| Case No. | EW-2009-0324 |
| Public Comments Description | The Public Service Commission should maintain the original intent of Proposition C. Only solar, wind, and biomass should be part of the 15% renewable energy requirement for electric generation. Nuclear or any fossil fuel should in no way be considered renewable. It should not be that difficult to achieve 15%. Electric utilities and individuals should be encouraged to make greater use of wind and solar. The rebate from AmerenUE was big factor in our decision to install a photovoltaic system. |
