FINAL TOTALS
COUNT 1,021

*** END OF REPORT ***

Exhibit 3: Cutover Sequence

STEP I (Make-ready work) :

- A. Make-ready work in Moberly for MEC & NMEPC to UE swaps.
- B. Make-ready work near Macon, Clarence & Shelbyville for UE to NMEPC swaps.
- C. Make-ready work at Brookfield, LaPlata and Cairo for UE to MEC swaps.
- D. Make-ready work in Brookfield for MEC to UE swaps.
- E. Make-ready work in Thomas Hill area for UE to MEC swaps.

STEP II (Cutover work):

- A. Cutover MEC & NMEPC facilities to UE around Moberly.
- B. Cutover UE facilities to NMEPC from Macon to Shelbyville/Shelbina.
- C. Cutover UE facilities to MEC: Bucklin, New Cambria, Bevier, Atlanta, Jacksonville, Excello, and Holiday Acres Areas.
- D. Cutover MEC facilities to UE around Brookfield.
- E. Cutover UE facilities to MEC in Thomas Hill area.

*File
Copy*

Area (1): Single-phase north of highway 24; from about 3 miles east of Cairo east to Madison.

- Extend single-phase 19.9kV north about 1/2 mile from highway 24
- Install a 19.9-7.2kV stepdown transformer and a recloser at the four-corners of sections 12,7,13,8 on the County line.
- Build double-deadend structures at two places in MEC's distribution lines, just south of County Road K, roughly on the "borderline"

Area (2): Distribution to be served by NMEPC's Moberly Sub

- Install NMEPC mobile substation at NMEPC's Moberly Sub.
- Remove the NMEPC transformers and regulators from NMEPC's Moberly Sub.
- Install the three-phase transformer from Clarence Substation.
- Remove the NMEPC mobile substation at NMEPC's Moberly Sub.
- Build structure to tap into NMEPC 69kV line from UE 69kV line just northwest of NMEPC's Moberly Substation.
- Build double-deadend structures in NMEPC's line
- Build double-deadend structures at two places in MEC's distribution lines, roughly on the "borderline":
 - on County Road 100 just south of Cairo
 - just west of NMEPC's Cairo Sub
- Extend additional phases and install additional recloser to serve golf course and other 3-phase customer with three-phase from the west.
- Build single-phase south of Cairo to pickup MEC customers on County Road 100.

Area (3): West of highway 63, north of highway 24, over to Huntsville

- Build structure to tap into MEC three-phase from UE three-phase at County Road DD just north of industrial park.
 - Install 50Amp reclosers at this point to protect industrial customers from the exposure
- Install solid-blade switches just east of highway 63 on County Road 102. Put warning label on pole due to need for "open transition".
- Build double-deadend structures at two places in MEC's distribution lines, roughly on the "borderline":
 - on County Road DD
 - due north of Huntsville

Area (4): Clifton Hill to Huntsville, north of highway 24

- Build structure, including recloser, to tap into MEC single-phase from UE three-phase about 1/2 mile east of highway 3
- Build structure, including recloser, to tap into MEC single-phase from UE three-phase at four corners of sections 32,33,5,4
- Install 50Amp fuses at point in section 20
- Build double-deadend structures at two places in MEC's distribution lines, roughly on the "borderline":
 - northwest of Huntsville, on line between sections 15 & 14
 - at bridge on border about 1/2 mile west of highway 3

Note:

Consider need for regulation and/or cap banks in Areas 3 and 4.

Verify coordination of new reclosers and fuses with existing protection.

Verify new load will not overload feeders and/or substations.

Verify phase rotation and phasing at three-phase connections.

Verify proper phasing at single-phase connections.

Double deadend structures designed to leave an open span between the lines after cut open.

Areas 1 and 4 can be done anytime (other than depending on MEC to cut-open the lines)

Area 3 must precede Area 2.

Area (1):

- Cutopen the jumpers at the double-deadend structures at two places in MEC's distribution lines, just south of County Road K, roughly on the "borderline"
- Close their normally-open switch in section 1
- Jumper around (and later remove) the 15Amp sectionalizer 1.5 miles north of the stepdown station.
- Close-in our 19.9-7.2kV stepdown transformer.

