```
1 PROCEEDINGS
```

- JUDGE JORDAN: We're on the record in
- 3 Case No. WC-2009-0277, Rob Lee versus Missouri
- 4 American Water Company. Before we went on the
- 5 record, the parties discussed amongst themselves the
- 6 admissibility of certain documents that the
- 7 plaintiff, Mr. Lee, intends to offer into evidence.
- 8 We are in Mr. Lee's case in chief, and I
- 9 am going to elaborate on Exhibits 14 and 15. I
- 10 admitted those provisionally with Mr. Lee tying in
- 11 their relevance in a theory addressing some claim or
- 12 defense. He did that to my satisfaction yesterday in
- 13 his cross-examination of Missouri American's
- 14 witnesses, and so those exhibits are admitted.
- 15 (EXHIBIT NOS. 14 AND 15 WERE RECEIVED
- 16 INTO EVIDENCE AND MADE A PART OF THE RECORD.)
- JUDGE JORDAN: Now, the parties are
- 18 still discussing Mr. Lee's exhibits, and Mr. Lee is
- 19 reviewing his documents, so we're gonna take some
- 20 time now for Mr. Lee to put his exhibits into order
- 21 so as to speed this process along out of respect for
- 22 the resources of all the parties present. So we're
- 23 going to break for --
- MR. LEE: I'm probably okay, Judge.
- 25 JUDGE JORDAN: Let's break for about ten

- 1 minutes.
- 2 (A RECESS WAS TAKEN.)
- JUDGE JORDAN: We are back on the
- 4 record. Mr. Lee is reviewing his documents and we're
- 5 going to take a break for another 15 minutes. And
- 6 we'll go off the record again.
- 7 (A RECESS WAS TAKEN.)
- JUDGE JORDAN: And we're on the record
- 9 again just briefly. We've taken our break and we're
- 10 going to extend it further. We're going to take
- 11 about -- we'll take ten minutes more and then we will
- 12 resume and go back on the record. And we're off the
- 13 record. Thank you.
- 14 (A RECESS WAS TAKEN.)
- JUDGE JORDAN: Let's go on the record.
- 16 We're back on the record and Mr. Lee has been
- 17 reviewing his documents, and the parties have been
- 18 discussing the procedure in this case.
- 19 Mr. Lee, you have video of a half dozen
- 20 sites that you believe represents current conditions
- 21 at those sites; is that correct?
- MR. LEE: That is correct.
- JUDGE JORDAN: All right. And you think
- 24 that will take about a half hour, 45 minutes to go
- 25 through all those?

```
1 MR. LEE: I do.
```

- JUDGE JORDAN: Okay. You also have
- 3 documents that you'd like to present; is that
- 4 correct?
- 5 MR. LEE: I do.
- 6 JUDGE JORDAN: Tell me the nature of
- 7 these documents. Are they all the same kind of thing
- 8 or do you have some different groups?
- 9 MR. LEE: Some of them are different. I
- 10 have a stack of customer complaints for the last ten
- 11 years.
- 12 JUDGE JORDAN: Okay. What else have you
- 13 got?
- MR. LEE: I have got leak reports, some
- of which I believe were submitted by Matt yesterday,
- 16 but there are, like, two in here that I would like to
- include just to show the number of leak reports.
- 18 JUDGE JORDAN: Okay. And tell me the
- 19 addresses and times of those leak reports.
- 20 MR. NOCE: And I guess, your Honor, I
- 21 think what Mr. Lee is referring to, these are
- 22 investigations. They're not actual leak reports, but
- 23 for clarification.
- JUDGE JORDAN: I appreciate that.
- MR. LEE: It says leak report on the

- 1 document.
- 2 MR. NOCE: Okay. That's fine.
- MS. BRUEGGEMANN: Your Honor, while he's
- 4 putting them together, can you remind everyone for
- 5 streaming purposes that they need to push their
- 6 microphone on "on" so that they can be heard in the
- 7 sound system for those listening?
- JUDGE JORDAN: Tell me a little bit more
- 9 about that. Are we talking about this?
- MS. BRUEGGEMANN: Yes. For Mr. Lee and
- 11 Mr. Noce, for everyone to be clearly heard through
- 12 the sound system, that the green light needs to be on
- 13 whenever they're speaking. The court reporter will
- 14 get it since she's in the room, but it's easier for
- 15 everyone listening also.
- 16 JUDGE JORDAN: Thank you. Since I've
- 17 never done a hearing in this room, I appreciate that.
- 18 MR. NOCE: Thank you, Shelley, I will do
- 19 that.
- 20 MR. LEE: I don't want to hold us up,
- 21 and I'm sure two more leak reports won't really make
- 22 much of a difference --
- JUDGE JORDAN: That's up to you.
- MR. LEE: -- in the large scheme of
- 25 things, so I'd like to move on.

```
1 JUDGE JORDAN: You have customer
```

- 2 complaints, some reports of leaks that you might want
- 3 to offer me. What else have you got?
- 4 MR. LEE: I have got information
- 5 provided to me in discovery here. I have information
- 6 provided to me in discovery from Missouri American
- 7 Water.
- 8 JUDGE JORDAN: And what do you believe
- 9 those documents will show the Commission?
- 10 MR. LEE: These documents will show the
- 11 Commission the number of gallons leaking from this
- 12 water system, and it will speak to the condition of
- 13 the water system.
- 14 JUDGE JORDAN: Okay. So the documents
- 15 that you're referring to right there are -- relate to
- 16 the amount of water lost in the system within a
- 17 certain time; is that correct?
- 18 MR. LEE: That is correct.
- 19 JUDGE JORDAN: Okay.
- 20 MR. LEE: There are some other --
- 21 there's other information on these documents that's
- 22 repetitious, so...
- JUDGE JORDAN: Uh-huh. But you would
- 24 have something in there that's not repetitious; is
- 25 that correct?

- 1 MR. LEE: Correct.
- JUDGE JORDAN: Okay. Are there any
- 3 other type of documents that you want to show us?
- 4 MR. LEE: I have more leak reports I
- 5 presume from the last ten years that I would like
- 6 to -- I do believe is important and speaks to the
- 7 integrity of this water system.
- JUDGE JORDAN: And you said more leak
- 9 reports. I thought we just talked about leak
- 10 reports.
- 11 MR. LEE: I guess I have two different
- 12 kinds of documents --
- 13 JUDGE JORDAN: Okay. And how would you
- 14 distinguish them?
- MR. LEE: -- called leak reports.
- 16 JUDGE JORDAN: What's the distinction?
- 17 Why do you make the distinction between them?
- 18 MR. LEE: One looks like a work-order-
- 19 type document with a time stamp on it that is stamped
- 20 I would presume in the field for the repair, and the
- 21 other looks like more of the same. I'm not sure why
- 22 I was provided two sets of leak reports.
- JUDGE JORDAN: Okay. I wouldn't know
- 24 that either. It's up to you to characterize these
- 25 documents and decide whether they're useful to you or

- 1 not.
- 2 MR. LEE: They speak to the integrity of
- 3 the water system and I would like to present them to
- 4 the Commission.
- 5 JUDGE JORDAN: Okay. What other sorts
- of documents do you have for the Commission?
- 7 MR. LEE: I have more leak reports.
- 8 JUDGE JORDAN: You have a third type of
- 9 leak report?
- 10 MR. LEE: This is another type of --
- 11 this says "Report Of Leak By Repair Crew".
- 12 JUDGE JORDAN: Okay. Does that document
- 13 look different from the other two types?
- MR. LEE: This document's entirely
- 15 different.
- JUDGE JORDAN: So that's a different set
- of forms?
- 18 MR. LEE: It is.
- 19 JUDGE JORDAN: Okay. I'm looking at
- 20 some pretty hefty stacks as to most of what you've
- 21 shown.
- MR. LEE: Correct.
- JUDGE JORDAN: What other type have you
- 24 got?
- MR. LEE: I believe that's all today.

- 1 You don't want to include the complaints; is that
- 2 correct?
- JUDGE JORDAN: Well, the complaints are
- 4 just things that were said outside -- well, you can
- 5 offer them if you want, I'll put it that way. You
- 6 can offer whatever you want, but it will probably be
- 7 subject to objection. I won't -- just based on what
- 8 I've heard. I'm not gonna rule on an objection
- 9 before I've had the offer and the objection made.
- 10 MR. LEE: Okay. One thing I would like
- 11 to point out to the Commission in discovery -- please
- 12 correct me if I'm wrong -- I was told that these
- 13 documents would require hours and hours of digging
- 14 through a file cabinet and would be very cumbersome
- 15 to Missouri American Water, and these appear to be a
- 16 computer printout.
- 17 JUDGE JORDAN: Okay. Does that prove or
- 18 disprove any claim or defense at issue here?
- 19 MR. LEE: It has nothing to do with the
- 20 water leaking, it just speaks to the incredibility --
- 21 the credibility of the company.
- MR. NOCE: Judge, I move to strike that
- 23 from the record.
- 24 JUDGE JORDAN: I'm not gonna strike it
- 25 from the record, I'm gonna keep it in. I'm not gonna

- 1 say what kind of weight it has. So these are the --
- 2 this is the evidence that I see you have prepared for
- 3 us today.
- 4 MR. LEE: That is correct.
- 5 JUDGE JORDAN: The movies of a half
- 6 dozen sites representing current conditions at those
- 7 sites.
- 8 MR. LEE: Correct.
- 9 JUDGE JORDAN: Take about a half hour,
- 10 45 minutes to get through that; is that correct?
- 11 MR. LEE: Correct.
- 12 JUDGE JORDAN: Okay. Then we have about
- 13 five sets of documents. I see five sets of
- 14 documents, three of those sets are leak reports,
- 15 okay? Then you have a set of customer complaints,
- 16 and those are complaints, all right? Those are just
- 17 people saying, hey, I think there's something going
- 18 on with my system; is that correct?
- 19 MR. LEE: Correct.
- 20 JUDGE JORDAN: Okay. Then we finally
- 21 have some numbers addressing lost water in the
- 22 system; is that correct?
- MR. LEE: That is correct.
- 24 JUDGE JORDAN: And that's everything,
- 25 isn't it?

- 1 MR. LEE: That is correct.
- JUDGE JORDAN: Okay. Looking at your
- 3 stack of documents, especially involving the customer
- 4 complaints and the three types of leak reports, your
- 5 description of them strikes me as likely unduly long
- 6 and wholly repetitious.
- 7 However, I would consider presentation
- 8 of that information to the Commission in some format.
- 9 Off the record the parties had discussed § 536.070,
- 10 subdivision 11. Would you like to speak to that
- 11 provision, Mr. Lee?
- MR. LEE: I would.
- 13 JUDGE JORDAN: What would you like to
- 14 tell me?
- MR. LEE: I'd like to tell you that this
- 16 information, that I would like it considered under
- 17 this 536.070, subdivision 11, to be admitted to the
- 18 Commission.
- 19 JUDGE JORDAN: Okay. Can you hand me
- 20 back my statute book, please? My initial impression
- 21 is that this subdivision is appropriate to the
- 22 information that you have, but it speaks to the
- 23 results of studies, audits, compilation of figures,
- 24 et cetera, not to the documents themselves.
- In other words, under this subdivision,

- 1 you don't put in those documents, you put together a
- 2 synopsis, okay? And that is very plain to me from
- 3 subdivision 11.
- 4 Now, when one does that, this section
- 5 provides that the person who makes that document must
- 6 be subject to cross-examination. Is that the kind of
- 7 device that you were wanting to use?
- 8 MR. LEE: That means I need to file a
- 9 synopsis of what I -- how I interpret these
- 10 documents; is that what you're saying?
- 11 JUDGE JORDAN: Something like that, yes.
- 12 Yes, that's what we're talking about. And I take it
- 13 you haven't actually got such synopsis with you
- 14 today; is that correct?
- MR. LEE: I do not.
- 16 JUDGE JORDAN: Would you like to present
- 17 such a synopsis to the Commission?
- 18 MR. LEE: I would.
- 19 JUDGE JORDAN: I will hold the record
- 20 open a week past the close of this hearing for the
- 21 filing of that document. Upon the filing of it, I
- 22 will schedule a hearing for the cross-examination of
- 23 whoever prepares that document and it will be subject
- 24 to objection just like any exhibits offered in this
- 25 proceeding.

```
1 Do the parties have any thoughts on that
```

- 2 procedure that they'd like to share just now?
- 3 MR. NOCE: Your Honor, I'm just gonna
- 4 file an objection on the record as to any synopsis
- 5 prepared by Mr. Lee. I believe it calls for
- 6 speculation of his interpretation of these records
- 7 created by another third party, not by him. I
- 8 believe that the statute speaks to a synopsis
- 9 prepared by the maker of the record rather than the
- 10 maker of the synopsis, and I also believe any sort of
- 11 presentation of evidence or reference to these
- 12 records lacks foundation and also subject to the
- 13 hearsay -- or is also hearsay and inadmissible.
- 14 JUDGE JORDAN: I note your objections,
- 15 and certainly you may renew them when the document
- 16 itself is filed and I will review and rule on those
- 17 objections at that time when I see the filing, and I
- 18 will probably issue my ruling on that in writing,
- 19 because you raise a lot of objections and I think
- 20 this deserves a thorough analysis.
- MR. NOCE: If I could have some time to
- 22 brief it, your Honor?
- JUDGE JORDAN: Oh, absolutely,
- 24 absolutely. Once the document is filed, then I'll
- 25 put out an order setting a schedule for the parties

- 1 to file their objections.
- 2 MR. NOCE: Thank you.
- JUDGE JORDAN: And we'll do that in
- 4 writing. Anything from Staff on that?
- 5 MR. RITCHIE: Staff has no objections.
- 6 JUDGE JORDAN: Okay. Thank you very
- 7 much. All right. That takes care of these classes
- 8 of documents, the consumer complaints, the three
- 9 types of leak reports, and that leaves us with
- 10 documents showing water lost in this system and the
- 11 movies.
- 12 So, Mr. Lee, I intend to take a break a
- 13 little before 11 as I have announced to the parties,
- 14 so I think we don't have quite enough time to look at
- 15 your movies right now before then. I don't want to
- 16 interrupt that presentation. I'd like to do that all
- 17 at once. So let's talk about your information on the
- 18 lost water if that is -- if you're prepared to do
- 19 that right now.
- 20 MR. LEE: I guess I'm prepared as I'm
- 21 gonna be.
- JUDGE JORDAN: I concur in that
- 23 analysis. Let's see. I'm gonna -- I've -- I swore
- 24 you in at the beginning of the hearing yesterday so
- 25 you are sworn now. You may testify from where -- you

- 1 may do your direct testimony from where you are, or
- 2 you may take the stand. It's up to you.
- 3 MR. LEE: I'm okay here.
- 4 JUDGE JORDAN: All right then.
- 5 MR. NOCE: Are we marking anything?
- 6 MR. LEE: Yeah, I guess we need to enter
- 7 this into evidence.
- 8 JUDGE JORDAN: Well, if you want to do
- 9 that, certainly you may. Remember the procedure is
- 10 you have to show it to the other party, you have to
- 11 hand it to the reporter so she can put a mark upon
- 12 it, and then we'll have a number for it so we can
- 13 refer to it conveniently.
- 14 MR. LEE: This is Respondent's first
- 15 supplemental response and complainant's number two
- 16 request.
- 17 MR. NOCE: I guess now would be the best
- 18 time to object. I'm going to again lodge a
- 19 continuing objection listing any reference to
- 20 nonrevenue water. The objection is to the relevance
- 21 of this. I guess it also lacks foundation as we've
- 22 discussed ad nauseam I think at this point. These
- 23 numbers correspond to county-wide and are not focused
- in on the areas where Mr. Lee has alleged leaks.
- 25 JUDGE JORDAN: Let me hear a little

- 1 testimony on the document and, yeah, look at it, and
- 2 then I'll rule on your objections.
- 3 MR. NOCE: If I could add -- not to
- 4 interrupt the proceedings -- if I could have a
- 5 running objection as to its relevance.
- 6 JUDGE JORDAN: Well, if I look at the
- 7 document I might sustain your objection, so I don't
- 8 want to give you a running objection yet. I might
- 9 agree with you once I've seen the document, then I'll
- 10 rule on it. And if I overrule your objection, I'll
- 11 understand that you have a continuing objection.
- 12 So, Mr. Lee, what would you like to tell
- 13 me about this document?
- MR. LEE: I actually have two that show
- 15 it's unaccounted for.
- 16 JUDGE JORDAN: And would you hand
- 17 those -- are they the same documents, two documents
- 18 of the same document or different documents?
- 19 MR. LEE: Different documents.
- JUDGE JORDAN: Okay. Please give those
- 21 to the reporter so she may mark them.
- 22 (EXHIBIT NOS. 18 AND 19 WERE MARKED FOR
- 23 IDENTIFICATION BY THE COURT REPORTER.)
- 24 JUDGE JORDAN: Do the other parties have
- 25 copies of this document?

```
1 MR. LEE: Not provided by me.
```

- JUDGE JORDAN: Maybe they have their own
- 3 copies.
- 4 MR. RITCHIE: Staff has what's been
- 5 provided by the company. I'd like to make sure that
- 6 we have the same documents here.
- 7 JUDGE JORDAN: Absolutely. I want us to
- 8 do that right now.
- 9 MR. LEE: I am somewhat confused about
- 10 the information, Judge.
- JUDGE JORDAN: Well, I don't know how
- 12 much I can help you with that, Mr. Lee. Do you want
- 13 to tell me something -- first, has everyone got the
- 14 documents that Mr. Lee is referring to?
- MR. RITCHIE: Yes, your Honor.
- MR. NOCE: Yes, your Honor.
- JUDGE JORDAN: And they have been marked
- 18 how?
- 19 MR. LEE: Exhibit 18 and Exhibit 19.
- JUDGE JORDAN: Okay. Do you have a copy
- 21 for me?
- MR. LEE: I do not.
- JUDGE JORDAN: Okay. Well, let's have a
- 24 look at what you've got and I will describe it for
- 25 the record as to what I am looking at.

```
1 MR. LEE: Let's look at this one first.
```

- 2 JUDGE JORDAN: This is 18. This is
- 3 good, that's right. Exhibit 18 is Respondent's
- 4 second supplemental responses -- all right, that's
- 5 probably a little fast. Respondent's second
- 6 supplemental responses to complainant's first data
- 7 requests. That's Exhibit No. 18.
- 8 Exhibit No. 19 is a document titled
- 9 Respondent's first supplemental responses to
- 10 complainant's second request for information. Okay.
- 11 Mr. Lee, what would you like to tell me about these
- 12 documents?
- MR. LEE: These documents have a amount
- 14 of nonrevenue water, and the part I'm confused about,
- on page 3 of No. 18, Missouri American Water says it
- 16 has been tracking unaccounted for water in the
- 17 St. Louis County system since 2007. "The following
- 18 are figures for unaccounted water in 1000-gallon
- 19 units."
- 20 And then on page 2 of 19, No. 6 states,
- 21 "The following are figures for nonrevenue water in
- 22 1000-gallon units in Missouri American Water's
- 23 St. Louis County system," and that takes it back to
- 24 1999.
- 25 JUDGE JORDAN: Okay. Is there anything

1 else you would like to tell me in relationship to

- 2 those documents?
- 3 MR. LEE: I would like to tell you that
- 4 that is a whole lot of water. I've converted the '07
- 5 losses to 12 and a half billion gallons of water.
- 6 JUDGE JORDAN: And what else would you
- 7 like to tell me in relationship to that document?
- 8 MR. LEE: I believe a portion of that
- 9 water is running out in my neighborhood as would only
- 10 be logical to assume.
- 11 MR. NOCE: Again, objection. This is
- 12 calling for speculation on Mr. Lee's part. He stated
- 13 he has to assume this.
- 14 JUDGE JORDAN: That's -- okay. That
- 15 much is speculation, but I understand that -- are you
- 16 relating this to the sites that your movies show?
- MR. LEE: I am.
- 18 JUDGE JORDAN: All right. Then I'll
- 19 take that as an allegation rather than speculation
- 20 and I overrule your objection as to that.
- 21 What else would you like to tell me in
- 22 connection with these documents, Mr. Lee?
- 23 MR. LEE: That's really all I want you
- 24 to know is that there's a large amount of water being
- 25 pumped into the ground. I spent quite a lot of time

- 1 driving around North County, and I don't see any
- 2 water flowing -- much water flowing on the surface,
- 3 just in a few different locations. So a question
- 4 that comes to my mind is, where does the water go?
- 5 If it's not running into my basement, it's not
- 6 damaging people's property, if it's not coming up
- 7 between cracks in the street, what is the water
- 8 doing?
- 9 JUDGE JORDAN: Okay. Is there anything
- 10 else you'd like to tell me connected with these
- 11 documents?
- MR. LEE: That's pretty much it.
- 13 JUDGE JORDAN: Okay. And you would like
- 14 to enter those into the record; is that correct?
- MR. LEE: I would.
- JUDGE JORDAN: Okay. Mr. Noce?
- 17 MR. NOCE: Again, I'm gonna object here
- 18 first to the relevance of these records. Again, as
- 19 we've discussed, they incorporate the entire
- 20 St. Louis County area and not Mr. Lee's neighborhood
- 21 where he is alleging leaks. I believe they also lack
- 22 foundation -- well, strike that. And I guess
- 23 Mr. Lee's analysis of these numbers I believe lacks
- 24 foundation as to -- it requires expert testimony, I
- 25 believe, on his part which he has not provided any

- 1 qualifications to lay the proper foundation for him
- 2 to provide an analysis of this. Subject to that,
- 3 though, those are my objections.
- 4 JUDGE JORDAN: Okay. Now, as to the
- 5 last one, I haven't actually heard an opinion that
- 6 would require expert testimony so I will overrule
- 7 your objections on that. And should these -- I don't
- 8 expect this matter to come up again, but you will
- 9 have a continuing objection as to them.
- 10 MR. LEE: Can I say one more thing about
- 11 this if I haven't said it already?
- JUDGE JORDAN: First, I'd like to admit
- 13 them into the record if that's okay.
- MR. LEE: Okay.
- JUDGE JORDAN: Okay. They're admitted
- 16 into the record.
- 17 (EXHIBIT NOS. 18 AND 19 WERE RECEIVED
- 18 INTO EVIDENCE AND MADE A PART OF THE RECORD.)
- 19 JUDGE JORDAN: Now, what else would you
- 20 like to tell me?
- 21 MR. LEE: I believe these numbers speak
- 22 clearly to the integrity of this water system.
- JUDGE JORDAN: We get that.
- MR. LEE: Just wanted that on the
- 25 record. Thank you.

```
JUDGE JORDAN: Okay. Mr. Lee, what else
```

- 2 do you have for me today other than the videos?
- 3 MR. LEE: I believe that is all.
- 4 JUDGE JORDAN: Well, then, let's go
- 5 ahead and take a lunch break, and when we resume it
- 6 will be time for cross-examination. Let's go off the
- 7 record until noon.
- 8 (DISCUSSION HELD OFF THE RECORD.)
- 9 JUDGE JORDAN: Let's go back on the
- 10 record briefly. We're back on the record for just a
- 11 moment, and Missouri American Water Company had a
- 12 point that it wanted to make.
- 13 MR. NOCE: I just ask if Mr. Lee's gonna
- 14 be presenting further evidence, I'd like him to do so
- 15 before cross-examination begins.
- 16 JUDGE JORDAN: And you're right about
- 17 that. We will view his videos before we subject him
- 18 to cross-examination. Thank you for that reminder.
- 19 And we're back off the record.
- 20 (THE LUNCH RECESS WAS TAKEN.)
- JUDGE JORDAN: We're back on the record.
- 22 Mr. Lee is preparing to present his video footage.
- 23 He'll need just a few moments to bring that up, so
- 24 we'll take a five-minute intermission and go off the
- 25 record for five minutes.

```
1 (A RECESS WAS TAKEN.)
```

- 2 JUDGE JORDAN: We're back on the record.
- 3 Mr. Lee is going to make his presentation of videos
- 4 which he has described as representative of current
- 5 conditions in his neighborhood. I'm now adjusting
- 6 the camera to get as good an image of his image as we
- 7 can. I'm zooming in on the small screen on Mr. Lee's
- 8 lap top.
- 9 The parties are watching on monitors in
- 10 the hearing room, and it looks to me from this
- 11 distance that at least for now it looks like we'll be
- 12 able to see what Mr. Lee has to show us.
- 13 Mr. Lee, would you like to take it from
- 14 here and tell us what we'll be seeing as we're seeing
- 15 it?
- 16 (THE VIDEO WAS PLAYED.)
- 17 MR. LEE: I believe this first one is
- 18 water being pumped out of the basement at 1201
- 19 McQuay.
- 20 JUDGE JORDAN: Okay. This is water in
- 21 the basement from 12 --
- MR. LEE: Actually a sump pump running
- 23 into the street.
- 24 JUDGE JORDAN: 1201 McQuay. And when
- 25 was this taken?

```
1 MR. LEE: There's a time stamp on here.
```

- 2 JUDGE JORDAN: Okay. And has there been
- 3 any repair affecting this since then? I think we
- 4 discussed that this morning.
- 5 MR. LEE: I'm not sure of that to be
- 6 honest.
- JUDGE JORDAN: Okay. Well, let's take a
- 8 look at the time stamp and see what it shows us.
- 9 MR. LEE: It's not my basement and
- 10 I'm...
- 11 MR. NOCE: I'm gonna object to the
- 12 relevance. This is not an area where there's an
- 13 alleged leak. He's claiming now the water's being
- 14 pumped -- he's assuming this, I believe, so I believe
- 15 this is also a speculation and lack of foundation
- 16 issue. Mr. Lee did not know the exact source. He's
- 17 speculating as to the source of the water, where it's
- 18 coming from.
- 19 JUDGE JORDAN: Okay.
- 20 MR. LEE: Judge, this property borders
- 21 the end of the storm drain. It is the adjoining
- 22 property to the end of the storm strain at Lilac and
- 23 Lydia -- or at McQuay and Lydia.
- 24 JUDGE JORDAN: Okay. So this is near
- 25 where you believe --

```
1 MR. LEE: It couldn't be any more
```

- 2 nearer. It joins it.
- JUDGE JORDAN: Okay. Let's back it up
- 4 there and have --
- 5 MR. NOCE: And again, Judge, this lacks
- 6 foundation. Mr. Lee is making the conclusion that
- 7 this water coming from this storm drain is reaching
- 8 this basement somehow, that from my knowledge that
- 9 he's never even been inside the basement. He's
- 10 videotaping of what he believes is coming out of it.
- 11 This is purely speculative. There's no foundation
- 12 for this and it's based on pure speculation and
- 13 conclusions drawn by Mr. Lee. It's lack of
- 14 foundation.
- JUDGE JORDAN: Okay. Well, I'm going to
- 16 overrule that objection let's take a look and you can
- 17 describe what we're seeing here if you please.
- MR. LEE: Okay.
- 19 JUDGE JORDAN: Can you back that up and
- 20 start from the beginning?
- MR. LEE: I am. Here we are,
- 22 February 23rd, 2009.
- JUDGE JORDAN: Okay.
- MR. LEE: This is Carl and McQuay.
- JUDGE JORDAN: Now, I can't hear the

- 1 narration that accompanies this video, Mr. Lee. Is
- 2 that something you want us to hear?
- 3 MR. LEE: That is all the volume I have.
- 4 I don't know if that helps any.
- JUDGE JORDAN: Well, I can't hear it and
- 6 I doubt anyone else can. Let's try this. Why don't
- 7 you tell us what you think this is showing us.
- 8 MR. NOCE: I think that would be better,
- 9 Judge. Any narration on the video, I believe, is
- 10 hearsay.
- 11 JUDGE JORDAN: Well, I will sustain an
- 12 objection to it because it is inaudible. Can't hear
- 13 it, so the narration cannot go into the record
- 14 anyway.
- 15 (THE VIDEO WAS PLAYED.)
- MR. LEE: This is a large volume of
- 17 water being pumped out of the basement. I believe
- 18 it's 1201 McQuay. This is a sump pump exit here,
- 19 sump pump drain.
- 20 MR. NOCE: Again, Judge, a running
- 21 objection as to all --
- JUDGE JORDAN: You have it.
- 23 MR. LEE: I traced it up to the -- to
- 24 right here. Okay. Now we're at March 6th of '09.
- MR. NOCE: Can we pause this?

```
1 JUDGE JORDAN: Is this going to be
```

- 2 another location or the same location.
- 3 MR. LEE: I'm not sure what this is.
- 4 MR. NOCE: Then I'm gonna have to object
- 5 to foundation.
- JUDGE JORDAN: Yeah, I'm gonna sustain
- 7 that objection because if we don't know what it is,
- 8 why are you showing it?
- 9 MR. LEE: It's more leaks in the
- 10 neighborhood.
- JUDGE JORDAN: You just said --
- MR. LEE: I'm not sure exactly what leak
- 13 this will be.
- MR. NOCE: Judge, Mr. Lee had all
- 15 morning to review these and to prepare himself. I
- 16 think we need to move forward, and I would ask the
- 17 Commission to do so.
- 18 JUDGE JORDAN: I've taken a lot of
- 19 hearing time for Mr. Lee to do exactly that. I mean,
- 20 this is the time. This is past the time for Mr. Lee
- 21 to present this video. If he doesn't know what it is
- 22 by now, I don't think he's going to, so I'm going to
- 23 not -- I'm not going to watch the next segment if
- 24 Mr. Lee cannot tell me what it is, okay? And he
- 25 can't tell me what it is. I think we're done. We've

- 1 had plenty of time for this and Mr. Lee is still not
- 2 prepared to tell me what he's got, so I'm going to
- 3 sustain your objection.
- 4 Please turn off your camera, sir.
- 5 MR. LEE: The next video is water
- 6 flowing off my mailbox.
- JUDGE JORDAN: Please turn off your
- 8 camera. Thank you. Do you have anything other than
- 9 these videos to show us, Mr. Lee?
- 10 MR. LEE: I do not.
- JUDGE JORDAN: All right, then. That
- 12 concludes your case in chief. The witness is
- 13 tendered for cross-examination.
- MR. NOCE: Is this okay, Judge, this
- 15 here?
- 16 JUDGE JORDAN: I can see it fine. Staff
- 17 might want to take a different position to see it,
- 18 but...
- 19 MR. NOCE: Are you gonna have a problem
- 20 seeing it? I'm going to use it as a demonstrative
- 21 aide.
- MR. RITCHIE: I can sit over here.
- MR. NOCE: Okay.
- 24 MR. LEE: Just for the record, if I may,
- 25 I'd like to object to not being able to show my

- 1 video. It's become an issue of how good a presenter
- 2 I am, not whether the --
- JUDGE JORDAN: No, sir, it's become an
- 4 issue of how well you have chosen to organize your
- 5 case. I've taken hours of hearing time for you to
- 6 prepare your case. Hearing time is not the time for
- 7 you to prepare your case --
- 8 MR. LEE: I'm trying --
- 9 JUDGE JORDAN: The time for you to
- 10 prepare your case was before the hearing started.
- 11 I've taken hours of these people's time -- and that
- 12 is ultimately ratepayer time -- for you to prepare
- 13 your case, and you haven't done it, still haven't
- 14 done it. Your case in chief is over. There's no
- 15 question pending before you, so, no, you may not
- 16 state --
- 17 MR. LEE: That's exactly my point.
- 18 I'm not --
- 19 JUDGE JORDAN: If you continue to talk
- 20 out of turn, I will sanction you. Thank you.
- 21 All right. Mr. Lee has been a witness
- 22 in his case in chief. He is now subject to
- 23 cross-examination. I think the order is that Staff
- 24 goes first, but I'm flexible on that.
- MR. NOCE: It doesn't matter to me.

```
1 MR. RITCHIE: It doesn't matter to us
```

- 2 either. You can go ahead.
- JUDGE JORDAN: I see that Missouri
- 4 American is prepared, so Missouri American, you may
- 5 proceed.
- 6 MR. NOCE: Thank you, your Honor.
- 7 CROSS-EXAMINATION BY MR. NOCE:
- 8 Q. Mr. Lee, I have a few questions for you
- 9 regarding the evidence that you've submitted here
- 10 before the Commission. And I'm gonna try to do this
- 11 in geographical order based on what I understand that
- 12 your testimony has been, and I'm gonna start up
- 13 north.
- 14 It's my understanding that you have
- 15 submitted Exhibit 16A through 16E which I'm gonna go
- 16 ahead and grab.
- 17 And, your Honor, I -- Mr. Lee, I'll
- 18 provide them to you.
- 19 I've handed you what's been marked as
- 20 Plaintiff's Exhibit 16A through 16E, and it's my
- 21 understanding that those photographs are taken on
- 22 Coal Bank Court; is that correct?
- 23 A. Correct.
- Q. If it will please the Court, I'm gonna
- 25 go ahead and place a No. 1 tab on Defendant's Exhibit

- 1 A to mark where these alleged leaks are located.
- 2 And Mr. Lee, I've placed a No. 1 in
- 3 front of 1207 Coal Bank Court. Is that approximately
- 4 where those photographs are shown?
- 5 A. It is not.
- 6 Q. Where is that? Can you --
- JUDGE JORDAN: Excuse me, counselor, can
- 8 you move the easel a little bit more towards the
- 9 witness? I'm trying to make sure we can see it on
- 10 the monitor. A little closer. Closer to the
- 11 reporter if you please.
- 12 BY MR. NOCE:
- 13 Q. Okay. Well, Mr. Lee, I'll ask you what
- 14 address is depicted in Plaintiff's Exhibit 16A
- 15 through 16E.
- 16 A. It's actually 11545 Larimore. Only this
- 17 is the property facing Coal Bank Court, right under
- 18 that red thing which I guess is a fire hydrant.
- 19 Q. Okay. So, now, Mr. Lee, is the marker
- 20 there, is that in the correct spot?
- 21 A. Yeah, pretty correct.
- Q. Okay. And it's your contention in this
- 23 case that this -- there is a water main leak at or
- 24 near this location; is that correct?
- A. At or near, yes.

