

LACLEDE GAS COMPANY
720 OLIVE STREET
ST. LOUIS, MISSOURI 63101
(314) 342-0601

KENNETH J. NEISES
EXECUTIVE VICE PRESIDENT
ENERGY & ADMINISTRATIVE SERVICES

October 28, 2008

VIA EFIS

Secretary
Missouri Public Service Commission
Governor Office Building
200 Madison Street
Jefferson City, MO 65101

Dear Secretary:

Enclosed herewith for filing with the Missouri Public Service Commission are the following revised tariff sheets which are applicable to both divisions of Laclede Gas Company:

P.S.C. MO. No. 5 Consolidated
Second Revised Sheet No.R-45
Second Revised Sheet No.R-46
Second Revised Sheet No.R-47
Second Revised Sheet No.R-48

Pursuant to paragraph 20 of the Stipulation and Agreement in Case No. GR-2007-0208, an Energy Efficiency Collaborative ("EEC") was formed to develop a portfolio of cost effective energy efficiency programs for the Company's customers. The EEC is comprised of representatives from the Company, the MPSC Staff, the Office of the Public Counsel, the Missouri Department of Natural Resources, USW Local 11-6, and AmerenUE. The enclosed tariff sheets reflect the programs that have been developed to date and that the EEC is prepared to implement.

These revised tariff sheets have an issue date of October 28, 2008 and an effective date of November 28, 2008.

Sincerely,

Handwritten signature of Kenneth J. Neises in cursive script.

35. Conservation and Energy Efficiency Programs

The Energy Efficiency Collaborative ("EEC") was formed pursuant to paragraph 20 of the Stipulation and Agreement in Case No. GR-2007-0208 to develop a portfolio of cost effective energy efficiency programs for the Company's customers. Pursuant to this tariff and terms developed by the EEC, the following programs have been established.

A. Residential High Efficiency Rebate Program:

The Company's Residential High Efficiency Rebate Program provides rebates to residential owners and customers for the installation of high efficiency heating systems and thermostats as described below:

Equipment	AFUE*	Rebate
Gas furnace	Greater than or equal to 92% but less than 96%	\$150
Gas furnace	Greater than or equal to 96%	\$200
Gas Boiler	Greater than or equal to 90%	\$150
ENERGY STAR thermostat		\$25

*Annual Fuel Utilization Efficiency

Owners of, or customers living in, an individually metered dwelling unit, are eligible to participate in this program and must apply for rebates through the Company or through participating heating, ventilating and air conditioning ("HVAC") contractors.

Rebate Limit: Individual dwelling units, as determined by account number, whether owner-occupied or rental property, are eligible for a maximum of two heating system rebates and two ENERGY STAR thermostat rebates under this program.

Owners of multiple individually metered dwelling units are limited to a maximum of 50 heating system rebates and 50 ENERGY STAR thermostat rebates during one program year.

35. Conservation and Energy Efficiency Programs (continued)

B. Commercial and Industrial (C/I) Rebate Program:

The C/I Rebate program was established to provide standard rebates, as set forth below, and custom rebates to commercial and industrial customers, for the implementation of natural gas energy efficiency improvements, including part or all of the cost of an energy audit that was performed in support of any measure that receives a rebate.

Customers implementing certain measures as described below will receive prescriptive rebates. In addition, energy efficient food services equipment such as clam shell griddles and booster water heaters are also eligible for a prescriptive rebate. All other rebates under this program will receive financial incentives which are customized or individually determined using the Societal Benefit/Cost Test, as defined in the latest edition of the California Standard Practice Manual for Economic Analysis of Demand-Side Programs and Projects.

Prescriptive Rebates: Following is a list of the major types of equipment and services available for prescriptive rebates under the C/I Rebate program:

Equipment or Service	Eligible Customer Sector	Rebate
Continuous Modulating Burners	All C/I Customers	25% of equipment cost; \$15,000 cap per burner
ENERGY STAR Thermostat	All C/I Customers	\$40
Gas-fired Boiler Tune Up (eligible for tune-up every two years)	C/I customers which are non-profit (i.e. schools and governmental agencies)	100% of the cost up to \$1,500 per building
	Other C/I customers	50% of the cost up to \$500 per boiler
High Efficiency Air-Forced Furnaces		
>=92% AFUE*	All C/I Customers	\$200
>= 94% AFUE*	All C/I Customers	\$250
Vent Dampers	All C/I Customers	50% of equipment cost with a \$500 cap per boiler

*Annual Fuel Utilization Efficiency

35. Conservation and Energy Efficiency Programs (continued)

Custom Rebates: The C/I Rebate program will also provide custom rebates to C/I customers, and residential rental property owners of multifamily structures of more than four units, for the installation of any natural gas related energy efficiency improvement that does not qualify for a prescriptive rebate. All custom rebates will be individually determined and analyzed to ensure that they pass the Societal Benefit/Cost Test. Any measure that is pre-qualified (evaluated prior to being installed), must produce a Societal Benefit/Cost test result of 1.0 or higher.

Rebates are calculated as the lesser of the following:

- A buy-down to a two year payback
- \$6.63 per MCF saved during the first year

Audit: The energy audit incentive will only be provided to a customer that qualifies for a rebate under this program. The incentive offer will be structured as follows:

- Non-Profit customers (i.e., schools and governmental customers) will be eligible for full cost reimbursement up to \$750 per building under 25,000 sq. ft. and \$1,000 for buildings over 25,000 sq. ft.
- All other types of C/I customers that are not included in the non-profit group will be eligible for a partial reimbursement up to \$375 per building under 25,000 sq. ft. and \$500 for buildings 25,000 sq. ft. and over.
- There will be a limit of three buildings per customer per year for audit incentives. Audits must be performed by qualified professionals.¹ Audit reports must cover multiple aspects of energy use including:
 - HVAC System Controls
 - HVAC System Efficiency and Operation
 - Building Envelope
 - Commercial Cooking (where applicable)

Rebate Limit: The total rebate any one commercial or industrial customer can receive during one program year is \$25,000.

¹ Qualified is defined as being a Professional Engineer, a Certified Energy Manager, or having equivalent experience. The Company will keep a list of qualified auditors to assist customers.

RULES AND REGULATIONS

35. Conservation and Energy Efficiency Programs (continued)

C. Program Year:

Each program year will begin on August 1 and end on July 31 of the following year, except for the first year of each program, in which case the program year will begin with the Commission-approved effective date of the tariff sheets originally filed to implement such program.

D. Program Tracking and Reporting:

Within forty-five days of the end of each calendar quarter, the Company shall submit a status report to the EEC regarding the cost and participation of its conservation and energy efficiency programs including:

- the number of energy efficiency measures implemented, summarized by measure type, by county and customer type for each calendar quarter and cumulatively for the fiscal year or program year; (Measure Types: Residential - gas furnace greater than or equal to 93% but less than 96%; gas furnace greater than or equal to 96%; gas boiler greater than or equal to 90%. Commercial and Industrial - summarized for each type of prescriptive equipment or service, type of custom rebate, and for the audits.)
- funds invested in each energy efficiency program for each calendar quarter and cumulatively for the fiscal year or program year.
- estimated savings for each energy efficiency program for each calendar quarter and cumulatively for the fiscal year or program year

E. Post-implementation Evaluation:

A detailed post-implementation evaluation of the initial two (2) years of each program shall be completed within six (6) months of the end of each program's second year. Where feasible, these reviews will include both process evaluations and cost effectiveness (impact) evaluations. Evaluations may be performed after less than two years of program implementation if the EEC determines this is preferable. Post-implementation evaluations will then be used in the selection and design of future programs.