Area (2):

- Cut open the jumpers at two places in MEC's distribution lines, roughly on the "borderline":
 - on County Road 100 just south of Cairo
 - just west of NMEPC's Cairo Sub
- NMEPC clear their 69kV line from Cairo south
- Cut open the jumpers at the borderline on NMEPC's 69kV line
- UE clear our 69kV line
- Tap into the NMEPC 69kV line, in order to pickup NMEPC's Moberly Sub
- Close their normally-open point just north of highway 24
- Jumper across deadend to pickup single-phase just south of Cairo (where we had to build a few spans of single-phase to pick it up)

Area (3):

- Cutopen the jumpers at two places in MEC's distribution lines, roughly on the "borderline":
 - on County Road DD
 - due north of Huntsville
- Close their normally-open switch in section 21
- Open solid-blade switches just east of highway 63 on County Road 102
- Jumper around (and later remove)
 - 35Amp reclosers at NW corner of section 14
 - 50Amp reclosers at NE corner of section 13
 - 50Amp regulator 1.5 miles north of Huntsville
- Close-into MEC three-phase from UE three-phase at County Road DD just north of industrial park.
- Turn off the instantaneous reclosing on the Sparks feeder that serves this area.

Area (4):

- Cutopen the jumpers at two places in MEC's distribution lines, roughly on the "borderline":
 - northwest of Huntsville, on line between sections 15 & 14
 - at bridge on border about 1/2 mile west of highway 3
- Open the fuses at the point in section 20
- Jumper around (and later remove)
 - 50Amp regulator at south side of section 22
 - both 35Amp reclosers in section 20
 - 25Amp sectionalizer at SW corner of section 33
- Close-into MEC single-phase from UE three-phase about 1/2 mile east of highway 3
- Close-into MEC single-phase from UE three-phase at four corners of sections 32,33,5,4

Clarence Substation:

- Install UE mobile transformer.
- Remove UE three-phase transformer. Ship to NMEPC's Moberly Substation for installation (see I-A under Area(2)).
- Install NMEPC single-phase transformers.
- Remove UE mobile transformer.

near Macon:

Install 69kV metering location.

near Macon:

Read-in 69kV metering.

NMEPC will continue to perform work necessary to put Clarence/Shelbyville onto NMEPC system. The following work can be done before or after the 69kV metering is read-in:

near Shelbyville:

- Build 69kV line from existing NMEPC 69kV line near Shelbyville to a point near UE's Shelbyville Substation.
- Build a structure to tap into UE 69kV line from new NMEPC 69kV line.

Open the 69kV switch east of Clarence, switch number 6213.

Tap into the UE 69kV line, in order to pickup Shelbyville Substation and Amoco-Shelbina.

near Macon:

- Build double-deadend structures east of UE's Macon Substation.

Optional:

- Build 69kV line from existing NMEPC 69kV line in/near Macon to a point east of the double-deadend structures mentioned above.
- Build a structure to tap into UE 69kV line from new NMEPC 69kV line.

Open the 69kV breaker in UE's Macon Substation.

Cut open the line east of UE's Macon Substation.

Close the 69kV switch east of Clarence to pickup Clarence Substation.

Note:

Verify phase rotation

Double deadend structures designed to leave an open span between the lines after cut open.

Brookfield:

Install a 34.5kV metering location and double deadend structures.

Cairo:

Install a 34.5kV metering location and double deadend structures.

LaPlata:

Install double deadend structure.

Note:

Double deadend structures designed to leave an open span between the lines after cut open.

Jacksonville, Excelsior, and Holiday Acres Areas

Read-in the 34.5kV meters at Brookfield and Cairo.

UE will continue to own the 34kV substations.

MEC and NMEPC will proceed to perform conversions and other work necessary to put these loads onto NMEPC substations.

When that work is done, the 34.5kV metering points will be removed and the 34.5kV lines cut open. Also cut open/loose the 34.5kV lines at/from Macon Sub.