- 1 Q. Okay. And that has been alleged in what
- 2 is -- in a document that's been entitled First
- 3 Amendment to WC-2009-0277 which was filed on April 6,
- 4 2009; is that correct?
- 5 A. Okay.
- 6 Q. I don't want you to guess. I want to go
- 7 ahead and hand you the document and you can confirm
- 8 or deny that.
- 9 A. Yes, that's alleged in that complaint.
- 10 Q. Okay. And Mr. Lee, in that complaint
- 11 you state -- or in that amendment you say, "Recently,
- 12 just days ago, it rained. Then we had a sunny day of
- over 70-degree weather. The puddle completely dried
- 14 up."
- 15 A. Uh-huh.
- 16 Q. Please confirm whether or not I read
- 17 this correctly. And I apologize. I do not have a
- 18 copy of this.
- 19 A. Yes, you did.
- Q. Thank you. So then, Mr. Lee, it's my
- 21 understanding that this puddle eventually did dry up;
- 22 is that correct?
- 23 A. Yes.
- 24 O. Okay.
- 25 A. Then it becomes wet again without any

- 1 rain.
- Q. Okay. Well, Mr. Lee, you don't stand
- 3 outside of this address all day long, do you?
- 4 A. I don't.
- 5 Q. Okay. So you don't have any idea of
- 6 whether or not a resident there or customer there is
- 7 watering their lawn, whether they've washed their
- 8 car, whether they've had a sump pump discharge into
- 9 this area; is that correct?
- 10 A. I do not know that, no.
- 11 Q. And have you personally performed any
- 12 water quality test on the water at this location,
- 13 Mr. Lee?
- 14 A. I have not.
- 15 Q. And have you personally performed any
- 16 other tests other than visually observing it and
- 17 documenting it through photograph or videotape,
- 18 documenting the surface water at that location to
- 19 determine if, in fact, this is water coming from the
- 20 Missouri American Water main?
- 21 A. Any other testing?
- 22 Q. Correct.
- 23 A. I have not, none besides visual.
- 24 O. And do you believe that the water that
- 25 you see, the surface water that is displayed in

- 1 Plaintiff's Exhibit 16A through 16E, is it your
- 2 contention that regardless of the source of this
- 3 water, that it is causing the current leaking
- 4 problems in your basement and has done so over the
- 5 years?
- 6 A. Do I believe this specific leak is
- 7 causing water in my basement?
- 8 Q. Yes.
- 9 A. I don't have any way to say that
- 10 specifically. I know now water is running and
- 11 continues to run at the north end of my basement, and
- 12 this is to the north of my property.
- 13 Q. Okay. So is it your contention that the
- 14 water displayed there, the surface water there,
- 15 whatever its source, is a cause of the leaks in the
- 16 north end of your basement?
- 17 A. Yes, this leak or a leak near here.
- 18 Q. Thank you. Mr. Lee, I'm gonna move to
- 19 the next set of records, the next location where I
- 20 believe you've alleged a leak, and that was done so
- 21 in the first amendment to WC-2009-0277 dated
- 22 April 10, 2009 edition.
- 23 And I'll go ahead and hand you this
- 24 document. I'm not sure if we've seen -- let me take
- 25 that back. Let me see if we have it. I think we do

- 1 have it. Plaintiff's Exhibit 9A I believe is
- 2 depicted -- depicts this area. And I'll go ahead and
- 3 grab those for you. In fact, Mr. Lee, I believe
- 4 you've described for the Commission that this leak
- 5 was occurring -- or this alleged leak was occurring
- 6 on the north -- on Larimore just north of Coal Bank
- 7 Court, correct?
- 8 A. Correct.
- 9 Q. I'll go ahead and place a No. 2 next to
- 10 that area. And let me know if I place it in the
- 11 correct area. Is that --
- 12 A. I don't know exactly where you placed
- 13 it. It covers two properties and this is not in
- 14 front of two properties.
- 15 Q. Okay. What property is that in front
- 16 of?
- 17 A. It's in front of 11545.
- 18 Q. Okay. Is this generally -- I know it's
- 19 not precise, but is this generally --
- 20 A. That's generally.
- Q. Okay. And again, now, did the water
- 22 that's depicted -- the surface water depicted in
- 23 that -- in Defendant's Exhibit -- or Plaintiff's
- 24 Exhibit 9A, does that water ever dry up after periods
- 25 of no rain?

- 1 A. Yes, it eventually dries up.
- Q. And Mr. Lee, have you personally
- 3 performed any water quality tests on the water
- 4 depicted, the surface water depicted in those
- 5 photographs?
- 6 A. I have not.
- 7 Q. Have you personally performed any other
- 8 tests other than visually observing them and
- 9 documenting the surface water at these locations to
- 10 determine whether or not this is water coming from a
- 11 Missouri American Water pipe?
- 12 A. I have not.
- 13 Q. And again, do you believe that the
- 14 surface water, regardless of its source, that's
- 15 depicted in Defendant's Exhibit 9A, is causing or
- 16 contributing to the leaking problem in your basement
- 17 currently today in the north end?
- 18 A. I believe it's part of the problem.
- 19 Q. Moving on, I believe we saw a DVD that
- 20 was marked Defendant's Exhibit 1 which you stated
- 21 evidenced water leaking out of the ground at the
- 22 storm drain on McQuay and Larimore on May 28th, 2008;
- 23 is that correct?
- 24 A. I presume. If I could see it, I could
- 25 tell you for sure.

```
1 Q. Well, I'm not gonna play the DVD, but do
```

- 2 you recall presenting a DVD on that -- on that date
- 3 of that area?
- 4 A. I do.
- 5 Q. Okay. Mr. Lee, are you aware that
- 6 according to the National Oceanic and Atmospheric
- 7 Administration, their records for precipitation
- 8 during the month of May 2008, that nearly 4.3 inches
- 9 of rain fell in your area in the three days preceding
- 10 that DVD?
- 11 A. I am not aware of that.
- 12 Q. Do you have any reason to dispute those
- 13 records?
- 14 A. Without seeing them and researching, I
- 15 would not be able to dispute them.
- JUDGE JORDAN: Counsel, will we be
- 17 putting that into the record or is that something of
- 18 which the Commission can take official notice?
- 19 MR. NOCE: I would ask the Commission to
- 20 take official notice for that particular month. I do
- 21 have certified records from the National -- from that
- 22 organization.
- JUDGE JORDAN: Okay. So you'll be
- 24 entering those into the record?
- MR. NOCE: I can if the Commission needs

- 1 that. It is my only copy, and I apologize.
- JUDGE JORDAN: We can accommodate that,
- 3 can't we? Thank you. Thank you very much.
- 4 MR. LEE: Over what period of time did
- 5 that rain fall?
- 6 MR. NOCE: That rain fell from May 26th --
- 7 from May 25th through May 27th. It totaled over 4.3
- 8 inches of rain.
- 9 Well, I guess I could speak to that,
- 10 Judge. The one concern I have is the way that this
- 11 organization does this, they tie a knot around it, so
- 12 it's hard to get, you can't -- cannot remove it or
- 13 else it loses its official...
- JUDGE JORDAN: Well, let me have a look
- 15 at that.
- MS. BRUEGGEMANN: Your Honor, we could
- 17 make a photocopy of it that your Honor could compare
- 18 to the certified copy if you wanted to place that
- 19 into EFIS as the exhibit, if that would solve your
- 20 problem.
- 21 JUDGE JORDAN: Well, it looks like we
- 22 have -- this is another one of those voluminous
- 23 exhibits that I don't think we need the whole thing
- 24 in the record. Is there one particular page in here,
- 25 counselor, that helps?

```
1 MR. LEE: I'm not sure if I'm gonna -- I
```

- 2 can -- I can -- I know that one in particular if the
- 3 court would like to put it in the record, I'd ask
- 4 that it would be.
- 5 JUDGE JORDAN: Well, I tell you what,
- 6 why don't we put that on the list of things that you
- 7 can file within a week at the close of this hearing.
- 8 MR. NOCE: Okay. I'll keep a list of
- 9 which ones I do.
- 10 JUDGE JORDAN: Okay. Thank you very
- 11 much. Sorry to interrupt, but I did want to clarify
- 12 that.
- MR. NOCE: No, that's okay. Thank you.
- 14 BY MR. NOCE:
- 15 Q. And again, Mr. Lee, I apologize I didn't
- 16 do this beforehand. I'm gonna go ahead and place a
- 17 No. 3. You're saying that this -- the DVD that was
- 18 taken and the storm drain that we've seen in many
- 19 photographs and DVDs at Larimore and McQuay is at the
- 20 intersection, is that correct, or just north of the
- 21 intersection?
- 22 A. Correct.
- Q. Okay. And is this a -- I'll place the
- No. 3. Is this generally the location of where that
- 25 storm drain is located?

```
1 A. The north end of it.
```

- 2 Q. So up here?
- 3 A. No, the north end of that storm drain.
- 4 Q. Okay. Okay. And again, I believe --
- 5 and I believe you testified -- you showed a
- 6 subsequent DVD dated July 9, 2008, where you said
- 7 there's a lack or a reduction of water at this
- 8 location; is that correct?
- 9 A. I believe so.
- 10 Q. Okay. That was in July, in the summer
- 11 months, correct?
- 12 A. Yes.
- 13 Q. And I assume is that true when there's
- 14 periods where there's no rain, is there a reduction
- of water in that area, a flow of water?
- 16 A. Over time there is. The -- I believe
- 17 what I tried to show in that DVD, I believe that was
- 18 several days or a week or two after the water main
- 19 repair on Coal Bank Court, but I've never been
- 20 provided the repair records for that, so in my
- 21 request to sit down and compare the DVD that I have
- 22 to the repair records has been refused more than
- 23 once.
- 24 Q. And Mr. Lee, just to the north of that
- 25 area, isn't it correct that there's a tomato farm

- called Moller's [phonetic spelling] Farm?
- 2 A. Correct.
- 3 Q. And that's on the same side of the
- 4 street as the storm drain, north end of the storm
- 5 drain; is that correct?
- 6 A. That is correct.
- 7 Q. And is that uphill from the storm drain?
- 8 A. The tomato farm?
- 9 Q. Correct.
- 10 A. I don't think it is. It's all flat in
- 11 there.
- 12 Q. And Mr. Lee, have you personally
- 13 performed any water quality tests on the water that
- 14 appears in the storm drain?
- 15 A. No, I have not.
- 16 Q. Have you personally performed any other
- 17 tests other than visually observing and documenting
- 18 the water at this location to determine if, in fact,
- 19 there is water coming from a Missouri American Water
- 20 main?
- 21 A. I have not.
- Q. And again, do you believe the water
- 23 depicted in the DVD on 5/28 of '08 and 7/9 of '08 at
- 24 this location, the surface water, regardless of the
- 25 source, is part of the current -- is causing or

- 1 contributing to the leaks that you are experiencing
- 2 in your basement and have so over 19 years?
- 3 A. Absolutely.
- 4 Q. Over 19 years, that's true, correct?
- 5 A. Pardon?
- 6 Q. In over the 19 years that you've lived
- 7 there; is that correct?
- 8 A. I believe that's true, yes. I didn't
- 9 know to document -- start documenting things until
- 10 '06 when there was a reduction in the flow in my
- 11 basement right after a water main repair.
- 12 MR. NOCE: I'd move to strike. I think
- 13 that's nonresponsive to the question that was posed.
- 14 JUDGE JORDAN: I will not strike it.
- MR. NOCE: Okay.
- 16 JUDGE JORDAN: It's merely cumulative of
- 17 statements in the record already --
- MR. NOCE: Okay.
- 19 JUDGE JORDAN: -- and therefore
- 20 harmless.
- 21 BY MR. NOCE:
- Q. Mr. Lee, I believe the next location
- 23 where you've alleged that there's an alleged leak was
- 24 part of a complaint dated March 20th, 2009, and it
- 25 states that there's water continuously running in the

- 1 storm drain at Larimore and the railroad -- and RR
- 2 tracks. Just for location purposes, I'm gonna put a
- 3 No. 4 on Defendant's Exhibit A. And if you would,
- 4 please let me know if this is an accurate location of
- 5 what you're trying to describe in that document?
- 6 A. Yeah, that's close.
- 7 Q. Okay. So those photographs that we've
- 8 seen, I believe 7C is one of those particular
- 9 photographs that depicted this area. Is that the
- 10 area that's depicted by the No. 4, Mr. Lee?
- 11 A. Correct.
- 12 Q. Okay. And Mr. Lee, you've testified --
- 13 or strike that. Mr. Lee, is it your understanding
- 14 that there is no Missouri American Water main on that
- 15 side of Larimore and this is -- this area is actually
- 16 south of Larimore; is that correct?
- 17 A. Yeah.
- 18 Q. And isn't it true that all the storm
- 19 drains from the neighborhood up on Aspen Woods and
- 20 Red River and Taos all dump their water into this --
- 21 this storm drain along the railroad tracks?
- 22 A. Those storm drains dump water into that
- 23 storm drain into this storm drain when it hasn't
- 24 rained in weeks. There's a constant flow of water
- 25 into those storm drains. I showed you that when you

- 1 came to the neighborhood.
- Q. And then isn't it true, then, that any
- 3 time somebody would water the lawn, the runoff water
- 4 is going to collect in the storm drains and it's
- 5 going to filter down and flow into this area,
- 6 correct?
- 7 A. We're not talking about a little
- 8 sprinkle here. I have seen this storm drain dry up
- 9 one time in 14 months.
- 10 JUDGE JORDAN: The witness must answer a
- 11 yes or no question with a yes or a no. You can
- 12 redirect yourself when all cross is done.
- 13 BY MR. NOCE:
- 14 Q. Is that correct, Mr. Lee, that all the
- 15 water, when somebody washes -- or waters the lawn,
- 16 washes their car, discharges their septic field, all
- 17 that water, all the runoff water from that is going
- 18 to collect and dump into this storm drain, correct,
- 19 from that neighborhood?
- 20 A. I cannot agree to that. I don't believe
- 21 that water collects, and I have driven through that
- 22 neighborhood two or three times a day for the last
- 23 six months, and there's just not that much water
- 24 flowing into these storm drains from the surface
- 25 unless it is raining.

- 1 Q. And Mr. Lee --
- These are other weather records, Judge,
- 3 that I'll be putting in.
- 4 BY MR. NOCE:
- 5 Q. You've contended that the only time the
- 6 storm drain's ever dried up was in October of 2008,
- 7 is that correct, following a repair made on Larimore?
- 8 A. Following that repair on Larimore the
- 9 storm drain dried up for a period.
- 10 Q. Do you know the address?
- 11 A. For a period of time.
- 12 Q. And are you aware of the address for
- 13 that repair?
- 14 A. I believe that was 11533. Am I correct
- 15 on that? Yes.
- 16 Q. And are you aware that that repair was
- 17 actually made to a portion of the -- a section of the
- 18 pipe that was customer-owned?
- 19 A. No, I am not. And I don't believe that.
- 20 That's not what I saw when I looked in the hole.
- Q. Well, okay. And Mr. Lee, are you also
- 22 aware that that repair was made on October 9th, 2008?
- 23 A. Okay.
- Q. And are you aware that according, again,
- 25 to the National Weather records that I have here for

- 1 October of 2008, the record -- or the week following
- 2 the repairs, it showed no rain with temperatures in
- 3 the high 70s and 80s for the following five days
- 4 following that repair?
- 5 A. Okay. And how about before the repair?
- JUDGE JORDAN: No, no, no.
- 7 BY MR. NOCE:
- 8 Q. And Mr. Lee, have you ever done
- 9 anything -- or have you ever performed any tests, you
- 10 personally, on any of the water shown -- the surface
- 11 water shown in Plaintiff's Exhibit 7C, performed any
- 12 water quality tests on that water?
- 13 A. I have not.
- 14 Q. Have you performed any other tests other
- 15 than visually observing them and documenting that
- 16 water at this location to determine if it, in fact,
- 17 is coming from a Missouri American Water main?
- 18 A. I have not.
- 19 Q. And you believe, Mr. Lee, isn't it
- 20 correct, that the water from this location,
- 21 regardless of its source, is causing the current
- 22 leaking problem in your basement as well as the
- 23 problems you experienced for the last 19 years?
- A. The water from where?
- Q. From this source -- or from this

- location, the surface water shown in Defendant's
- 2 Exhibit 7C?
- 3 A. I believe this is one more -- one more
- 4 part of the problem.
- 5 Q. I'll move on to the next location,
- 6 Mr. Lee, where you've alleged possible leaks. And
- 7 that is depicted -- or that is alleged in a pleading
- 8 entitled, "Complaint" which was filed March 20th,
- 9 2009, and it speaks to, "Water continues to run in a
- 10 storm drain between 11340 Larimore and Warmann Oil
- 11 Company."
- 12 A. Uh-huh.
- 13 Q. And then I'm gonna go ahead and place a
- 14 5. I think there may be some confusion as to this
- 15 location on this map because I don't believe there is
- 16 an 11340 depicted on the map. I think we know where
- 17 Warmann Oil is, so we can get it close. And again,
- 18 this is not an exact location and I understand.
- 19 A. This is -- you're talking about this
- one, correct, in the upper photo?
- Q. Yes, I believe you've stated that's 7F.
- 22 If you're referring to that, I believe that is
- 23 correct. I believe your testimony is that that is
- 24 the storm drain there, correct?
- 25 A. Correct.

- 1 Q. Is this about the location, Mr. Lee?
- 2 A. Yeah, I would say that. Between those
- 3 two properties is where I believe it is.
- Q. Okay. Okay. And Mr. Lee, the property
- 5 that you've discussed is 11340 which is not depicted
- 6 on that map, correct?
- 7 A. I don't see 11340 on there.
- 8 Q. Okay. But it is on the south side of
- 9 Larimore, this area that you're discussing, correct?
- 10 A. Correct.
- 11 Q. So it is on the opposite side of the
- 12 street as where Missouri American Water main is in
- 13 this area; is that correct?
- 14 A. That's really not correct.
- 15 Q. Okay. Which side of the street is
- 16 Missouri American Water main according to the
- 17 evidence that's been presented to you for the
- 18 records?
- 19 A. The water main is on the north side of
- 20 the street, but this is an exit for a storm drain on
- 21 the north side of the street which just happens to
- 22 flow under the street.
- Q. Okay. And isn't this property next to
- 24 the neighbors' house that you stated at 11338 who has
- 25 had the toilet problem, or the leaking toilet that

- 1 you say that you've seen?
- 2 A. Is it next to the property?
- 3 Q. Correct.
- 4 A. Correct. Door one property, that
- 5 property is one property to the west from here.
- 6 Q. Exactly, okay. Correct.
- 7 A. One whole property in between.
- 8 Q. And I guess, is this property across
- 9 from the property located at 11347 there, which I
- 10 believe is depicted in 7 -- is it on 7F, the top
- 11 photograph, I believe?
- 12 A. You just said across from that property?
- 13 Q. I'm sorry. It's the bottom photograph,
- 14 correct.
- 15 A. Yes. That is across -- across -- if you
- 16 look at the storm drain right here, this is straight
- 17 across from there.
- 18 Q. Okay.
- 19 A. So that would put this a little to the
- 20 west of this storm drain.
- Q. And isn't it correct that the surface
- 22 water that's depicted in the bottom photograph in
- 23 front of 11347 Larimore, it's your understanding that
- 24 that water is coming from a source from that
- 25 customer's sump pump?

- 1 A. That is correct.
- Q. Do you know what the water table level
- 3 is at that location, Mr. Lee?
- 4 A. I do not know in inches. I know that
- 5 I've lifted the lid on this storm drain right here
- 6 before.
- 7 Q. I think, Mr. Lee, you don't have a
- 8 question before you there.
- 9 A. My answer has to do with the water table
- 10 in this area and --
- 11 JUDGE JORDAN: Your answer is you don't
- 12 know.
- MR. LEE: -- on this property.
- 14 BY MR. NOCE:
- 15 Q. Mr. Lee, have -- have you personally
- 16 performed any water quality tests on the water that's
- 17 flown out of that drainage ditch on the south side of
- 18 Larimore?
- 19 A. I have not.
- Q. Have you performed any water quality
- 21 tests on the water that is seen -- the surface water
- 22 seen in front of 11347 in Plaintiff's Exhibit 7F?
- 23 A. I have not.
- Q. Okay. Have you performed any other
- 25 tests at these -- those two locations to determine --

- 1 other than visually observing and documenting, that
- 2 determine that it was actually water coming from a
- 3 Missouri American Water main?
- 4 A. Other than visual?
- 5 Q. Yes.
- 6 A. I have not.
- 7 Q. Okay. And do you believe that the water
- 8 from this location, regardless of its source, is and
- 9 has been causing the leaking problems in your
- 10 basement for the past 19 years?
- 11 A. I believe this is part of the problem.
- 12 Q. Okay. I'm gonna move on to the next
- 13 source. I'm gonna be brief with this one because I
- 14 believe this is the one we talked about yesterday.
- Mr. Lee, in your initial complaint
- 16 that's dated January 27th, 2009, it states that
- 17 you're alleging that there's an alleged water main
- 18 leak based on water running out of the ground and
- 19 driveway in front of 11334 Larimore Avenue; is that
- 20 correct?
- 21 A. That is correct.
- 22 Q. And it was your testimony, and I believe
- 23 it's been depicted in Plaintiff's Exhibit 15A as well
- 24 as 14 -- 15A through C and Plaintiff's Exhibit 14A
- 25 through H, and I can show you those. And while I'm

- 1 up here, Mr. Lee, I'm gonna place a 6 on that
- 2 property. Did I do that correctly?
- 3 A. You did.
- 4 Q. Okay. And is that -- are those exhibits
- 5 that I've handed you, are those the exhibits that
- 6 depict the surface water that you're speaking of in
- 7 your initial complaint?
- 8 A. It does.
- 9 Q. And Mr. Lee, I believe you testified
- 10 yesterday that it's your understanding that this
- 11 water depicted in those photographs is actually water
- 12 caused by an overflow of a septic tank; is that
- 13 correct?
- 14 A. That's what I was told.
- 15 Q. Do you have any evidence that
- 16 contradicts that, or any knowledge that contradicts
- 17 that?
- 18 A. The only knowledge I have is that the
- 19 ground remained wet in that area after the repair was
- 20 made to the septic tank.
- Q. Do you know whether or not there has
- 22 been a repair made to that septic tank?
- A. That I do.
- Q. Okay. And what is that? How do you
- 25 know?

- 1 A. I spoke to the neighbor.
- Q. So you believe there's an ongoing leak
- 3 at this location in front of that individual's yard?
- 4 A. I believe the repair --
- 5 Q. We're speaking about 11334 Larimore
- 6 only?
- 7 A. I believe the repair at Red River and
- 8 Aspen Woods added to this problem, was the cause of
- 9 the water that remained at this location after the
- 10 repair to the -- to the toilet was made.
- 11 Q. Mr. Lee, isn't it true that the property
- 12 at 11334 goes uphill from the street?
- 13 A. Uphill from the street?
- 14 Q. Correct.
- 15 A. No.
- 16 Q. You deny that, that the property at
- 17 11334 does not slope up from Larimore? That was a
- 18 bad question. Let me rephrase it. Do you deny that
- 19 the property at 11334 slopes uphill from Larimore
- 20 Avenue?
- 21 A. The house sits up a little bit on the
- 22 hill. The water problem wasn't at the house, it was
- 23 at the street, down near the street.
- 24 Q. Well, the photographs you've depicted
- 25 show water problems all the way up along the

- 1 driveway.
- 2 A. Right. We don't have a photograph of it
- 3 remaining damp down here by the end of the driveway.
- 4 Q. And Mr. Lee, have you personally
- 5 performed any water quality tests on the water that's
- 6 depicted in Plaintiff's Exhibits 15A through C and
- 7 14A through H?
- 8 A. I have not.
- 9 Q. Have you personally performed any other
- 10 tests other than visually observing and documenting
- 11 the water at this location to determine if, in fact,
- 12 it is coming from the Missouri American Water main?
- 13 A. I have not.
- Q. And do you believe the water from this
- 15 location, regardless of its source, is and has been
- 16 causing your problems with your basement leaking?
- 17 A. The water from this source?
- 18 Q. Correct.
- 19 A. I believe at one point that that may
- 20 have been part of it. Although repairing this leak
- 21 did nothing to solve the water problems in my
- 22 basement or anywhere else in the neighborhood except
- 23 for this yard.
- 24 Q. Okay. I'm gonna move on to the next
- 25 location. This location is referenced in Plaintiff's

- 1 pleading entitled second amendment WC-2009-0277, and
- 2 it's dated April 6th, 2009. And according to this
- 3 document, you believe that there was -- that there
- 4 appeared to be another leak at 11339 Larimore, which
- 5 is across the street from 11334; is that correct?
- 6 A. Correct.
- 7 Q. I'm gonna go ahead and put a 7 at that
- 8 location on the map. And Mr. Lee, is that an
- 9 accurate location?
- 10 A. Yes, it is.
- 11 Q. And this -- and in this particular
- 12 amendment you're alleging that the water that you'd
- 13 seen in the storm -- or in the drainage ditch along
- 14 Larimore Road is evidence of a Missouri American
- 15 Water leak; is that correct?
- 16 A. Correct.
- 17 Q. And I believe in your June 2000 -- June
- 18 7th, 2009 pleading which is marked Defendant's
- 19 Exhibit 7G, or one of those I believe you say the
- 20 property to the west of that at 11333 depicted and
- 21 shows a reduction in that flow; is that correct?
- 22 A. That is correct.
- Q. And that was back -- and that was just a
- 24 couple weeks ago, correct?
- 25 A. Correct.

```
1 Q. And so does this area dry up after
```

- 2 periods of no rain?
- 3 A. The water dried up in front of 11333,
- 4 and when we get down here by 11339 and 11341, it's
- 5 flowing up out of the ground again even after the
- 6 repair on Red River and Aspen Woods. And it's
- 7 flowing into the drain under the driveways at 11341
- 8 and 11347.
- 9 Q. And again, 11347 is the area where you --
- 10 it's your understanding that the surface water that
- 11 was depicted in the previous photograph shown to you,
- 12 that that water's coming from that person's sump
- 13 pump, correct?
- 14 A. It's my understanding that the water
- 15 here by the mailbox is coming from the sump pump, but
- 16 water --
- 17 Q. And that drainage ditch is right next to
- 18 that area, isn't that correct, shown in that
- 19 photograph actually?
- 20 A. Yeah, and if you go --
- Q. Thank you.
- 22 A. -- further west here, you can see a flow
- 23 of water headed to the east in that drainage ditch, a
- 24 continuous flow.
- Q. Mr. Lee, do you know whether or not the

- 1 sump pumps for those neighbors discharges in that
- 2 drainage ditch?
- 3 A. I do not.
- 4 Q. And have you performed any water quality
- 5 tests on the water from the drainage ditch in front
- 6 of 11333 or 11339 or 11341 --
- 7 A. I have not.
- 8 Q. -- Larimore? And have you performed any
- 9 other tests other than visually observing and
- 10 documenting the water flowing in this location to
- 11 determine if, in fact, it is water coming from a
- 12 Missouri American Water main?
- 13 A. I have not.
- 14 Q. And you -- again, Mr. Lee, you
- 15 believe -- is it true that you believe that the water
- depicted in those photographs and the water from this
- 17 location in front of 11339 and 11341 and the drainage
- 18 ditch there, that that water is and has been causing
- 19 and contributing to the problems you've had with your
- 20 water leak -- water -- the water in your basement,
- 21 regardless of its source?
- 22 A. I do.
- Q. I'd move to the next location. Mr. Lee,
- in the third amendment to WC-2009-0277, filed April
- 25 20th, 2009, you've alleged that water running out of

- 1 the street and over the sidewalk on Aspen Woods near
- 2 the church, you've alleged that that's a water main
- 3 leak; is that correct?
- 4 A. That is correct.
- 5 Q. And I believe you filed a -- an
- 6 amendment and an update on, I believe it was sometime
- 7 around May 14th or May -- I think it might have been
- 8 May 14th where you depicted photographs of this area
- 9 being completely dry. I could show that to you.
- 10 It's entitled third amendment to WC-20 --
- 11 A. Yeah, that's after three hours of rain
- 12 the night before, correct. That's the first time
- 13 water hadn't flowed out of the ground at the end of
- 14 that street and into that storm drain in nearly 14
- months.
- 16 Q. Okay. So this area is dry --
- 17 A. After a rain.
- 18 Q. So this area is dry today, correct?
- 19 A. I don't know that it's dry today. The
- 20 last time I saw it, it had rained for three days in a
- 21 row, and we -- now we had water coming out of the
- 22 street again, where previously it could rain for 15
- 23 minutes and we'd have water running out of the
- 24 street.
- Q. Okay. So now when it rains, even for

- 1 one day straight, it doesn't -- there's no evidence
- 2 of surface water in this location, correct?
- 3 A. Correct.
- 4 Q. And back when there was surface water at
- 5 this location, Mr. Lee, did you ever perform any
- 6 water quality tests on the water?
- 7 A. I have not.
- 8 Q. And had you personally performed any
- 9 other tests at this location back when there was
- 10 surface water evident to determine if, in fact, this
- 11 water was from a Missouri American Water main?
- 12 A. I have not.
- 13 Q. And back before the repair made at Aspen
- 14 Woods and Red River, Mr. Lee, would this area ever
- 15 eventually completely dry up after periods of no
- 16 rain?
- 17 A. Eventually it would.
- 18 Q. Okay. Thank you.
- 19 A. Often it would take five and six days.
- Q. But it would dry? It would dry; is that
- 21 correct?
- 22 A. It would dry?
- Q. And it's your contention, Mr. Lee, that
- 24 the water depicted in those photographs from this
- 25 location, regardless of its source, was or is causing

- 1 the current leaking problems in your basement?
- 2 A. Correct.
- 3 Q. I'm gonna move on to the next location.
- 4 Now, did I put up -- I'm gonna go ahead and mark this
- 5 with an 8. And let me know if this is a correct
- 6 location. I know it's kind of a wide area depicted
- 7 in this area, but I'll try and get as close as I can.
- 8 Is this approximately correct?
- 9 A. Yeah, that's pretty close.
- 10 Q. Mr. Lee, the next amendment I'd like
- 11 to -- that you've filed -- I don't know if it's the
- 12 next one in time that you filed, but it's entitled
- 13 fourth amendment to WC-2009-0277 update. This one
- 14 discusses alleged leaks and depicts pictures taken on
- 15 May 16th in front of 11303 Aspen Woods and 11307
- 16 Aspen Woods.
- 17 And I believe those are depicted in
- 18 Plaintiff's Exhibit 8. And I'll try and get those
- 19 for you. I'm gonna try and mark those, Mr. Lee. I
- 20 don't see an 11303, but is this approximately the
- 21 location of these pictures?
- 22 A. That is down further toward the court,
- 23 Matt.
- Q. Down here?
- 25 A. No, the other way.

- 1 Q. Up here?
- 2 A. Yeah. That's two houses up from the
- 3 court. I'll show you.
- 4 Q. On 8C?
- 5 A. That's the corner property.
- 6 Q. Right here?
- 7 A. So this would be in front of the first
- 8 house here. It would be right in there at 11339, I
- 9 believe, maybe.
- 10 Q. Mr. Lee, the only reason --
- 11 A. That's the first house, and that house
- 12 is on that street, so it would have to be -- yeah,
- 13 it's right in that area there, looks like.
- Q. Are you sure? I think there's another
- one that's referring to 11333. This one right here
- 16 states 11303, and that's what I'm going by. And then
- 17 this one says 11307.
- 18 A. Okay. Where is 11307?
- 19 Q. That's down here.
- 20 A. Yeah. Now, that is, that's on down --
- 21 up a couple of properties from this photo, or down a
- 22 couple of properties.
- Q. So it's generally, if we place it in
- 24 here, it's somewhere in this location, correct? And
- 25 I understand it extends up to 11333.

```
1 A. I believe this house here is the corner
```

- 2 house right here.
- Q. Okay.
- 4 A. So this is probably right on top of that
- 5 there.
- 6 Q. Why don't I do 9A and 9B then since it
- 7 appears...
- 8 So the one at 11307 is this right here?
- 9 A. Yes.
- 10 Q. Okay. And you're saying the other one
- 11 shown is up here closer to the intersection?
- 12 A. Yeah. It's only -- it's not very far.
- 13 Q. Okay. But those are the two locations?
- 14 A. Correct.
- Q. And Mr. Lee, does this area that's
- depicted in Exhibits 8A through, I think, C, does
- 17 this area eventually dry up after periods of no rain?
- 18 A. Eventually it does.
- 19 Q. And Mr. Lee, when you took these
- 20 photographs, you hadn't been present at this property
- 21 for an extended period of time prior to it to
- 22 determine what the source of this water was, is that
- 23 correct, these wet spots?
- 24 A. This was days after a rain. I don't
- 25 know if I put how many days.

```
1 Q. You weren't present to check to see
```

- 2 whether or not somebody had washed their car, watered
- 3 their lawn at these locations, correct?
- 4 A. I have not.
- 5 Q. And Mr. Lee, have you personally
- 6 performed any water quality tests on the water of
- 7 these puddles at these locations?
- 8 A. I have not.
- 9 Q. Have you personally performed any other
- 10 tests, Mr. Lee, other than visually observing and
- 11 documenting the surface water at the locations
- 12 depicted in Plaintiff's Exhibit 8A through 8C to
- 13 determine if, in fact, it is water coming from a
- 14 Missouri American Water main?
- 15 A. I have not.
- 16 Q. And again, Mr. Lee, it is your
- 17 contention that the water from this location, the
- 18 water depicted in 8A through 8C, regardless of its
- 19 source, is and has been contributing to the water
- 20 problems in your basement; is that correct?
- 21 A. Absolutely.
- 22 Q. The next area I'm gonna talk about is
- 23 fairly close to the other one, but this is from
- 24 document -- a document entitled fourth amendment to
- 25 WC-2009-0277, and it's dated April 21st, 2009, and

- 1 there's no address listed in this. However, I'll ask
- 2 you if you can describe for us where this is? And
- 3 I'll go ahead and place a 10 according to your
- 4 description.
- 5 A. That is in the same location as this
- 6 other photo which would be basically on top of that
- 7 one, yeah.
- 8 Q. Right here?
- 9 A. Correct.
- 10 Q. Okay. So I assume, Mr. Lee, the wet
- 11 spots depicted in this photograph, which I guess I
- 12 can hand you. I think it's Plaintiff's Exhibit 12.
- 13 Again, Mr. Lee, the puddles depicted in Plaintiff's
- 14 Exhibit 12, is it true that those wet spots
- 15 eventually dry up after periods of no rain?
- 16 A. After four or five days with no rain and
- 17 warm weather, they do eventually dry up.
- 18 Q. And again, prior to taking this
- 19 photograph, you can't state whether or not somebody
- 20 in that area had been washing their car or watering
- 21 their grass?
- 22 A. I can say that I spoke with the neighbor
- 23 at the time of this photo or shortly thereafter, and
- 24 he told me that this side of the street remains wet
- 25 longer than any other street in the neighborhood.

