VI.	CONCLUSION	Ç

# SURREBUTTAL TESTIMONY OF DANE A. WATSON LIBERTY UTILITIES BEFORE THE MISSOURI PUBLIC SERVICE COMMISSION CASE NO. GR-2018-0013

1		I. <u>WITNESS IDENTIFICATION</u>		
2	Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.		
3	A.	My name is Dane A. Watson. My business address is 101 E. Park Blvd., Suite		
4		220, Plano, Texas 75074. I am a Partner of Alliance Consulting Group. Alliance		
5		Consulting Group provides consulting and expert services to the utility industry.		
6	Q.	ARE YOU THE SAME DANE A. WATSON THAT FILED DIRECT AND		
7		REBUTTAL TESTIMONY IN THIS PROCEEDING ON BEHALF OF		
8		LIBERTY UTILITIES?		
9	A.	Yes.		
10		II. PURPOSE AND SUMMARY OF SURREBUTTAL TESTIMONY		
11	Q.	WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY IN		
12		THIS PROCEEDING?		
13	A.	The purpose of my testimony is to:		
14		• Respond to and explain the differences I have with OPC's		
15		recommendation to retain the Company's existing depreciation rates		
16		which were approved in GR-2014-0152;		
17		• Respond to and explain differences I have with OPC's criticism of both		
18		my depreciation study and that conducted by Staff; and		

## DANE A. WATSON SURREBUTTAL TESTIMONY

	Respond to and explain differences I have with OPC's recommendation to
	reject general plant amortization for certain small low volume accounts for
	Liberty Utilities Missouri assets and Shared Services assets.
Q.	WHAT IS THE SOURCE OF THE COMPANY'S CURRENT
	DEPRECIATION RATES?
A.	The existing depreciation rates were retained by settlement in Case Nos. GM-
	2012-0037 and GR-2006-0387. The only rates that were added were in Case No.
	GR-2014-0152 for corporate hardware and software at the corporate office. The
	rates approved in docket GR-2006-0387 were retained from earlier cases before
	this Commission. At that time, the facilities were owned by Atmos Energy. As
	stated by then Staff Witness Guy Gilbert,1 the rates ordered for this property by
	this Commission depend on the date Atmos acquired the property.
	Atmos depreciation rates are comprised of previously acquired Greeley Gas Company, United Cities Gas Company and Associated Natural Gas Company rates. Case No. 15.542, dated January 5, 1968, was the last time the Commission ordered Greeley Gas Company depreciation rates. United Cities Gas Company rates were last ordered effective March 31, 1997 in Case No. GM-97-70. Associated Natural Gas Company rates were also ordered in Case No. GR-97-272. There is one composite rate for each account, based on consolidated historic data.
	There are no sources on the Commission's website that indicate what life and net
	salvage parameters were used in the prior cases, or even what depreciation system
	might have been used. Since the most recent sources of the Company's
	depreciation rates are at least 20 years old, it is important in this proceeding to set
	depreciation rates that reflect current and future operations of Liberty Utilities.

**RECOMMEND** 

**ROBINNETT** 

#### III. SUMMARY OF DIFFERENCES

**OPC** 

**DOES** 

1

2

16

17

18

19

20

21

Q.

**WHAT** 

3		REGARDING THIE COMPANYS PROPOSED DEPRECIATION RATES?
4	A.	OPC Witness Mr. Robinnett recommends retention of the existing depreciation
5		rates which have an unknown basis having been derived in settlements two
6		decades ago. <sup>2</sup>
7	Q.	WHAT DEPRECIATION STUDY PROPOSALS ARE IN THE RECORD
8		FOR THIS CASE? A. There are three proposal in the record to this point,
9		none of which Mr. Robinnett accepts. My original depreciation study was
10		presented in direct testimony with a three state analysis combining Liberty Mid-
11		States assets in Missouri, Iowa, and Illinois at September 30, 2015. The
12		Commission Staff believed that it was more appropriate for Liberty Utilities
13		Missouri customers to be charged depreciation expense based on a state specific
14		study. Staff analyzed the life and net salvage parameters based solely on Missouri
15		data and made alternative recommendations for all accounts. Life

WITNESS

Consistent with Staff's approach, in my rebuttal, I presented a comprehensive analysis of annual depreciation for Liberty Utilities that was based on Liberty Utilities' Missouri depreciable plant in service as of December 31, 2017. If Staff has an alternative recommendation to my proposal, the current

recommendations were based on September 30, 2015 life data and net salvage

data through year end 2017.

<sup>&</sup>lt;sup>1</sup> Docket GR2006-0387, Gilbert Direct, page 4, liens 1-8.