Area north of Brookfield:

- Extend single-phase 7200V east about 1 mile from existing UE 12kV line on highway M. Install 35Amp reclosers at the tap.
- Build structure to tap into MEC single-phase from new UE single-phase.
- Build double-deadend structures in MEC's line in section 20, roughly on the "borderline"

Area east of Brookfield:

- Install a 12kV metering location and double deadend structures in MEC backbone, roughly at the "borderline", about 3/4 mile south of Highway 36 between sections 13 and 14.
- Install a 7200V, 50Amp, single-phase voltage regulator in the single phase line heading east from the Highway 11 and County Road F intersection.
- perform preliminary work necessary to convert the two-phase section of line in sections 25 and 26 to single-phase
- Build double-deadend structures in MEC lines, roughly at the "borderline"
 - on Highway 11 between sections 25 and 26
 - about 1.25 miles east of Highway 11 between sections 30 and 31
 - about 3 miles south of Highway 36 between sections 27 and 34

Note:

Consider need for cap banks in Area east of Brookfield.

Verify coordination of new reclosers and fuses with existing protection.

Verify new load will not overload feeders and/or substations.

Verify phase rotation and phasing at three-phase connections.

Verify proper phasing at single-phase connections.

Double deadend structures designed to leave an open span between the lines after cut open.

Area north of Brookfield:

- Cut open the jumpers in MEC's line.
- Close-into MEC single-phase from UE single-phase.

Area east of Brookfield:

- Cut open the jumpers in the MEC lines:
 - on Highway 11 between sections 25 and 26
 - about 1.25 miles east of Highway 11 between sections 30 and 31
 - about 3 miles south of Highway 36 between sections 27 and 34
- Jumper around (and later remove)
 - 35 Amp recloser located about 3/4 mile north of Highway 11 in section 35
 - 50 Amp regulators in the two-phase section
- Close-into (jumper)
 - at the 12kV meter at the "borderline", about 3/4 mile south of Highway 36 between sections 13 and 14; and read-in the meter.
 - to energize the 7200V, 50Amp, single-phase voltage regulator in the single phase line heading east from the Highway 11 and County Road F intersection.
 - to convert the two-phase section to single-phase
- Close their normally-open switch(es) at
 - about 1/4 mile north of Highway 36 on County Road F
 - about 1/2 mile west of the intersection of County Road F and Highway 36

MEC will proceed to perform work noted under item II-C. When that work is complete, the 34.5kV line can be cut open at the "borderline". Once the 34.5kV line has been cut open at the "borderline", UE will proceed to perform work necessary to put the area east of Brookfield onto UE substations:

The following work can be done before or after the 12kV meter is read-in:

- Cut BRFD-BRKS-73 open at Brookfield Substation and Brooks Substation.
- Build structures necessary to tap into BRFD-BRKS-73 from Pershing 984-51 just north of Halliburton St.; and go ahead and convert to 12kV.
- Reconfigure BRFD-BRKS-72 to a 69kV construction standard.
- Install 70 Amp reclosers at the tap point Halliburton St.
- Build structures around Brookfield Substation necessary to connect old BRFD-BRKS-73 and BRFD-71 together.
- Build structure necessary to cut old BRFD-71 line into MEC's line on County Road F.
- Install 100 Amp regulators just west of County Road F.
- Extend two additional phases from the point just north of Highway 36 on County Road F north on County Road F about 1.75 miles to the tapping structure at old BRFD-71.

The following work must wait until after the 34.5kV has been cut-open at the "borderline" and the 34kV breaker opened:

- Close-into (jumper)
 - at Brookfield Substation to pickup BRFD-71 east at 12kV
 - the regulators at County Road F
 - at County Road F to pickup MEC three-phase on old BRFD-71

When that work is done, the 12kV metering point will be removed and the line cut open.

Install a 12kV metering location and double deadend structure in UE's line in section 24, roughly on the "borderline".

Note:

Consider need for cap banks.

Verify coordination of new reclosers and fuses with existing protection.

Verify new load will not overload feeders and/or substations.

Verify phase rotation and phasing.

Double deadend structures designed to leave an open span between the lines after cut open.

• Read-in the 12kV meter at the "border".

MEC will proceed to perform conversions and other work necessary to put these loads onto MEC distribution.

When that work is done, the 12kV metering point will be removed and the 12kV line cut open.

Exhibit 4

UE/MACON TERRITORIAL AGREEMENT NON-CUSTOMER SERVICE EQUIPMENT LIST

UE SUBSTATIONS

Holiday Acres Substation #801

The Holiday Acres Substation is a platform substation located on railroad right-of-way. The Company has no land rights to the substation site. Company equipment located at the substation includes one 34.5/7.2 kV transformer, one 7,200 volt regulator, one regulator bypass switch, two high-side fuseholders, one platform, and various minor material. The Company will remove the equipment soon after the cutover date.

