThermalSource LLC).

13

14      Following my public accounting experiences, I have been charged with the  
15      responsibility of keeping financial records for multiple entities within the energy  
16      industry. These experiences include, but are not limited to, fixed asset  
17      accounting, revenue recognition, internal controls, contract review, preparation  
18      and communication of financial results and position, and working in cooperation  
19      with external auditors.

20

21   **Q.     Are you the witness sponsoring VEKC's unadjusted test year income**  
22      **statement and balance sheet?**

1    **A.**     Yes. The unadjusted income statement and balance sheet data were provided to  
2           Company witness Steven C. Carver for use as the test year starting point for  
3           purposes of quantifying the overall revenue deficiency, along with updates for  
4           known and measurable changes.

5  
6    **Q.**     **How were the unadjusted test year income statement and balance sheet**  
7           **derived?**

8    **A.**     VEKC maintains its books and records in conformance with the Federal Energy  
9           Regulatory Commission (“FERC”) Uniform System of Accounts (“USOA”) for  
10          electric companies. VEKC has reported its financial results in conformance with  
11          FERC USOA, as evidenced in its submission of surveillance and annual reports to  
12          Commission Staff.

13  
14   **Q.**     **Please describe the VENAH corporate structure, including VEKC’s**  
15          **affiliates.**

16   **A.**     The VENAH corporate structure is summarized in Schedule SRW-1 attached to  
17          this testimony. As illustrated in this schedule, VEKC is a wholly-owned  
18          subsidiary of TNAI, which in turn is a wholly owned subsidiary of VENAH.  
19          VENAH also maintains interests in several other corporate entities, most of which  
20          are located in jurisdictions outside of the State of Missouri. With few exceptions,  
21          VEKC does not conduct, transact or enter into any type of related party  
22          transaction with these out of state entities. In particular, VEKC maintains

1 relationships with TNAI, its parent, and VENAH, VEMO and VENA LLC, which  
2 is the management services provider to all TNAI operating companies.

3

4 **Q. Please identify and briefly describe the intercompany transactions that**  
5 **VEKC has with either VENAH, TNAI or VENA LLC.**

6 **A.** VENAH is the parent company to TNAI, VEKC, VEMO, VENA LLC and all  
7 other operating entities as illustrated in Schedule SRW-1. VENAH secures  
8 insurance policies for all of the operating entities and allocates the related  
9 premiums among the benefiting entities using one of three methods: net revenues,  
10 salaries or replacement cost values. VENAH secures insurance for property,  
11 director and officers, automobile, general, workers' compensation and  
12 environmental. Policy premiums are based on information provided to agents by  
13 VENA LLC employees acting on VENAH's behalf. This information includes  
14 actual data for net revenues, salaries and replacement cost values for each  
15 operating entity to price the policies appropriately and accordingly. The use of  
16 the actual information in obtaining insurance premiums then becomes the basis  
17 for allocating the cost to the operating entities.

18

19 In addition to insurance, VENAH allocates interest expense to all operating  
20 entities. The test year interest expense is based on the intercompany debt between  
21 Veolia Environment North America Operations, Inc. (VENAO) and VENAH,  
22 which was established to purchase TNAI and its subsidiaries on December 13,  
23 2007.

1

2 VENA LLC is the management services company that employs substantially all  
3 individuals performing work for the VENAH operating companies. Monthly,  
4 VENA LLC directly assigns the salaries of those employees that are physically  
5 located in Kansas City and working directly for VEKC, and performs an indirect  
6 allocation of employee costs for those individuals performing support services to  
7 VEKC and all other operating entities owned directly or indirectly by VENAH.

8

9 **Q. Are the VENA LLC employees located in the Kansas City area only**  
10 **responsible for the direct operation and maintenance of the VEKC and**  
11 **VEMO business entities or do they also provide additional support services**  
12 **you reference?**

13 **A.** The day-to-day activities of operating and maintaining the VEKC and VEMO  
14 facilities, as well as administrative duties directly related to those entities, are the  
15 responsibility of VENA LLC employees located in Kansas City. The broader  
16 VENAH LLC and VENAH support services are not provided by employees  
17 located in Kansas City.

18

19 **Q. Please describe the general support services provided by VENA LLC.**

20 **A.** These support services include finance, treasury, accounting, tax, legal, human  
21 resources, information technology and senior management services.  
22 VENAH/TNAI is managed and organized in a central structure that provides  
23 functional support to all of the plants that it owns either directly or indirectly. The

1 following are the functional areas of support that VENA LLC/VENAH provides  
2 and a brief description of the support services provided:

3 **a. Accounting and Tax** – Accounting and reporting for operating entities  
4 is performed centrally in Boston. Each operating entity is assigned an  
5 accountant to process transactions, review and analyze results and to  
6 adhere to all reporting requirements for each individual entity. All tax  
7 compliance matters are performed through Veolia’s shared tax function in  
8 Indianapolis. VENA LLC at times will engage third-party professionals  
9 for assistance in adhering to compliance requirements and research of  
10 certain special transactions.