- 1 MR. NOCE: I'll move to strike that as
- 2 hearsay, your Honor.
- JUDGE JORDAN: I'll sustain an objection
- 4 to it.
- 5 BY MR. NOCE:
- 6 Q. And again, Mr. Lee, I'd just ask -- my
- 7 question is, you weren't present for an extended
- 8 period of time prior to taking this photograph to
- 9 determine whether or not somebody had just watered
- 10 the lawn or washed their car?
- 11 A. I was not.
- 12 Q. And Mr. Lee, again, have you performed
- 13 any water quality tests on the water depicted in
- 14 Plaintiff's Exhibit 12?
- 15 A. I have not.
- 16 Q. And Mr. Lee, have you performed any
- 17 other tests other than visually observing and
- 18 documenting the surface water at this location to
- 19 determine if, in fact, it is water coming from a
- 20 Missouri American Water main?
- 21 A. I have not.
- Q. And Mr. Lee, is it your contention that
- 23 the water from this location, regardless of its
- 24 source, is causing and has caused the current and
- 25 past leaking problem that you've had over the 19

- 1 years in your basement?
- 2 A. It is.
- 3 Q. I'm gonna move to the next location.
- 4 Actually, I'm sorry. Going back, I believe the date
- on those photographs, it was taken on 4/21 of '09; is
- 6 that correct?
- 7 A. Is that what it says on there? I
- 8 presume that is correct.
- 9 Q. I believe that's what you testified as
- 10 to yesterday.
- 11 A. Yes, that's correct.
- 12 Q. Okay. That's the date of the document
- 13 at least?
- A. (Nodded head.)
- Okay. Mr. Lee, are you aware,
- 16 according to the National Weather Service records
- 17 that I have that I'll present to the Court, that over
- 18 the -- April 18th and April 19th, 2009, there was
- 19 over 6 -- .68 inches of rain over that time period?
- 20 A. How much?
- 21 Q. .68 inches.
- 22 A. No, I was not aware of that. The photos
- 23 are taken after a rain --
- 24 JUDGE JORDAN: That's the end of the
- 25 question.

```
1 MR. LEE: So I'm aware --
```

- JUDGE JORDAN: That's end of the
- 3 question.
- 4 MR. LEE: I'm aware of the rain, just
- 5 not how much.
- 6 BY MR. NOCE:
- 7 Q. I'm gonna move on to the next location,
- 8 and this one is depicted in Plaintiff's Exhibit 10A
- 9 through C, and I'll go ahead and present those to
- 10 you. And Mr. Lee, according to this, it's a pleading
- 11 entitled fourth amendment to WC-2009-0277, update,
- 12 May 18th, 2009?
- 13 A. Correct.
- 14 Q. And I believe the addresses listed in
- 15 these photographs are around 11357 and 11363 Aspen
- 16 Woods; is that correct?
- 17 A. Correct.
- 18 Q. I'll go ahead and place a No. 11 on
- 19 Defendant's Exhibit 8. Is this approximately the
- 20 area that you're --
- 21 A. Yeah. It is in the court there.
- Q. Okay. Okay. And, again, Mr. Lee, I'll
- 23 ask you, after extended periods of no rain, is this
- 24 area dry?
- 25 A. It is.

```
1 Q. And in this pleading, Mr. Lee, you state
```

- 2 that you contacted Missouri American Water on May 18th,
- 3 2009, regarding a potential leak at this address, and
- 4 that you saw somebody from that company respond by
- 5 later that day, within a few hours; is that correct?
- 6 A. Later that afternoon, yes.
- 7 Q. And isn't it true that Missouri American
- 8 always sends somebody out when you called to complain
- 9 to investigate to determine whether or not there is,
- 10 in fact, a leak in the area?
- 11 A. I am not certain of that. Sometimes
- 12 they have. I'm not certain of every time.
- Q. Okay. And Mr. Lee, again, I'd ask, have
- 14 you personally performed any water quality tests on
- 15 the water --
- 16 A. And I cannot agree to "investigate." I
- 17 don't -- I cannot agree to a drive-by visual
- 18 inspection as investigating a long-term water leak
- 19 the way I've been complaining about it for years.
- 20 Q. But somebody was at least at this
- 21 location from Missouri American Water; is that
- 22 correct?
- 23 A. I can agree to that.
- Q. And Mr. Lee, have you personally
- 25 performed any water quality tests on the water from

1 these puddles depicted in Plaintiff's Exhibits 10A to

- 2 10C?
- 3 A. I have not.
- 4 Q. And have you performed any other tests
- 5 other than visually observing and documenting the
- 6 surface water at the locations to determine if, in
- 7 fact, this is water coming from a Missouri American
- 8 Water main?
- 9 A. I have not.
- 10 Q. And again, Mr. Lee, I'd ask, do you
- 11 believe that the water -- the surface water depicted
- 12 in those photographs has and is causing and
- 13 contributing to the problems that you've experienced
- 14 in your basement, with the leak in the basement --
- 15 A. I do.
- 16 Q. -- regardless of the source? Finally,
- 17 Mr. Lee, you've alleged that you believe that water
- 18 running under your mailbox in the drainage ditch is
- 19 evidence of leaking water mains throughout your
- 20 neighborhood; is that correct?
- 21 A. Water running under my mailbox is
- 22 evidence of water main leaks?
- Q. Yes, is that correct?
- A. Yes, that's correct.
- Q. And you've alleged that in a document

- 1 entitled complaint which was filed March 20th, 2009;
- 2 is that correct? And I can show it to you. At least I
- 3 guess I can show you the photographs. I think they're
- 4 depicted in 17A through C. And I'm gonna go ahead
- 5 and place a 12 at that location. Is this correct,
- 6 Mr. Lee, approximately where your mailbox would be
- 7 located?
- 8 A. That is correct.
- 9 Q. And Mr. Lee, isn't it correct that
- 10 according to -- according to an e-mail that you
- 11 recently sent, Mr. Lee, that water flowing under the
- 12 mailbox has since stopped since the repair made on
- 13 Aspen Woods and Red River; is that correct?
- 14 A. That's correct.
- 15 Q. And is that true as of today, that
- 16 there's no water flowing under this area?
- 17 A. I presume it's true. We had a rain here
- 18 and it was a normal storm drain, so it should flow
- 19 for a day or two and then dry up, but that is a
- 20 pattern that I've seen since the repair.
- 21 Q. So as of when you left for this hearing
- 22 on Tuesday, I presume, there was no current problem;
- 23 is that correct?
- 24 A. That is correct.
- Q. And Mr. Lee, again, is it your

- 1 understanding that there is no water main located on
- 2 Carl Street?
- 3 A. That is correct.
- 4 Q. And that the closest main to your house
- 5 is either on McQuay or on Lydia; is that correct?
- 6 A. That's correct.
- 7 Q. And you had not alleged in any of the
- 8 complaints a current leak on either of those two
- 9 streets; is that correct?
- 10 A. That is not correct.
- 11 Q. Other than -- are you speaking about the
- 12 main -- or the area -- the drainage ditch at McQuay
- 13 and Larimore?
- 14 A. I'm speaking about the drain at Lydia
- 15 and McQuay.
- 16 Q. Which begins up at Larimore and McQuay,
- is that correct, the north end of it is?
- 18 A. It doesn't exactly begin there. I guess
- 19 it begins -- seems to begin to flow under that pipe
- 20 there, and with the sinkhole on top of that drain, I
- 21 assume that it continues to add to the underground
- 22 flow until it flows out there at Lydia and McQuay.
- Q. Okay. Mr. Lee, have you personally
- 24 performed any water quality tests on the water that
- 25 was flowing under this drainage ditch?

- 1 A. I have not.
- Q. And have you personally performed any
- 3 other tests other than visually observing and
- 4 documenting the water that flowed under this area to
- 5 determine if, in fact, there was water coming from
- 6 the Missouri American Water main?
- 7 A. I have not.
- 8 Q. And it's your contention that this --
- 9 that that phenomenon had occurred -- had been ongoing
- 10 since the date you purchased the house?
- 11 A. Water mains leaking in my neighborhood?
- 12 Q. No. I'm talking about water flowing
- 13 under your mailbox.
- 14 A. Yes.
- 15 Q. And you noticed that even prior to
- 16 purchasing your home; isn't that correct?
- 17 A. That is correct.
- 18 Q. And, in fact, the former owner who you
- 19 purchased the home from even informed you over 19
- 20 years ago that there was an ongoing problem with the
- 21 leaking basement; isn't that true?
- 22 A. Not to the magnitude that I've
- 23 experienced.
- 24 Q. But he informed you that the basement
- 25 leaked?

- 1 A. He informed me that the basement leaked,
- 2 and if I kept the gutters cleaned out, I wouldn't
- 3 have a problem.
- 4 Q. And Mr. Lee, isn't it true that you've
- 5 never conducted any tests or investigations to
- 6 determine -- or strike that. Isn't it true, Mr. Lee,
- 7 that you haven't conducted any tests or
- 8 investigations to rule out the possibility that your
- 9 home was built on a natural spring?
- 10 A. Any tests?
- 11 Q. Correct.
- 12 A. The tests that I have observed are water
- 13 main repairs in my neighborhood and then my basement
- 14 does not leak even after days of heavy rain. And the
- 15 things that I've noticed is when water is flowing out
- of the ground around my house, that my basement leaks.
- 17 Q. Other than visual observations, Mr. Lee,
- 18 you haven't performed any other tests to rule out the
- 19 possibility that your home was built on a natural
- 20 spring; is that correct?
- 21 A. I have not.
- 22 Q. And your basement currently leaks today;
- 23 is that correct?
- 24 A. That is correct.
- Q. And isn't it true, Mr. Lee, that you

- 1 have more problems with your basement leaking and
- 2 that more water gets in during certain months than
- 3 others; is that a fair statement?
- 4 A. I have never tracked it month-wise. It
- 5 appears when the ground freezes, but I -- I have not
- 6 tracked it like that, no.
- 7 Q. Mr. Lee, isn't it true that you pled
- 8 guilty to a manslaughter charge in the early 1980's?
- 9 A. That is true.
- 10 MR. NOCE: I believe that's all the
- 11 questions I have at this time.
- 12 JUDGE JORDAN: Thank you. Any
- 13 cross-examination from Staff?
- MR. RITCHIE: Staff has no
- 15 cross-examination.
- JUDGE JORDAN: Okay.
- 17 MR. LEE: Can I object to that last
- 18 question?
- 19 JUDGE JORDAN: You may. It's a little
- 20 late.
- 21 MR. LEE: That has absolutely nothing
- 22 to do with water mains leaking in my
- 23 neighborhood.
- JUDGE JORDAN: Well, that's a little bit
- 25 late. The question's been asked and answered. But

- 1 I'll hear a response to that.
- 2 MR. NOCE: Judge, it does go to the
- 3 witness's credibility. Obviously a manslaughter
- 4 charge is a felony in the state of Missouri and
- 5 therefore admissible subject to his credibility.
- 6 JUDGE JORDAN: I will overrule the
- 7 objection and take it for the purpose of credibility.
- 8 I don't have any questions from the Commissioners.
- 9 I'll double-check on that. And I have no questions
- 10 for this witness, which brings us to redirect, and
- 11 here are my instructions on redirect.
- 12 Redirect is for the purpose of Mr. Lee
- 13 addressing issues that were raised on cross, And he
- 14 may offer testimony for that purpose. But his
- 15 testimony will be subject to the rules of evidence
- 16 that we have discussed; that is, I don't want to hear
- 17 anything that is repetitious, and it would be subject
- 18 to an objection, and I don't want to hear anything
- 19 that is unduly long because we've had plenty of that.
- 20 As to the video evidence that Mr. Lee
- 21 offered during his direct examination of himself,
- 22 here is my ruling. I am going to add that to the
- 23 list of documents which may be filed after this
- 24 hearing.
- Now, I've been describing this as the

- 1 time frame for these filings, I've been describing
- 2 them as one week after this hearing closes, and I was
- 3 presuming that this hearing would close today, but
- 4 what we're gonna have to do is set a different date
- 5 for that than one week from the end of this hearing
- 6 because the hearing's gonna be extended a little bit,
- 7 at least as to the document that Mr. Lee is planning
- 8 to file under subdivision 11 of 536.070.
- 9 So let me ask my court reporter about
- 10 how long she thinks -- this is one of my least
- 11 favorite questions. A rough estimate of when a
- 12 transcript of this hearing might be ready.
- 13 THE COURT REPORTER: I think it's seven
- 14 business days, Judge.
- JUDGE JORDAN: What we'll do is we'll
- 16 build in a little bumper for that. We can assume
- 17 that the transcript will be ready in ten business
- 18 days, that it will be filed. And what we'll do is
- 19 we'll set that date as the start date for a period in
- 20 which the parties may file the documents which we've
- 21 described.
- 22 And that will include the DVD that Mr. Lee
- 23 may prepare of his video evidence of water currently
- 24 flowing in his neighborhood in the sites he has
- 25 described.

```
1 MR. NOCE: I guess -- and we're going to
```

- 2 leave the record open as to those records?
- JUDGE JORDAN: That's correct. And
- 4 here's what we're going to do. After these documents
- 5 are filed, we'll have a time for objections and we'll
- 6 have a time to resume the hearing as to those. And
- 7 let me make clear about this most recent one. I want
- 8 that DVD to have -- to be edited to the current
- 9 conditions, okay? I don't want anything extraneous
- 10 on there. So what you put on there will depict
- 11 current conditions from your evidence that you
- 12 brought today.
- 13 Okay. Since you've indicated you have
- 14 the ability to edit but it takes a little while, I
- 15 think that will be long enough and I think we can do
- 16 that.
- 17 MR. LEE: Again. What is the date, Judge?
- 18 JUDGE JORDAN: Well, it will begin when
- 19 the transcript is filed. And here's what I'll do.
- 20 When the transcript is filed, I'll put out an order
- 21 setting a deadline. It will probably be a week, but
- 22 that will be your trigger. I want everyone to know
- 23 what timeline we're on. So I will take the lead on
- 24 that.
- MR. NOCE: So it's not a date a week

- 1 from today, your Honor?
- JUDGE JORDAN: That's correct, that's
- 3 correct.
- 4 MR. NOCE: Okay.
- JUDGE JORDAN: Because that's just not
- 6 gonna work for us.
- 7 MR. LEE: I am unclear about the cross-
- 8 examining myself.
- 9 JUDGE JORDAN: This would be redirect.
- 10 See, now, you've put on a witness and everybody's
- 11 cross-examined them and then raised more issues,
- 12 then you could ask the witness more questions when
- 13 everyone was done with cross.
- 14 But remembering that we only want to
- 15 hear things once, and we only need to because they're
- 16 written down in the transcript, repetition adds
- 17 nothing. It only takes away time.
- 18 If there's something that's been
- 19 addressed that you would like to clarify or explain
- 20 that you haven't already in the past two days, this
- 21 would be your chance to do it. So would you like to
- 22 do that?
- MR. LEE: Yes, I would.
- 24 JUDGE JORDAN: All right. What would
- 25 you like to tell the Commission on redirect?

```
1 MR. LEE: I don't exactly know how to
```

- 2 present this, but I would like to add the water main
- 3 repairs that I know of to our chart here with a
- 4 different color Post-It.
- JUDGE JORDAN: Okay.
- 6 MR. LEE: We have alleged that I have
- 7 complained about all those leaks, and we have done
- 8 that.
- 9 JUDGE JORDAN: But I think you're going
- 10 to be addressing that in your subdivision 11
- 11 statement, and I think I can put that together. I
- 12 mean, you're going to talk about water repairs over
- 13 how great a period of time?
- MR. LEE: Last year, a year and a half.
- JUDGE JORDAN: Okay.
- 16 MR. LEE: I believe it is -- the
- 17 complaints only show half the picture. Without the
- 18 other condition of the water system being added to
- 19 this, you know, you're only getting half of the
- 20 problem here.
- JUDGE JORDAN: Sure.
- MR. LEE: And the contention of Missouri
- 23 American is that something is wrong with me and I'm
- 24 making all this up or dreaming this water in the
- 25 neighborhood up and it has nothing to do with their

- 1 system, and I'm pretty sure if you could just add the
- 2 visual to the number of repairs just in this little
- 3 area, that it would have a great impact on you and
- 4 the Commission.
- JUDGE JORDAN: Let me first clarify. I
- 6 saw Mr. Noce shaking his head when you mentioned
- 7 dreaming something up or imagining it. Mr. Noce, do
- 8 you want to speak to that?
- 9 MR. NOCE: I'll object to Mr. Lee's
- 10 characterization of Missouri American Water's
- 11 impression of him and his complaints.
- 12 JUDGE JORDAN: That's fine. That will
- 13 do. That will address that. It is his exhibit
- 14 rather than your exhibit.
- MR. LEE: Okay.
- JUDGE JORDAN: What do you think that
- 17 will tell me as far as supporting your complaint?
- 18 MR. LEE: That will tell you that the
- 19 complaints that I've had have been justified.
- 20 JUDGE JORDAN: Okay. I can't -- I can't
- 21 see that. However, I do see that that information
- 22 will come in, in the exhibit that you will be
- 23 preparing under subdivision 11, because you'll be
- 24 setting forth the repairs as set forth in those
- 25 repair records; is that correct? And I can compare

- 1 that to this map or any other.
- 2 MR. LEE: Okay.
- JUDGE JORDAN: And is there anything
- 4 else that you would like to address on redirect that
- 5 you haven't had the chance to talk about already?
- 6 MR. LEE: The only other issue would be
- 7 the question about the manslaughter charge that
- 8 happened in 1981.
- 9 JUDGE JORDAN: And what would you like
- 10 to tell the Commission about that?
- 11 MR. LEE: I'd like to tell them that
- 12 that was -- gosh, how many years, '81, 28 years ago
- 13 and that I am not the same person today that I was at
- 14 that time. And I would like them all to know that,
- 15 yeah, I made a mistake, but now I need to move on and
- 16 have a life, you know, without constantly dredging up
- 17 my past and trying to make that who I am today.
- 18 JUDGE JORDAN: Okay. Is there anything
- 19 else that you would like to tell us on redirect that
- 20 you haven't had the chance to yet, that's been raised
- 21 on cross?
- 22 MR. LEE: I guess I would just like
- 23 everyone to know that I don't have the tools to test
- 24 the water. I don't believe in the water test anyway,
- 25 as you can tell from yesterday.

- 1 JUDGE JORDAN: Uh-huh.
- 2 MR. LEE: I have spent an enormous
- 3 amount of time trying to figure out and help solve
- 4 this problem in my neighborhood. I have received a
- 5 gauntlet of denial from this water company, and I
- 6 have damage to my health and property from water --
- 7 MR. NOCE: Objection.
- 8 JUDGE JORDAN: Sustained. Is there
- 9 anything else that you would like to tell the
- 10 Commission that was raised on cross and you have not
- 11 yet testified?
- MR. LEE: That many of these issues on
- 13 this chart persist as we speak, as we're here in this
- 14 hearing.
- JUDGE JORDAN: Okay. And is there
- 16 anything else to add to that?
- 17 MR. LEE: I guess it's my interpretation
- 18 of never having a continuous resolution to the
- 19 problem that not enough is being done on the part of
- 20 this company.
- JUDGE JORDAN: Okay.
- 22 MR. LEE: And --
- MR. NOCE: Objection. We're getting
- 24 argumentative. This is something he can address in
- 25 his closing argument. This is not factual.

```
1 JUDGE JORDAN: I'm going to sustain
```

- 2 that, and I'll ask you if there's anything, any
- 3 issues that were raised during your cross-examination
- 4 that you haven't been able to address so far on
- 5 questions that were asked you on cross-examination.
- 6 MR. LEE: I guess the issues are that I
- 7 was asked that American Water always responded when I
- 8 called.
- 9 JUDGE JORDAN: Okay.
- 10 MR. LEE: Okay. I call, make a
- 11 complaint. They send the van out to drive around the
- 12 subdivision, and then they leave, okay, which did
- 13 what to solve the problem? I make another complaint.
- 14 They send the van out, drive around, they don't see a
- 15 geyser, so they leave. This has been going on for
- 16 years.
- 17 JUDGE JORDAN: Okay. That sounds like
- 18 it pretty much fills out the explanation that you
- 19 wanted to give in response to that question on cross.
- 20 MR. LEE: Correct. Not -- I feel not
- 21 enough is being done to solve this problem.
- JUDGE JORDAN: Okay. Was there anything
- 23 asked of you on cross, anything more that you would
- 24 like to tell the Commission about that you haven't
- 25 already?

```
1 MR. LEE: I had -- I had a couple
```

- 2 things. The septic tank leak in the yard at 11334
- 3 Larimore.
- 4 JUDGE JORDAN: Okay. Would you like me
- 5 to look at one of your exhibits for that?
- 6 MR. LEE: You can if you want. It is
- 7 Exhibit 14 and Exhibit 15.
- 8 JUDGE JORDAN: 14 and 15; is that
- 9 correct?
- 10 MR. LEE: That is correct.
- JUDGE JORDAN: I have 15.
- 12 MR. LEE: 14 looks like this, if that
- 13 helps.
- 14 JUDGE JORDAN: I've got it. Okay. Now,
- 15 the question you were asked was what that you were
- 16 going to tell me about?
- 17 MR. LEE: Was -- I believe it was
- 18 something like, was this water leak attributed to a
- 19 septic tank leak.
- JUDGE JORDAN: Right. Okay. And you
- 21 wanted to explain your answer a little more fully,
- 22 and you're going to tell me something you haven't
- 23 told me already?
- MR. LEE: I am.
- JUDGE JORDAN: Okay.

```
1 MR. LEE: Or -- yeah. I was told that
```

- 2 this massive amount of water leaking from the ground
- 3 here was from a septic tank leak, and I believe this
- 4 was determined by Staff and by MAWC. And my question
- 5 is, was that reported?
- 6 JUDGE JORDAN: Well, that's not really a
- 7 statement, that's really a question. There may be a
- 8 witness that you can ask that question of, because we
- 9 have yet to have Staff's and Missouri American's case
- 10 in chief.
- 11 MR. LEE: So I would need to ask them
- 12 that instead of add that on to my...
- 13 JUDGE JORDAN: Well, asking me would do
- 14 no good.
- 15 MR. LEE: Okay. Then I would just like
- 16 to say it's my understanding that that was never
- 17 reported to anyone, and that raises questions in my
- 18 mind about what Missouri American's water -- Missouri
- 19 American Water's duty to the neighborhood and duty to
- 20 citizens is to protect them.
- 21 JUDGE JORDAN: Okay. And is that all
- 22 you had that you wanted to address as to cross?
- 23 Anything additional for cross that you wish to
- 24 address that we have not heard before?
- MR. LEE: Yeah, that's all I can do

- 1 right now.
- JUDGE JORDAN: All right. Thank you.
- 3 Then we are ready for Missouri American Water
- 4 Company's case in chief.
- 5 MR. NOCE: Your Honor, at this time I
- 6 think Missouri American would like to move for a
- 7 directed verdict. At this time we'd like to move for
- 8 a directed verdict as to all the amendments, and then
- 9 if I could address some of the individual ones.
- 10 JUDGE JORDAN: Well, I think I can
- 11 answer that pretty succinctly by denying for a few
- 12 reasons. Number one, the Commission doesn't give out
- 13 verdicts; number two, each party has the right to
- 14 file a written argument and have the Commission read
- 15 it before the Commission makes its decision. So the
- 16 procedure that you're suggesting doesn't apply in
- 17 this forum.
- MR. NOCE: Okay.
- 19 JUDGE JORDAN: So I will deny that.
- MR. NOCE: Thank you.
- JUDGE JORDAN: And are you ready to
- 22 present evidence? Do you want to break first?
- MR. NOCE: Yeah, if we could take a
- 24 five- to ten-minute break.
- JUDGE JORDAN: Let's take a ten-minute

- 1 break. We will be off the record.
- 2 (A RECESS WAS TAKEN.)
- 3 JUDGE JORDAN: We are back on the record
- 4 and we're about to begin the case in chief from
- 5 Missouri American Water Company. And counsel, you
- 6 may proceed.
- 7 MR. NOCE: Missouri American Water calls
- 8 Derek Linam.
- 9 (The witness was sworn.)
- 10 JUDGE JORDAN: Can you state your name
- 11 for the record and spell it.
- 12 THE WITNESS: Derek Linam, D-e-r-e-k,
- 13 L-i-n-a-m.
- 14 DIRECT EXAMINATION BY MR. NOCE:
- 15 Q. Mr. Linam, can you briefly describe your
- 16 education background?
- 17 A. Bachelor of science degree in civil
- 18 engineering and --
- 19 Q. Where is that from?
- 20 A. From the University of Arkansas.
- 21 O. And when was that obtained?
- 22 A. 1991, May of 1991.
- Q. And Mr. Linam, do you have any licenses
- or certificates that you've obtained since then?
- 25 A. Yes, I do.

- 1 Q. And what are those?
- A. Professional engineers license in the
- 3 state of Missouri.
- Q. Can you explain to me or explain to the
- 5 Commission what exactly does that involve?
- 6 A. It involves a two-part test, some work
- 7 experience. The first test would be as an engineer
- 8 in training along with that pass -- successful
- 9 passing of that test, you have to work for a minimum
- 10 of four years experience under a professional
- 11 engineer. You can then apply and take your
- 12 professional engineers license exam.
- Q. When did you obtain that license?
- 14 A. I believe it was in 1996.
- 15 Q. And are you -- do you have to perform
- 16 any current continuing education programs on a yearly
- 17 basis to remain current on that license?
- 18 A. Yes, we do.
- 19 Q. And what -- can you describe for the
- 20 Commission what exactly does that entail?
- 21 A. You're required to maintain a minimum of
- 22 I believe it's 30 hours every two years. The license
- 23 is a two-year license at a time, and there's 30
- 24 hours, I believe it is, of continuing education
- 25 requirements during that two-year process.

```
1 Q. And are you current on all your
```

- 2 continuing education?
- 3 A. Yes, I am.
- 4 Q. Do you have any other licenses or
- 5 certificates that you've obtained over the years?
- 6 A. Yes. I have a level A water treatment
- 7 operator's license for the state of Missouri.
- 8 Q. Can you explain to the Commission what
- 9 exactly is it that entails?
- 10 A. Again, examination process, passing an
- 11 exam, and then you receive your license from the
- 12 Missouri DNR.
- Q. When did you obtain that license?
- 14 A. I believe it was in 1998.
- Q. Any other licenses?
- 16 A. I also have a DS3, distribution system 3
- 17 operator's license for a distribution system.
- 18 Q. What does that allow you to do?
- 19 A. Same thing Mr. Simmons described
- 20 yesterday. It's knowledgeable of the distribution
- 21 system and the operation of the distribution system,
- 22 water distribution system.
- Q. And how did you obtain that license?
- A. Similar to Mr. Simmons' discussion. I
- 25 actually wasn't aware of that until he mentioned that

- 1 that was grandfathered in from 2000. I knew it
- 2 showed up, if you will, as part of the grandfathering
- 3 process as he said they were combined before.
- 4 Q. And are those all your licenses?
- 5 A. Yes, they are.
- 6 Q. And who's your current employer?
- 7 A. Missouri American Water Company.
- 8 Q. And when did you begin with Missouri
- 9 American Water?
- 10 A. May of 1991.
- 11 Q. And what position did you first hold at
- 12 Missouri American Water?
- 13 A. I was a system engineer in our
- 14 engineering department.
- 15 Q. And what does a system engineer do?
- 16 A. We're responsible for the installation
- 17 and the relocation of water mains within the
- 18 distribution system.
- 19 Q. Have you held any other positions other
- 20 than a system engineer?
- 21 A. Yes. After that I moved to our
- 22 production facilities as a plant engineer.
- Q. And what does that entail?
- 24 A. I'm responsible for the operations of
- 25 the water treatment plant and small improvement,

- 1 capital improvement projects that need to be done
- 2 within that treatment plant.
- 3 Q. Have you held any other positions?
- 4 A. Yes. I was a senior production engineer
- 5 in our system operations group.
- 6 Q. What duties are included with that job?
- 7 A. That position worked with the tank and
- 8 booster sites of our distribution system. Again,
- 9 small capital improvement projects or capital
- 10 improvement projects that occurred as well as
- 11 hydraulic modeling that I did of the distribution
- 12 system, which is a computer model program.
- 13 Q. After that position have you held any
- 14 others?
- 15 A. Yes. I was a plant superintendent for
- 16 our South County and Meramec treatment plants.
- 17 Q. Okay. Other than that position, have
- 18 you held any others?
- 19 A. Yes. I was an engineering manager after
- 20 that back in the engineering department.
- Q. Okay. And what -- what duties are
- 22 included with a position of engineering manager?
- 23 A. That position was the manager for the
- 24 group of system engineers as I described earlier for
- 25 overseeing that department and their relocation and

- 1 installation of water mains.
- Q. Would that include also the repairs of
- 3 such mains?
- A. No. After that I became the operations
- 5 manager for the construction/maintenance group.
- 6 Q. Okay. And what were your job duties as
- 7 an operations manager for that department?
- 8 A. Oversee the crews and the personnel that
- 9 maintain the distribution system, as well as install
- 10 water mains. That was a little bit of the -- the
- 11 installation -- the time in charge of the
- 12 construction group was maybe a year or less, and then
- 13 we did some reorganization and I was strictly the
- 14 maintenance side, but they were -- their -- they kind
- of go hand in hand. They're very similar.
- 16 Q. And how long did you hold that position,
- 17 from what time period?
- 18 A. Moved -- I took the construction
- 19 position I believe in the fall of '03, and the
- 20 following July I became the maintenance manager, and
- 21 that was true up until about September of last year,
- 22 September of '08.
- Q. Okay. And as operations manager, you
- 24 stated that you were in charge of overseeing the
- 25 crews that would do the repairs of the water mains;

- 1 is that correct?
- 2 A. Yes, that's correct.
- 3 Q. Okay. And are you familiar with the
- 4 recordkeeping procedure that would be included with
- 5 those repairs?
- 6 A. Yes, I am.
- 7 Q. Okay. And does that include also
- 8 investigations of potential leaks?
- 9 A. Yes, it does.
- 10 Q. And can you explain to the Commission
- 11 how exactly are leak tickets generated by Missouri
- 12 American Water?
- 13 A. Well, when we receive a call either from
- 14 a customer or -- doesn't necessary have to be a
- 15 customer, it could be a municipal official inspector,
- 16 police, whoever -- whenever we receive a call either
- into our call center or dispatch, a water company
- 18 record is initiated, documenting what the nature of
- 19 the call is.
- 20 That information is then assigned to
- 21 a -- either a troubleshooter or sometimes directly to
- 22 a crew, but essentially we go out and investigate
- 23 what the report is.
- 24 Q. Okay. What sort of information would be
- 25 recorded in those tickets?

- 1 A. They would typically record who the
- 2 caller is, if it's known, or if they had when the
- 3 call came in, when it's -- you know, who it's
- 4 assigned to or when it's assigned out at least, any
- 5 other pertinent information that might be needed by
- 6 the crew that's given by that person that called it
- 7 in.
- 8 Q. And then what does the crew do with the
- 9 tickets after they've either investigated or made
- 10 repairs based on the complaint?
- 11 A. If it's investigated and there is a
- 12 repair, they make their repair, record what was done
- 13 on the repair, and then that record is brought back
- 14 into the office and matched up with any other
- 15 paperwork that would go with that record, any office
- 16 copies of any of that paperwork.
- 17 Q. And how is it matched up?
- 18 A. There's a unique ticket number
- 19 identifier that's on the top of those tickets, and
- 20 then it's filed in our offices as well as entered
- 21 into a database.
- Q. Okay. And are you familiar with the
- 23 recordkeeping procedure of Missouri American Water
- 24 with regards to these leak tickets?
- 25 A. Yes, I am.

- 1 Q. And Mr. Linam, are you familiar with the
- 2 complaints made by Mr. Lee both in this proceeding as
- 3 well as the civil lawsuit?
- 4 A. Yes, I am.
- 5 Q. And what has been your involvement with
- 6 those complaints?
- 7 A. I have overseen the field personnel that
- 8 have gone out and done the investigation as well as
- 9 been out to the site myself inspecting conditions at
- 10 the site.
- 11 Q. How many times would you estimate that
- 12 you've been out to the site on Mr. Lee's property?
- 13 A. Maybe three to four. I can't remember
- 14 the exact date right now. Maybe three to four.
- 15 Q. And generally without getting specific
- 16 into the tickets, what sort of things has Missouri
- 17 American Water done to your knowledge to investigate
- 18 these leaks, or these alleged leaks?
- 19 A. We've done some water characteristic
- 20 analysis sampling, we have done some, what I would
- 21 call sounding, or listening on the mains with, I
- 22 would call it -- we call it a horn, but essentially a
- 23 manual listening device, and then as well as some
- 24 more extensive thorough electronic listening with our
- 25 correlating equipment.

