Missouri-American Water Company Name of Issuing Corporation

For

Hickory Hills Estates & Temple Terrace, Moniteau County, Missouri

#### WATER TARIFF ADOPTION NOTICE

Missouri – American Water Company, hereby adopts, ratifies, and makes its own, in every respect as if the same had been originally filed by it, all tariffs, schedules, rules, concurrences, schedule agreements, divisions, authorities or other instruments whatsoever filed with the Public Service Commission, State of Missouri, by Hickory Hill Water & Sewer Company, Inc., currently on file with and approved by the Commission. By this Notice Missouri – American Water Company adopts and ratifies all supplements or amendments to any of the above schedules, etc. which Hickory Hill Water & Sewer Company has heretofore filed with said Commission. Missouri - American Water Company adopts Hickory Hill Water & Sewer Company's Missouri P.S.C. Tariff No. 2, in its entirety, as Missouri - American Water Company P.S.C. Tariff No. 22.

Hickory Hills Water & Sewer Company, Inc.

For: Hickory Hills Estates & Temple Terrace

Name of Issuing Company

Community, Town or City

### Rules Governing Rendering of Water Service

#### RULE 5

#### INSIDE PIPING AND WATER SERVICE LINES

- (a) The company will provide water service at the outdoor meter, or at the property line. Separate buildings shall be served through separate water service lines.
- (b) The service connection from the water main to the customer's property line, the meter installation and setting, or shut off valve when inside meters are used, shall be constructed, owned and maintained by the company. Water service line construction and maintenance from the property line or meter setting, or shut off valve, including the connection to the meter setting or shut off valve, to the building shall be the responsibility of the customer. All service line construction is subject to inspection by the company. Customers shall be responsible for the cost of repairing any damage to the company's mains, meters and meter installations caused by the customer, his agent, or tenant.
- (c) Existing water service lines may be used in connecting with new buildings only when they are found by examination and testing not to constitute a hazard to the health and safety of any customer or the company's facilities.
- (d) The water service line shall be brought to the unit at a depth of not less than 36 inches and have a minimum inside diameter of ½ inch. The customer is responsible for the determination of whether or not a larger size is needed to provide adequate flow to the unit. A valve must be installed in the service line where it enters the unit. This valve must be kept in good repair in order to shut off the water supply and drain the inside plumbing, if necessary.
- (e) Water service lines and inside piping shall be of material conforming to recognized + standards for potable water service, shall have a minimum pressure rating of at least 160 psi, and shall meet the Department of Natural Resources standards for lead service line replacement requirements as stated in the Public Drinking Water Program's regulations, namely 10 CSR 60 Chapter 15 of the Code of State Regulations.
- (f) The company will not install a service connection to a vacant lot.

# METERS AND METER INSTALLATIONS (continue blic Service Commission

- (g) The cusotmer shall promptly notify the company of any defect in, or damage to, the meter setting.
- (h) Any change in the location of any existing meter or meter setting at the request of the customer shall be made at the expense of the customer, and with the approval of the company.
- (i) If an existing basement meter location is determined inadequate or inaccessible by the company, the customer must provide for the installation of a meter to be located at or near the customer's property line. The customer shall obtain from the company, or furnish the necessary meter installation appurtenances conforming to the company's specifications, and said appurtenances and labor shall be paid by the customer.
- Approved meter installation locations in dry basements, sufficiently heated to keep (i) the meter from freezing, may remain provided the meter is readily accessible, at the company's and customer's convenience as determined by the company, for servicing and reading and the meter space provided is located where the service line enters the building. The company may, at its discretion, require the customer to install a remote reading device at an approved location, for the purpose of reading the meter. It is the responsibility of the customer and/or the owner of the premises to provide a location for the water meter which, in the event of water discharge as a result of leakage from the meter or couplings, will not result in damage. The company's liability for damages to any and all property caused by such leakage shall in no event exceed the price of water service to the affected premises for one average billing period in the preceding year. Where damage is caused by the negligence of company personnel at the premises, the limitation will not apply. If a customer refuses to provide an accessible location for a meter as determined by the company, the company will notify the Executive Secretary of the Public Service Commission before ultimately refusing service or proceeding to discuntinue service. (a) Any cusotmer may request the company to make a special test of the accuracy of the meter through which water is supplied to him. This test will be made in accordance with water industry test procedures, and to check for accuracy as required by regulations of the Public Service Commission.  (b) The company reserves the right to remove and test a meter at any time and to substitute another in its place. In case of a dispute involving a question as to the accuracy of the meter, a test will be made by the company upon the request of the customer without charge if the meter has not been tested within twelve (12) months preceding the requested test; otherwise, an approved charge will be made if the test indicates meter accuracy within five percent (5%).  (c) A meter test requested by the customer may be witnessed by the customer or his duly authorized representative, except for tests of meters larger than two (2) inch inlet, which will be conducted by the water manufacturer. A certified copy of the test report will be provided to the customer.  (d) If a test shall show an average error of more than five percent (5%), billings shall be adjusted as provided by these Rules.  * Indicates new rate or text    APR 3 0 1996  * Indicates change  The of ISSUE 3-30-16    The month day year    DATE EFFECTIVE    The month day year    The month day year    DATE EFFECTIVE    The month day year    The			P.S.C. (b) Upon receipt of a written application for a main extension, the Company will provide the applicant(s) with an itemized estimate of the cost of the proposed extension. Said estimate shall included the cost of all labor and materials required, including valves, fir hydrants, booster stations, storage facilities, reconstruction of existing mains (if necessary, and the direct costs associated with supervision, engineering, permits, and bookkeeping.  (c) Applicant(s) shall enter into a contract with the Company for the installation of said extension and shall tender to the Company a contribution in aid of construction equal to the amount determined in paragraph (b) above, plus any applicable customer connection fee. The contract may allow the customer to contract with an independent contractor for the installation and supply of material, except that mains of 12" or greater diameter must be installed by the Company, and reconstruction of existing facilities must be done by the Company.  (d) The cost to an applicant or applicant(s) connecting to a main extension contributed by other applicant(s) shall be as follows:  (1) For single-family residential applicants that are applying for service in a platted subdivision, the Company shall divide the actual cost of the extension by the number of lots abutting said extension + to determine the per lot extension cost. When counting lots, corner lots, which abut existing mains, shall be excluded.  * Indicates new rate or text  * Indicates new	(a)		_			-	ie Compan	y within its	1

		RULE RENDERING OF V	s Gove Vater			+ RECTO F	EB 25 1999
	EXTENSION OF WATER MAINS (CONTINUED) +						
	(3) The sum of all refunds to any applicant shall not exceed the total contribution, adjusted for taxes where applicable, associated with the extension, which the applicant(s) have paid.						
(f)	Extensions made under this rule shall be and remain the property of the Company.						
(g)	The Company reserves the right to further extend the mains and to connect mains on intersecting streets and easements. Connecting new customers to such further extensions shall not entitle the applicant(s) paying for the original extension to a refund for the connection of such customers.						
(h)	Extensions made under this rule shall be of Company approved pipe sized to meet water service requirements. If the Company chooses to size the extension larger in order to meet the Company's overall system requirements, the additional cost caused by the larger size pipe shall be born by the						
(i)	Company.  No interest will be paid by the Company of payments for the extension made by the applicant(s).						
(i)	If extensions are required on private roads, streets, through private property, or on private property adjacent to public right-of-way, a proper deed of easement must be furnished to the Company without cost to the Company, before the extension will be made.