1		schedule offers an opportunity to make those recommendations in the record for	
2		this proceeding.	
3	Q.	WHAT REASONS DOES OPC OFFER FOR REJECTING STAFF'S	
4		STUDY?	
5	A.	OPC does not believe Staff has provided sufficient information to justify the	
6		recommended parameters. He also criticizes Staff's study for not performing a	
7		theoretical reserve comparison to determine the book reserve adjustments.	
8	Q.	ARE SOME OF OPC'S REASONS TO REJECT STAFF"S PROPOSAL	
9		ADDRESSED IN YOUR DEPRECIATION STUDY IN REBUTTAL?	
10	A.	In Appendix C and D of my rebuttal testimony I present revised recommendations	
11		based on Missouri only information. I have provided workpapers with different	
12		placement and experience bands and discuss the incorporation of information	
13		from Company subject matter expert opinions on the operations of Liberty	
14		Utilities Missouri.	
15	Q.	DID YOU MAKE THE THEOERTICAL RESERVE ANALAYIS OPC	
16		MENTIONS?	
17	A.	Yes. There are three separate analyses in my rebuttal testimony that address the	
18		computations based on various life and net salvage parameters offers by the	
19		parties in this case.	
20	Q.	WHAT NET SALAVGE DATA IS AVAILABLE IN THIS CASE?	
21	A.	Net salvage history is available from 2005-2010 and 2013-2017. OPC is critical	

<sup>&</sup>lt;sup>2</sup> Robinnett, Direct, page 1 lines 17-19.

- of the missing years of 2011 and 2012 as well as the lack of history prior to 2004.<sup>3</sup>
  Two states, Iowa and Illinois, however, found sufficient net salvage data from 2005-2010 and 2013-2015 to approve depreciation rates for the Liberty Gas
- 4 operations in other jurisdictions.

#### 5 Q. IS IT COMMON TO HAVE A COMPLETE NET SALVAGE HISTORY

#### 6 THAT PARALLELS LIFE DATA?

A. In my experience, it is very unusual to have the two periods of life and net salvage data to coincide. Particularly for Liberty Utilities assets, which have had multiple owners, the detailed data does not always find its way to the new owner. That is why the void in 2011 and 2012 data exists, which coincides with part of the interval the assets were owned by Atmos. The data in the record for this case is sufficient to enable a depreciation analysist to make a net salvage recommendation for net salvage in this case.

#### IV. GENERAL PLANT AMORTIZATION

#### 15 Q. WHAT IS GENERAL PLANT AMORTIZATION?

A. General Plant Amortization, sometimes known as vintage group accounting, has
its roots in Accounting Release 15 that was issued by FERC more than 20 years
ago. The purpose of Accounting Release 15 is to allow companies to retire small,
low volume assets and eliminate the need for detailed inventories. The entirety of
FERC Accounting Release 15 is shown below.<sup>4</sup>

14

<sup>&</sup>lt;sup>3</sup> Robinnett, Direct, page 2.

## DANE A. WATSON SURREBUTTAL TESTIMONY

1	Question: Is it permissible for a public utility, licensee, natural gas company, or
2	oil pipeline company to adopt a vintage year accounting method for the general
3	plant accounts listed below which would eliminate the unitization and record
4	keeping requirements associated with individual items of property and allow such
5	companies to record only the total cost of plant additions for the year as a vintage
6	group for each account?
7	
8	For Public Utilities, Licensees, Natural Gas Companies
9	Account 391, Office Furniture and Equipment;
10	Account 392, Transportation Equipment;
11	Account 393, Stores Equipment;
12	Account 394, Tools, Shop and Garage Equipment;
13	Account 395, Laboratory Equipment;
14	Account 396, Power Operated Equipment;
15	Account 397, Communication Equipment;
16	Account 398, Miscellaneous Equipment; and
17	Account 399, Other Tangible Property.
18	
19	For Oil Pipeline Companies
20	Account 179, Machine Tools and Machinery;
21	Account 183, Communication Systems;
22	Account 184, Office Furniture and Equipment; and
23	Account 185, Vehicles and Other Work Equipment.
24	1. I
25	<b>Answer:</b> Yes, provided the following requirements are met:
26	
27	1. the individual classes of assets for which vintage year accounting is followed
28	are high volume, low value items;
29	
30	2. there is no change in existing retirement unit designations, for purposes of
31	determining when expenditures are capital or expense;
32	
33	3. the cost of the vintage groups is amortized to depreciation expense over their
34	useful lives and there is no change in depreciation rates resulting from the
35	adoption of the vintage year accounting;
36	r
37	4. interim retirements are not recognized;
38	
39	5. salvage and removal cost relative to items in the vintage categories are included
40	in the accumulated depreciation account and assigned to the oldest vintage first;
41	and
42	
43	6. properties are retired from the affected accounts that, at the date of the adoption
44	of vintage year accounting, meet or exceed the average service life of properties
45	in that account.