11 **b. Finance and Treasury** – Support from the finance function primarily  
12 relates to the review of investments and assistance in the decision making  
13 process for those investments, as well as budgeting and forecasting of the  
14 financial operations of each operating unit. The treasury function provides  
15 all cash management support for all operating entities and forecasts cash  
16 inflows and outflows. In addition, the treasury function couples with the  
17 accounting function in reviewing and ensuring that all operating entities  
18 are adhering to procurement controls and limits.

19 **c. Legal** – The legal department located in Boston is responsible for  
20 reviewing and supporting any contract review or negotiation, and advising  
21 in matters involving rate cases, regulatory requirements, litigation, and  
22 dispute resolution. The legal team at times will engage third-party

professionals to assist in performing these support functions on behalf of the operating entities.

**d. Human Resources** – Payroll, benefit administration, recruiting and employee matters are all managed by a team of professionals employed by VENA LLC located in the Boston office. The interaction with third-party payroll providers and coordinating the processing of payroll is led by this team. Benefit administration and the negotiation of all benefit plans offered by VENA LLC and any of its operating entities is managed by this same team. The human resources function engages third-party organizations and professionals to assist in the payroll and benefit administration of the organization.

**e. Information Technology** – The information technology team supports both the infrastructure as well as the applications that are employed by all operating entities. Infrastructure support includes hardware, network administration, phone systems, plant controls and all communication devices. This team of professionals provides this support from office locations in Boston and Philadelphia. The applications team supports existing applications run by operating entities to manage the business, including Maximo and PeopleSoft. Maximo is the managed maintenance and procurement systems utilized by operating entities and PeopleSoft is the platform used for general ledger, fixed asset and accounts payable. Further, the organization continues to implement additional applications aimed at improving operations, financial information, working capital and

1 the reliability of information flow. These implementations currently  
2 include a centralized billing system and human resources management  
3 application, as well as the creation of all integration points between these  
4 applications.

5 **g. Engineering and Health and Safety** – The engineering and health and  
6 safety teams support the activities, compliance and policies that are  
7 employed by all operating entities. The engineering team offers technical  
8 expertise on ways to improve efficiency and address operational matters.  
9 The Health and Safety team is responsible for ensuring compliance with  
10 local, state and federal rules, and protecting the safety of employees and  
11 others. In addition, a companywide health and safety policy and procedure  
12 is maintained and administered by this team.

13 **h. Marketing** – The marketing team is responsible for external  
14 communication. In addition, this team is responsible for all  
15 advertisements and marketing campaigns issued by the Company.

16 **i. Senior Management** – The senior management team of VENAH is  
17 centrally located in the Boston office. This senior management team is  
18 responsible for the oversight and integration of all of the business  
19 functions and manages the VENAH business as a whole.  
20

21 **Q. What intercompany transactions exist between VEKC and VEMO?**

22 **A.** VEKC and VEMO engage in several intercompany transactions, including the  
23 sale of steam by VEKC to VEMO, sharing of office and operating personnel, and

1 the sharing of operating space for equipment used in the chilling business. VEKC  
2 sells steam to VEMO at the full tariff rate for use in its chilling operation. These  
3 transactions are recorded on a monthly basis within the financial statements of  
4 each of the operating entities. In addition, rent is charged to VEMO by VEKC for  
5 the use of certain space within the Grand Avenue plant location. VEMO uses this  
6 space for the chilling equipment used to supply chilling service to customers  
7 under separate agreements with VEMO. This service is provided through a  
8 separate chilling distribution system. The rent transactions are recorded on a  
9 monthly basis within the financial statements of both VEKC and VEMO at a rate  
10 previously agreed and contracted. Employees performing office and operating  
11 tasks for VEKC and VEMO track their time spent supporting the operations of  
12 each of these operating units. This time is reported monthly and the transaction to  
13 charge the time spent on VEMO activities is recorded in the financial statements  
14 on a monthly basis.

15  
16 **Q. Please briefly explain the accounting for corporate support services and the**  
17 **accounting for common costs between VEKC and VEMO.**

18 **A.** VENAHH allocates corporate support service costs on a monthly basis to VEKC.  
19 The allocation of the vast majority of these costs is calculated using the pre-tax  
20 revenues of VEKC for the month as the numerator and the total pre-tax VENAHH  
21 revenues as the denominator.<sup>1</sup> These costs are allocated to VEKC and have the

---

<sup>1</sup> Costs allocated using revenues as the basis are general and administrative costs for the accounting, tax, finance, treasury, legal, human resources and information technology functions that are centrally located within the organizational structure.

