I am not sure why you sent me information concerning your complaint. Everything is fine with the water and sewer. I have had my water tested by the Lab in Clinton Mo 2 times since Kathy sent out the letter indicating there was a poblem with the quality of the water and that my grandchildren were at risk.

By filing complaints it is probably going to cost me 3 times more in my Water and Sewer. I realize that only 2 of you have service, and that is only sewer. Perhaps you should have considered other's before you thought about "vengeance" against F/R.

You have accomplished nothing except maybe getting your money back if you have any coming, and making a BIG STINK out of Big Island. Look to the future, and stop living in the past.

Sincerely, Bill