Excello #742

The Excello Substation is located on perpetual easements (copies of easements attached). The Company will maintain their land rights to the substation site as described in the easements. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

Jacksonville Substation #931

The Jacksonville Substation is located on perpetual easements (copies of easements attached). The Company will maintain their land rights to the substation site as described in the easements. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

Macon Substation #720

The Macon Substation is located on land owned by the Company (copy of deed attached). The Company will maintain ownership of the land. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

Atlanta Substation #744

The Atlanta Substation is located on land owned by the Company (copy of deed attached). The Company will maintain ownership of the land. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

UE/MACON TERRITORIAL AGREEMENT NON-CUSTOMER SERVICE EQUIPMENT LIST

UE SUBSTATIONS (continued)

Peabody Mine (Associated Electric) Substation #7232

The idle 69/34 kV Peabody Mine customer substation is located on customer owned property for which the Company has no land rights. The Company will maintain ownership of the substation fence and all structures, equipment, and materials located within the fence. The Company will remove the 34 kV metering equipment from this substation.

Bevier #757

The Bevier Substation is located on land owned by the Company (copy of deed attached). The Company will maintain ownership of the land. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

New Cambria #758

The New Cambria Substation is located on land owned by the Company (copy of deed attached). The Company will maintain ownership of the land. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

Bucklin #759

The Bucklin Substation is located on land owned by the Company (copies of deeds attached). The Company will maintain ownership of the land. The Company will also maintain ownership of the substation fence and all structures, equipment, and materials located within the fence.

MACON 12.47 3-PHASE LINE

The Macon 12.47 kV. 3-phase line runs south along the west side of the County Road 62 to Route Z and then west along the south side of Route Z; west of Cairo. The Cooperative will maintain ownership of this line.

EXHIBIT 4

MACON 12.47 KV 3 PHASE LINE

The Macon 12.47 KV 3 phase lines, which are located in Section 35, Township 55 North, Range 14 West, and Section 2, Township 54 North, Range 14 West.

MACON 7.2 KV SINGLE PHASE LINE

The Macon 7.2 KV line runs North and South on the West side of Highway M at the end of Highway P in Linn County. The cooperative will retain ownership of this line, but customers on this line are to be transferred in accordance with the terms of the Agreement.

FILED
JUL 5 - 1996
MISSOURI
PUBLIC SERVICE COMMISSION

SUMMARY OF RESPONSES TO CUSTOMER COMMENTS

1. Meter Reading - Because of the increased density in the cities that would be acquired under the territory agreement and because of the cost to change all meters to a cyclometer type meter it is decided to read all meters in these cities. Some customers in more remote areas may be asked to read their meter.
2. Franchise With 10% Street Light Reduction - Because of the added accessibility of street lights and the benefits of the franchise, a decision has been made to approve acceptance of transferred franchise agreements along with a 10% reduction in street lighting rate.
3. Additional Servicemen - With the added customers in certain outlying areas and the benefits this would give existing customers as well, a decision to locate a serviceman in or near Shelbyville and a serviceman in or near Bucklin has been made if the territory agreement is approved.
4. Rate At Maytag - This large industrial customer provides its own transformer and does not fit an existing rate structure our rate will be no more than existing UE rate.
5. Property Tax Impact - Because of the different methods of property tax assessment some tax impact will be felt. Monroe, Randolph and Linn should go up and Macon and Shelby should go down. the impact is great enough on individual tax payers in cities coming to MEC in the agreement that MEC will compensate the cities for a period of four years following the transfer to be calculated by calculating the tax lost less savings on street light rate from MEC.

City tax loss	\$ 37,466
	<u>10,935</u>
	\$ 26,531 per year

6. Other Services - Existing loans for customers lost by MEC shall continue to be serviced by MEC. Maintenance contracts of Ground Source Heat Pumps shall be honored through as per the service agreement contract. Satellite programming and sales will continue in the area lost by the cooperative.

7. Membership - A zero membership fee will be brought to the 1997 Annual Meeting for approval.

President

Secretary/Treasurer