- 1 Q. Can you estimate how many times you
- 2 believe the crews have actually responded to the
- 3 complaints by Mr. Lee since the initial complaint
- 4 filed with the Public Service Commission, if you
- 5 know?
- 6 A. At least four or five, maybe more. I
- 7 don't know for sure.
- 8 Q. And are those in addition to your -- the
- 9 times that you were out there?
- 10 A. I was there sometimes when the crew was
- 11 there and other times I was out there when they
- 12 weren't there.
- 13 Q. Okay. I'm gonna go through a few of the
- 14 records I have before you now I think in a binder
- 15 there. If I could ask you to turn to what's been
- 16 marked as Defendant's Exhibit D1.
- 17 A. Okay.
- 18 Q. I'll represent this is a multipage
- 19 document. Can you first identify this document for
- 20 the Commission?
- 21 A. Yes. This is a printout, if you will,
- 22 of screen shots of our customer information system.
- 23 Q. And what did that show in that -- the
- 24 first page?
- 25 A. The first page is showing a service

- 1 order number, when it was scheduled, when it was
- 2 closed.
- 3 Q. What was the date it was scheduled?
- 4 A. 4/21 of 2004.
- 5 Q. And is that the date that you received
- 6 that complaint?
- 7 A. Yes -- as -- I believe so. Yeah, as far
- 8 as I know, that's the date we received that
- 9 complaint.
- 10 Q. Okay. And moving to page 2, according
- 11 to that document, who is identified as a caller?
- 12 A. It was documented under Rob Lee's
- 13 account which would -- he was the caller for the
- 14 request.
- 15 Q. And according to Defendant's Exhibit D1,
- 16 how did Missouri American respond to the complaint --
- 17 or strike that. Actually, let me back up. What was
- 18 the complaint according to this document?
- 19 A. The complaint says that, "Customer says
- 20 that ever since the house next door was torn down,
- 21 there's been water noticeable in the ground. Needing
- 22 to have someone come out to investigate.
- Q. And when you say that the record was
- 24 closed, what is that referring to?
- 25 A. It's referring to -- well, the service

- 1 order -- it's referring to the field person
- 2 representative, troubleshooter went out to the site
- 3 and was not able to find any type of leak on our
- 4 system.
- 5 Q. When did they go out there? When was
- 6 this ticket?
- 7 A. According to the close date, it was
- 8 4/21, so I would say it was on the same day.
- 9 Q. And again, how is this record generated
- 10 by Missouri American Water?
- 11 A. It's an electronic service order record.
- 12 This was generated by printing the comments from
- 13 the -- it's not real conducive to, you know, printing
- 14 the screen, so we had to print the screen to show
- 15 what the comments were.
- 16 Q. Okay. So this is something that was
- 17 kept electronically?
- 18 A. Yes.
- 19 Q. And why is there not a hard copy ticket
- 20 that corresponds with this work order?
- 21 A. If there had been a leak found, the
- 22 troubleshooter would have generated one of our leak
- 23 tickets that they maintain in the maintenance
- 24 department that had that unique tracking number I was
- 25 referring to follow through with a repair and file

- 1 that in our drawer, leak database.
- 2 Q. So because there was no leak found and
- 3 nothing found, there's no actual leak ticket
- 4 generated; is that correct?
- 5 A. Correct.
- 6 Q. And was this electronic ticket generated
- 7 by Missouri American Water, or at least the
- 8 information on it generated by Missouri American
- 9 Water at or near the time the work was performed?
- 10 A. Yes. The service facility was created
- 11 at or near the time the work was performed.
- 12 Q. And the information contained on here,
- 13 is this electronic ticket kept by Missouri American
- 14 Water in the ordinary course of business?
- 15 A. Yes, it is.
- 16 Q. Then I'd ask you to turn to Exhibit D2.
- 17 A. Okay.
- 18 Q. And again, who -- can you identify this
- 19 document for the record?
- 20 A. This is a one-page document of a leak
- 21 investigation or a leak -- I should say a leak
- 22 reported actually by looks like one of our field
- 23 service representatives.
- Q. Okay. And can you kind of explain, now
- 25 that we have one of these in front of us maybe for

- 1 the Commission, how is this -- how is the information
- 2 generated onto this ticket?
- 3 A. He would have either called in or
- 4 stopped by the dispatch office and reported the
- 5 information. They wrote the street address down,
- 6 where the call came from, a phone number looks like
- 7 with the name Rob written underneath, so I believe
- 8 that would be Mr. Lee based on the address, and it
- 9 has a time stamp of when they called and time stamp
- 10 of when it was given to the troubleshooter.
- 11 Q. And is there -- is there a second page
- 12 that corresponds to this document or is it just a
- one-page document?
- 14 A. In my folder it's just one page.
- 15 Q. Okay. I don't know why yours only has
- one, but maybe I can make an extra copy?
- 17 JUDGE JORDAN: I also have only one.
- 18 And we're talking about D2; is that correct?
- MR. NOCE: Correct.
- JUDGE JORDAN: Yes, I only have one page.
- MR. NOCE: Okay. Well, I guess I have
- 22 to make a copy of this. And I apologize to the
- 23 Commission. I have a two-page document.
- 24 BY MR. NOCE:
- Q. But going back to the first page of D2,

- 1 where would this ticket be once the information was
- 2 received, what would happen with this ticket? Where
- 3 would it go, I guess?
- 4 A. It would go to the troubleshooter to
- 5 begin the investigation to determine...
- 6 Q. And again, according to D1, the one page
- 7 that everybody has in front of them, what address is
- 8 listed as the complaint?
- 9 A. The address is listed as 11119 Carl
- 10 Drive, and then, slash, McQuay Avenue.
- MR. LEE: Do you mean D1 or D2?
- 12 MR. NOCE: I'm sorry. D2. The first
- 13 page of D2. The one page that we're talking about.
- 14 BY MR. NOCE:
- 15 Q. And again, what's the date on that?
- 16 A. It was dated April 8th of 2008.
- 17 Q. Okay. And what is the complaint?
- 18 A. Water going into the basement.
- 19 Q. And who -- who does the -- this ticket
- 20 refer to?
- 21 A. It was referred to it Jerry Barklage.
- Q. And who is that?
- 23 A. Troubleshooter in our field -- field
- 24 maintenance department.
- Q. Okay. And if I could -- again, I have a

- 1 ticket. I'll show this to Mr. Lee before I present
- 2 it to the witness. If it's okay with the Court,
- 3 maybe during a break I can make a copy of this page.
- 4 JUDGE JORDAN: That's fine.
- 5 MR. NOCE: Thank you. Mr. Lee should
- 6 have a copy of that.
- 7 MR. LEE: I don't. I have one page
- 8 also.
- 9 MR. NOCE: I think it was produced to
- 10 you, though, during discovery. And I apologize to
- 11 the Court that I didn't have that.
- 12 JUDGE JORDAN: While the parties are
- 13 comparing documents, I need to mention to everyone
- 14 here that this hearing will not go past six o'clock
- 15 this evening, and the reason being our computer
- 16 system will shut down.
- 17 MR. NOCE: I have no intention of
- 18 keeping the Commission that long.
- 19 JUDGE JORDAN: I'm sure everyone here
- 20 appreciates that.
- 21 BY MR. NOCE:
- Q. Mr. Linam, I've just handed you what
- 23 will be marked, I guess, as Defendant's Exhibit D2,
- 24 the second page. Can you identify that document?
- 25 A. This is troubleshooter Jerry Barklage's

- 1 ticket that he used to write on when he received the
- 2 call about the possible leak and what he wrote on
- 3 after his investigation.
- 4 Q. Okay. And what was the result of his
- 5 investigation?
- 6 A. He did not find any leak.
- 7 Q. And what was the date of that?
- 8 A. April 8th of 2008.
- 9 Q. Moving to Defendant's Exhibit D3,
- 10 again -- strike that. If we could move back real
- 11 quickly to Defendant's Exhibit D2. Are these two
- 12 documents -- are these two documents generated by
- 13 Missouri American Water at or near the time listed on
- 14 here?
- 15 A. Yes, they were.
- 16 Q. And are these two documents kept in the
- 17 ordinary course of business by Missouri American
- 18 Water?
- 19 A. Yes, they are.
- Q. Moving on to Exhibit D3. And can you
- 21 identify for the Commission what this document is?
- 22 A. This is a record of investigation filled
- 23 out by one of my supervisors up at Lydia and McQuay.
- MR. NOCE: And if it please the
- 25 Commission, all these leak reports I assume are gonna

- 1 be filled out in the same fashion. Rather than go
- 2 through the process, is it okay if we skip that and
- 3 just discuss what was done on it?
- JUDGE JORDAN: Well, I'll tell you what,
- 5 why don't we -- why not ask the witness whether that
- 6 is, in fact, the case. Have him look at the
- 7 documents and then ask him those questions.
- 8 MR. NOCE: Okay.
- 9 BY MR. NOCE:
- 10 Q. Mr. Linam, is it your understanding that
- 11 all of these leak reports that we'll be discussing
- 12 here in D3 through D13, that all of these are
- 13 completed in the same fashion, in that a call comes
- 14 in, information is recorded, and then it's presented
- 15 to a field services representative?
- 16 A. Yes, that is typical. Again, a call
- 17 could be to our call center, a call could be directly
- 18 into our maintenance office.
- 19 Q. But the information recorded on the top,
- 20 is that what would be received from the caller?
- 21 A. Yes, the location, the address and the
- 22 other -- they're all very similar. It's all done the
- 23 same way.
- 24 O. Okay. And do you know how this ticket
- 25 or why this ticket was generated?

- 1 A. I -- we had done some investigation at
- 2 Mr. Lee's house on actually May the 20th of '08, and
- 3 I asked my supervisor to make a record of that
- 4 investigation so that we would have information on
- 5 what was done.
- 6 Q. And who was your supervisor?
- 7 A. I'm sorry. I asked the supervisor that
- 8 worked for me to fill out the record.
- 9 Q. Oh, okay. And who was the field service
- 10 representative who actually performed the work?
- 11 A. Bob Robinette.
- 12 Q. And what -- according to the ticket,
- 13 what work or what investigation was conducted on
- 14 May 20th, 2008?
- 15 A. Located and listened on the water main
- 16 with the correlating equipment, had no picture or
- 17 sound on the mains, listened on the mains on Lydia
- 18 and McQuay.
- 19 Q. And again, when we say located and
- 20 listened on the water main, what does that mean?
- 21 A. It means they made contact with either --
- 22 as Mr. Bommarito described yesterday, either on the
- 23 valves themselves or through probing rods or metal
- 24 rods making contact with the pipe and putting the
- 25 electronic equipment and/or -- the manual as well on

- 1 the -- on those valves and/or main to listen for
- 2 leaks.
- 3 Q. Okay. And what was the result of those
- 4 tests?
- 5 A. Nothing found.
- 6 Q. And again, why is this document dated
- 7 6/7/08?
- 8 A. Did not have a write-up on the date. It
- 9 was done -- Mr. Robinette had to have some surgery,
- 10 and when he returned, I asked him to make me a record
- 11 of that investigation.
- 12 Q. Okay. And was this record kept in the
- ordinary course of business by Missouri American
- 14 Water?
- 15 A. Yes, it is.
- 16 Q. Okay. And again, is this area at or
- 17 near the area depicted on Defendant's Exhibit A with
- 18 the number 3?
- 19 A. Yes, it's near No. 3, Lydia and McQuay.
- Q. Okay. Moving on to Defendant's Exhibit
- 21 D4, can you identify that document for the record?
- 22 A. This is a record of investigation by one
- of our maintenance crews dated January 15th of 2009
- 24 on Larimore Road.
- Q. Okay. Actually, before I get to that

- 1 document, I'm gonna try to go in order here. And I
- 2 apologize. I'm gonna back up a little bit. You
- 3 stated that you've had a chance to investigate this
- 4 area throughout the course of this litigation; is
- 5 that correct?
- 6 A. Yes, I have.
- 7 Q. Okay. And have you had a chance to
- 8 investigate the area on Coal Bank that is depicted by
- 9 the No. 1 on Defendant's Exhibit A?
- 10 A. Yes, I have.
- 11 Q. Okay. And what exactly have you done at
- 12 that location?
- 13 A. I have been out there to visually review
- 14 the wet spots that were presented in Mr. Lee's
- 15 photographs, as well as I believe was present the day
- 16 that -- or I was present the day that Mr. Bommarito
- 17 and then the correlating crew were there as well in
- 18 May of this year.
- 19 Q. When would -- when did you first go out
- 20 there to investigate the complaint -- or the
- 21 photographs depicted by Mr. Lee in his complaints?
- 22 A. I recall going out there April 9th, I
- 23 believe it was, of 2009.
- 24 O. And what do you recall seeing on Coal
- 25 Bank on that date?

- 1 A. There was no water puddle that existed.
- 2 Q. The area depicted in Mr. Lee's
- 3 photographs was dry; is that what you're saying?
- 4 A. Yes, the area pictured in the photograph
- 5 in the complaint was dry.
- 6 Q. Was there anything else significant
- 7 about the area depicted by Mr. Lee's photographs in
- 8 his amendment on Coal Bank that was significant to
- 9 you?
- 10 A. I observed the area that -- where the
- 11 water was puddling and the photograph was the lowest
- 12 elevation along that road. The road leading to
- 13 Larimore actually had a slight slope downward and
- 14 then from that point where the water in the picture
- 15 was puddled, Coal Bank sloped upwards, a slight
- 16 elevation there, as well as the yard I believe for on
- 17 the map, 11545 also slopes slightly downward toward
- 18 that.
- 19 Q. While you were out there on that day,
- 20 did you have a chance to look at -- or to inspect the
- 21 culvert that's depicted and noted on Defendant's
- 22 Exhibit A as No. 2?
- 23 A. Yes, I did.
- 24 Q. And what did your investigation reveal
- 25 in that area?

- 1 A. It was also dry.
- Q. And again, on that same date on April
- 3 9th, did you have the chance to investigate the area
- 4 near the intersection of McQuay and Larimore where
- 5 the storm drain is located?
- 6 A. Yes, I did. I looked at the storm drain
- 7 that was -- ran from west to east or northwest to
- 8 southeast on Larimore at McQuay there.
- 9 O. And is that the storm drain we've heard
- 10 Mr. Lee refer to that runs under Larimore and then
- 11 comes out at Lydia?
- 12 A. Yes, it's by sticker No. 3 on your map.
- 13 Q. Okay. And what did your investigation
- on that date, what did you observe?
- 15 A. There was water pooling in the bottom of
- 16 the inlet or the -- I don't know if you'd call it an
- 17 inlet, or of the ditch on the west side -- north side
- 18 of Larimore, northwest side of Larimore. I noticed
- 19 that the -- that ditch was actually lower in
- 20 elevation than the flow line of the pipe going across
- 21 the road, so there was water that just pooled in the
- 22 bottom that couldn't escape through the flow line of
- 23 the pipe.
- 24 O. Were you able to make any conclusions as
- 25 to why that water was pooling in there other than...

- 1 A. It just appeared to be poor drainage,
- 2 poor setup with having -- of flow line of the ditch
- 3 lower than the flow line of the pipe going from one
- 4 side of the road to the other.
- 5 Q. Did you observe any flow of water into
- 6 that storm drain while you were there?
- 7 A. I didn't observe any water entering into
- 8 that ditch drain there. There's two pipes that come
- 9 there. They were completely dry.
- 10 Q. Okay. Going back to Defendant's Exhibit
- 11 D4 that's in front of you, again, can you identify
- 12 this record for the Court?
- 13 A. Yes. Again, this is a record of a leak
- 14 investigation by one of our maintenance crews on
- 15 January 15th of 2009 on Larimore Road.
- 16 Q. Okay. This ticket looks a little bit
- 17 different than D1 and D -- from D2 and D3 that we've
- 18 previously talked about, so let's go ahead and
- 19 explain. Can you explain to the Commission how this
- 20 record is generated?
- 21 A. This was generated by an actual repair
- 22 crew that went up to do the investigation as opposed
- 23 to a troubleshooter or the correlating crew. It's
- 24 actually the second page of -- it's actually a
- 25 document that would be utilized if we actually found

- 1 a leak, and so because that crew probably didn't have
- 2 any other tickets on their truck, he went ahead and
- 3 utilized the side of the page that would be utilized
- 4 if we actually had some repair that would have been
- 5 made.
- 6 Q. And can you identify from this document
- 7 what the investigation consisted of?
- 8 A. They listened on the valves and on the
- 9 service T heads and the fire hydrants, the new PVC
- 10 main along Larimore Road from Aspen Woods Drive
- 11 eastward to the railroad tracks.
- 12 Q. So would that -- if I could, hold on one
- 13 second. So does that area include the areas depicted
- on Defendant's Exhibit A which would include 4, 5, 6
- 15 and 7?
- 16 A. Yes, essentially. Four looks like it's
- 17 right on the railroad tracks, and according to this,
- 18 they went up to what I'll call the western or
- 19 southern side of the railroad tracks.
- 20 Q. Okay. And who was the person who signed
- 21 this ticket?
- 22 A. Kevin Dorn.
- Q. And who is that?
- 24 A. He's one of our maintenance department
- 25 lead man. It's a union position in charge of the --

- 1 that leads the construction -- or the maintenance
- 2 crew out in the field.
- 3 Q. Okay. And what, if any, damage was
- 4 reported, or leaks?
- 5 A. None was noted.
- 6 Q. And was this record generated by
- 7 Missouri American -- or strike that. I don't know if
- 8 I asked you the date. What was the date that this
- 9 document was -- or that this work was performed?
- 10 A. January the 15th of 2009.
- 11 Q. And was this record generated in the
- 12 ordinary course of business by Missouri American
- 13 Water?
- 14 A. Yes, it was.
- 15 Q. And moving on to Defendant's Exhibit D5,
- 16 will you identify that ticket for the Commission?
- 17 A. This is a leak investigation generated
- 18 by a -- or a ticket generated at 11338 Larimore Road.
- 19 O. And is that the -- is that near the area
- 20 depicted on Defendant's Exhibit A that's numbered 6?
- 21 A. Yes.
- Q. And that's the address 11338 which is
- 23 the address next to 11334; is that correct?
- A. Yes, it is. I can't see the 4.
- Q. Just to make sure.

- 1 A. Yes, it is.
- 2 Q. Okay. And again, this address is on the
- 3 opposite side of the street as the main; is that
- 4 correct?
- 5 A. That's correct.
- 6 Q. What was the complaint on this,
- 7 according to this ticket?
- 8 A. It was a request to check for a service
- 9 line leak.
- 10 Q. And what did the crew do?
- 11 A. They investigated at the site for a
- 12 service line leak. They looked at the meter and the
- 13 meter was registering water.
- Q. What does that mean?
- 15 A. Well, the meter obviously turns whenever
- 16 there is flow -- whenever there is usage or flow
- 17 occurring in the service line, and so the meter dial
- 18 will be spinning, and so they looked at that meter to
- 19 observe that it was turning, which they then
- 20 concluded or noted that water -- there was either
- 21 usage or a toilet leaking inside the house.
- Q. And according to that record, what
- 23 problems did they believe that was causing at this
- 24 address?
- 25 A. Well, they noted that the leak at the

- 1 road where they saw the water, it notes here it is in
- 2 line with the septic tank. If the toilet was
- 3 leaking, it may be filling the septic.
- 4 Q. What was the date that the call was
- 5 received?
- 6 A. November 21st of 2006.
- 7 Q. And according -- I know it says to turn
- 8 it over, but according to the initial record on this
- 9 page, when was the response by Missouri American
- 10 Water?
- 11 A. November 23rd of 2006.
- 12 Q. Did Missouri American Water conduct any
- 13 follow-up investigations?
- 14 A. Yes, they did.
- 15 Q. And what was that? What and when was
- 16 that done?
- 17 A. What was done was -- well, on 11 -- on
- 18 November the 28th -- actually it was -- the ticket
- 19 was held to say and go verify that there was no leak,
- 20 or if there was one on the surface because the
- 21 troubleshooter wasn't able to conclude for sure, so
- 22 the maintenance crew was actually sent, I believe,
- 23 because when we went out on the 28th, it was signed
- 24 by one of our maintenance lead people.
- 25 He noted that there was water running in

- 1 the front yard of 11338 to the drainage ditch, and he
- 2 says it's coming from what I believe is the septic
- 3 tank which is probably damaged or not working. The
- 4 small valve on the meter was constantly moved. Went
- 5 into the basement of the building which is served by
- 6 one water meter, turned off stop and waste valve and
- 7 meter stopped registering usage.
- 8 Therefore he concluded the leak was
- 9 inside the house and assumed it was probably the
- 10 toilet. Did not leave the service line notice
- 11 because it would be the customer's responsibility to
- 12 pay for the repair.
- 13 Q. And with a leaking toilet, what kind of
- 14 problems can result in that in your experience?
- 15 A. Well, you can have obviously water
- 16 continuing to flow through the house and out the
- 17 drain, in this case having the septic system that
- 18 would be flowing into the septic system [sic].
- 19 Q. And was that record -- I know there's
- 20 multiple dates on this, but was that record generated
- 21 at or near the dates that are listed?
- 22 A. Yes, it is.
- Q. Okay. And is that record kept by
- 24 Missouri American Water in the ordinary course of
- 25 business?

- 1 A. Yes, it is.
- Q. Moving on, can you identify Defendant's
- 3 Exhibit D6, which is a multiple-page document. And
- 4 if you can, explain what the relation is between
- 5 these documents?
- 6 A. Okay. This is a call from 11338
- 7 Larimore Road on April 2nd of '07. It is a -- it
- 8 came in through our call center and it's a report --
- 9 the homeowner's calling to report water coming up in
- 10 the back yard in several spots. He states it's clear
- 11 water and states this is a lot of water which is
- 12 bubbling up from the ground. "Customer states
- 13 tenants are not home." And so we went out to do some
- 14 investigation.
- Q. And what was the result of those
- 16 investigations?
- 17 A. It appears to be groundwater, or at
- 18 least not our water because there's no mains in the
- 19 area.
- Q. Okay. Where's the main in relation to
- 21 this address, real quick?
- 22 A. The main is on the north side of
- 23 Larimore Road, and this house is, again, on the south
- 24 side, and the report of the water was actually in the
- 25 back yard of that house.

```
1 Q. And have you been to this property?
```

- 2 A. Yes, I have.
- 3 Q. Okay. And can you describe it? What is
- 4 the elevation from Larimore to this property?
- 5 A. The home sits above the -- above
- 6 Larimore Road. It's higher in elevation than
- 7 Larimore Road.
- 8 Q. Does that elevation help explain why
- 9 Missouri American Water would conclude that this
- 10 appears to be groundwater in the backyard? Did that
- 11 have any significance to that conclusion?
- 12 A. The location of the main, yeah, the fact
- 13 that the water's in the backyard and difference in
- 14 elevation would have some impact on that.
- 15 Q. How would water coming from the main
- 16 located across the street, what would it look like if
- 17 it were causing problems in the back yard at higher
- 18 elevation? What would have to -- what would have to
- 19 happen for that to be the case?
- 20 A. You'd need a boat to be able to go down
- 21 Larimore Road. The water level on Larimore would
- 22 have to be above the elevation of the ground in the
- 23 backyard to be able to push water up into the
- 24 backyard like that.
- 25 Q. And Mr. Linam, were these records -- I

- 1 know the first one -- again, the first one on this
- 2 page, or D6, was that record part of these electronic
- 3 records we talked about with reference in D1?
- 4 A. Yes. The electronic record was reduced
- 5 to a paper ticket that was utilized by the
- 6 maintenance department.
- 7 Q. And all three of these tickets are all
- 8 dated April 2nd, 2007; is that correct?
- 9 A. That is correct.
- 10 Q. And they all have the address of 11338
- 11 Larimore, correct?
- 12 A. Correct.
- 13 Q. And are these records kept in the
- 14 ordinary course of business by Missouri American
- 15 Water?
- 16 A. Yes, they are.
- 17 Q. Moving on, I think we can skip D7.
- 18 Moving on to D8, this is the last one I'll have at
- 19 this address. Can you identify this document for the
- 20 Commission?
- 21 A. This is a leak report investigation
- 22 ticket generated by Missouri American Water.
- Q. What is the date on this address -- of
- 24 this ticket?
- 25 A. December 12th of 2008.

- 1 Q. And according to this ticket, where is
- 2 the complaint of a potential leak?
- 3 A. 11334 Larimore Road.
- 4 Q. That's the same address we've been
- 5 discussing; isn't that correct? Or this is next
- 6 door?
- 7 A. The next one to the west, yes.
- 8 Q. Okay. And where is the alleged leaks --
- 9 where is the leak claiming to be occurring, claiming
- 10 to be?
- 11 A. It says, "Leak near the driveway."
- 12 Q. And who's listed as the individual
- 13 reporting the leak?
- 14 A. Myself and Mr. Lee.
- 15 Q. Do you know why you're listed on there?
- 16 A. I believe I received this via an e-mail
- 17 that was generated by Mr. Lee to the Commission, and
- 18 I contacted our dispatcher from there and asked them
- 19 to create the ticket to go investigate.
- Q. Okay. And when was that investigation
- 21 conducted?
- 22 A. December 13th of 2008.
- Q. Okay. Who conducted the investigation
- 24 according to this ticket?
- 25 A. One of our troubleshooter, Bob Koddloski

- 1 [phonetic spelling].
- Q. What was the result?
- 3 A. It appeared to be groundwater not our
- 4 water.
- 5 Q. Mr. Koddloski, did he perform any other
- 6 tests at the address at that date?
- 7 A. He did. He notes no chlorine, so he did
- 8 a field test for the presence of chlorine.
- 9 Q. And again, what was the result of that
- 10 test?
- 11 A. No chlorine found.
- 12 Q. And was this record generated at or near
- 13 the time of December 13th, 2008, by Missouri American
- 14 Water?
- 15 A. Yes, it was.
- 16 Q. And was this record kept in the ordinary
- 17 course of business by Missouri American Water?
- 18 A. Yes, it is.
- 19 Q. I'm gonna go ahead and skip Defendant's
- 20 Exhibit D9 because that's repetitive. Can you
- 21 identify for the Commission, though, what Defendant's
- 22 Exhibit D10 is?
- 23 A. It's a letter from Missouri American
- 24 Water to the customer at 11334 Larimore Road.
- Q. Okay. And according to this letter,

1 what -- what did Missouri American Water inform the

- 2 customer of?
- 3 A. That we had visited the property on
- 4 December 26th and read his meter. "During our visit
- 5 we found movement on the water meter which may
- 6 indicate that water was being used or that there is a
- 7 leak at the property. We were unable to determine if
- 8 there's a service line leak due to a toilet running
- 9 full blast, and we found that the stop and waste
- 10 valve would not hold. The repairs to the stop and
- 11 waste valve will need to be completed before we can
- 12 determine if there is a service line leak."
- 13 Q. Okay. And maybe -- and I apologize to
- 14 the Commission. Maybe I should back up. I was
- 15 thinking that that was gonna be repetitive, but I
- 16 forgot what was done on 12/26, so maybe we do need to
- 17 back up to D9 and describe what work was performed on
- 18 that date. Can you identify the multipage document
- 19 that's noted as Defendant's Exhibit D9?
- 20 A. Yes. It's the service order that was
- 21 generated. The customer generated a request to come
- 22 inspect the meter and check for leaks because the
- 23 customer said they had a high bill.
- 24 O. And again, what did Missouri American
- 25 Water do?

- 1 A. We went out to do the investigation.
- 2 That's when we found the stop and waste valve
- 3 wouldn't hold on. We couldn't determine if there was
- 4 a leak on the service line, and then that's when we
- 5 generated the letter back to the customer.
- 6 Q. Okay.
- 7 JUDGE JORDAN: Can you just give us a
- 8 brief explanation of what that means, "stop and waste
- 9 valve does not hold"?
- 10 THE WITNESS: The stop and waste valve
- 11 is the valve right before your meter, and typically
- 12 it would be used to change your meter. It's inside,
- 13 you know -- it's inside the basement right below the
- 14 meter, and you would shut that off. That would
- 15 obviously isolate any additional flow going into the
- 16 house, so if we were looking for a leak between the
- 17 house and back to our main out in the yard, that
- 18 would stop any flow.
- 19 It's also if there was a leak past that
- 20 and we closed it off, the meter should stop spinning
- 21 if there was a leak going on inside. So it helps us
- 22 isolate if it's inside or outside.
- JUDGE JORDAN: But it didn't work in
- 24 this case?
- 25 THE WITNESS: Correct, it would not

- 1 hold.
- JUDGE JORDAN: It does not work.
- THE WITNESS: It would not hold, and
- 4 it's the customer's responsibility to have it
- 5 repaired.
- 6 MR. NOCE: Thank you, your Honor, for
- 7 that clarification.
- 8 BY MR. NOCE:
- 9 Q. And again, we notified the customer of
- 10 this problem on what date?
- 11 A. We sent a letter on January 6th --
- 12 Q. Okay.
- 13 A. -- of 2009.
- 14 Q. And have you had a chance to review
- 15 service records for this account to determine whether
- or not we've received any follow-up from the customer
- 17 at that address?
- 18 A. Yes. I did not see any notifications or
- 19 requests to come back out and check after repairs
- 20 were made.
- 21 Q. Have you received any further complaints
- 22 of leaking for that address? No leaks?
- A. Not to my knowledge, no.
- Q. Moving to Defendant's Exhibit D10.
- 25 A. That was the letter.

```
1 Q. I'm sorry. Dl1, can you identify this
```

- 2 record for the Commission?
- 3 A. Again, a record of a leak investigation
- 4 for 11339 Larimore Road.
- Q. And is 11339, is that the address that's
- 6 noted on Defendant's Exhibit A with, I believe it's
- 7 No. 7?
- 8 A. Yes, it is.
- 9 Q. Okay. And what was the result of that
- 10 investigation?
- 11 A. There was a comment by the
- 12 troubleshooter that did the investigation that there
- 13 was a new main installed and there's a possible main
- 14 leak that needs to be checked out and needed to have
- 15 a construction crew up there to dig out them to fix
- 16 if it was leaking.
- 17 Q. And who was the troubleshooter?
- 18 A. Larry Zipway [phonetic spelling].
- 19 Q. And what was the date that that
- 20 investigation was conducted?
- 21 A. February 9th, 2007.
- Q. And again, this is a multipage document.
- 23 How can you tell that these tickets, these three
- 24 pages are related?
- 25 A. Well, again, they have a unique

- 1 identifier number. The first one has a printed
- 2 number stamped on it. The second document --
- 3 Q. What is that number for the record?
- 4 A. 169356.
- 5 Q. And then turning to page 2, again, how
- 6 do you -- does that number appear on that record?
- 7 A. Yes. That's -- this is what starts out
- 8 as a blank copy that the field crew would use to go
- 9 make the repair and they write the same ticket number
- 10 in the box at the top of the page.
- 11 Q. Okay. And what is the date of that --
- 12 of this ticket?
- 13 A. February 10th, 2007.
- 14 Q. And what was done according to this
- 15 ticket by Missouri American Water?
- 16 A. We sent a crew up there and they --
- Q. Where?
- 18 A. I'm sorry. Up to the site, which is
- 19 referenced as -- be on the north side of Larimore
- 20 Road about 250 feet east of the centerline of Aspen
- 21 Woods Drive. And we --
- Q. Is there an address listed on there?
- 23 A. Yes. I'm sorry. 11339 Larimore Road.
- Q. All right. Go ahead. I'm sorry.
- 25 A. And the lead man for the crew that was

- 1 doing the work noted on here that he had the
- 2 correlators up there and could not find a leak.
- 3 Q. Was there any follow-up investigation at
- 4 this address regarding this complaint?
- 5 A. Yes. The miscellaneous -- the ticket
- 6 was kept in the maintenance office, and it was --
- 7 again, that would be the third page still with ticket
- 8 No. 169356 where the maintenance crew went up six
- 9 days later, looks like on February 16th of 2007.
- 10 Again, it was Kevin Dorn. "No sound on service lines
- 11 noted. Small amount of water in the ditch line, but
- 12 no chlorine."
- 13 Q. What does it mean again when there's no
- 14 sound on the service line, what does that mean they
- 15 did?
- 16 A. Again, they were listening -- they
- 17 utilized the services to -- at the connection point
- 18 to the main as well as to listen to the sewer to see
- 19 if there was any evidence of a leak.
- Q. And what was the date of that
- 21 investigation?
- 22 A. February 16th of 2007.
- 23 Q. So for this particular leak, Missouri
- 24 American Water was out there on three separate
- 25 occasions to investigate this leak; is that correct?

- 1 A. That's correct.
- Q. Moving to Defendant's Exhibit D12, can
- 3 you identify that document for the record?
- A. A report of -- generated by Missouri
- 5 American of a leak -- a possible leak at 11347
- 6 Larimore Road.
- 7 Q. And what date was that?
- 8 A. That was dated October the 14th of 2008.
- 9 Q. And according -- again, this is a
- 10 two-page record. Turning to the second page, what
- 11 was the result of the investigation conducted?
- 12 A. States that there was nothing found.
- 13 "Water in the driveway is the customer's sump pump."
- Q. And what was the date of that
- 15 investigation?
- 16 A. I believe it to be the same date, but I
- don't see the actual date on the handwritten part
- 18 that the troubleshooter filled out.
- 19 Q. What's the date of the time stamp? Or
- 20 I'm sorry.
- 21 A. On the first page of it is October 14th
- 22 of 2008.
- Q. And was that not the date, then, of the
- 24 result of the investigation at the bottom?
- 25 A. Yes, it is. "Water from sump pumps."