1 impact of increasing an intercompany liability it has with its ultimate parent,  
2 VENA. Other costs, such as insurance discussed above, are allocated using  
3 other indirect measures such as net revenues, salaries or tank storage capacity, as  
4 appropriate.

5  
6 Common costs<sup>2</sup> between VEKC and VEMO are allocated using timesheets  
7 maintained on a bi-weekly basis by plant personnel. These timesheets separately  
8 provide daily data of the hours worked on VEKC and VEMO related matters.  
9 Using the hours reported for VEMO, VENA LLC calculates salaries and  
10 employee related costs that must be allocated to VEMO on a monthly basis, and  
11 records the transaction in the underlying financial statements.

12  
13 **Q. Did you also provide Mr. Carver with additional accounting and financial**  
14 **information required to develop and/or quantify annualization or**  
15 **normalization adjustments that might be necessary for ratemaking**  
16 **purposes?**

17 **A.** Yes. I served as the primary accounting contact for Mr. Carver. We have  
18 discussed and exchanged information on a variety of regulatory and accounting  
19 matters, including: basic accounting records and transaction detail; net original  
20 cost plant accounting; income taxes and normalization accounting (Veolia  
21 Adjustment C-10); test year accounting for outside services and regulatory  
22 commission expense (Veolia Adjustment C-16); the allocation and adjustment of

---

<sup>2</sup> Common costs include salaries and benefits that are allocated from VEKC to VEMO. Steam sales and rent expense are recorded based on established tariffs rates and contract terms.

1 corporate overhead costs (Veolia Adjustment C-14); as well as the annualization  
2 of salaries, benefits and payroll taxes for the personnel dedicated to VEKC  
3 (Veolia Adjustments C-13, C-17 and C-18).  
4

5 **Q. Did the Company experience any recent events or transactions that had a**  
6 **unique impact on the revenues or expenses recorded during the 2010 test**  
7 **year?**

8 A. Yes. There were three such events or transactions that impacted operating results  
9 in 2010. First, the Company received a request from a former customer that had  
10 left the steam system in 2008 for emergency steam service. Second, a natural gas  
11 billing dispute arose between the Company and Missouri Gas Energy (“MGE”) in  
12 2008, which continues to negatively impact VEKC in 2010. Third, the Company  
13 recorded a series of charges to operating expense arising from a 2004 agreement  
14 to ship fly ash to a third party for use as filler material for construction of a  
15 parking lot located in Kansas. For this third matter, the Company recorded a  
16 series of charges to operating expense in 2010 after receiving a Responsible Party  
17 Notification Letter dated February 1, 2010 from the Kansas Department of Health  
18 and Environment (“KDHE”).  
19

20 **Q. Please summarize the circumstances that resulted in the emergency service**  
21 **request from a former customer.**

22 A. On June 8, 2010 the General Services Administration (“GSA”) Federal Bolling  
23 Building contacted Veolia regarding an emergency situation where both of its

1 electric boilers had failures. The GSA wanted to know if VEKC could provide  
2 emergency steam to their facility. Due to the building requirements for tempering  
3 air, etc., if steam remained off, the facility would have to shut down until the  
4 boilers could be repaired or portable boilers could be brought in to supply steam.  
5 Due to the nature and extent of the failure, the necessary boiler repairs would take  
6 significant time and the location of the steam supply in the boiler room would  
7 require excavation of the property with core drilling to gain access. This repair  
8 solution was not expected to be a quick, secure or a financially sound option.  
9 Fortunately, the original steam line from VEKC remained in the building due to  
10 an agreement with the GSA when it had come off line, keeping the line and valve  
11 within the facility. Veolia responded to the GSA's emergency request by  
12 reconnecting the steam line for service, and within four hours of the initial call  
13 from GSA had restored reliable steam service preventing the facility from closing.

14  
15 **Q. Under what tariff did the Company provide emergency steam service to the**  
16 **GSA Bolling Building?**

17 **A.** The GSA was placed on the SCS tariff which resulted in the payment of the  
18 higher tariff energy costs for the emergency service, even though past history  
19 would have otherwise placed GSA on the LCS tariff. Because this was initially to  
20 be an emergency service only, and there was no meter installed in the facility, the  
21 best option for rate charges for that service was the SCS rate. For billing  
22 purposes, GSA's steam usage was estimated from their prior usage while on the  
23 Veolia Steam System.

1

2 Q. **What is the current status of the Company's business relationship with this**  
3 **customer?**

4 A. In 2011, the Company installed a permanent meter and steam connection to the  
5 customer, and will be entering into a steam service agreement providing steam to  
6 the customer under the LCS tariff. For purposes of the 2010 test year, Company  
7 witness Carver has quantified an adjustment increasing LCS revenues by about  
8 \$420,000, under current rates.