1 2 3 4		A vintage year method of accounting for the general plant accounts that meets all of the foregoing requirements may be implemented without obtaining specific authorization from the Commission to do so.
5 6 7 8		Debbie L. Clark Chief Accountant Effective: January 1, 1997
9	Q.	HAS MISSOURI APPROVED GENERAL PLANT AMORTIZATION FOR
10		OTHER UTILITES IN THE STATE?
11	A.	Yes. General plant amortization was approved in the following cases:
12		Missouri American Water Company WR-2015-0301, Kansas City Power and
13		Light. (ER-2014-0370) and Ameren (ER-2014-0258).
14	Q.	WHOW MUCH OF LIBERTY'S PLANT WOULD BE CATEGORIZED
15		FOR GENERAL PLANT AMORTIZATION?
16	A.	Accounts 391, 393,395, 397-399 subaccounts are proposed for general plant
17		amortization. As of December 31, 2017, this is only 2.64% of the total plant in
18		service.
19	Q.	WHY DOES OPC OBJECT TO GENERAL PLANT AMORTIZATION?
20	A.	OPC states "General Plant Amortization threatens the ability to perform any sort
21		of prudence review of plant added into these accounts because it fails to tract
22		retirement units and original costs. Under the General Plant Amortization
23		method, only two values matter: the total additions for an account in a vintage
24		year and the amortization period over which the investment is to be recouped.5"

7

<sup>&</sup>lt;sup>5</sup> OPC Direct, p 3 lines 21-24.

1	Mr. Robinnett's statements are simply incorrect. General Plant Amortization
2	allows the timely retirement of small, low-volume assets and also eliminates the
3	need for detailed inventories. Accounting records still record the age and cost of
4	an asset which is automatically retired when an assets reaches the amortization
5	age. Utilities across the United States have adopted general plant amortization to
6	simplify record keeping and save the cost of detailed inventories.
7 <b>Q.</b>	OPC STATES GENERAL PLANT AMORTIZATION MIGHT 'MASK'
8	THE APPROPRIATE RECOVERY PERIOD FOR ASSETS. IS THAT
9	CORRECT?
10 A.	No. The accounts in question are small items of limited value that many
11	Companies prefer not to track. Adoption of general plant amortization generally
12	produces a savings in the form of less accounting personnel time (and operational
13	time if inventories are conducted) and allows timely retirement of assets without
14	the need for detailed paperwork and record keeping. These savings are, of course,
15	ultimately reflected in the rates charged customers. OPC's objections are
16	unfounded and the Commission should allow the Company to implement General
17	Plant Amortization as has been done for the majority of utilities in the US and for
18	other utilities in Missouri.
19 <b>Q.</b>	IS LIBERTY UTILITIES PLANNING TO IMPLEMENT GENERAL
20	PLANT AMORTIZATION FOR ACCOUNTS 392 AND 396 SINCE FERC
21	INDICATES THOSE ARE ELIGIBLE FOR AMORTIZAITON?

<sup>6</sup> Opc Direct, page 4, lines 10-11.

## DANE A. WATSON SURREBUTTAL TESTIMONY

1	A.	No. Liberty Utilities Missouri still plans to keep normal accounting records for
2		Account 392- transportation equipment and 396 power operated equipment. Only
3		small items like office furniture and equipment (Account 391) or tools (Account
4		394) would be automatically retired when the age of the asset reaches the
5		amortization period.
6		VI. <u>CONCLUSION</u>
7	Q.	IN SUMMARY, WHAT ARE YOUR RECOMMENDATIONS FOR
8		LIBERTY UTILITIES?
9	A.	I recommend that the Commission reject OPC's proposal to retain the existing
10		depreciation rates. I also recommend that the Commission adopt general plant
11		amortization for Liberty Utilities Missouri's small general plant accounts.
12	Q.	DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?
13	A.	Yes.

### AFFIDAVIT OF DANE WATSON

STATE OF TEXAS	)
COUNTY OF COLLIN	) ss

On the 8th day of May, 2018, before me appeared Dane Watson, to me personally known, who, being by me first duly sworn, states that he a partner at Alliance Consulting Group and acknowledges that he has read the above and foregoing document and believes that the statements therein are true and correct to the best of his information, knowledge and belief.

Subscribed and sworn to before me this 8th day of May, 2018.

My commission expires: 03 01 2620