- 1 I'm sorry.
- O. What's the date on that?
- 3 A. October 14th of 2008.
- Q. Okay. And again, are these -- and when
- 5 I ask you this, I'm gonna refer to Defendant's
- 6 Exhibit D10, 11 and 12 because I forgot to ask you
- 7 for those. Have those records that we've been
- 8 discussing, have all of these been generated by
- 9 Missouri American Water in the ordinary course of
- 10 business?
- 11 A. Yes, they are.
- 12 Q. Okay. And again, you know that this --
- 13 these two pages of Defendant's Exhibit D12 are
- 14 related how?
- 15 A. By their unique identifier number, which
- 16 is 185792.
- 17 Q. Move on to Defendant's Exhibit D13.
- 18 Where's the reported -- let me start off, where is
- 19 the street address listed on the top as the location
- 20 of the reported leak?
- 21 A. 11119 Carl Street.
- Q. Okay. And what is the date of this
- 23 ticket or this complaint?
- 24 A. April 7th of 2008.
- Q. Okay. Where is the actual -- in the

- 1 other "remarks" section, though, what is the location
- 2 of the water reported flooding or coming from?
- 3 A. It says water is coming from the corner
- 4 of Aspen Woods and Larimore.
- 5 Q. And what did Missouri American Water do
- 6 according to this?
- 7 A. The troubleshooter went to the site to
- 8 investigate and found -- nothing found. Didn't find
- 9 a leak.
- 10 Q. And what does NF stand for?
- 11 A. Nothing found.
- 12 Q. And who was the troubleshooter that did
- 13 this?
- 14 A. Keith Bacon.
- Q. And what was the date of this
- 16 investigation by the troubleshooter?
- 17 A. April 7th of 2008.
- 18 Q. So the same date that the call came in;
- 19 is that correct?
- 20 A. Yes.
- Q. And who was reported as the caller?
- 22 A. It came in through our call center, so
- 23 it's noted as the FRCC, our call center, but it has
- 24 in the phone -- a phone number listed and it has Rob
- 25 written underneath it, and I believe that to be

- 1 Mr. Lee.
- Q. Okay. And if I could, we'll move on to
- 3 Defendant's Exhibit E1. Excuse me. Actually, I'm
- 4 gonna back up before we go to the photographs.
- 5 During your investigation of the area on
- 6 April 9th of '09, did you have an opportunity to
- 7 investigate anywhere along Larimore on that date?
- 8 A. Yes. I went along Larimore from the
- 9 railroad track area, westward to Aspen Woods.
- 10 Q. Okay. And what did you observe on that
- 11 date? And why don't we start along the north side of
- 12 Larimore.
- 13 A. There was some water in the ditch,
- 14 drainage ditch areas, and I also noted that the
- 15 culverts under the driveways were packed full of
- 16 leaves and creating a poor drainage situation.
- Q. What about the drainage ditch to the
- 18 south of Larimore, did you note anything during your
- 19 investigation on that date?
- 20 A. I believe I noted there was still some
- 21 water present there as well.
- Q. Were you able to conclude where that
- 23 water was coming from?
- A. No. I went on up Larimore a little bit
- 25 more to the west. I noticed a black corrugated metal

- 1 pipe coming perpendicular from the property
- 2 terminating into the drainage ditch a little bit west
- 3 of that, probably at either 11320 or 11306 Aspen
- 4 Woods, based on the map here.
- 5 Q. And that's the south side --
- 6 A. That was on the south side of Larimore,
- 7 that's correct.
- 8 Q. Okay. And also before we get to the
- 9 photographs, you stated that you were out there I
- 10 believe when Mr. Bommarito was out there in May?
- 11 A. On the first visit he was out there, on
- 12 May the 1st.
- 13 Q. Okay. And on May the 1st did you have
- 14 ab opportunity to investigate the area along Aspen
- 15 Woods near the church there that we've been
- 16 discussing and I think is marked as Defendant's
- 17 Exhibit A -- or on Defendant's Exhibit A as the
- 18 No. 8.
- 19 A. Yes.
- 20 Q. Okay. Do you recall anything from your
- 21 investigation of that area that was significant?
- 22 A. The -- right behind at the back of the
- 23 building there was saturated ground, appeared to be
- 24 flowing, seeping out across the sidewalk and over
- 25 into the street area, I guess. And there was a -- I

- 1 don't know, a cistern or whatever, they had a pallet
- 2 on top of it in that area.
- Q. What about the church parking lot, were
- 4 you able to determine -- make any determinations as
- 5 to how it -- any run-off water escaped from there?
- 6 A. The church has a large parking lot in
- 7 the back of the building, and it all runs to a drain
- 8 that then appears to come eastward over to Aspen
- 9 Woods. The flow path appears to be collected on the
- 10 parking lot and then eastward over to Aspen Woods.
- 11 Q. And where did that drain appear to empty
- in relation to the number, the 8 that's the number on
- 13 there?
- 14 A. Right about where No. 8 is.
- 15 Q. Now, moving to Defendant's Exhibit E1
- 16 through E10. We'll start with E1. Can you identify
- 17 this document for the Court?
- 18 A. E1.
- 19 Q. Yes.
- 20 A. It's a photograph that I took I think in
- 21 response to some of the filings that Mr. Lee had
- 22 made. I can't remember if they were supplemental
- 23 filings out along Aspen Woods.
- 24 Q. And do you know where this photo was
- 25 taken, what address?

- 1 A. I think it was in the vicinity of 11307.
- Q. Okay. And is that noted by the number
- 3 9, I believe, 9A?
- 4 A. Yes, it is.
- 5 Q. Okay. And do you recall when this
- 6 photograph was taken?
- 7 A. May -- sometime in May. I think May
- 8 19th.
- 9 Q. Okay. And what are you trying to depict
- 10 by this photograph?
- 11 A. I was trying to represent the same area
- 12 that Mr. Lee had in previous photographs showing
- 13 water in that curb line that is now dry.
- 14 Q. If we could move on to Defendant's
- 15 Exhibit E2, where is this photograph taken?
- 16 A. It's the same area of the first
- 17 photograph. I was looking to the north. This one's
- 18 looking to the south.
- 19 Q. Okay. And again, was this taken the
- 20 same date?
- 21 A. Yes, it was.
- Q. Okay. I'm sorry. I didn't ask you this
- 23 on E1. Does that photograph fairly and accurately
- 24 depict the area in front of 11307 on May 19, 2009?
- 25 A. Yes.

```
1 Q. Same question for E2?
```

- 2 A. Yes.
- 3 Q. Moving to E3. Again, can you identify
- 4 where this photograph was taken and when?
- 5 A. May 19th in the same area as No. 9.
- 6 Q. And what was the significance of this
- 7 photograph?
- 8 A. Making sure I captured all of the curb
- 9 line along that area.
- 10 Q. And was this -- does this photograph
- 11 fairly and accurately depict that area in front of
- 12 11307 Aspen Woods --
- 13 A. Yes.
- 14 Q. -- as of May 19th?
- 15 A. Yes.
- JUDGE JORDAN: What year, please?
- 17 THE WITNESS: 2009, this year.
- 18 BY MR. NOCE:
- 19 Q. Sorry. Moving on to E4, can you
- 20 identify that document for the Commission, please?
- 21 A. That is a photograph I took out in front
- of 11363 Aspen Woods.
- Q. Okay. And is that located anywhere near
- 24 any of the numbers depicted on Defendant's Exhibit A?
- 25 A. Yes, near No. 11.

- 1 Q. And when was this photograph taken?
- 2 A. Same day, May 19th, 2009.
- 3 Q. And what was the purpose of this
- 4 photograph?
- 5 A. Again, I was taking a picture of the
- 6 area that was previously submitted by Mr. Lee as
- 7 being wet, and showing the dry spot there in front of
- 8 the mailbox.
- 9 Q. And does this photograph fairly and
- 10 accurately depict the area in front of 11363 Aspen
- 11 Woods on or about May 19, 2009?
- 12 A. Yes.
- Q. Moving on to Exhibit E5, can you
- 14 identify that for the Commission, please?
- 15 A. It's a second photograph of the same
- 16 area in front of 11363.
- 17 Q. And what was the date of that
- 18 photograph?
- 19 A. Same date, May 19th, 2009.
- 20 Q. And does that fairly and accurately
- 21 depict that area as of that date?
- 22 A. Yes.
- Q. Moving on to E6, was this the same area?
- 24 A. Yes, it is.
- Q. This was taken the same date?

- 1 A. Yes, it was.
- Q. And does this photograph fairly and
- 3 accurately depict that area as of that date?
- 4 A. Yes, it does.
- 5 MR. LEE: Objection. Why do we have
- 6 three photographs of the same spot on the same day?
- 7 MR. NOCE: I think he actually is
- 8 backing up here.
- 9 THE WITNESS: I think I was trying to
- 10 show farther behind the white car in the adjacent
- 11 property. If I recall, there might have been a wet
- 12 spot there too in the previous photo submitted, so I
- 13 wanted to try to capture everything.
- 14 BY MR. NOCE:
- 15 Q. Okay. Thank you. And moving on to
- 16 Defendant's Exhibit E7.
- 17 JUDGE JORDAN: I will overrule the
- 18 objection.
- 19 MR. NOCE: Oh, I'm sorry, Judge.
- JUDGE JORDAN: That's okay.
- 21 BY MR. NOCE:
- Q. Moving on to E7, can you identify that
- 23 document for the record?
- A. A photograph taken by me on the same day
- 25 backing up to be in front of 11371 Aspen Woods Drive.

```
1 Q. Okay. And does this photograph -- what
```

- 2 was the purpose of this photograph?
- A. Again, to record the dry curb line that
- 4 had been submitted in previous photographs.
- 5 Q. And does this photograph fairly and
- 6 accurately depict the area in front of 11371 Aspen
- 7 Woods?
- 8 A. Yes, it does.
- 9 Q. Again, is this all near the 11 that's
- 10 marked on Defendant's Exhibit A?
- 11 A. Yes, it is.
- 12 Q. And moving on to Defendant's Exhibit E8,
- 13 can you identify this document for the Court?
- 14 A. Second photograph for 11371.
- Q. Okay. And when was that taken?
- 16 A. May 19th of 2009.
- 17 Q. And does that photograph fairly and
- 18 accurately depict the area?
- 19 A. Yes, it does.
- 20 MR. LEE: Could I just ask for
- 21 clarification? We have five photos of the same spot.
- 22 Am I seeing this wrong? What are -- what are you
- 23 trying to show?
- MR. NOCE: This is in response to if you
- 25 look at Plaintiff's Exhibit D8 -- or 10A, I'm sorry,

- 1 you'll see that there's multiple puddles that he's
- 2 trying to depict in this cul-de-sac, and it's our
- 3 contention that Mr. Linam was trying to capture the
- 4 entire cul-de-sac through these series of photographs
- 5 and cover the entire area that Mr. Lee is alleging
- 6 where leaks are occurring.
- 7 JUDGE JORDAN: Okay. I just had that
- 8 exhibit. What is it? Is that 10?
- 9 MR. NOCE: It's 10A.
- 10 JUDGE JORDAN: Okay. I see. So you're
- 11 telling me what, that what you're trying to do with
- 12 this series of photographs is match the photographs
- 13 of 10A -- let's see. I see a couple of them. I see
- 14 two of them. I see two with the silver truck.
- MR. NOCE: Correct.
- JUDGE JORDAN: On the first page, are
- 17 those some of the photographs you're referring to?
- 18 MR. NOCE: These photographs are being
- 19 offered to dispute the alleged -- the allegations
- 20 that there's a leak, and if you follow the series,
- 21 it's continuing to back up to show more area around
- 22 the circle.
- JUDGE JORDAN: Okay. Well, let me take
- 24 a look.
- 25 MR. LEE: My question is, am I missing

- 1 something? These appear to be at least four
- 2 photographs of the same spot in the street.
- 3 MR. NOCE: I think if the Commission
- 4 will --
- 5 JUDGE JORDAN: Okay. As we go through
- 6 the photograph, the foreground changes a little bit
- 7 differently. It changes a little bit.
- 8 MR. LEE: Okay.
- 9 JUDGE JORDAN: Is that the clarification
- 10 you sought?
- 11 MR. LEE: I'm fine.
- JUDGE JORDAN: Okay. Thank you.
- 13 BY MR. NOCE:
- Q. Mr. Linam, can you identify for the
- 15 Commission Defendant's Exhibit E9?
- 16 A. Yes. It's a photograph in front of 1360
- 17 Aspen Woods, which is on the opposite side of the
- 18 street from where the previous photographs were
- 19 taken.
- 20 Q. Okay. And is that also near Exhibit
- 21 No. 11 on Defendant's Exhibit A?
- 22 A. Yes, it is.
- Q. And what were you attempting to show in
- 24 that photograph?
- 25 A. That there was -- there is still water

- 1 in front of the mailbox, but it is less and drying up
- 2 than the amount -- than the water that was provided
- 3 in Mr. Lee's photograph.
- 4 JUDGE JORDAN: Are you referring to this
- 5 as Exhibit 11?
- 6 MR. NOCE: No. I believe it's
- 7 Exhibit 10C. Is that the photograph you're referring
- 8 to? And the exhibits should be in front of you. I
- 9 don't have his in here, but they should be...
- 10 JUDGE JORDAN: I see. I've got it.
- 11 Thank you.
- MR. NOCE: But, yeah, if you want to go
- 13 ahead and take a look and just confirm that that's
- 14 the area that you're trying to depict. And I'm
- 15 referring to the bottom picture on 10C, I believe.
- 16 THE WITNESS: Yes, that's what I was
- 17 trying to depict.
- 18 JUDGE JORDAN: I see that.
- 19 BY MR. NOCE:
- Q. Okay. And Defendant's Exhibit E10, does
- 21 that -- excuse me, does Defendant's Exhibit E9 fairly
- 22 and accurately depict that area it front of 1360
- 23 Aspen Woods?
- 24 A. Yes, it does.
- Q. And moving on to Defendant's Exhibit

- 1 E10, can you identify that record for the Court, or
- 2 for the Commission.
- 3 A. It's a close-up of the same area in
- 4 front of that address, 1360 Aspen Woods, showing the
- 5 smaller-sized puddle.
- 6 Q. And when was that photograph taken?
- 7 A. May 19th, 2009.
- 8 Q. And does that photograph fairly and
- 9 accurately depict the area in front of 1360 Aspen
- 10 Woods on that date?
- 11 A. Yes, it does.
- 12 Q. Mr. Linam, you've been present in the
- 13 court over these past few days and heard the
- 14 testimony of all the witnesses; is that correct?
- 15 A. Yes, I have.
- 16 O. If I could ask you to turn to
- 17 Defendant's Exhibit H. Can you identify what that
- 18 document is?
- 19 A. It's a summary table of the
- 20 investigations that have been done, site visits and
- 21 investigations of possible leaks in the area as part
- 22 of this complaint.
- 23 Q. And does that fairly and accurately list
- 24 the summary of the investigations conducted by
- 25 Missouri American Water in the evidence that you've

- 1 heard both today and yesterday? Have you had a
- 2 chance to review that document?
- 3 A. Yes, I believe it does.
- 4 MR. NOCE: At this time I don't have any
- 5 further questions. I would ask that several exhibits
- 6 be admitted into evidence, and I guess I can go
- 7 through them. I guess it would be Exhibit D1, D2.
- 8 And I'll get the second page during a break. D3, D4,
- 9 D5. I think we skipped D6. Or I think we did D6.
- 10 We skipped D7, so I'd ask that D6 be admitted. We
- 11 skipped D7. No, I apologize. We did go over D7.
- 12 That was the one we went back to.
- 13 MR. LEE: Are those in the binder here?
- 14 D like dog, right?
- 15 MR. NOCE: Yes. D8, D9, D10, D11, D12,
- 16 D13, and then E1 through 10, and H, and ask that all
- 17 of those be admitted into evidence.
- 18 JUDGE JORDAN: Okay. Objections?
- 19 MR. LEE: I don't know enough to
- 20 object.
- JUDGE JORDAN: Okay. While you're
- 22 thinking about it, I'll ask Staff. Any objections?
- MR. RITCHIE: Staff has no objections,
- 24 your Honor.
- 25 MR. LEE: I guess I don't have a problem

- 1 with it.
- 2 JUDGE JORDAN: Okay. I have one
- 3 question about E. And -- no, I'm sorry. That's H,
- 4 summary of investigations. I don't remember you
- 5 saying -- the witness saying who prepared this
- 6 document.
- 7 MR. LEE: Pardon?
- JUDGE JORDAN: I don't remember the
- 9 witness saying who prepared the document.
- 10 MR. NOCE: Judge, I can address that. I
- 11 actually did prepare the document.
- 12 JUDGE JORDAN: I've heard no objection
- 13 to it, so it's admitted. Those exhibits will be
- 14 admitted.
- 15 (EXHIBITS D1 THROUGH D13, E1 THROUGH E10
- 16 AND H WERE RECEIVED INTO EVIDENCE AND MADE A PART OF
- 17 THE RECORD.)
- 18 MR. NOCE: It's just a summary, your
- 19 Honor. I'll go ahead and put this in with the actual
- 20 documents that are being submitted. No further
- 21 questions at this time.
- JUDGE JORDAN: Okay. Cross-examination
- 23 from Staff.
- MR. RITCHIE: Staff has no cross.
- JUDGE JORDAN: All right.

- 1 Cross-examination from Mr. Lee.
- 2 CROSS-EXAMINATION BY MR. LEE:
- 3 Q. Okay. H, Exhibit H.
- 4 A. Yes.
- 5 Q. The first page, No. 4?
- 6 A. Yes.
- 7 Q. It says, "Storm drain at Larimore and
- 8 railroad tracks on 3/20 of '09."
- 9 A. Okay.
- 10 Q. I assume you mean this in 7C; am I
- 11 correct?
- 12 A. I believe that's correct. Yes, at the
- 13 gravel parking lot near the railroad tracks at
- 14 Larimore and -- yes.
- 15 Q. Okay. And your explanation is here,
- 16 that the main is on the opposite side of the road?
- 17 A. Yes.
- 18 Q. Okay. I guess if that drain runs under
- 19 the railroad tracks, how could that be an intelligent
- 20 reason that it couldn't be leaking?
- 21 MR. NOCE: I'll object the question as
- 22 argumentative.
- JUDGE JORDAN: It is argumentative. Can
- 24 you rephrase that?
- 25 BY MR. LEE:

- 1 Q. If the water main is on the other side
- 2 of the railroad tracks, how can -- which in the drain
- 3 goes under the railroad tracks, how can which side of
- 4 the road the main is on be an issue?
- 5 A. Well, it's just stating that the main is
- 6 on the opposite side of the street.
- 7 Q. Okay. So you're not using that as a --
- 8 in several of these other things, I believe I've
- 9 heard, well, the main's on the other side of the
- 10 street is a reason that water couldn't be on the
- 11 other side, but you're not necessarily saying that in
- 12 this --
- 13 A. It's a factor to consider, but it's not
- 14 the only factor.
- 15 Q. And then my point is, if it's a straight
- 16 pipe running under the road, how could that be even
- 17 anything to remotely consider?
- 18 A. If what's a straight pipe running under
- 19 the road? I don't understand the question.
- Q. That drain runs under the tracks. It's
- 21 a pipe that runs under the tracks.
- 22 A. Okay.
- 23 Q. If you have the pipe that runs -- that
- 24 connects both sides of the road, how could which side
- of the road it's on be an issue?

1 JUDGE JORDAN: You understand the

- 2 question?
- 3 THE WITNESS: No.
- 4 JUDGE JORDAN: I think I do. The drain
- 5 spans a road or railroad tracks. Why does it matter
- 6 which side, or does it matter which side of the road
- 7 the main is on, why does that matter in accounting
- 8 for water in the drain?
- 9 THE WITNESS: I mean, it's just a note
- 10 that the main is on the opposite side of the street
- of where the picture is and where the water is seen.
- 12 It would be a consideration, but again, there's
- 13 multiple factors to consider. That's just one of
- 14 them.
- JUDGE JORDAN: In other words, you're
- 16 not saying that's determinative.
- 17 THE WITNESS: Correct.
- 18 JUDGE JORDAN: Okay. Sometimes it's
- 19 helpful to isolate the premise of these questions.
- 20 BY MR. LEE:
- Q. Okay. Do you know if that's currently
- 22 leaking, that location?
- 23 A. Not to my knowledge.
- Q. Okay. Have you inspected it lately?
- 25 A. What is lately, I guess?

```
1 Q. The last week.
```

- 2 A. No.
- Q. Or last month, the last two months.
- 4 When was the last --
- 5 A. The last inspection would have been the
- 6 correlation of the main on Larimore Road on May the
- 7 1st.
- 8 Q. May the 1st?
- 9 JUDGE JORDAN: Of what year?
- 10 THE WITNESS: Of 2009.
- JUDGE JORDAN: Thank you.
- 12 BY MR. LEE:
- 13 Q. So you can't -- you don't know today if
- 14 that's leaking right now, or before the rain
- 15 yesterday, you have no way of knowing it?
- 16 A. All I can say is it wasn't leaking on
- 17 May 1st, 2009.
- 18 Q. So the problem has not been solved,
- 19 correct?
- 20 MR. NOCE: Objection. I don't think
- 21 there's been -- vague as to what the problem is; and
- 22 B, I'm not sure it's been established that there is a
- 23 problem.
- JUDGE JORDAN: That's a difficult
- 25 question for the witness to answer. You asked him

- 1 when was the last time he examined this, and he
- 2 answered. It kind of sounds like the current
- 3 question is connected to that, but I can't tell. So
- 4 maybe you want to rephrase that.
- 5 MR. LEE: Let me try to say what I'm
- 6 trying to get here.
- 7 JUDGE JORDAN: Explain your line of
- 8 inquiry to me and we'll take it from there.
- 9 MR. LEE: This is a summary that I guess
- 10 is trying to prove that there's no problem here.
- 11 MR. NOCE: Your Honor, if I can speak to
- 12 that. This summary was prepared just as a summary
- 13 for the purpose of all the investigations that were
- 14 done. It's not -- it's just a reference to the
- 15 exhibits that have been submitted. As I stated, I
- 16 was the one -- I'm the author of this. All it is,
- 17 though, is summarizing what was on those exhibits.
- 18 JUDGE JORDAN: I am taking this as sort
- 19 of a demonstrative exhibit --
- 20 MR. NOCE: Correct.
- 21 JUDGE JORDAN: -- that is something that
- 22 will guide me through the other exhibits. And for
- 23 the record, H does not have independent probative
- 24 value; is that correct, Mr. Noce?
- MR. NOCE: Yes, it is. Yes, correct.

```
1 JUDGE JORDAN: Okay. It's like a table
```

- 2 of contents.
- 3 MR. NOCE: Exactly, your Honor.
- 4 JUDGE JORDAN: Thank you.
- 5 BY MR. LEE:
- 6 Q. Okay. Another question here on the
- 7 right lower corner under "Water Sample," it says,
- 8 "Lab results came back zero for chlorine in water
- 9 collected by PSC at 11338 Larimore."
- 10 After the testimony of Mr. Simmons
- 11 yesterday about the unreliability of the lab results,
- 12 are you still willing to consider this as a valid
- 13 test for this water?
- 14 MR. NOCE: Objection. It misstates the
- 15 testimony by Mr. Simmons yesterday.
- JUDGE JORDAN: Well, I'll sustain that
- 17 as to characterization. Your question will not
- 18 constitute evidence that the tests were unreliable,
- 19 so the rest of the question is fine.
- 20 MR. LEE: Maybe I could rephrase it.
- JUDGE JORDAN: Please do.
- 22 BY MR. LEE:
- 23 Q. Yesterday we heard testimony that four
- of the ten tests performed on this water in the
- 25 laboratory, that you couldn't tell if it was tap

- 1 water or groundwater.
- 2 MR. NOCE: Object. Misstates the
- 3 testimony yesterday of Mr. Simmons.
- 4 JUDGE JORDAN: Allow me to ask the
- 5 question, this question. Do you remember
- 6 Mr. Simmons' testimony as to the content of tap water
- 7 and groundwater?
- 8 THE WITNESS: I do.
- 9 JUDGE JORDAN: Okay. Do you remember
- 10 Mr. Lee's cross-examination of Mr. Simmons as to
- 11 that -- as to that testimony and the content of tap
- 12 water versus groundwater?
- 13 THE WITNESS: Most of it. Quite a bit
- 14 of it.
- JUDGE JORDAN: Okay. Do you remember
- 16 Mr. Lee's questions with regard to -- I think I'll
- 17 stop there. I'll stop there. Mr. Lee, maybe you can
- 18 pick it up from there.
- 19 BY MR. LEE:
- 20 Q. Are you qualified to collect water
- 21 samples?
- 22 A. I believe I'm qualified to collect a
- 23 water sample for a leak investigation, yes.
- Q. If you collected a water sample out of a
- 25 tap, and en route your bottle fell over, say it fell

- on a table or it fell on the floor or it fell in some
- 2 dirt, would you set that water back up and put it in
- 3 a -- I believe the bottle was autoclaved, washed in
- 4 an expensive dishwasher and took extreme measures to
- 5 make sure we had a sterile bottle.
- 6 MR. NOCE: I think I'm gonna object.
- JUDGE JORDAN: Let's wait until the
- 8 question is finished.
- 9 BY MR. LEE:
- 10 Q. If you spilled that water out of that
- 11 bottle and it went on either one of those surfaces, a
- 12 table, a floor or into dirt, would you suck that
- 13 water back up and put it back in the jar and take it
- 14 to the lab?
- 15 A. You're referring to a bacteriological
- 16 sample, and no, I would not, because I'm not
- 17 taking -- and I wouldn't be taking a bacteriological
- 18 sample, which is the bottle you were describing, for
- 19 a leak investigation.
- 20 Q. I don't know that Mr. Simmons stated
- 21 that the clean bottles were only for bacteriological
- 22 samples. It was my understanding we had sterile
- 23 bottles for all samples.
- JUDGE JORDAN: Okay. Well, since
- 25 this -- all testimony is being transcribed, the

- 1 transcript will show what he said. He's answered
- 2 your question. You can ask another question if you'd
- 3 like.
- 4 BY MR. LEE:
- 5 Q. But you would not put that water back in
- 6 the bottle?
- 7 JUDGE JORDAN: That's the same question.
- 8 So you can ask him -- he's answered that question.
- 9 BY MR. LEE:
- 10 Q. Then my next question is, I just can't
- 11 figure this out. Say this water is flowing a quarter
- 12 mile underground or less, being contaminated through
- 13 soil, through limestone, through we don't even know
- 14 what. How can you show up on the scene with a
- 15 sterile bottle and claim to start the chain of
- 16 command after the sample is already contaminated?
- 17 MR. NOCE: I'm gonna object.
- 18 JUDGE JORDAN: That sounds like a
- 19 rhetorical question.
- 20 MR. LEE: The test could only be --
- MR. NOCE: I'm going to object.
- MR. LEE: -- used to compare groundwater
- 23 to other groundwater. It could not be used to
- 24 compare tap water to groundwater because of the
- 25 contamination factor.

```
1 MR. NOCE: I'm gonna move to strike.
```

- 2 Mr. Lee is testifying here, and I believe it lacks
- 3 foundation. He's laid no foundation for this
- 4 testimony, and furthermore, he's cross-examining a
- 5 witness at this time.
- 6 JUDGE JORDAN: Right. I think I
- 7 understand what the question is, though. You're
- 8 asking about the nature of the sample that is
- 9 collected, correct?
- MR. LEE: (Nodded head.)
- JUDGE JORDAN: Maybe you can rephrase
- 12 that and focus on that.
- MR. NOCE: Judge, I guess I'd also
- 14 object that this is beyond the scope of what this
- 15 witness has been presented, the evidence that this
- 16 witness has been asked to testify to.
- 17 MR. LEE: I object to that. He's
- 18 already testified to water samples and their validity
- 19 in determining the leak.
- JUDGE JORDAN: Right.
- 21 MR. NOCE: I don't believe this witness
- 22 did testify to any of the water samples. Mr. Simmons
- 23 was offered as the expert.
- MR. LEE: Each one of these pages says
- 25 no chlorine found, and we used that information to

- 1 prove that it's not tap water.
- JUDGE JORDAN: Okay. That will do.
- 3 That will do for now. I'm going to give you my
- 4 ruling here by reference to the statute. And I'm
- 5 going to cite § 536.070, subdivision 2, which states
- 6 that each party shall have the right to cross-examine
- 7 opposing witnesses on any matter relevant to the
- 8 issues, even though that matter was not the subject
- 9 of direct examination.
- 10 In other words, we have open
- 11 cross-examination in this forum. So he can ask this
- 12 witness something that was not the subject of direct.
- Now, let's focus on this question. I'll
- 14 give you another run at it. You're trying to pin
- down the quality of a sample that's taken, its
- 16 nature; am I correct in that?
- 17 MR. LEE: I am. I believe we're
- 18 comparing apples to oranges here.
- 19 JUDGE JORDAN: Okay. And you can ask
- 20 him a question that will illustrate that, but we're
- 21 gonna have to move on. I'm gonna give you one more
- 22 chance to take a run at this.
- 23 BY MR. LEE:
- 24 O. Okay. We wouldn't contaminate tap water
- 25 if the jar fell over. My question is, if this water

- 1 ran underground or even came in contact with the
- 2 ground and we picked it up off the ground and put it
- 3 in the bottle, how can contaminated water results
- 4 even remotely compare to water that's not touched the
- 5 ground?
- 6 A. You're asking me a question about a
- 7 sterilized bottle utilized for bacteriological
- 8 testing only. It doesn't -- we don't test chlorine
- 9 in the bottle that is sterilized and sealed when it's
- 10 taken out, so I can't answer the question other than
- 11 to tell you that I don't use bacteriological bottles
- 12 to test for chlorine.
- 13 Q. Any type of bottle that you put it in --
- 14 JUDGE JORDAN: Okay. We're almost
- 15 there, I think. We're almost there. You're not
- 16 really asking about the bottle. You're asking about
- 17 the quality of the water.
- 18 BY MR. LEE:
- 19 Q. The quality of the water. One water has
- 20 flown through or touched soil, one water has come
- 21 straight out of a tap. How can we compare the
- 22 results on those two samples? One is contaminated
- 23 before it's tested, one is straight out of the tap.
- 24 JUDGE JORDAN: Let's isolate the premise
- 25 of that question also. If water runs through

- 1 ground -- I'll ask this question. , I can ask the
- 2 question. If water from a main flows through the
- 3 earth, can you tell us, just with those facts, how it
- 4 will compare to water from a main that has not flowed
- 5 through the earth? Are you qualified to tell us?
- 6 THE WITNESS: Treated water that had
- 7 chlorine in it that flows through ground could still
- 8 have chlorine in it when we collected the sample and
- 9 took it for analysis.
- 10 JUDGE JORDAN: Okay.
- 11 MR. LEE: Could. May or may not.
- 12 JUDGE JORDAN: Now, whether it does or
- 13 not, what will determine that?
- 14 THE WITNESS: The test itself telling us
- 15 that there's chlorine still present in the water.
- JUDGE JORDAN: Let me rephrase my
- 17 question. What factors affect the chlorine content
- 18 of the water that you collect from the earth?
- 19 THE WITNESS: Whether or not there's
- 20 enough chlorine demand to reduce that level to
- 21 nondetectible or zero.
- JUDGE JORDAN: Okay. Water from your
- 23 main and water that comes from the ground, okay,
- 24 after -- say water flows from the main to the ground,
- 25 and then there's water that just comes out of the

- 1 main, tap water, okay, we're trying to compare those
- 2 two, and I'm having a hard time with this also. I
- 3 think I know where we're trying to go. We've had
- 4 testimony stating that water taken from these sites
- 5 does not have the characteristics of Missouri
- 6 American's water.
- 7 Okay. The issue here is, first, would
- 8 having flown through the ground affect those
- 9 characteristics? Can you tell us that?
- 10 THE WITNESS: It could.
- 11 JUDGE JORDAN: Okay. It could. What
- 12 would be the characteristics of such flow? What
- 13 would be the variables as to how much it changes the
- 14 characteristics of that water.
- MR. NOCE: And again, Judge, if I could
- 16 have a running objection to this line of questioning.
- 17 This witness is not being offered for this type of
- 18 expert testimony.
- 19 JUDGE JORDAN: Well, first of all, I'll
- 20 ask you, can you tell us about that?
- THE WITNESS: Some.
- JUDGE JORDAN: Okay. If I were to say
- 23 it depends on how long the water sat in the ground,
- 24 how far it flowed from the source to the collection
- 25 point, the type of soil and the type of geology that

- 1 it went through, are those among the factors that
- 2 would change the characteristics of Missouri
- 3 American's tap water?
- 4 THE WITNESS: Yeah, I think they would
- 5 have some impact on it.
- 6 JUDGE JORDAN: Okay. That concludes my
- 7 inquiry. Thank you for indulging me. Mr. Lee, I'll
- 8 let you resume.
- 9 BY MR. LEE:
- 10 Q. So would you say that it is not fair to
- 11 compare tap water results to groundwater results --
- MR. NOCE: I think I'll object.
- 13 BY MR. LEE:
- 14 Q. -- to determine that that water did not
- 15 come from a water main?
- 16 MR. NOCE: Object. Argumentative, the
- 17 characterization of what Mr. Lee means by fair.
- 18 MR. LEE: How is that argumentative?
- 19 JUDGE JORDAN: Okay. He's focusing on
- 20 the term fair, and that sounds argumentative. You're
- 21 trying to get to whether these things are
- 22 scientifically comparable. Tap water that has flown
- 23 through the ground versus tap water that just comes
- 24 out of the tap.
- MR. LEE: To me it seems like one sample

- 1 is contaminated before they test and one is pure, and
- 2 they're trying to compare the results.
- JUDGE JORDAN: They are comparing the
- 4 results according to what I've heard. What you're
- 5 calling contamination is what I referred to as the
- 6 flow through the earth.
- 7 MR. LEE: Right. Absolutely.
- 8 JUDGE JORDAN: Now, you want to ask
- 9 something I think about the validity of such
- 10 comparison.
- 11 MR. LEE: Correct.
- JUDGE JORDAN: Okay. Why don't you ask
- 13 that question.
- 14 BY MR. LEE:
- Q. Okay. How are these test results
- 16 comparable?
- 17 A. It's still valid to test the components
- 18 of the water as one -- or the characteristics of the
- 19 water as one component of a leak investigation to
- 20 determine if a leak exists.
- Q. But you just said the --
- JUDGE JORDAN: That's okay. We heard
- 23 what he just said. And remember, this is all
- 24 transcribed. So if there's an inconsistency, it will
- 25 appear in black and white.

- 1 BY MR. LEE:
- O. So it seems like much of Missouri
- 3 American Water's defense or reason that this water
- 4 did not come from their water mains relies on lab
- 5 work of either on-site lab work with the little pill
- 6 bottle, or water collected and taken to a lab; is
- 7 that correct?
- 8 MR. NOCE: I'll object. It misstates --
- 9 it mischaracterizes the evidence that's admitted.
- 10 JUDGE JORDAN: Well, the witness can
- 11 answer because he is a Missouri American's witness.
- 12 He can say.
- 13 THE WITNESS: It's one component of
- 14 everything we do to investigate a complaint about a
- 15 leak.
- 16 Q. If a complaint is called in, a Missouri
- 17 American worker is sent out, water's flowing out of
- 18 the ground, they do their little swimming pool test
- 19 on that water and it shows no chlorine, what is the
- 20 next step?
- 21 A. To inspect also the nature of the water,
- 22 how the water is flowing out of the ground, what it
- 23 looks like, you know, where is it going, and make
- 24 additional -- listen on the valves and the service
- 25 lines and even correlate, if necessary, to further

- 1 detail and make sure there's not a leak.
- 2 BY MR. LEE:
- 3 Q. So every time I've called in a
- 4 complaint, they have come and tested the water and
- 5 correlated that water main?
- 6 A. Not necessarily every time.
- 7 Q. Okay. I just asked what the next
- 8 procedure was after the test, and you said correlate.
- 9 A. That could be the last -- that could be
- 10 done if in their experience and knowledge they don't
- 11 see the need to correlate and especially if they can
- 12 tell from their observation that it's not typical of
- 13 the way a leak presents itself, then they would
- 14 necessarily take it to the step of correlating.
- 15 Q. Could you describe to me how a leak
- 16 typically presents itself?
- 17 A. Well, I'll use Aspen Woods as an
- 18 example. The ground around the main, if there was a
- 19 leak, would saturate, and then that saturation that
- 20 yard would be -- the water would come to the surface
- 21 and flow a little bit away from there. If it
- 22 continued, it would continue further, but the grass
- 23 in that area would be so saturated that you would --
- 24 right over the main there, that you would -- that
- 25 would be a strong indication that, you know, there

- 1 would be a leak there then.
- Q. In every leak that would be the case?
- 3 A. It's pretty -- "every" is a broad
- 4 statement, but it's pretty dominant. If that would
- 5 be the case, you're gonna see evidence right around
- 6 the main.
- 7 Q. If that's true, there's no reason to
- 8 have the correlating equipment, is there? You could
- 9 just find a wet spot and know the leak was right
- 10 there.
- 11 A. No. You could -- again, if you let a
- 12 leak -- correlating it also gives you exactly where
- 13 to dig, so they use that correlating equipment for a
- 14 lot of reasons, and, you know, correlating is the --
- 15 the best -- I would guess -- I would say it was the
- 16 best method, or the most comprehensive method or
- 17 portion component, if you will, of an entire leak
- 18 investigation.
- 19 Q. I agree with that. My next question is,
- 20 the one documented here was a complaint about me from
- 21 2004 about water running under my mailbox, I believe.
- MR. NOCE: I think it was D1.
- 23 THE WITNESS: It doesn't say anything
- 24 about it running under your mailbox. It makes
- 25 reference to a house being torn down next door, and

- 1 there's been water noticeable in the ground. Can
- 2 someone come investigate.
- 3 Q. If I could, just for knowledge part of
- 4 this, the house was torn down just to the north of my
- 5 property, which is where my mail box --
- 6 MR. NOCE: I think I'm going to object,
- 7 your Honor. I think this is him testifying again
- 8 outside of his case in chief.
- JUDGE JORDAN: Right, which means I'll
- 10 allow a question phrased as a hypothetical, as an
- 11 "if" statement, you can ask him a question, assuming
- 12 something.
- 13 BY MR. LEE:
- 14 Q. Okay. If this complaint was about water
- 15 running under my mailbox, would the correlation
- 16 equipment have been hooked to the line?
- 17 A. I don't know.
- 18 Q. Was the correlation equipment hooked to
- 19 the water main on this complaint?
- 20 A. I don't know.
- Q. If we could go to B2. I'm a little
- 22 curious about what the time stamp means, and
- 23 specifically what got done in it looks like 12
- 24 minutes. What did that employee spend 12 minutes
- 25 doing at my address?

- 1 A. The call was received by, or notified by
- our dispatcher, and 12 to 13 minutes later she
- 3 dispatched it to the troubleshooter. He didn't go
- 4 out there until after he got that call.
- 5 Q. So that's not in and out time, is it?
- 6 That's the time I called and the time she gave it to
- 7 him; is that correct?
- 8 A. It's actually the time that the field
- 9 service representative notified her.
- 10 Q. So from this, I assume, although it
- 11 doesn't say here, that this gentleman visited my
- 12 property?
- 13 A. Yes.
- Q. Can you tell me what was done?
- 15 A. Not specifically, no. Just that he
- 16 investigated and didn't find anything, any leak.
- 17 Q. What does investigated mean?
- 18 A. Any of the parameters that I've
- 19 described before as what's part of an investigation.
- 20 JUDGE JORDAN: Is this the document to
- 21 which we so far lack the second page?
- MR. NOCE: Yes, it is, your Honor. I
- 23 believe Mr. Lee has a copy that was provided in
- 24 discovery of that fact, which I pointed out to him as
- 25 we were going through it.

- 1 MR. LEE: I do. And if the Court would
- 2 like to see a copy, I could show you.
- 3 JUDGE JORDAN: Can you just hand that to
- 4 me and let me have a look at it?
- 5 Okay. The second page has a notation NF
- 6 being explained as nothing found. Maybe I should ask
- 7 the witness. Is that correct.
- 8 THE WITNESS: Yes, it is correct.
- 9 JUDGE JORDAN: Thank you. Do you have
- 10 much more on cross, Mr. Lee? Our reporter needs a
- 11 break.
- 12 MR. LEE: We can take a break. Could I
- 13 just finish up with this one document so we're not in
- 14 the middle of it?
- JUDGE JORDAN: That sounds all right
- 16 with me.
- 17 BY MR. LEE:
- 18 Q. So with this visit on April 8th, it
- 19 could have been an investigation; the term
- 20 "investigation" could have meant a visual inspection,
- 21 they never even got out of the van?
- 22 A. I don't know. I wouldn't say that he
- 23 didn't get out of the van.
- Q. But you don't know if he did or not?
- 25 A. No. He didn't document whether he

- 1 listened on the main with his ear horn or the service
- 2 lines. He just noted that he did not find a leak.
- 3 Q. We don't know if he tested water?
- A. Right. He didn't note if he looked for
- 5 chlorine or not.
- 6 Q. So I guess I'm really confused. When I
- 7 have a complaint and I call up the water company,
- 8 it's almost an unspoken agreement that I'm gonna get
- 9 an intelligent or a systematic process to solve my
- 10 problem.
- 11 JUDGE JORDAN: Remember to ask a
- 12 question.
- 13 BY MR. LEE:
- 14 Q. Is it assumable for me to assume when I
- 15 call up and make a complaint, that I will get a
- 16 systematic process to follow through and solve my
- 17 complaint?
- 18 A. It's assumable that we would investigate
- 19 the complaint.
- 20 Q. An investigation you just said could be
- 21 as little as driving by and not getting out of the
- 22 van, right?
- 23 A. I didn't say that.
- MR. NOCE: Objection.
- JUDGE JORDAN: Yeah.

- 1 BY MR. LEE:
- Q. Well, you said you didn't know that he
- 3 investigated, but you don't know if he got out of the
- 4 van.
- JUDGE JORDAN: What he said is what he
- 6 said. This is not really questioning; this is
- 7 arguing, arguing with the witness, which you can't do.
- 8 MR. LEE: I'm just trying to understand.
- 9 I hear the word investigation.
- 10 JUDGE JORDAN: Then you need to ask him
- 11 what constitutes an investigation.
- MR. NOCE: He has been and it's asked
- 13 and answered.
- 14 BY MR. LEE:
- 15 Q. What constitutes an investigation? Is
- 16 it the same all the time?
- 17 MR. NOCE: Again, objection. This is
- 18 asked and answered several times.
- 19 JUDGE JORDAN: I'll overrule that.
- 20 We'll take one more run at it.
- 21 THE WITNESS: No. I would say it's
- 22 based on the circumstances.
- 23 MR. LEE: And -- all right. I guess I
- 24 don't have any more. I am -- the problem has
- 25 continued for so long, this Exhibit 1, when I called

- 1 in, in '04 --
- JUDGE JORDAN: Mr. Lee, it's not the
- 3 time for you to testify.
- 4 MR. LEE: I'm trying to get to a
- 5 question here.
- 6 JUDGE JORDAN: Okay. Well, make it
- 7 quick because our reporter needs a break.
- 8 MR. LEE: All right. Well, let's stop
- 9 now.
- JUDGE JORDAN: Okay. We'll go off the
- 11 record. We'll take a break for ten minutes.
- 12 (A RECESS WAS TAKEN.)
- 13 JUDGE JORDAN: And we are resuming the
- 14 cross-examination of Missouri American with
- 15 Mr. Linam.
- 16 BY MR. LEE:
- 17 Q. All right. If I could just refresh my
- 18 own memory for a minute here. I believe we went over
- 19 the 4/21/04 repair. Or was that the last one?
- MR. NOCE: You mean complaint?
- 21 BY MR. LEE:
- Q. My question is, do you know any repairs
- 23 that were made near my home after this complaint?
- MR. NOCE: Objection, relevance.
- 25 JUDGE JORDAN: And which complaint are

- 1 we talking about? You'll have to refresh me on that.
- 2 MR. LEE: 1D, D1. I won't even ask
- 3 that. Let me ask it a different way.
- 4 BY MR. LEE:
- 5 Q. My home -- where is my house?
- 6 A. It's by No. 12.
- 7 Q. My home is here. Okay. If I complained
- 8 about a leak in '04 here, could there have been a
- 9 water main leaking here for the next two years?
- 10 A. Not that I know of.
- 11 MR. NOCE: Objection, calls for
- 12 speculation.
- 13 JUDGE JORDAN: Well, if you can please
- 14 ask the question again, and if you can answer without
- 15 guessing, do so. But if you don't know, of course
- 16 the answer is you don't know.
- 17 BY MR. LEE:
- 18 Q. How long do water mains leak
- 19 underground?
- MR. NOCE: Objection, vague.
- JUDGE JORDAN: I'll sustain that.
- 22 MR. LEE: So I have to ask a different
- 23 question?
- JUDGE JORDAN: Do you have another
- 25 question for him?

- 1 BY MR. LEE:
- Q. How far have you seen water surface from
- 3 the repair point of the water main?
- 4 A. Not very far.
- 5 JUDGE JORDAN: Can you quantify that to
- 6 move this along?
- 7 THE WITNESS: Less than 100 feet.
- 8 JUDGE JORDAN: Thank you.
- 9 BY MR. LEE:
- 10 Q. Are there currently water mains leaking
- in this system as we speak?
- 12 A. I don't know.
- MR. NOCE: Are you referring to those
- 14 shown on the map on Defendant's Exhibit A?
- MR. LEE: I'm referring to any leak, a
- 16 leak in the system, in this system currently.
- 17 JUDGE JORDAN: Okay. But you're
- 18 gesturing towards the map. Are you confining your
- 19 question to the area shown on the map or do you mean
- 20 the system as in everywhere?
- 21 BY MR. LEE:
- Q. Okay. Let's do it both ways. Would you
- 23 suspect there are leaks in this area on this map
- 24 right now?
- 25 A. No.

- 1 Q. No. Everything is watertight?
- A. Based on all the testing we've done in
- 3 the last month, I don't have anything else to go on.
- 4 Q. Okay. Have you ever seen any data in
- 5 your career about how long water mains leak
- 6 underground?
- 7 A. Not that I recall.
- 8 MR. LEE: I just don't know how to ask
- 9 about the leaks now without proving a history, and
- 10 also without showing that water mains leak for long
- 11 periods of time underground and produce lakes and
- 12 springs and a number of different things.
- JUDGE JORDAN: Well, you would have to
- 14 present some evidence of that happening, and if this
- 15 witness doesn't have that knowledge, then you're
- 16 asking the wrong person.
- 17 MR. LEE: Okay. And all my evidence is
- 18 in already. I can't put any more in; is that
- 19 correct?
- JUDGE JORDAN: Well, you've rested.
- 21 Your case in chief is over. You will be putting in
- 22 more evidence such as I have directed already. There
- 23 will be more evidence coming in.
- MR. LEE: Okay.
- 25 BY MR. LEE:

```
1 Q. Do you know of any repairs near these
```

- 2 complaints?
- MR. NOCE: Objection, relevance.
- 4 JUDGE JORDAN: And I find the question a
- 5 little bit confusing when you say "these complaints."
- 6 MR. LEE: Well, we have 11 different
- 7 complaints. We have one, two, three, four, five that
- 8 I know of repairs in this small area here.
- 9 JUDGE JORDAN: You're referring to the
- 10 yellow flags on the map as complaints. Now you're
- 11 asking him if he knows of repairs that have occurred
- 12 near those; is that your question?
- MR. LEE: Correct. Were some of these
- 14 complaints justified?
- MR. NOCE: Again, I'm gonna object to
- 16 the relevance of repairs.
- 17 MR. LEE: I might as well go home if I
- 18 can't show history, because I can't show present
- 19 without excavating the neighborhood. I can show
- 20 water running out of the ground, which they deny.
- JUDGE JORDAN: You will be showing
- 22 history, and you will be showing water running out of
- 23 the ground according to the documents that I'm
- 24 allowing you to file after the close of today.
- MR. LEE: Okay.

- 1 BY MR. LEE:
- Q. D3, please. I'm not sure who complained
- 3 about this. Do you have any idea what generated this
- 4 leak report?
- 5 A. It was based on, I believe, your civil
- 6 lawsuit when we came out on the 20th of May and took
- 7 water samples at various locations in addition to
- 8 this investigation here.
- 9 Q. And No. 4, do you know what generated
- 10 that?
- 11 A. This hearing -- or this case, and I
- 12 don't remember if it was someone from Staff that had
- 13 asked that we do this or it was just a follow-up
- 14 check, but it was related to this PSC complaint.
- 15 Q. I can't read that. It said, "We
- 16 listened on valves..."
- 17 A. "...listened on valves, serviced T-heads
- 18 and fire hydrants." And it's noting that it's a new
- 19 water main, new PVC pipe here, and there was no sound
- 20 from Aspen Woods east to RR tracks.
- 21 Q. Do you know of an industrywide problem
- 22 with detecting sound on PVC water mains because of
- 23 the acoustic nature of them deadening the sound?
- 24 A. I know it's different. I'm not aware of
- 25 industrywide problem.

```
1 Q. And how do they locate a plastic pipe?
```

- 2 A. Can you -- are you talking about
- 3 underground? With a locating device, metal detecter.
- 4 They put a trace wire with it and they install it.
- 5 Q. The next one, 9 --
- JUDGE JORDAN: Please remember to keep
- 7 your voice up so the court reporter can hear, and me
- 8 too.
- 9 BY MR. LEE:
- 10 Q. This is another complaint it looks like.
- 11 MR. NOCE: Which exhibit? I'm sorry, I
- 12 didn't hear.
- MR. LEE: 9, No. D9.
- 14 THE WITNESS: It was a complaint about a
- 15 high bill, a high water bill.
- 16 BY MR. LEE:
- 17 Q. And the leak report, "Appears to be
- 18 groundwater. No mains in area." If there's no mains
- in the area, how does a man get his water?
- 20 A. On D9?
- 21 Q. Page 2 on D9.
- 22 MR. NOCE: I think Mr. Lee is referring
- 23 to D6.
- 24 MR. LEE: I am sorry. I looked at the
- 25 other side of it. D6.

- 1 JUDGE JORDAN: Thank you. And the
- 2 question is, if there is no, quote, main in the area,
- 3 how does water get to the residence?
- 4 MR. LEE: Absolutely.
- 5 THE WITNESS: The leak location reported
- 6 by the customer was in his backyard, and the water
- 7 main is across the street. It would be normal to
- 8 state that there's no main in the area of his
- 9 backyard.
- 10 JUDGE JORDAN: Right. But the question
- 11 was, how does the water get from the main to his
- 12 residence.
- 13 THE WITNESS: I'm sorry. He gets his
- 14 water off of the water main on Larimore Road.
- 15 BY MR. LEE:
- 16 Q. Was this leak more than 100 feet from
- 17 the water main?
- 18 MR. NOCE: Object. I don't think it's
- 19 established that this was a leak. I think it was
- 20 established as something other than a water leak.
- JUDGE JORDAN: Answer the question
- 22 anyway.
- 23 BY MR. LEE:
- 24 Q. Was the complaint more than 100 feet
- 25 from the water main?

- 1 A. I don't know the distance. I remember
- 2 stating earlier that it was in the backyard and that
- 3 that home set higher in elevation than the water
- 4 main, but I don't remember the -- I don't know the
- 5 distance without measuring that.
- 6 Q. But if it was -- theoretically you said
- 7 you'd seen water travel 100 feet. If it would have
- 8 been 100 feet or less, the water could have traveled
- 9 there, correct?
- 10 MR. NOCE: I'll object. I think it
- 11 misstates his prior testimony. I believe the
- 12 furthest he'd seen water is less than 100 feet on his
- 13 previous testimony. Water surfaced from the leak was
- 14 less than 100 feet.
- JUDGE JORDAN: I'll overrule the
- 16 objection.
- 17 THE WITNESS: I don't believe this water
- 18 leak could have come from the water main on Larimore
- 19 Road due to the difference in the elevation.
- 20 BY MR. LEE:
- Q. Okay. So am I safe to assume that every
- 22 time there is a complaint of water leaking out of the
- 23 ground, that the correlation equipment is not hooked
- 24 to the water system?
- 25 A. I'm sorry, could you repeat that?

- 1 Q. Every time there is a complaint, a
- 2 complaint does not make it mandatory to hook the
- 3 correlation equipment to the water system; is that
- 4 true?
- 5 A. I would say that's correct.
- 6 Q. And much of that is based on a chlorine
- 7 test; is that correct?
- 8 A. It's based on the experience of the crew
- 9 investigating and any other analysis or investigation
- 10 that they would do as part of their site visit.
- 11 Q. In that experience what tools do they
- 12 use to determine that?
- 13 A. Visual observation, the listening on the
- 14 main, water quality, water characteristic testing.
- 15 Q. Okay. That's not the question.
- 16 Somebody calls in a leak. They go out and take a
- 17 sample of water, do a chlorine test, on the spot
- 18 chlorine test and they find no chlorine. Do they
- 19 hook the correlation equipment to it?
- 20 A. Not necessarily.
- 21 MR. NOCE: Objection, calls for
- 22 speculation.
- JUDGE JORDAN: I'll overrule that.
- 24 MR. LEE: Just trying to find out the
- 25 testing procedures.

- 1 JUDGE JORDAN: I understand. That's why
- 2 I overruled the objection.
- 3 MR. NOCE: Then I'll object that it's
- 4 been asked and answered.
- JUDGE JORDAN: I don't remember it being
- 6 asked and answered of this witness, so I will
- 7 overrule that objection also.
- 8 BY MR. LEE:
- 9 Q. Okay. Back to the samples of water. If
- 10 water was leaking from a break right here and it ran
- 11 down a trench in that water main and you sampled it
- 12 at the bottom of the hill there, would you consider
- 13 that water to be contaminated?
- 14 MR. NOCE: I'll object. This has been
- 15 asked and answered.
- JUDGE JORDAN: We have been through this
- 17 theme some already. I'll also note that you
- 18 haven't -- remember, we're preparing a written
- 19 transcript, so if you can refer to the numbers on the
- 20 yellow stickers, that would be helpful. And we've
- 21 had a lot of questions on this.
- I'll allow a couple more just to make
- 23 sure that you feel that you have cleared everything
- 24 up, but I'm starting to hear the same questions over
- 25 and over again.

```
1 MR. LEE: I feel like I have some loose
```

- 2 ends around this for the fact that I believe you said
- 3 that if you had a sample in a bottle and it fell on
- 4 the dirt, that you wouldn't put it back in the
- 5 bottle, correct?
- 6 Now water may be running 500 feet
- 7 underground. Why aren't we calling that water
- 8 contaminated?
- 9 A. I was referring to a bacteriological
- 10 sample earlier when you asked me if I'd put it back.
- 11 Q. Well, I'm trying to focus on the
- 12 chlorine test that seemed to be the main factor for
- 13 the employees getting in their vehicles and not doing
- 14 any further testing when they find no chlorine. We
- 15 find no chlorine, so it's not our water, so the
- 16 problem persists.
- 17 If you spilt water on the dirt, you
- 18 wouldn't pick it up. And let's say this water was
- 19 leaving the main here. It would only be fair if we
- 20 were gonna compare these two samples to get it out of
- 21 the main right there before it contacted the soil; is
- 22 that correct?
- 23 A. No, not if you were trying to
- 24 investigate a leak.
- 25 JUDGE JORDAN: Okay. I think I

- 1 understand what your point is, I believe.
- 2 MR. LEE: Okay.
- JUDGE JORDAN: You're questioning
- 4 whether the testing of water that comes, say, from a
- 5 drainage ditch, how that can -- how it is fair to
- 6 characterize it as having the characteristics of
- 7 Missouri American's water?
- 8 MR. LEE: Absolutely.
- 9 JUDGE JORDAN: I think we've been
- 10 through that a lot.
- MR. LEE: Okay.
- 12 JUDGE JORDAN: I don't think you can ask
- 13 any more questions about that, and the reason I say
- 14 that is because I don't think you have any more
- 15 questions because I'm hearing the same questions.
- MR. LEE: Something seems unclear. But
- 17 I'll move on. I guess it just seems like that test
- 18 is the determining factor if they hook the
- 19 correlation equipment to it. If every test they do
- 20 is contaminated, then they continually --
- JUDGE JORDAN: Well, you haven't asked
- 22 whether that is the determining factor. You have not
- 23 asked that.
- 24 MR. LEE: I just asked that, I thought.
- 25 BY MR. LEE:

```
1 Q. Is a chlorine test a determining factor
```

- 2 in whether they hook the correlation equipment to
- 3 that system?
- 4 A. No, not necessarily.
- 5 Q. It's not a determining factor?
- 6 JUDGE JORDAN: He just said no. That's
- 7 the same question.
- 8 BY MR. LEE:
- 9 Q. What determines whether they hook the
- 10 correlation equipment up?
- 11 A. If they are uncertain of a leak and they
- 12 want to further verify it with the correlation
- 13 equipment, they would hook the correlation equipment
- 14 to it and check.
- 15 Q. What test, scientific test, determines
- 16 whether they hook the correlation equipment to the
- 17 system to check for a leak?
- 18 MR. NOCE: Objection, asked and
- 19 answered.
- JUDGE JORDAN: I don't think we've had
- 21 quite this. I will inquire from the bench.
- 22 Sometimes you use correlation equipment and sometimes
- 23 you don't, right?
- 24 THE WITNESS: Yes.
- JUDGE JORDAN: What's the difference?

- 1 What makes the difference?
- THE WITNESS: If we go out and see the
- 3 water surfacing, take a sample and it has chlorine,
- 4 we would then listen with -- if the correlator crew's
- 5 not there, everybody knows how to listen on existing
- 6 valves and hydrants or even put probing rods on the
- 7 main and listen and pinpoint the leak, a leak without
- 8 the correlating equipment.
- 9 As I described earlier, the way, you
- 10 know -- something like Mr. Lee is trying to present,
- 11 the ground -- the pipe would be super saturated. It
- 12 would be intuitively obvious to us that there was a
- 13 leak there. You wouldn't necessarily need the
- 14 correlating equipment.
- 15 If they exhausted all of those and still
- 16 weren't sure, they could call -- they would call for
- 17 the correlators and hook up the correlating equipment
- 18 just to verify as an additional test.
- 19 JUDGE JORDAN: Okay. So the field
- 20 chlorine test we've been discussing is a factor, but
- 21 it is not the factor; is that correct?
- THE WITNESS: Correct.
- JUDGE JORDAN: Okay. Mr. Lee.
- 24 BY MR. LEE:
- 25 Q. So before they make the determination of

- 1 no problem found, do they hook the correlation
- 2 equipment to it?
- JUDGE JORDAN: We've had that question
- 4 and that answer. Sometimes they do, sometimes they
- 5 don't.
- 6 MR. LEE: My point is how sporadic the
- 7 diagnosis of the system is.
- 8 JUDGE JORDAN: Okay. But do remember
- 9 that this is not the time for argument. You will
- 10 have a time for argument. I want to reiterate this.
- 11 There will be a time for argument and you can make
- 12 your written argument, put it down in writing after a
- 13 transcript is filed. This is a time to ask this
- 14 witness questions. Once you get the answer, then you
- move on.
- 16 BY MR. LEE:
- 17 Q. Okay. Those photos I was told was
- 18 coming from a septic tank.
- 19 JUDGE JORDAN: And can you refer to
- 20 those by exhibit number, please?
- 21 MR. LEE: I can. 15A and I think that
- 22 was 14, wasn't it? Yeah 14. Well, 14 and 15.
- 23 BY MR. LEE:
- 24 O. Do you know if that water came from a
- 25 septic tank?

- 1 A. No, I don't know.
- Q. If the diagnosis of that problem was a
- 3 stuck ball valve on a toilet stuck wide open, would
- 4 that water have been coming from a septic tank?
- 5 A. I don't know. It could be, could not.
- 6 Q. I complained about that water. They
- 7 sent a crew out and determined that the cause of that
- 8 water was a stuck valve on a toilet; is that correct?
- 9 A. I believe they noted that there was a
- 10 stuck valve on the toilet. I don't know if they went
- 11 as far as to definitely say that that's where this
- 12 water was coming from. They -- the field guy may
- 13 have made an assumption or assertion to that, but I
- 14 can't tell you for sure when you ask me that that's
- 15 where that came from.
- 16 Q. So I made a complaint and one more time
- 17 they didn't determine the cause of the water?
- 18 JUDGE JORDAN: Well, the witness said he
- 19 doesn't know.
- 20 THE WITNESS: We determined that the
- 21 water wasn't coming from our main there on Larimore.
- 22 BY MR. LEE:
- Q. And they went home without determining
- 24 the cause of the complaint?
- MR. NOCE: I don't know if that's a

```
1 question, first of all. And second, I'd object, I
```

- 2 think it misstates the testimony.
- JUDGE JORDAN: Well, I'm gonna overrule
- 4 both of them because it sounded like a question to
- 5 me. I kind of heard a question mark at the end and I
- 6 think it's a proper follow-up to that question. The
- 7 witness has been saying that they determined it was
- 8 not their water, and the other evidence that we've
- 9 had is that this was a problem inside the house.
- 10 When I say not their water, I mean not
- 11 coming from their main. That was the witness's
- 12 testimony. Other evidence has shown that this water
- 13 was coming from inside the house. Now, ask him
- 14 whether they determined the cause of the leak or not.
- 15 I don't know, once he's told you -- once he's told
- 16 you that they determined it did not come from their
- 17 main, that seems to be the end of it.
- MR. LEE: That's my point.
- 19 JUDGE JORDAN: All right.
- 20 MR. LEE: I was told this water was
- 21 coming from a septic tank flowing through the septic
- 22 tank into the field, and my point for asking these
- 23 questions is, are there any dangers for sewage
- 24 running out like that that you know of?
- MR. NOCE: I guess I'll object as to

- 1 relevance.
- JUDGE JORDAN: Yeah, what's the
- 3 relevance of that?
- 4 MR. LEE: The relevance to that is I
- 5 complained about water running out of the ground.
- 6 They claim it's sewer water, but the complaint was
- 7 never -- you know, we never followed through and took
- 8 care of the problem.
- 9 JUDGE JORDAN: I'll sustain that
- 10 objection.
- 11 MR. LEE: And it's a health hazard.
- MR. NOCE: And I'll also point out that
- 13 there has been evidence put in that there was a
- 14 letter sent to that customer.
- JUDGE JORDAN: I'm going to sustain the
- 16 objection.
- 17 BY MR. LEE:
- 18 Q. I guess I just have one other question
- 19 around the testing from Mr. Simmons' testimony
- 20 yesterday. Can you 100 percent, be 100 percent sure
- 21 that the water, when it shows up as groundwater in
- the test, did not leave your water main?
- MR. NOCE: I'll object as vague. If he
- 24 wants to specify a specific location or a specific
- 25 test that was conducted.

```
1 JUDGE JORDAN: If I understand the
```

- 2 question, it is with regard to the quality of testing
- 3 overall; is that correct?
- 4 MR. LEE: Right. Can we be 100 percent
- 5 sure that at some point that water did not leave a
- 6 water main. Is that an okay question?
- 7 JUDGE JORDAN: Yes. The witness may
- 8 answer if he knows the answer.
- 9 THE WITNESS: Can you ask it one more
- 10 time, please?
- 11 BY MR. LEE:
- 12 Q. Based on the -- so many discrepancies in
- 13 the test that Mr. Simmons testified to yesterday, for
- 14 the test he couldn't tell if it was groundwater or
- 15 tap water. Several of the other --
- JUDGE JORDAN: I think we've been
- 17 through this.
- MR. LEE: -- witnesses were easily
- 19 swayed.
- 20 MR. NOCE: Objection.
- JUDGE JORDAN: I'm going to --
- MR. LEE: So knowing the --
- JUDGE JORDAN: Mr. Lee, hang on. I
- 24 think I'm gonna wrap this line of questioning up
- 25 pretty quick. You recall that I asked you whether

```
1 you remembered Mr. Simmons' testimony yesterday?
```

- THE WITNESS: Uh-huh.
- MR. NOCE: Answer audibly.
- 4 THE WITNESS: Yes.
- 5 JUDGE JORDAN: Thank you. You remember
- 6 his response to the question that you've just been
- 7 asked, do you have 100 percent certainty that water
- 8 tested from the ground has never been in a Missouri
- 9 American Water Company main? Do you remember that
- 10 question?
- 11 THE WITNESS: Close to that line. Maybe
- 12 not that exact way, but yes.
- 13 JUDGE JORDAN: Okay. Is your answer any
- 14 different from his?
- 15 THE WITNESS: Other than that's such a
- 16 broad question, that the answer --
- JUDGE JORDAN: You don't have to comment
- 18 on the question.
- 19 THE WITNESS: I don't have any different
- 20 answer, no.
- JUDGE JORDAN: Mr. Lee, do you have
- 22 another line of questioning for this witness?
- 23 BY MR. LEE:
- Q. With all the tests that you've
- 25 performed, the swimming pool test and the lab test,

- 1 how certain are you that the water never left the
- 2 main? If you're not 100 percent certain, can you be
- 3 50 percent certain?
- 4 MR. NOCE: Object as to vague. If
- 5 Mr. Lee wants to refer to a specific complaint that
- 6 he has made -- he's just referring to the main. I'm
- 7 not sure where he's talking about.
- JUDGE JORDAN: Well, we'll talk about
- 9 your confidence in testing overall. If you can
- 10 quantify it by a percentage, you may answer the
- 11 question.
- 12 THE WITNESS: I don't feel like I have
- 13 enough details to be able to answer the question.
- 14 JUDGE JORDAN: Then your answer is you
- 15 don't know?
- THE WITNESS: (Nodded head.)
- JUDGE JORDAN: You have to say yes or
- 18 no, give us a yes or no.
- 19 THE WITNESS: Based on that question, I
- 20 don't know.
- 21 JUDGE JORDAN: Are you saying you cannot
- 22 answer that question?
- 23 THE WITNESS: I'm saying I don't know
- 24 the answer to the question, yes.
- 25 BY MR. LEE:

```
1 Q. So you don't know how reliable your
```

- 2 tests are?
- 3 A. I think I've testified they're reliable.
- 4 It's gonna depend on the situation. I mean, we do
- 5 find chlorine present when we -- to find main brakes,
- 6 it's not uncommon to find it and know that we then
- 7 have a -- we have a break there and we fix it. So,
- 8 you know, again, just because we didn't find any
- 9 chlorine didn't mean we stopped there. We
- 10 correlated, you know, we did every test we have
- 11 possible to determine if there's a leak, and the
- 12 answer is no, it's coming up there is no leak.
- 13 Q. There's a leak, we just haven't figured
- 14 out --
- MR. NOCE: Objection.
- 16 JUDGE JORDAN: It's not time for
- 17 testimony.
- 18 MR. LEE: My point is --
- 19 JUDGE JORDAN: No, don't tell me what
- 20 your point is. Ask another question.
- 21 BY MR. LEE:
- Q. The question is, if you cannot be 100
- 23 percent certain that that water in your test, every
- 24 time, 100 percent certain, how can you trust in it as
- 25 a reliable diagnostic tool?

- 1 A. I can only speak to this scenario, and I
- 2 am very confident that our tests, if we had a leak up
- 3 here, that the main -- the water would surface close
- 4 enough to the main, that we would see characteristics
- 5 that told us we had a leak.
- 6 JUDGE JORDAN: Okay. We're getting into
- 7 argument here, so it's time to move on to another
- 8 line of questioning.
- 9 BY MR. LEE:
- 10 Q. All right. I'm confused. I thought we
- 11 weren't -- didn't have much reliability in our test
- 12 and now we're saying we do. Did I understand
- 13 correct?
- JUDGE JORDAN: No, it's time for a new
- 15 line of questioning. And what his answers are will
- 16 be recorded in the transcript. That's why we do it.
- 17 BY MR. LEE:
- 18 Q. If I could focus your attention on 18
- 19 and 19, and No. 8 of 18 and No. 6 of 19. I don't
- 20 know if you have a copy of that. No. 8 was the
- 21 number of gallons unaccounted for in this water
- 22 system.
- 23 A. I'm sorry. And No. 18?
- 24 Q. 8 on 18.
- 25 A. Okay.