9

10 Q. **Please describe the circumstances of the natural gas billing dispute with**  
11 **MGE.**

12 A. On June 23, 2009 MGE notified the Company of an allegation that MGE had  
13 failed to bill the Company \$3,871,399.58 related to the delivery of natural gas  
14 between April 2003 and June 2008. MGE alleged that it had installed a meter in  
15 April 2003, and in so doing, caused a programming error that resulted in reporting  
16 only fifty percent of the natural gas delivered to the Company through two of the  
17 three meters measuring delivered natural gas.

18

19 Q. **Has the Company actually made any payments to MGE as a result of this**  
20 **dispute?**

21 A. Yes. After numerous attempts to negotiate a resolution to the dispute, MGE  
22 announced that if the Company did not tender full payment of the amount MGE  
23 allegedly failed to bill, MGE would terminate its supply of natural gas to the

1 Company. In order to avoid such a calamitous result, the Company agreed to a  
2 payment schedule for the alleged unbilled amounts. In turn, MGE agreed that the  
3 payments would not be deemed a waiver of any of the Company's rights to seek  
4 damages from MGE. As of today, the Company has paid MGE \$967,625 related  
5 to MGE's allegations of its failed billings. The Company continues to make  
6 monthly payments of \$71,402.82 and is currently scheduled to do so until August,  
7 2014.

8

9 Q. **Without disclosing any privileged information, please generally describe the**  
10 **current status of this dispute.**

11 A. The Company sued MGE in the Circuit Court of Jackson County, Missouri, Case  
12 No. 1016-CV24880, for declaratory judgment seeking to limit the amount MGE  
13 can lawfully demand from the Company, if any, as well as to identify for recovery  
14 damages the Company suffered as a result of MGE's negligence and negligent  
15 misrepresentation. The litigation is on-going.

16

17 Q. **How have the costs incurred by the Company associated with this dispute**  
18 **been reflected in the 2010 rate filing?**

19 A. At the present time, the Company is not requesting that any portion of these  
20 disputed payments to MGE be included in or recovered through VEKC's tariff  
21 rates. Upon conclusion of this legal action and a determination of the actual cost  
22 of this billing dispute, VEKC will then consider what options might be available

1 with respect to any unrecovered payments to MGE. Company witness Carver  
2 also briefly discusses this matter.

3  
4 **Q. Please provide an overview of the fly ash transaction.**

5 **A.** By letter dated February 1, 2010, the KDHE informed the Company that it was  
6 considered a Potentially Responsible Party in connection with the following  
7 allegations, among others:

8 (a) Between 2004 and 2008, the Company allegedly provided 6,000 tons of  
9 waste coal residue and/or bottom ash (the "Material") generated at the  
10 Company's facility to McGraw Trucking.

11 (b) McGraw Trucking allegedly deposited the Material at its property located  
12 in Frontenac, Kansas for purposes of filling in low areas and constructing  
13 a parking lot pad.

14 (c) McGraw Trucking did not apply for and KDHE did not issue a solid waste  
15 permit for disposal of the Material at the McGraw Trucking site.

16 Subsequently, the Company negotiated and executed a preliminary consent order  
17 for the implementation of interim measures designed to prevent the runoff of  
18 acidic rain water from the McGraw Trucking site to a nearby creek. Thereafter,  
19 the Company negotiated and agreed upon a Removal Site Evaluation plan with  
20 KDHE for the scope of remediation of the McGraw Trucking site. Finally, the  
21 Company and KDHE expect to negotiate a second consent order for the actual  
22 remediation of the McGraw Trucking site. It should be noted that in addition to

1 the Company's alleged involvement with the Material allegedly deposited at the  
2 McGraw Trucking site, there are other potentially responsible parties.

3

4 Q. **Did the Company have any reason to believe that this transaction would**  
5 **result in any exposure to environmental claims or financial consequences?**

6 A. At the time of the transaction the Company did not have any reason to believe that  
7 there would be any exposure environmentally or financially relating to the  
8 Material.

9

10 Q. **Has the Company recorded any journal entries associated with this**  
11 **transaction?**

12 A. Yes.

13

14 Q. **How have these costs been reflected in the 2010 rate filing?**

15 A. As discussed by Company witness Carver, the Company has removed these  
16 amounts from test year expense (Veolia Adjustment C-19). Since the total cost to  
17 VEKC is presently unknown and other parties may ultimately be held responsible  
18 for a portion of the remediation costs, the Company is not seeking recovery at this  
19 time.

20

21 Q. **Has the Company determined whether it will seek recovery of these costs in a**  
22 **future rate case?**

1   A.    No.  Once the actual costs are known and the participation of other potentially  
2       responsible parties is determined, the Company will be able to assess the  
3       materiality of its costs.  At that time, the Company may or may not seek to  
4       recover those costs through utility rates

5

6   **Q.    Does this conclude your direct testimony?**

7   **A.    Yes.**
