B. Service Descriptions

1. Anonymous Call Block - allows subscribers of this service to block calls from a person that is using either Selective or Complete Blocking (which prevents the display of the caller's telephone number to Caller ID customers). The person calling, whose identification is blocked, will receive a message to hang up and call back with the calling number unblocked.
2. Busy Redial *66 - is an arrangement which permits the customer to redial automatically the last number dialed. If the called line is found to be busy, a 30-minute queuing process begins. The customer is then given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of the called line until both lines are found idle, the customer cancels the request, or the queuing process expires. If both lines are found to be idle, the calling party is alerted with a distinctive ring signifying that the call can now be completed.

This feature is offered on a per line or per activation basis. When Busy Redial *66 is implemented on a per activation basis, a charge will apply each time the service is invoked. This service is implemented by dialing *66. There is a billing limit of ten activations per month. Any activations in excess of ten per month will not be billed.

3. Call Return *69 - allows a customer to automatically return the last incoming call whether it is answered or not. Upon activation of the service, the number of the most recent party who called is dialed automatically. If the called line is found to be busy, a 30-minute queuing process begins. The customer is given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of both parties until both lines are found idle, the customer cancels the request, or the queuing process expires. If both lines are found to be idle, the calling party is alerted with a distinctive ring signifying that the call may now be completed.

This feature is offered on a per line or per activation basis. When Call Return *69 is implemented on a per activation basis, a charge will apply each time the service is invoked. This service is implemented by dialing *69. There is a billing limit of ten activations per month. Any activations in excess of ten per month will not be billed.

B. Service Descriptions (Cont'd)

6. Call Forward Busy (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Centrex line number, or other line number of the customer at another location on a different premises when such incoming calls encounter a normal busy line condition.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

7. Call Forward Busy/No Answer (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Centrex line number or other line number of the customer at another location on a different premise when such incoming calls encounter either a normal busy line condition or a no answer condition.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

B. Service Descriptions (Cont'd)

8. Call Forward Busy/No Answer (Variable) - This service permits the customer to have incoming calls transferred to another telephone number when his number is busy and/or not answered after a specified number of rings. The customer is responsible for the establishment and change of the forwarded telephone number destination. The customer is also responsible for service (Busy, No Answer or Busy/No Answer) activation and deactivation as well as reestablishing the forwarded telephone number upon interruption of the Call Forwarding service. Where a toll message charge is applicable to the call to be forwarded, such charges will be billed to the Call Forwarding customer. This service is not available in connection with Call Forwarding service as described in B.2, 3 and 5 or line (rotary) hunting service.
9. Call Forward No Answer (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Centrex line number, or other line number of the customer at another location on a different premises when such incoming calls encounter a no answer condition after a specific number of rings, such number of rings to be specified when this service is ordered.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

B. Service Descriptions (Cont'd)

10. Call Trace *57 - allows the customer to immediately and automatically trace the last incoming call received from a local service. Upon the customer's request the trace information will be provided to law enforcement agencies by the Company but will not be released directly to the customer. To initiate the call trace, the customer must contact the Company at the number provided in the voice announcement within ten (10) days of the incident. Call Trace Service performs the function of recording call information, but in no way identifies the person(s) actually placing the call(s). By accepting the Service, the customer agrees that CenturyTel shall not be liable for damages due to an inability to trace the call(s). Call Trace Service will be the only nuisance call tracing service available to residential one-party and business one-party customers where this service is offered.
11. Call Waiting - Provides for signaling a customer, who is talking on his line, that another call has been placed to his line. He may, by switchhook operation, hold the first call, answer the second, return to the first or converse alternately with both.
12. Call Waiting ID - is a service that will allow a Caller ID/Call Waiting subscriber who is offhook on an existing call to receive caller identification information on a new incoming call. Once the customer receives the Caller ID data, he or she may decide whether to ignore the waiting call, interrupt the current call and flash to answer the waiting call, or end the current conversation in order to be connected to the new caller. These options are the same as for the existing Call Waiting service except that the subscriber has the ability to identify the waiting caller. The customer must be using Call Waiting ID compatible equipment and not have activated Cancel Call Waiting. Customers must subscribe to Call Waiting and Caller ID or Caller ID Number Only at the tariffed rates for each service or in a "flexible package". The customer must subscribe to this service specifically even though there are not additional rates or charges.

