Digital Phone convenient calling features are easy to use. To learn how, click on the names below.

**Call Waiting****Caller ID****Call Waiting ID**

Call Waiting

When you're on the phone, hear when another caller is trying to reach you.

When a second call comes in, the caller hears normal ringing while you hear a special tone.

To answer a second call:

Press and quickly release the "switchhook" or "flash" button on your phone. While you talk with one caller, the other caller is automatically put on hold. Each conversation is private.

To alternate between calls:

Press and quickly release the "switchhook" or "flash" button again to return to the first call.

To end either call:

Hang up. Your phone will ring right away, and when you answer it, you'll be connected with the other call.

To cancel Call Waiting:

Dial *70, wait for a dial tone and dial your number. You must do this for each call you wish to cancel call waiting for.

Caller ID

See who's calling before you answer the phone.

After the first ring, the name and telephone number of the person calling you automatically appears on your Caller ID screen.

Note:

- If you see "Private" or "P", the caller may have blocked the display of their name and number by pressing *67 before placing the call.
- If you see "unknown name", "unknown number", "out of area" or "O", the caller is in an area that does not support this service.
- You need a Caller ID display telephone or an add-on display to see Caller ID.

Call Waiting ID

When you're on the phone and another call comes in, see who is trying to

reach you.

Combine Caller ID with Call Waiting and take control of your calls. A special tone alerts you when a second call comes in, and you see the name and number of the caller.