- 1 Q. And page 2 on 19. A couple
- 2 discrepancies here. First it just says that you've
- 3 been tracking water.
- 4 JUDGE JORDAN: Don't tell us what it
- 5 says, just ask him the question.
- 6 BY MR. LEE:
- 7 Q. Do you see a discrepancy in question 8
- 8 and question 6?
- 9 A. No.
- 10 MR. NOCE: I'm sorry. Go ahead.
- 11 BY MR. LEE:
- 12 Q. Question 8 says -- can I read this? I
- 13 can read this. Question 8 says, 12 million
- 14 408,753,000 [sic] gallon units are unaccounted for,
- 15 for 2007. On page 2 for 2007, it says 13 million,
- 16 176, 9 -- 294, 100,000 [sic] gallon units are
- 17 unaccounted for?
- MR. NOCE: I think I'll object.
- 19 MR. LEE: Is there --
- 20 MR. NOCE: I think that he misstated the
- 21 answer.
- JUDGE JORDAN: Well, he's just read from
- 23 the document. Now, what that portends --
- MR. NOCE: I think he gave the wrong
- 25 unit. I think he said 12 million -- or 13 million,

- 1 et cetera, 100,000 gallons.
- JUDGE JORDAN: Let's just refer to the
- 3 documents which will be in the record for that --
- 4 MR. NOCE: That's fine.
- 5 JUDGE JORDAN: -- and that are before
- 6 the witness.
- 7 MR. NOCE: The document will speak for
- 8 itself.
- 9 JUDGE JORDAN: And the question before
- 10 the witness, the question pending is, do you see a
- 11 discrepancy between those two quantities? And your
- 12 answer was?
- 13 THE WITNESS: It was no.
- JUDGE JORDAN: Okay.
- 15 BY MR. LEE:
- 16 Q. Okay. I'm good with that. For the year
- 17 2008, I don't need to read it to you, but there's a
- 18 discrepancy in those numbers too.
- 19 A. There's a difference in those numbers.
- Q. A difference in those numbers. What do
- 21 you attribute that difference to?
- 22 A. You asked two different questions.
- No. 8 asks for gallons of unaccounted for water, and
- 24 No. -- in Exhibit 18, and in Exhibit 19 the question
- 25 asked for nonrevenue water.

```
1 Q. Okay. What is the difference in those?
```

- 2 A. Well, nonrevenue water is the difference
- 3 between what was delivered to the system or produced
- 4 and delivered to the system minus the billed sales to
- 5 the customer, and unaccounted for is, I guess, quite
- 6 a complex -- or consists of many components.
- 7 Q. Which some of which would be?
- 8 A. Usage during fire fighting, billing,
- 9 meter reading errors, billing errors, errors in
- 10 production meter, flow meters, water main breaks,
- 11 flushing water for new mains, flushing waters for
- 12 distribution, flushing of your system, theft,
- 13 unauthorized usage, construction activity by others
- 14 for permitted usage on a fire hydrant. I don't know
- if I've covered them all, but that's most of them.
- Q. When there's a fire, do you account for
- 17 that water at flow rate?
- 18 A. No.
- 19 Q. Have there been many fires in North
- 20 County lately?
- MR. NOCE: Objection, relevance.
- 22 JUDGE JORDAN: I have to sustain that
- 23 because the question asked in discovery was not North
- 24 County.
- MR. LEE: It was not what?

- 1 JUDGE JORDAN: It was not North County.
- 2 It was about the whole system.
- 3 MR. LEE: Okay. My understanding was
- 4 the system was in North County. Am I misunderstood
- 5 about that?
- 6 JUDGE JORDAN: You just asked a
- 7 different question. If you want to ask a question
- 8 about the system, then you may.
- 9 BY MR. LEE:
- 10 Q. Is the system more than just North
- 11 County?
- 12 A. Yes.
- 13 Q. How large is the system that we're
- 14 talking about for this lost water?
- 15 A. All of St. Louis County and a portion of
- 16 Jefferson County.
- 17 Q. Do you try to account or track any of
- 18 this water?
- 19 JUDGE JORDAN: Will you specify which
- 20 water you're talking about? The unaccounted for
- 21 verses the nonrevenue, which are you asking him
- 22 about? They're two different measures according to
- 23 his testimony.
- 24 BY MR. LEE:
- 25 On the unaccounted for water.

```
1 A. Well, no. I guess that's why it's
```

- 2 called unaccounted for, because there's not a
- 3 quantifiable way to really account for it.
- Q. Does a fire district have to tell you
- 5 they used your water?
- 6 A. No.
- 7 Q. They can just hook on and use as much as
- 8 they want?
- 9 A. Yes.
- 10 Q. And do you try to account for any of the
- 11 nonrevenue water, which is theft and things like
- 12 that, correct?
- 13 A. Yeah. It's everything.
- 14 Q. This is a total of this plus more?
- 15 A. I don't understand your question.
- 16 Q. You don't have a total of approximately
- 17 25 million units. The nonrevenue water is the
- 18 unaccounted for water plus the small amount which
- 19 equals the total here, right?
- 20 A. The unaccounted for water is a part of
- 21 the nonrevenue water.
- Q. All right. So how do you try to account
- 23 or do you -- any way that you try to cut these
- 24 losses?
- MR. NOCE: I'll object to the relevance.

```
1 JUDGE JORDAN: I don't see the
```

- 2 relevance.
- 3 MR. LEE: Well, a water loss survey
- 4 would be one way to account for this, to go around
- 5 and if we had any integrity issues in our system, we
- 6 could do a systematic water loss survey to try to
- 7 account for some of this water.
- 8 JUDGE JORDAN: And that's --
- 9 MR. LEE: And I'm trying --
- 10 JUDGE JORDAN: -- too far afield. I'm
- 11 going to sustain that objection.
- 12 MR. LEE: -- find out what precautions
- 13 or what -- it's not relevant.
- 14 BY MR. LEE:
- 15 Q. Do you have any idea of just how much
- 16 water if I converted that to 13 and a half billion
- 17 gallons of water? Would that be correct?
- 18 MR. NOCE: Again, I'll object. I
- 19 believe the document speaks for itself, the numbers.
- JUDGE JORDAN: Yeah, the probity of the
- 21 water loss through the entire system, the entire
- 22 system, is not great. I can't see it frankly. I
- 23 mean, throughout St. Louis County and Jefferson
- 24 County is where these numbers apply. What that does
- 25 for your neighborhood, I can't see. I cannot see it.

- 1 I can't see how that tells me anything about this
- 2 area.
- 3 MR. LEE: If I have a small portion of
- 4 this water which you would assume logically that --
- 5 that I could have a small portion of this water
- 6 running out of the ground in my neighborhood.
- JUDGE JORDAN: Right, so your
- 8 questioning is going to be based on the assumption
- 9 that the amount of water lost in your neighborhood is
- 10 in the same proportion that your area, your
- 11 neighborhood bears to the entire system; is that
- 12 correct?
- 13 MR. LEE: I wouldn't say exactly, but I
- 14 would assume that it would be close.
- JUDGE JORDAN: Okay. Well, I'm gonna
- 16 sustain the objection.
- 17 BY MR. LEE:
- 18 Q. Okay. There's no way to determine how
- 19 much of this is lost to a leaking system? It's
- 20 pretty much agreed to industrywide that most systems,
- 21 if not all of them, have leaks; is that correct?
- 22 A. It's a component of the unaccounted for
- 23 water and the nonrevenue water.
- Q. Do you know if any other water systems
- 25 do water loss surveys to test the integrity of their

1 system to show their stockholders or their consumers,

- 2 you know, the citizens?
- 3 MR. NOCE: I'll object.
- 4 JUDGE JORDAN: We've run down this line
- 5 of questions. That's the kind of thing you want to
- 6 address in discovery. Now, do you have.
- 7 BY MR. LEE:
- Q. Can I ask, so we don't know how much of
- 9 this water goes underground? Do we know that?
- 10 JUDGE JORDAN: Now you're talking
- 11 systemwide?
- MR. LEE: Systemwide.
- 13 THE WITNESS: No.
- 14 BY MR. LEE:
- Q. Could it be 50 percent?
- 16 JUDGE JORDAN: He's answered that
- 17 question.
- MR. LEE: We don't know.
- 19 JUDGE JORDAN: He's already told you he
- 20 doesn't know, so it's time for another question.
- 21 BY MR. LEE:
- 22 Q. If I could point your attention towards
- 23 the pictures in the back. And picture 4 would be?
- 24 JUDGE JORDAN: You're referring to E4?
- 25 MR. LEE: E4.

```
1 JUDGE JORDAN: E4.
```

- 2 BY MR. LEE:
- 3 Q. Do you know how many days it had been
- 4 since it rained when you took this picture?
- 5 A. No, I don't.
- 6 Q. If the water remained in that area for
- 7 four days and you came out on the fifth day, it would
- 8 be dry, wouldn't it? You would have missed the
- 9 water?
- 10 A. Say that again.
- 11 Q. If it only leaked for four days after a
- 12 rain and you showed up on the fifth day to take the
- 13 picture, you would have missed the water, correct?
- 14 A. If it was leaking I wouldn't miss the
- 15 water.
- 16 Q. Are you 100 percent certain of that?
- 17 A. Yes.
- 18 Q. If these water mains were leaking in
- 19 other areas and saturated the ground and then it
- 20 rained, the rainwater would not be able to soak into
- 21 the ground and could cause a leak; would you agree?
- 22 A. No. Rainwater soaking into the ground
- 23 would not cause a leak.
- 24 O. Okay. It wouldn't cause a leak. It
- 25 would cause the appearance of water on the street,

- 1 could cause the appearance of water on the street
- 2 like this, correct?
- 3 A. A leak could cause -- can you rephrase
- 4 that?
- 5 Q. If we had the ground saturated like a
- 6 soggy piece of bread, and then it rained, we could
- 7 have water coming up out of the cracks in the streets
- 8 for several days; is that correct?
- 9 A. You could have water coming up out of
- 10 the cracks in the street if it rained for several
- 11 days -- I mean if it rained. I'm not sure that the
- 12 soggy piece of bread has to happen for there to be --
- 13 Q. If there's ground under the street
- 14 saturated, then the water wouldn't be able to run
- off; is that correct? You'd have an excess of water
- 16 under the street trying to come up?
- 17 A. But it would still be coming out in this
- 18 picture.
- 19 Q. Not if the evaporation content --
- JUDGE JORDAN: Not time for testimony.
- 21 You may ask another question.
- 22 BY MR. LEE:
- 23 Q. Could the evaporation have dried that up
- 24 and there still be a leak under the ground?
- A. Not in my opinion, no.

- 1 Q. Is one of your diagnostic procedures on
- 2 a visual inspection to look for water on the street
- 3 like this?
- 4 A. Yes.
- 5 Q. Does this picture seem to depict a
- 6 recurring water problem right there?
- 7 A. Seems to be a low spot where debris and
- 8 leaves and sticks and trash collect when it rains.
- 9 Q. On your visit to the neighborhood, did
- 10 you talk with any of the residents there?
- 11 A. No, I did not.
- 12 Q. Would that be a good thing to do if
- 13 you're calling what you're doing an investigation?
- 14 A. I don't know. For my investigation, no,
- 15 it wasn't necessary.
- 16 Q. Okay. Exhibit 2 --
- 17 JUDGE JORDAN: Is that E2?
- 18 MR. LEE: I think this was Exhibit 2.
- 19 MR. NOCE: It was.
- 20 BY MR. LEE:
- Q. Well, I don't see the rest of the third
- 22 amendment. Have you ever seen water flow out of the
- 23 street there?
- 24 A. I've seen pictures of it, and I believe
- 25 I've seen it on one site visit.

```
1 Q. If this water stopped flowing out of the
```

- 2 cracks in the street one day after the water there
- 3 was repaired -- water main was repaired at Red River
- 4 and Aspen Woods, would you presume that water had
- 5 come from that water main all that time?
- 6 MR. NOCE: Again, I think I'll object as
- 7 to the relevance. We're getting back into repairs.
- 8 JUDGE JORDAN: I'll overrule that
- 9 objection. Answer if you can.
- 10 THE WITNESS: No, I would not presume
- 11 that.
- 12 BY MR. LEE:
- 13 Q. So what good is your visual inspection
- 14 to look for water in the streets if you can't --
- 15 JUDGE JORDAN: That's argumentative.
- 16 We've been through it.
- 17 BY MR. LEE:
- 18 Q. How reliable are your visual inspections
- 19 of the street if you can't rely on them?
- 20 MR. NOCE: Objection, argumentative.
- 21 And I believe it's been asked and answered.
- JUDGE JORDAN: I can't remember that
- 23 question being asked as regard to visual inspections.
- 24 So how reliable do you think these visual inspections
- 25 are?

- 1 THE WITNESS: The water's drying up. If
- 2 it was our -- we had a leak, it would continue to be
- 3 wet. It wouldn't dry up until we came and fixed the
- 4 repair that was actually leaking, causing that
- 5 area -- so if it's dried up, we can't say that it is
- 6 a leak of ours. That's rainwater that's persisting
- 7 for several days, but it does dry up.
- 8 BY MR. LEE:
- 9 Q. How long did you see that leak? How
- 10 long have you been involved with this complaint?
- 11 A. I've been involved with it since you've
- 12 filed the civil case. So I guess it would be back in
- 13 May. I don't remember when it was filed, but I know
- 14 at least back to May of '08.
- 15 Q. And did you ever repeatedly watch the
- 16 water flow out on the street? I mean, did you come
- 17 to the neighborhood once, twice or --
- 18 A. I've been to the neighborhood on more
- 19 than one occasion and seen it dry when there had been
- 20 no repair made by us anywhere else.
- Q. Uh-huh. And once again, you're saying
- 22 that if water continues to flow out of the street for
- 23 four or five days or across the sidewalk and a repair
- 24 was made and the water stopped flowing like that --
- 25 JUDGE JORDAN: This question is sounding

- 1 awfully familiar.
- 2 MR. LEE: -- that it could not be
- 3 correlated to the repair? Pardon?
- 4 JUDGE JORDAN: I said this question
- 5 sounds really familiar.
- 6 MR. LEE: I just can't imagine --
- 7 JUDGE JORDAN: This is not the time for
- 8 argument. This is not the time for argument. There
- 9 will be one and we'll want to hear it. This is not
- 10 it.
- 11 MR. LEE: All right.
- 12 BY MR. LEE:
- 13 Q. Do you know if any of this water main on
- 14 Coal Bank has been replaced?
- 15 A. I do not recall.
- 16 Q. Do you know if there had been any
- 17 repairs on Coal Bank Court?
- 18 MR. NOCE: Objection, relevance. We're
- 19 getting into repairs, I believe, and I think we've
- 20 addressed this.
- JUDGE JORDAN: Yeah, we've...
- We've addressed that.
- 23 MR. LEE: I just don't know how I can --
- 24 if I don't rely on historical data, how I can show
- 25 anything's leaking at the present.

- 1 JUDGE JORDAN: Well, if the issue were
- 2 historical data, of course you could, but we've
- 3 addressed how you will deal with that in my ruling.
- 4 BY MR. LEE:
- 5 Q. Are you aware of my invitation to come
- 6 out and inspect Aspen Woods and my basement, the
- 7 reduction of flow in my basement --
- 8 MR. NOCE: Objection.
- 9 MR. LEE: -- on May -- I believe it was
- 10 May 14th or May 15th, an e-mail that I sent to
- 11 Mr. Noce.
- 12 MR. NOCE: Again, objection. We've
- 13 addressed this. I believe this is getting into
- 14 discussing settlement negotiations between the
- 15 parties. It's also --
- JUDGE JORDAN: Yeah, I think I have to
- 17 keep that out. I have to sustain that objection.
- 18 No, wait a minute. Answer the question. The
- 19 question was, are you aware of an invitation to
- 20 inspect.
- 21 MR. NOCE: Then I guess I might have to
- 22 object as attorney/client privilege, your Honor.
- JUDGE JORDAN: Okay. Please repeat your
- 24 question.
- 25 BY MR. LEE:

```
1 Q. Are you aware of my invitation to
```

- 2 Missouri American Water to come out and inspect the
- 3 reduction of flow in water in this neighborhood
- 4 several days after the repair on Aspen Woods?
- 5 MR. NOCE: Which constitutes discussions
- 6 between the parties regarding settlement
- 7 negotiations, and then he's asking in turn what
- 8 discussions I may have had with my client Missouri
- 9 American Water.
- 10 JUDGE JORDAN: The second question was
- 11 different from the first. I will sustain your
- 12 objections.
- MR. LEE: On the second one?
- 14 JUDGE JORDAN: On both. The first one
- 15 involved communication to Mr. Noce. That is
- 16 privileged, attorney/client privilege if you're
- 17 asking his awareness of something you sent to the
- 18 attorney. The second one I will sustain on the
- 19 ground of settlement negotiations.
- 20 BY MR. LEE:
- 21 Q. Is there any reason that Missouri
- 22 American Water would not want to inspect my basement
- 23 or a reduction in flow of water coming out of the
- 24 ground?
- MR. NOCE: I guess I'd object as to the

- 1 relevance. I'm not sure why Missouri American Water
- 2 has a duty to inspect a reduction of an alleged leak.
- JUDGE JORDAN: I'm gonna overrule that
- 4 objection and let the witness answer if he can. Is
- 5 there a reason why Missouri American would not come
- 6 to Mr. Lee's basement to look at it?
- 7 THE WITNESS: I have been to look at it
- 8 once.
- 9 BY MR. LEE:
- 10 Q. How many times have you been there
- 11 immediately following a repair when I claimed there
- 12 was a huge reduction in water flow?
- 13 A. None that I -- none.
- Q. Could that tell us something about the
- 15 repair?
- JUDGE JORDAN: I think we've been
- 17 through that.
- 18 BY MR. LEE:
- 19 Q. Is it your opinion as an engineer that
- 20 storm drains should have water in them almost
- 21 continually?
- 22 A. I'm not a storm water or an MSP [sic]
- 23 employee here. My career's not been in storm water,
- 24 so in my -- I would think they would have water in
- 25 them sometimes and not others. It depends on the

- 1 situation and circumstances.
- Q. But if they remained wet year long, wet
- 3 if not flowing, would you consider that could be a
- 4 problem?
- JUDGE JORDAN: That's the same question.
- 6 MR. LEE: Okay. I guess I'm done. I'm
- 7 confused and I guess I'm kind of going in circles
- 8 so...
- 9 JUDGE JORDAN: All right. That's
- 10 Mr. Lee's cross. I don't have any questions from the
- 11 bench, so...
- MR. NOCE: If it please the Commission,
- 13 I have some brief redirect.
- 14 JUDGE JORDAN: That would be the next
- 15 step, yes.
- 16 REDIRECT EXAMINATION BY MR. NOCE:
- 17 Q. Mr. Linam, in several of the records
- 18 that have been produced as part of Group Exhibit D, I
- 19 believe they stated nothing found. And I'll ask you,
- 20 is it Missouri American Water's policy that it tells
- 21 its investigators when they go out in typical
- 22 situations to record all investigations that they
- 23 perform when they're at a site visit and they don't
- 24 find a leak?
- 25 A. No, not necessarily.

- 1 Q. And the ones that are related to this
- 2 investigation and these complaints by Mr. Lee, why is
- 3 it that they are -- the investigation efforts are
- 4 recorded in detail?
- 5 A. Because of the nature of the complaint
- 6 and the fact that we're under a civil lawsuit as well
- 7 as this PSC complaint.
- 8 Q. And Mr. Linam, in your time with the
- 9 water service, have you ever seen instances where a
- 10 leak would go away or dry up on its own without being
- 11 repaired?
- 12 A. No.
- MR. NOCE: No further questions.
- 14 JUDGE JORDAN: Thank you.
- MR. NOCE: I guess at this time, your
- 16 Honor, I did have -- I did mention to the parties
- 17 that I do need to correct part of Exhibit H. Would
- 18 this be an appropriate time?
- 19 JUDGE JORDAN: This would be a good
- 20 time. Tell us about that, please.
- 21 MR. NOCE: There was a test result and
- 22 an exhibit referred to in I guess the row numbered 5
- 23 and No. 6 which was never entered into evidence nor
- 24 was it ever discussed by the witnesses, so I -- I'm
- 25 going to go ahead and strike that from the record.

```
1 JUDGE JORDAN: Okay.
```

- 2 MR. NOCE: And mark it out.
- JUDGE JORDAN: Will you state what
- 4 paragraphs those are again, please?
- 5 MR. NOCE: Oh, yes. It's discussing a
- 6 lab test conducted at 11338 Larimore on 1/12/09.
- 7 JUDGE JORDAN: And just for clarity of
- 8 the record, will you refer to them by, let's see,
- 9 line number?
- 10 MR. NOCE: Yes. It's line 5 on page 1,
- 11 and then line 6 on page 2 in the last column under
- 12 "Water Sample."
- JUDGE JORDAN: Okay. Is there any
- 14 other part of that that you want to withdraw or is
- 15 that it?
- MR. NOCE: I believe that is it.
- 17 JUDGE JORDAN: Okay. Our regulations do
- 18 not require recross of a witness, so while Mr. Noce
- 19 is moving into working on his document revision, the
- 20 next step would be Staff's rebuttal. We have an hour
- 21 before our computer shuts down. Staff's case in
- 22 chief I guess is really the word for this.
- 23 MR. RITCHIE: I'd like to call Jim Busch
- 24 as a witness, please.
- JUDGE JORDAN: That sounds good. And

- 1 will you be following up on the question I asked you
- 2 during your opening statement?
- 3 MR. RITCHIE: Yes, your Honor.
- 4 JUDGE JORDAN: Thank you very much.
- 5 MR. NOCE: Judge, what would you like me
- 6 to do? This is a series of exhibits that have been
- 7 admitted in Respondent's case. Do you want me to
- 8 give these to the court reporter, this booklet?
- 9 JUDGE JORDAN: Well, the court reporter
- 10 should possess the exhibits that have been
- 11 introduced, but only those. I wouldn't want -- I
- 12 mean, not everything there has been admitted into the
- 13 record; is that correct?
- MR. NOCE: Actually, it has, your Honor.
- 15 I've removed everything that is not.
- JUDGE JORDAN: Oh, have you? Very good.
- 17 Can I have a look at it, please?
- 18 Yes. These are admitted into the
- 19 record. Thank you very much.
- 20 MR. NOCE: All right. Thank you, your
- 21 Honor.
- JUDGE JORDAN: All right. Mr. Ritchie,
- 23 you called someone to the stand, have you?
- 24 MR. RITCHIE: I have. I've called Jim
- 25 Busch as a witness.

```
1 JUDGE JORDAN: All right. Then please
```

- 2 raise your right hand.
- 3 (The witness was sworn.)
- 4 JUDGE JORDAN: Thank you.
- 5 MR. RITCHIE: Judge, actually, before I
- 6 start with my questions, I'm just going to note that
- 7 it is almost five after five o'clock and I'm aware
- 8 that the computers are shutting down at six o'clock.
- 9 Given the nature of previous
- 10 cross-examination, I'm not sure that we'll be able to
- 11 get through this in one sitting here by six o'clock,
- 12 so in light of that, I'd like to go ahead and offer
- 13 Staff's report of the investigation made. The
- 14 Staff's report was filed March 20th, 2009. Offer
- 15 this into evidence, please.
- 16 JUDGE JORDAN: Well, objection?
- 17 MR. LEE: No.
- 18 JUDGE JORDAN: Okay. Any objection from
- 19 Missouri American?
- MR. NOCE: None.
- 21 JUDGE JORDAN: Okay. Then I will admit
- 22 it into the record.
- 23 (EXHIBIT NO. 20 WAS MARKED FOR
- 24 IDENTIFICATION BY THE COURT REPORTER.)
- 25 (EXHIBIT NO. 20 WAS RECEIVED INTO

- 1 EVIDENCE AND MADE A PART OF THE RECORD.)
- JUDGE JORDAN: As we get closer to six
- 3 o'clock and we end our recording for today, we'll
- 4 discuss matters relevant to your case in chief that
- 5 have not come into the record already. In other
- 6 words, we will be scheduling another hearing, but
- 7 we'll be scheduling another hearing anyway to deal
- 8 with the matters that are going to be filed after
- 9 today.
- 10 So right now I envision those things
- 11 happening on the same day, but we can discuss that.
- MR. RITCHIE: That would be fine. Thank
- 13 you, Judge.
- 14 JUDGE JORDAN: All right. And who
- 15 knows, maybe we'll get through this entire case
- 16 before six o'clock.
- MR. RITCHIE: Maybe so.
- 18 JUDGE JORDAN: All right. And you may
- 19 proceed.
- MR. RITCHIE: Thank you, your Honor.
- 21 DIRECT EXAMINATION BY MR. RITCHIE:
- 22 Q. Can you please state your name and spell
- 23 it?
- A. My name is James Busch. J-a-m-e-s,
- 25 B-u-s-c-h.

- 1 Q. And what is your occupation, Mr. Busch?
- 2 A. I am the manager of the water and sewer
- 3 department at the Missouri Public Service Commission.
- 4 Q. Could you please describe your duties?
- 5 A. My duties as a manager, I have general
- 6 supervision over the water and sewer department.
- 7 Some of the things that we do, we investigate
- 8 complaints, we do rate requests, we do inquiries from
- 9 customers and the company, we do general inquiries
- 10 from the public, we investigate certificates of
- 11 convenience and necessity, we deal with tariff
- 12 filings, we work with the DNR for possible
- 13 violations.
- 14 Q. Okay. And how long have you been the
- 15 manager of the water and sewer department?
- 16 A. I've been the manager since February 1st
- of 2008, so about almost a year and a half.
- 18 Q. And what did you do before that job?
- 19 A. Just prior to that job I was a
- 20 regulatory economist III in the Public Service
- 21 Commission in the energy department. Prior to that I
- 22 was a economist with the Office of Public Counsel for
- 23 over five years, and prior to that I was an economist
- 24 in the procurement analysis department here at the
- 25 Public Service Commission.

```
1 Q. So how many total years experience do
```

- 2 you have in the area of public utility regulation?
- 3 A. I have over 12 years experience in the
- 4 field of public utility regulation.
- 5 Q. Now, can you briefly describe the role
- 6 of the Staff of the Public Service Commission in a
- 7 formal consumer water complaint case such as this?
- 8 A. In a formal complaint such as this where
- 9 a complaint has been filed in front of the
- 10 Commission, Staff is generally ordered to do an
- 11 investigation and file a report. So what we do is we
- 12 will get the information, the nature of the
- 13 complaint, we will -- I will assign it to one of my
- 14 staff, and I have staff members who are engineers,
- 15 professional engineers, technicians such as people
- 16 who have operator licenses, and they will do an
- 17 investigation into the nature of the complaint.
- They will contact the company, see what
- 19 the company's doing, making sure that there are no
- 20 violations of the PSC rules or the tariff violations.
- 21 We will then, based upon that investigation, write a
- 22 report, basically giving the Commission what our
- 23 recommendation is.
- Q. Okay. Now, are you aware of any
- 25 statutory guidance that the utility needs to meet?

```
1 A. Yes, I am.
```

- 2 Q. And would that be Section -- Missouri
- 3 statute § 393.130.1?
- 4 A. I believe it is.
- 5 MR. RITCHIE: I would ask the Commission
- 6 to take official notice of that statute, and if I
- 7 could hand a copy to my witness?
- JUDGE JORDAN: The answer to both is
- 9 yes.
- 10 MR. RITCHIE: Thank you, Judge.
- 11 MR. NOCE: What was the number on that?
- MR. RITCHIE: 393.130.
- MR. LEE: What does this have to do with
- 14 the water leaks?
- MR. RITCHIE: Well, are you objecting?
- 16 JUDGE JORDAN: I take that as an
- 17 objection to relevance.
- 18 MR. RITCHIE: This has to do with
- 19 Staff's role in the investigation of your water
- 20 leaks, or your alleged water leaks.
- JUDGE JORDAN: We're getting background
- 22 for the witness, in other words.
- 23 MR. LEE: Their office role or their
- 24 diagnostic role?
- JUDGE JORDAN: Well, let's find out.

```
1 MR. RITCHIE: I think if -- if I was
```

- 2 able to go on, we would address some of your
- 3 questions with my witness. May I proceed, Judge?
- 4 JUDGE JORDAN: Please do.
- 5 BY MR. RITCHIE:
- 6 Q. Mr. Busch, can you please read the first
- 7 line of § 393.130.1?
- 8 MR. LEE: Did you give me a copy of
- 9 this?
- 10 MR. RITCHIE: I've asked the Commission
- 11 to take official notice of it, but I can provide
- 12 copies to whoever would need one.
- JUDGE JORDAN: Do you want a copy?
- MR. LEE: I have a copy.
- JUDGE JORDAN: Okay. It's not an
- 16 exhibit and it doesn't need to be because the
- 17 Commission has to take official notice of the
- 18 statutes. It has to.
- 19 THE WITNESS: The first sentence of that
- 20 section states, "Every gas corporation, every
- 21 electrical corporation, every water corporation and
- 22 every sewer corporation shall furnish and provide
- 23 such service, instrumentalities and facilities and
- 24 shall be safe and adequate and in all respects just
- 25 and reasonable."

- 1 BY MR. RITCHIE:
- Q. Okay. Thank you, Mr. Busch. So in the
- 3 course of its investigation, the Staff will make
- 4 findings and then write a Staff report?
- 5 A. In the situation like in this case where
- 6 it is a formal complaint, yes, Staff will do an
- 7 investigation and then write a report and file that
- 8 with the Commission.
- 9 Q. Now, are you familiar with Rob Lee's
- 10 complaint case against Missouri American Water?
- 11 A. Yes, I am.
- 12 Q. And what's your understanding of his
- 13 claims?
- 14 A. The claims that are, I think, specific
- 15 for this complaint are, there are leaks, alleged
- 16 leaks in the -- Missouri American's infrastructure in
- 17 and around Mr. Lee's house and his neighborhood, and
- 18 that those leaks are not being repaired, and then
- 19 causing leaking into his basement. That's my
- 20 understanding.
- 21 Q. And have you personally met with Lee and
- 22 discussed this case with him?
- 23 A. Yes, I have personally met with Mr. Lee.
- 24 Q. What other members of the Staff of the
- 25 Public Service Commission have been involved in this

- 1 case?
- A. Other members of the Staff that have
- 3 been involved with this case -- are you referring to
- 4 just this specific case, this water, the
- 5 WC-2009-0277? I just want to make sure.
- 6 Q. Yes.
- 7 A. This case, Staff members involved have
- 8 been Mr. Jerry Scheible, Mr. Steve Loethen,
- 9 Ms. Natelle Detrich. The other members of the -- of
- 10 my department, we've done a -- when we investigate a
- 11 case such as this which is complex, we have a
- 12 collaborative process, so we'll discuss it, but those
- 13 are the ones who have actually had contact with
- 14 Mr. Lee and involved in this case.
- 15 Furthermore, members of the consumer
- 16 services department and I believe the records
- 17 department.
- 18 Q. You mentioned Steve Loethen. What are
- 19 Mr. Loethen's qualifications to work in this area?
- 20 A. Mr. Loethen has worked in the water and
- 21 sewer department for I think eight to nine years. He
- 22 is a utility operations technical specialist II I
- 23 believe is his title. He holds a wastewater and
- 24 water license. He also has a license to be a water
- 25 distributor. I think that's the way it's called.

- 1 And then prior to that, I know Mr. Loethen has worked
- 2 for a utility as an operator, operating water
- 3 systems, and I believe that Mr. Loethen actually
- 4 currently operates a system in his home town.
- 5 Q. And can you speak about Mr. Scheible's
- 6 qualifications?
- 7 A. Mr. Scheible has worked at the
- 8 Commission almost as long as Mr. Loethen, about
- 9 almost eight years. Mr. Scheible has a degree in
- 10 civil engineering and, in fact, is a PE.
- 11 Mr. Scheible also holds wastewater and water
- 12 license -- operator license.
- 13 Q. And what roles did Mr. Loethen and
- 14 Mr. Scheible play in our -- in Staff's investigation?
- 15 A. Mr. Loethen and Mr. Scheible have gone
- 16 out to visit Mr. Lee with me. In one of Staff's
- 17 first visits with Mr. Lee, they have reviewed what
- 18 Missouri American has done. We have discussed the
- 19 actions taken by Missouri American to make sure that
- 20 they were -- that they seemed appropriate actions on
- 21 how to investigate a leak.
- They also have gone out on their own to
- 23 visit with Mr. Lee or to visit the area to look at
- 24 some of the allegations that Mr. Lee has put forth.
- 25 Mr. Loethen has also took samples at Mr. Lee's house

- 1 on one of his visits.
- Q. Do you know how many times someone from
- 3 the PSC Staff, either individually or together, has
- 4 traveled from Jefferson City to Mr. Lee's home in
- 5 St. Louis to investigate these claims?
- 6 A. For this case in particular, I would say
- 7 five times.
- 8 Q. And can you describe each of those
- 9 visits, please?
- 10 A. For this case what brought this to my
- 11 attention, first time I had heard of Mr. Lee was
- 12 during the local public hearing that was held in
- 13 Case WR-2008-0311, Missouri American's last full rate
- 14 case. Mr. Lee testified at the local public hearing.
- We set up a meeting for October 7th of
- 16 which myself and Mr. Scheible, Mr. Loethen and
- 17 Ms. Detrich went out and visited with Mr. Lee. We
- 18 also at that time invited members of Missouri
- 19 Department of Natural Resources and the
- 20 Metropolitan -- St. Louis Metropolitan Sewer
- 21 District.
- Q. And when was the next visit?
- 23 A. The next visit involved in this
- 24 complaint, Mr. Scheible and Mr. Loethen and myself
- 25 set up a meeting with Missouri American. We met at

- 1 Missouri American's offices. I believe this was
- 2 December 11th or 12th. We looked at some maps, we
- 3 discussed --
- 4 Q. I'm sorry, of 2008?
- 5 A. Of 2008. I'm sorry. The first visit
- 6 was in 2008 as well.
- 7 Q. Thank you.
- 8 MR. LEE: December 12th you said?
- 9 THE WITNESS: December 11th or 12th,
- 10 yes. And we met, we discussed the complaint with
- 11 members of Missouri American, trying to come up with
- 12 some ideas of what could possibly be going on out in
- 13 that area, hearing more about what the tests that
- 14 they've done, and then we all -- and then also a
- 15 member of DNR was at that meeting as well.
- 16 And we drove out to Mr. Lee's
- 17 neighborhood and we walked around the neighborhood.
- 18 BY MR. RITCHIE:
- 19 Q. And when was the next visit?
- 20 A. The next visit was in early March, I
- 21 think March 3rd of 2009. Mr. Scheible and
- 22 Mr. Loethen went out to the area. I believe they
- 23 tried to make contact with Mr. Lee, but unfortunately
- 24 they were unable to make contact, and they did some
- 25 just general inspection of the area.