13. Calling Identification Services

- a. Caller ID Number Only - is an arrangement which permits a customer with local exchange service, other than foreign central office service, to be immediately apprised of the calling telephone number of a call placed to the customer.

At the time the incoming call is placed, the calling telephone number is forwarded from the terminating central office to compatible customer provided display equipment associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

- b. Caller ID - is an arrangement that permits a customer to receive the name, as well as the telephone number, associated with the calling party for calls placed to the customer. The calling telephone number and name will be forwarded from the terminating central office to compatible customer-provided display equipment associated with the customer's Local Exchange Service.

If the calling telephone number and name are not available for forwarding to the called party, a message indicating unavailability will be forwarded. The calling party can prevent the Caller ID customer from seeing the calling name and telephone number display by activating Selective Blocking (per call). Complete Blocking (per line) also functions the same as described in this section of the tariff.

13. Calling Identification Services (Cont'd)

- c. For calls originating from a line with a multiline hunt group, ordinarily the main telephone number is delivered. If the calling identification information is not available for forwarding to the called party, the customer's display device will give an anonymous indication. Calling identification information is unavailable from calls made through some large PABX systems, from most cellular radio calls, and currently from interexchange carrier calls. Nor is the calling identification information made available when incoming calls have been handled by an operator or charged to credit cards.

Customers subscribing to Calling Identification Services will be responsible for the provision of compatible display equipment. The Company assumes no liability for any incompatibility of the customer provided display equipment.

Calling Identification Service information may not be sold or given to another party without the caller's consent. Calling Identification Service information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the name and/or number delivery services subscriber. This applies if the name and/or number delivery services subscriber has an existing relationship with the customer. Calling Identification Service customers failing to comply with any of these conditions will have their service terminated.

Anonymous Call Reject *77 is available in conjunction with these services.

B. Service Descriptions (Cont'd)

18. Distinctive Ring - Allows distinctive ringing to be applied to an individual line, where each of two numbers, a main number and a Distinctive Ring number, will have a uniquely separate ring for customer identification. Because two telephone numbers are associated with one telephone line, only one conversation can be conducted at a time.

Regulations for directory listings set forth elsewhere in this Tariff will apply for the main number. The customer is entitled to one free listing in the alphabetical section of the telephone directory for the Distinctive Ring number, regardless of the class of service.

19. Selective Call Accept *64 - allows a customer to select (maximum of 12) customer telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller the customer is not accepting calls. Calls from numbers outside the specified exchanges will ring normally.
20. Selective Call Forward *63 - is an arrangement which permits a customer to prespecify telephone numbers (maximum of 12) from which incoming calls are to be forwarded. During the period that Selective Call Forwarding is activated, only calls from the prespecified numbers will be forwarded.
21. Special Call Waiting* - allows a customer to choose up to 12 numbers which can activate Call Waiting. Incoming calls placed from numbers not selected by the customer receive busy signals when the customer's line is busy. Customer may not subscribe to Call Waiting and Special Call Waiting on the same line.

* This service is limited to all existing customers at their existing locations.

- 22. Speed Call - Permits local and long distance calls to be placed by dialing an abbreviated code. This arrangement is available in an eight-number capacity and a thirty-number capacity.
- 23. 3-Way Calling - Permits a customer to add a third party to an existing conversation, whether the original call was incoming or outgoing.

This feature is offered on a per line or per activation basis. When Three-Way Calling is implemented on a per activation basis, a charge will apply each time the service is invoked. The service is invoked by properly executing a hook-switch flash while engaged in a two-way conversation and initiating a conversation with a dialed third-party, then executing a second hook-switch flash to complete a three-way conversation.

- 24. VIP Alert - allows a customer to program up to twelve (12) telephone numbers of selected callers enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone. If a customer also subscribes to Call Waiting, calls from the selected numbers will be distinguished by a special Call Waiting tone.

C. Satisfaction Guarantee

- 1. If at anytime the customer notifies the Company he is not satisfied with the service(s), and wishes to discontinue the service(s), the customer will be entitled to a full refund of one (1) month's monthly recurring charge (MRC), or portion thereof if subscription is less than 30 days. The service(s) for which the credit is being issued will be discontinued from the customer's line. This refund will be applied as a credit on the customer's bill. Each customer will be entitled to the credit one time per service.

The Satisfaction Guarantee will apply to all CenturyTel Calling Services listed in this section.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls
