SECTION 1. TECHNICAL TERMS AND ABBREVIATIONS

Authorization Code - A numerical code, one or more of which may be assigned to a Subscriber, to enable Carrier to identify the origin of service User so it may rate and bill the call. All authorization codes shall be the sole property of Carrier and no Subscriber shall have any property or other right or interest in the use of any particular authorization code. Automatic numbering identification (ANI) may be used as or in connection with the authorization code.

Automatic Numbering Identification (ANI) - A type of signaling provided by a local exchange telephone company which automatically identifies the local exchange line from which a call originates.

A Customer may dial additional called party numbers without hanging up by pressing the # key, and listening for the bong tone. After hearing the bong tone, the Customer may dial the number of the called party. The Bong Charge will be assessed for each bong tone the Customer receives, whether the Customer hangs up between calls or not. Section 3.5.2 details the Bong Charge per call, if any, associated with Global Time's Prepaid Calling Card products.

Calling Card - A postpaid or prepaid calling card issued by Carrier which allows Subscribers and/or Users to make telephone calls and charge the calls to a postpaid or prepaid account. Calls charged to a Carrier-issued postpaid Calling Card will appear on the Subscriber's regular monthly bill. Calls charged to a Carrier-issued prepaid Calling Card will be charged against the debit account.

Carrier or Company - Refers to Global Time, Inc.

SECTION 3. DESCRIPTION OF SERVICES AND RATES**3.1 When Billing Charges Begin and End for Phone Calls**

The Customer's long distance usage charge is based on the actual usage of the Company's network. Usage begins when the called party picks up the receiver, (i.e., when 2-way communications, often referred to as "conversation time" is possible.). When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to sixty (60) seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling or called party hangs up.

3.2 Billing Increments

Except as otherwise stated herein, the minimum call duration for billing purposes is three (3) minutes for a connected call and calls beyond three (3) minutes are billed in one (1) minute increments.

3.3 Uncompleted Calls

The Company does not bill Customers for calls which are not completed (busy numbers, no answer, etc.).

3.4 Minimum Call Completion Rate

A Customer can expect a call completion rate (number of calls completed / number of calls attempted) of not less than 96% during peak use periods.