- 1 Q. And the next visit?
- A. The next visit I believe was March 12th,
- 3 and that's where Mr. Loethen went out there. He did
- 4 meet with Mr. Lee. At that meeting they did take --
- 5 Mr. Loethen took samples to get tested from both
- 6 Mr. Lee's basement and from the tap.
- 7 Q. And was there one more visit where Staff
- 8 traveled there?
- 9 A. I believe the last visit was May 1st,
- 10 and I believe there were various parties involved.
- 11 And I know from Staff Mr. Loethen was there and I
- 12 believe with our attorney. And those are the ones
- 13 that I'm aware of. There might have been other
- 14 instances where Mr. Loethen or Mr. Scheible were
- 15 investigating other matters in the St. Louis area and
- 16 drove by the Larimore neighborhood. Those are the
- ones that I'm aware of.
- 18 Q. Now, what sort of testing has the Staff
- 19 used to find out if Missouri American's pipes were
- 20 leaking?
- 21 A. We don't have any, you know, formal or
- 22 testing equipment such as been described so far like
- 23 Missouri American has. Generally what we do is if we
- 24 find out that there was a complaint of a potential
- leak and we'd go out and visit, we'd look for some of

- 1 the obvious signs such as water running out of the
- 2 ground, try to locate, you know, where the mains
- 3 were, look and see if there was situations where it
- 4 looks like the soil is really saturated or if maybe
- 5 there's a situation where the grass looks like it's
- 6 growing a lot more than the rest of the yard. That
- 7 would indicate that there's water, a potential leak,
- 8 there's water in that area.
- 9 Q. Now, you're familiar with some of the
- 10 more sophisticated testing that the water company has
- 11 done to investigate this?
- 12 A. I'm familiar with --
- MR. LEE: I object.
- 14 JUDGE JORDAN: And your objection is?
- MR. LEE: The testing has never been
- 16 referred to as sophisticated.
- 17 JUDGE JORDAN: Okay. So you object to
- 18 the characterization of the testing as sophisticated?
- 19 THE WITNESS: Correct.
- JUDGE JORDAN: Okay. Do you want to
- 21 rephrase your question?
- 22 BY MR. RITCHIE:
- Q. Certainly. Are you aware of any
- 24 Missouri American testing?
- 25 A. Yes.

- 1 Q. Now, have you viewed Mr. Lee's videos
- 2 that he has submitted to the Commission of the area?
- 3 A. I believe I've seen all -- I believe
- 4 I've seen all of them. There's been quite a few
- 5 videos that have been submitted, and I think I've
- 6 seen all of them. It's been months since I've viewed
- 7 them, though.
- 8 Q. Uh-huh. Would these have been the
- 9 videos from the local public hearing?
- 10 A. Yes. And I believe there were some
- 11 other videos that Mr. Lee submitted to the Office of
- 12 the Public Counsel, and I got copies of those from
- 13 that office.
- 14 Q. Okay. Now, has Staff been in Mr. Lee's
- 15 basement?
- 16 A. I'm aware of Staff being in Mr. Lee's
- 17 basement on two occasions.
- 18 Q. What did Staff see there?
- 19 A. The first visit to Mr. Lee's basement
- 20 that I'm aware of was the one on October 7th. On
- 21 that day it was raining, drizzly weather. In
- 22 Mr. Lee's basement there was no standing water. It
- 23 looked like there was water that was seeping into
- 24 what I would assume is the northwest corner of his
- 25 basement near a crawl space.

```
1 Q. And what has Staff observed in Mr. Lee's
```

- 2 neighborhood?
- A. At that time, like I said, it was wet,
- 4 so there was, you know, water. There was -- we saw
- 5 there was a creek that goes just to the east of
- 6 Mr. Lee's house. We went down a railroad track and
- 7 there was water in that storm ditch, drainage ditch
- 8 that was on the side of the railroad track.
- 9 We looked at the McQuay and Larimore
- 10 intersection where like a culvert goes underneath
- 11 Larimore there, and there was a pipe. And there
- 12 might have been some water there, but again, it was
- 13 raining.
- I know we then walked up to Coal Bank,
- 15 and that's where we saw the -- where Mr. Lee pointed
- 16 out that he thought there was a leak in front of, I
- 17 think it's 11533 Larimore, and I think it was
- 18 Mr. Loethen or maybe Mr. Scheible, but I think it was
- 19 Mr. Loethen pointed out that it looks like there
- 20 might be a leak there because of the grass looked
- 21 newer, fresher and taller than the grass in the
- 22 neighborhood, so that was one of the times where we
- 23 went and contacted Missouri American and they
- 24 repaired. It was a leak on the service line, and
- 25 they repaired it.

```
1 Q. You verified that that was followed up
```

- 2 on and repaired?
- 3 A. Yes.
- 4 JUDGE JORDAN: Did you say they repaired
- 5 a service line?
- 6 THE WITNESS: They told us it was a
- 7 service line.
- 8 JUDGE JORDAN: Okay. Did you also --
- 9 are you also saying that Missouri American repaired
- 10 it?
- 11 THE WITNESS: Yeah, Missouri American
- 12 repaired it, yes.
- 13 MR. LEE: I object to that. It's
- 14 hearsay. "They told us." It's never been
- 15 determined. A service line can be feet long. It's
- 16 never been --
- 17 JUDGE JORDAN: I'll sustain the
- 18 objection.
- 19 MR. LEE: -- been exactly what the
- 20 repair was, although they --
- 21 JUDGE JORDAN: I sustained your
- 22 objection.
- MR. LEE: Thank you.
- 24 BY MR. RITCHIE:
- Q. Okay. How would you explain running

- 1 water in ditches and culverts around the neighborhood
- 2 when maybe there hadn't been rain for several days?
- 3 A. Yes. If you assume that there hasn't
- 4 been rain for several days --
- 5 MR. LEE: Objection. Is this expert
- 6 testimony or is this an opinion?
- 7 MR. RITCHIE: This is expert testimony.
- 8 MR. LEE: I don't know --
- 9 MR. RITCHIE: I'm asking my witness in
- 10 his experts opinion.
- 11 MR. LEE: I don't know that you've
- 12 presented him as an expert on running water, have
- 13 you?
- 14 MR. RITCHIE: Yes, I think I have. I
- 15 established him as an expert at the very beginning of
- 16 my questioning when I established his experience in
- 17 utility regulation, 12 years.
- 18 MR. LEE: You established him as having
- 19 quite a lot of administrative experience.
- 20 JUDGE JORDAN: Okay. How are you going
- 21 to characterize your witness's expertise for me?
- MR. RITCHIE: He's an expert in
- 23 water and -- as the manager of the water and sewer
- 24 department at the Public Service Commission,
- 25 regulated water utilities are what he's worked with

- 1 for a number of years, and on top of his experience
- 2 in public utility regulation generally for over the
- 3 last decade I would say establishes him as an expert
- 4 in this area.
- JUDGE JORDAN: Okay.
- 6 MR. LEE: And I object to that.
- 7 JUDGE JORDAN: Right. I think I'm gonna
- 8 need to hear more. Okay. The question you're asking
- 9 him, though, is about the flow of water. Can I hear
- 10 something more about knowledge, skill or training or
- 11 experience in the flow of water? Because that's what
- 12 you're asking him about. Maybe a little more
- 13 foundation for his background on those issues would
- 14 be helpful.
- 15 For now I'll sustain the objection.
- MR. RITCHIE: Okay. I'll withdraw the
- 17 question.
- 18 JUDGE JORDAN: Okay.
- 19 BY MR. RITCHIE:
- 20 Q. Based upon the Staff's investigation,
- 21 has the Staff prepared a report for this case?
- 22 A. Yes, we have.
- Q. And who prepared the report?
- 24 A. I wrote the report based upon --
- 25 MR. LEE: Objection. Is this an expert

- 1 report or is this an opinionated report?
- JUDGE JORDAN: Well, so far we're just
- 3 asking questions about a document, and it's already
- 4 in the record so...
- 5 MR. LEE: Missed my chance, didn't I?
- 6 JUDGE JORDAN: Proceed.
- 7 THE WITNESS: I was the author of the
- 8 report, but the information that was put in the
- 9 report was based upon the knowledge and experience of
- 10 the entire water and sewer department staff and
- 11 information that we received from both the company,
- 12 DNR, et cetera. So I was the author, but, you know,
- 13 it was a collaborative effort amongst the entire
- 14 water and sewer department staff.
- 15 BY MR. RITCHIE:
- 16 Q. So you received input from Steve
- 17 Loethen, Jerry Scheible?
- 18 A. Yes.
- 19 Q. And we established earlier that they
- 20 have a substantial amount of experience?
- 21 A. They have substantial experience in the
- 22 water and wastewater field, and I am their manager.
- Q. And you also -- did you also mention
- 24 that we had information from the water company for
- 25 the Staff report?

- 1 A. We have looked at information and
- 2 received it from the water company, that's correct.
- 3 Q. And what information was that?
- 4 A. Some of the information that we received
- 5 were like some of the test results that they did. We
- 6 received leak repairs or -- you know, I'm gonna
- 7 misstate what exactly that they sent us because there
- 8 was a lot of information. But anytime that there was
- 9 a complaint or an allegation, that they had a work
- 10 order. We received those work orders and reviewed
- 11 those.
- 12 We received -- like I said, we reviewed
- 13 the test results, and we also reviewed the testing
- 14 that they did to try to determine where the leaks
- 15 are.
- 16 Q. And I'll just go ahead and mention that
- 17 the Staff report I've been referring to has been
- 18 entered into evidence as Exhibit No. 20.
- 19 Mr. Busch, is that your signature on the
- 20 Staff report, or did you sign it?
- 21 A. I believe I did. In fact, I know I did.
- 22 So maybe just verify. You're referring to the
- 23 affidavit?
- Q. Yeah. There's a signature --
- 25 A. Yeah, at the top. Yeah.

- 1 Q. Okay. Now, are you aware of any tariffs
- 2 that would apply to the situation in the complaint
- 3 case for Missouri American?
- 4 A. The only tariffs I'm familiar with that
- 5 deal with like leaks would be the fact that if
- 6 there's a leak on a service line, which is the line
- 7 that goes from the main to the customer's house is
- 8 the responsibility of the customer's.
- 9 Q. And are you aware of any tariff
- 10 violations from the company?
- 11 A. No, I am not.
- 12 Q. Are you aware of any PSC rules
- 13 violations from this company?
- 14 A. I am not.
- Q. Are you aware of any Department of
- 16 Natural Resources violations of this company?
- 17 A. I am not.
- 18 JUDGE JORDAN: Can we narrow that scope
- 19 a little bit? Try to clarify the question. Is that
- 20 like ever?
- 21 BY MR. RITCHIE:
- Q. Let's say since July 2008.
- JUDGE JORDAN: Thank you.
- 24 THE WITNESS: The answer is still I am
- 25 not aware for any of those three.

- 1 BY MR. RITCHIE:
- 2 Q. Thank you. Can you explain, what do
- 3 leaks have to do with safe and adequate service?
- 4 A. Well, if there's a leak in the area, it
- 5 goes into the integrity of the system and it goes
- 6 into potential health risks, property risks. So if
- 7 we see leaks or we hear about leaks, we contact the
- 8 company and send the company regardless if it's
- 9 Missouri American or any company that we regulate to
- 10 go and fix those problems as soon as possible.
- 11 Q. So if leaks are excessive, how does that
- 12 affect safe and adequate service?
- 13 A. Well, and something it could also,
- 14 depending upon the size of the leak --
- MR. LEE: Objection.
- JUDGE JORDAN: What is your objection?
- 17 THE WITNESS: Any leak could affect the
- 18 safe and adequate service, not excessive.
- 19 JUDGE JORDAN: Right, that's not really
- 20 an objection to that question, though. So will you
- 21 repeat the question?
- 22 BY MR. RITCHIE:
- Q. Yes. If leaks are excessive, how does
- 24 that affect safe and adequate service?
- 25 A. Well, if it's an excessive leak,

- 1 something else, it could affect the water pressure
- 2 that the customers receive, it could lower the water
- 3 pressure significantly which is not adequate service.
- 4 I believe DNR has regulations that they have to
- 5 maintain at least 20 psi pressure-wise in order to
- 6 utilize the service of their homes.
- 7 Q. So what could the Commission do about
- 8 excessive leaks?
- 9 A. If we had a situation where we had to
- 10 come in and somebody had excessive leaks and they
- 11 were not fixing them, I would think the Commission
- 12 could use their authority underneath the statute to
- 13 compel the company to fix those leaks.
- 14 Q. Could excessive leaks affect water
- 15 rates?
- 16 A. They can. As we've talked about earlier
- 17 throughout the two days, part of what's built into
- 18 rates, there's an allowance for lost and unaccounted
- 19 for, and depending upon how that would be resolved in
- 20 front of the Commission, the higher amount
- 21 theoretically could cause rates to go up.
- Q. So would you say that the service
- 23 provided and response made by Missouri American would
- 24 qualify as safe and adequate as required under
- 25 § 393.130.1?

```
1 JUDGE JORDAN: Could we narrow that down
```

- 2 a little bit to like a time frame perhaps, and maybe
- 3 time and space?
- 4 BY MR. RITCHIE:
- 5 Q. Sure. Let's say, has the response the
- 6 company has made to investigate potential leaks in
- 7 your opinion been -- meet -- meet safe and adequate
- 8 service as required under § 393.130?
- 9 A. That is what Staff's opinion is.
- 10 Q. And what is your opinion about the water
- in Mr. Lee's basement?
- 12 MR. LEE: Objection as to an expert
- 13 opinion.
- JUDGE JORDAN: That's a really vague
- 15 question.
- 16 BY MR. RITCHIE:
- 17 Q. What is the -- I'll rephrase. What is
- 18 the water and sewer services' department at the
- 19 Public Service Commission's opinion about the water
- in Lee's basement?
- 21 MR. LEE: Objection. That's hearsay.
- JUDGE JORDAN: Well, it's not hearsay,
- 23 so...
- 24 MR. LEE: Somebody else's opinion, how
- 25 can he know that?

- 1 JUDGE JORDAN: This is the manager of
- 2 the department, so he is the department for these
- 3 purposes. So I will overrule that objection. But
- 4 can you get a little more specific about -- in your
- 5 question as to what you're asking about the water?
- 6 Because that would help me.
- 7 MR. RITCHIE: Certainly, Judge, yeah.
- 8 BY MR. RITCHIE:
- 9 O. Can the water and sewer services
- 10 department of the Public Service Commission -- of the
- 11 Public Service Commission say with any certainty
- 12 where the water running into Mr. Lee's basement is
- 13 coming from?
- 14 A. With any certainty, no.
- MR. RITCHIE: No further questions.
- 16 Thank you.
- 17 JUDGE JORDAN: Okay. Cross from
- 18 Missouri American Water Company.
- 19 MR. NOCE: Are we up first? I was
- 20 assuming Mr. Lee was going first.
- 21 JUDGE JORDAN: Missouri American as the
- 22 Respondent goes first.
- MR. NOCE: Okay.
- 24 JUDGE JORDAN: You don't have to if you
- 25 don't want to. If you'd like to defer that to

- 1 Mr. Lee, I might be open to that.
- MR. NOCE: Well, I think I'm gonna go
- 3 ahead and try and ask a few questions, if that's
- 4 okay.
- 5 JUDGE JORDAN: Please do.
- 6 CROSS-EXAMINATION BY MR. NOCE:
- 7 Q. Mr. Busch, can you state for the
- 8 Commission, do you have any certifications or
- 9 licenses that you've obtained over your career?
- 10 A. Could you be more specific?
- 11 Q. Sure. Well, let's start, I guess, what
- 12 is your education background?
- 13 A. My education background, I have both a
- 14 bachelors and master's of science in economics.
- 15 Q. Okay. And through your work here at the
- 16 Missouri Public Service Commission, have you applied
- 17 for any licenses with regards to sewer and water?
- 18 A. I have not.
- 19 Q. What has your job experience entailed
- 20 over the time you've been with the Public Service
- 21 Commission?
- 22 A. With the PSC?
- 23 Q. Yes.
- 24 A. Going back to when I first started, I
- 25 worked in the procurement analysis department. We

- 1 investigated natural gas issues, pricing of natural
- 2 gas, hedging programs with the LDCs, the local
- 3 distribution companies, Laclede Gas Company, stuff
- 4 like that. Then I will add to that, I went to five
- 5 years to Office of Public Counsel where I was an
- 6 economist, and at the Office of Public Counsel we did
- 7 just about everything.
- 8 We looked into water/sewer cases, we
- 9 looked into telephone, telecommunications, gas,
- 10 electric.
- 11 Q. If I could stop you. What sort of
- 12 investigations did you do with regards to water and
- 13 sewer?
- 14 A. At the Office of Public Counsel my role
- 15 with the water companies were basically the rate
- 16 requests that Missouri American filed while I was
- 17 there looking into the rate design aspect of it.
- 18 Q. Okay. You can go on. I'm sorry to cut
- 19 you off.
- 20 A. And then after that I worked in the
- 21 energy department. We did cost of service studies,
- 22 which was looking into class cost of service studies
- 23 which were looking into development of rates. We
- 24 also -- or I also did integrated resource planning
- 25 when we look at, you know, the company's building new

- 1 facilities to generate electricity. There might have
- 2 been some issues where I looked into tariff -- all of
- 3 them I looked into tariff filings and to make sure
- 4 that the companies were following their tariffs, or
- 5 helping to write tariffs, reviewing tariffs. Might
- 6 have some issues with some complaints in the energy
- 7 department with electric service.
- Q. And again, you've stated that you're the
- 9 manager of what department?
- 10 A. I am the manager of the water and sewer
- 11 department. We have two professional engineers on
- 12 staff, we have another gentleman who has an
- 13 engineering degree, then we have one person who is an
- 14 auditor who deals with the rate and the tariff. He's
- 15 called a rate and tariff examiner.
- And then we have two other individuals
- 17 who are technicians who go out and they -- all of
- 18 them except for the rate and tariff guy go out and
- 19 they inspect all the water systems.
- 20 Q. Okay. And those include the individuals
- 21 that investigated the complaints filed by Mr. Lee in
- 22 this case, correct?
- 23 A. That is correct.
- 24 Q. And was your office able to form any
- 25 conclusions as to what the cause of the water

- 1 reaching Mr. Lee's basement was?
- A. What the direct cause of the water, we
- 3 do not know what the direct cause. We did -- as the
- 4 department at this time has not seen any indications
- 5 that the water's coming from Missouri American's
- 6 pipes in the area.
- 7 Q. And did you offer Mr. Lee any
- 8 recommendations in your report?
- 9 A. Yes, we did.
- 10 Q. And what was that?
- 11 A. In the report when we talked about
- 12 keeping water out of Mr. Lee's basement, we talked to
- 13 him about finding somebody who can waterproof his
- 14 basement.
- MR. NOCE: Okay. I don't believe I have
- 16 any further questions for you at this time. Thank
- 17 you very much.
- 18 JUDGE JORDAN: Okay. Next in our order
- 19 would ordinarily be Mr. Lee's cross-examination. We
- 20 only have about 20 minutes left today, and we will be
- 21 scheduling another session for this hearing.
- 22 If Mr. Lee wants to begin his cross, he
- 23 can do it now or he can save it for the next session.
- MR. LEE: I'm fine.
- 25 JUDGE JORDAN: Okay

- 1 CROSS-EXAMINATION BY MR. LEE:
- Q. Most of your education and training that
- 3 you just stated to me seemed like it was
- 4 administrative; is that correct?
- 5 A. I wouldn't describe it as
- 6 administrative.
- 7 Q. You're dealing with tariffs and
- 8 economics and office; working for the Office of
- 9 Public Counsel is not administrative?
- 10 A. No. When we do a class cost of service
- 11 study, that's a very mathematically-intensive
- 12 process. I wouldn't call it administrative work.
- 13 Q. How much training do you have in
- 14 diagnostic procedures?
- 15 A. I personally don't, but I believe that
- 16 members of my staff do.
- 17 Q. And what training do they have?
- 18 A. Mr. Loethen was an operator, and part of
- 19 being an operator is looking into repairing leaks, so
- 20 what his specific training for that is, you know, I
- 21 don't know the exact nature of it, but I would assume
- 22 anybody who's an operator of a system has knowledge
- 23 of how to look at diagnostics.
- Q. You would assume that?
- 25 A. If they had to go out and repair a leak.

- 1 Q. I wouldn't assume that. I would like to
- 2 know what training he has had in diagnostics.
- 3 MR. RITCHIE: Judge, I'm gonna object.
- 4 That's asked and answered. Argumentative also.
- 5 BY MR. LEE:
- 6 Q. And how much training do you have in
- 7 diagnostics?
- 8 A. Again, I said I don't have any myself.
- 9 Q. In your report here you stated that my
- 10 complaint was water in my basement?
- 11 A. Could you point me to where that is
- 12 written?
- 13 Q. I believe it's in the Findings. "The
- 14 nature of Mr. Lee's complaint was that he had water
- 15 in his basement."
- 16 JUDGE JORDAN: Where is that language?
- 17 MR. LEE: That is the first paragraph
- 18 about halfway down.
- 19 THE WITNESS: Okay. I see that
- 20 statement.
- 21 BY MR. LEE:
- Q. Okay. Are you aware of any
- 23 communications I had with Senator Tim Green's office
- 24 where I complained about water running out of the
- 25 ground in a number of different areas in my

- 1 neighborhood, or at the Public Service Commission
- 2 rate increase hearing where I complained about --
- 3 MR. RITCHIE: Judge, I'm gonna object to
- 4 this questioning.
- 5 BY MR. LEE:
- 6 Q. -- running out of the ground in several
- 7 areas of my neighborhood?
- 8 JUDGE JORDAN: Go ahead and speak your
- 9 objection.
- 10 MR. RITCHIE: First of all, it's
- 11 compound, and the first part of it is irrelevant.
- 12 JUDGE JORDAN: Well, I don't -- it is
- 13 compound, so let's ask about like one matter at a
- 14 time. So I'll sustain that.
- 15 As far as the relevance of your
- 16 communications with a legislator, I don't see -- can
- 17 you tell me why that is going to be relevant, how
- 18 that is going to prove or disprove a claim or defense
- 19 in this case?
- 20 MR. LEE: When I read this, it seems to
- 21 discount my complaints of water running out of the
- 22 ground at a number of different areas in my
- 23 neighborhood. I had complained about the water
- 24 running out of the neighborhood at the rate increase
- 25 hearing, I have also complained about the water

- 1 running out of the ground in the neighborhood to my
- 2 senator, and I believe to not include this complaint,
- 3 Mr. Hummel and Mr. Busch seem to have ignored the
- 4 problems of the water running out of the ground and
- 5 want to focus on my basement. That was not the main
- 6 part of my complaint.
- 7 JUDGE JORDAN: I don't see how --
- 8 MR. RITCHIE: Judge, I'd like to --
- 9 JUDGE JORDAN: -- those inquiries you've
- 10 mentioned are really relevant to what I think you're
- 11 getting to. I think you're getting to the quality of
- 12 this report; is that correct?
- MR. LEE: I am.
- 14 JUDGE JORDAN: Okay. Well, see, your
- 15 communications with other persons, that's not
- 16 relevant.
- 17 MR. RITCHIE: I'd like to lodge an
- 18 additional objection.
- 19 JUDGE JORDAN: Let's hear it.
- 20 MR. RITCHIE: As mischaracterizing what
- 21 my witness said. If you go down just a couple more
- 22 lines, Mr. Busch does mention in his report that
- 23 finally Mr. Lee claimed that there were leaks
- 24 throughout his neighborhood, all a result of MAWC
- 25 mains.

- 1 JUDGE JORDAN: Right.
- MR. LEE: What paragraph are you in?
- 3 MR. RITCHIE: The first paragraph, just
- 4 two or three lines after the line you put in.
- 5 JUDGE JORDAN: I'm going to sustain the
- 6 objection for the reasons that I've -- that I've
- 7 already stated, and I'm also going to mention that
- 8 I've read this document, and I've read it more than
- 9 once, and I know where it emphasizes Mr. Lee's
- 10 basement, and I also know where it emphasizes other
- 11 leaks, other appearances of surface water throughout
- 12 the neighborhood.
- 13 MR. LEE: Okay. So I'm not sure what
- 14 that means to me.
- 15 JUDGE JORDAN: That means you can ask a
- 16 different question.
- 17 MR. LEE: I can do what now?
- 18 JUDGE JORDAN: Ask another question, a
- 19 different question.
- 20 MR. LEE: Ask another question.
- 21 BY MR. LEE:
- Q. Did Mr. Hummel communicate anything to
- 23 you about water leaks in my neighborhood?
- 24 A. I believed you're referring to
- 25 Mr. Martin Hummel, an engineer on my staff.

- 1 Mr. Hummel's involvement with this situation was an
- 2 informal complaint that was filed with the Commission
- 3 in June of 2008, and then Mr. -- it's my
- 4 understanding that at that time most of the complaint
- 5 seemed to revolve around water in Mr. Lee's basement,
- 6 and that's where Mr. Hummel was doing his
- 7 investigation on. After the public hearing in
- 8 September of '08, Mr. Hummel has not really been
- 9 involved with this case.
- 10 Q. Okay. So he could have ignored the
- 11 complaints of the water running out of the ground and
- 12 you would not know that, correct?
- 13 A. I'm not -- I don't know necessarily what
- 14 the complaints were from June of '08. I don't have
- 15 them in front of me. So I don't know what --
- 16 everything that you were complaining about in June of
- 17 '08?
- 18 Q. Okay. You've said that your staff has
- 19 investigated my complaint. What tests were done
- 20 during that investigation?
- 21 A. Tests that were done during the
- 22 investigation were -- I know Missouri American has
- 23 done many tests as to -- trying to determine where
- 24 the source of water was from.
- Q. And which tests are those?

- 1 A. Those are where they take water samples
- 2 and then they do the tests that Mr. Simmons was
- 3 describing yesterday.
- 4 Q. Okay.
- 5 A. I believe that DNR took some samples and
- 6 investigated as well.
- 7 Q. Is that more water samples?
- 8 A. That is more water samples. And I know
- 9 the testing that Missouri American did on its pipes,
- 10 the ultrasonic testing, the listening devices.
- 11 Q. And so how much of your investigation
- 12 relies on water sampling and testing?
- 13 A. I think our -- what the role of the
- 14 Staff is, is to look into an investigation or into a
- 15 complaint and then to follow up with the company and
- 16 the customer, and it is -- we look at it as what does
- 17 the company do to investigate this complaint? So our
- 18 determination has been made by the fact that through
- 19 our visits, Missouri American has shown that they
- 20 have been out there on numerous occasions. Whenever
- 21 we get -- whenever I got a call or an e-mail from
- 22 Mr. Lee, I would contact --
- Q. That's a nice answer, but it's not an
- 24 answer to the question. How much of your
- 25 investigation relies on water testing?

- 1 A. I don't know that I can put a number or
- 2 percent of how much of it was involved. It was a
- 3 collaborative process with all the information that
- 4 we have.
- 5 Q. And what other test results did it
- 6 entail?
- 7 A. What other test results did what entail?
- 8 Q. Your report here, the production of your
- 9 report. What other test results did you use to write
- 10 this report? You've used water sampling and --
- 11 A. We looked at water sampling,
- 12 understanding what the company provided us based upon
- 13 their water sampling, and we also based it upon
- 14 the -- doing that ultrasonic testing that
- 15 Mr. Bommarito was talking about yesterday and when
- 16 they would go out and investigate the leaks.
- We based it upon what our collective
- 18 knowledge in the water and sewer department is and
- 19 what it looked like Missouri American was doing to
- 20 try to find the answer to the problem.
- 21 MR. LEE: Okay. Could you go to the
- 22 chart and show me exactly how much of that water
- 23 system on the chart has been tested with the
- 24 ultrasonic method at the time that you wrote this
- 25 report?

```
1 MR. RITCHIE: Judge, I'm gonna object to
```

- 2 that. That's not related to Mr. Busch's role here.
- JUDGE JORDAN: Well, if Mr. Busch can
- 4 answer the question, he should answer the question.
- 5 THE WITNESS: I don't know exactly where
- 6 they put that equipment on. I know that they used
- 7 that testing at various points, at various leaks, or
- 8 various alleged leaks that we were aware of. I do
- 9 not know -- I would assume it was up and down
- 10 Larimore and McQuay and --
- 11 MR. LEE: Objection. How could you
- 12 write an important document, an important report that
- 13 affects people's lives and not know what the test
- 14 results were or how much of the system had been
- 15 tested?
- JUDGE JORDAN: That's a pretty
- 17 argumentative question. How could you write a
- 18 report? I think that's argumentative. But you could
- 19 make a question out of it that is not argumentative,
- 20 although I think you pretty much covered it.
- 21 BY MR. LEE:
- 22 Q. If you don't know what the test results
- 23 were, how could you write an important report based
- on it where you don't even know which pipes were
- 25 tested?

- 1 A. I know that -- we do know the results of
- 2 the test results, and we do know that whenever
- 3 Missouri American went out to investigate a potential
- 4 leak, they told us what the result was.
- 5 Q. Okay. Can you show me which part of
- 6 that pipe was tested to give you which results?
- 7 A. No, I cannot off the top of my head come
- 8 up there and show you. Whenever you would talk about
- 9 a potential leak, I would contact Missouri American,
- 10 generally Mr. Linam, and then they would go out and
- 11 test it, and then they would let me know we did not
- 12 find a leak.
- Q. Okay. So how much of your
- 14 recommendation in your report is based on ultrasonic
- 15 test results?
- 16 JUDGE JORDAN: We've heard that question
- 17 already.
- 18 MR. LEE: I believe that was how much
- 19 was related to the water sampling.
- JUDGE JORDAN: Okay. It was related to
- 21 testing. Answer the question if you can.
- 22 THE WITNESS: Again, I don't know
- 23 specifically how much of that. It was -- that report
- 24 was a compilation of the experience of the water and
- 25 sewer department and the information --

```
1 MR. LEE: I don't want to know about
```

- 2 experience. I want to know what test results your
- 3 report was based on.
- 4 JUDGE JORDAN: That's been asked and
- 5 answered.
- 6 MR. RITCHIE: Objection for asked and
- 7 answered.
- 8 JUDGE JORDAN: He's already described
- 9 the types of tests. You already asked that question,
- 10 and he answered it.
- 11 MR. LEE: I don't know that I got an
- 12 answer. Is it -- could you refresh my memory,
- 13 please?
- JUDGE JORDAN: No, no.
- MR. RITCHIE: Your Honor, it's already
- 16 in the transcript.
- MR. LEE: We have used two different
- 18 test results to base our report on. We can't
- 19 determine -- we've already determined one of them may
- 20 not be credible -- a credible way to test for water.
- 21 The other we don't even know which part of the system
- 22 we tested. How could the report be reliable if we
- 23 don't know what test results it's based on?
- JUDGE JORDAN: That's a great argument,
- 25 and this is not the time for argument. It is the

- 1 time to --
- 2 MR. LEE: -- ask questions.
- JUDGE JORDAN: Exactly. And, in fact, I
- 4 think the time to ask questions is about up, the
- 5 reason being, we are about five minutes away from our
- 6 computer shutdown. So I'm going to have to adjourn
- 7 this hearing. And we had planned to reconvene
- 8 anyway, so when we reconvene, we can resume with the
- 9 cross-examination of this witness, if you have more
- 10 questions.
- MR. LEE: And when may that be?
- JUDGE JORDAN: Well, we're going to have
- 13 to work on that. And I intend to put that matter
- 14 into the order that I will issue when the reporter
- 15 files the transcript, and then I will deal with all
- these pending issues, and then we'll start the
- 17 scheduling process.
- MR. LEE: Will we get a copy of the
- 19 transcript?
- 20 JUDGE JORDAN: The transcript will be
- 21 filed in EFIS, so if you want to read the transcript,
- 22 you can read it in EFIS or you can get a copy from
- 23 the reporter as well, and you'll have to contact her
- 24 to do that if you want your own.
- MR. LEE: EFIS is fine.

```
1 MR. RITCHIE: Your Honor, could we
```

- 2 submit conflict dates for a potential hearing, being
- 3 that there's a lot of people to coordinate with the
- 4 Staff.
- 5 JUDGE JORDAN: There really is. And
- 6 it's my usual MO to ask for conflict dates first,
- 7 but, you know, I'll make a note of that just to make
- 8 sure. Certainly if I ever deviate from that
- 9 practice, I know it's going to cause problems.
- 10 MR. RITCHIE: Appreciate that, your
- 11 Honor.
- 12 JUDGE JORDAN: That's not a problem. I
- 13 will get conflict dates, and that's from everybody.
- 14 And any questions? Well, I think I've addressed what
- 15 I intend to do pretty thoroughly, but I'm going to
- 16 reiterate it one more time. When the reporter files
- 17 the transcript of this hearing so far, I will put out
- 18 an order addressing further scheduling of the
- 19 hearing, also addressing the filing of the matters
- 20 that we've discussed which will include a timetable
- 21 for filing them and also for making objections to
- 22 them, and then we'll start a scheduling process in
- 23 that order.
- 24 And with that I'm going to adjourn this
- 25 hearing temporarily until the next scheduled date.

```
So we will go off the record.
1
                (WHEREUPON, the hearing of this case was
 2
 3
    recessed until a date to be determined.)
