2.0 – REGULATIONS (CONT'D)

2.22 Carrier Presubscription

2.22.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

2.22.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The Company does not provide either IntraLATA or InterLATA long distance services. Thus, the following options for long distance Presubscription are available:

Option A: Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

Option B: Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.

Option C: Customer may select two different carriers, neither being the Company, for intraLATA and interLATA toll calls. One carrier to be the Customer's primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

Option D: Customer may select no presubscribed carrier for intraLATA or interLATA toll calls, which will require the Customer to dial a carrier access code to route all toll calls to the carrier of choice for each call.

2.0 – REGULATIONS (CONT'D)

2.22 Carrier Presubscription

2.22.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed. Customers of record or new Customers may select either Options A, B, C or D, for intraLATA and interLATA Presubscription. Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in Section 4 of this tariff.

2.22.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in Section 5 of this tariff. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.

3.2 Timing of Calls

Timing of calls begins when the called station is answered, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. The company does not bill for incomplete calls.

3.3 Service Area

Services are provided throughout the State in the same service areas of ILECs with whom Company has Resale and/or Interconnection Agreements in effect. Services are provided subject to technical availability and compatibility with Customer facilities. Services, rates, and contract conditions may not be available in all areas. Company initially will provide service in AT&T-Missouri's service area, in the exchanges set forth in Section 5 of this Tariff. In the future, the Company may expand its service area to that of additional ILECs.

The local calling areas of Customers who reside in AT&T-Missouri exchanges will be the same as that provided by AT&T-Missouri.

3.4.2 Custom Calling Services (Cont'd)

3.4.2.2 Call Waiting -provides a tone/signal to a Customer that has a call in progress, that another call has been placed to that Customer's telephone number. The Customer may elect to hold the first call, by use of the switchhook, and answer the second call; as well as alternate between calls by pressing the switchhook. The Customer may elect not to respond to the signal, and continue the original call. In locations where the Company has made it available, Call Waiting may be deactivated prior to making an outgoing call, (or during a call if the Customer has Three-Way Calling).

3.4.2.3 Caller Identification – Number - This feature enables the Customer to view on a display unit the Calling Party Directory Number (CPN) on incoming telephone calls. When Caller ID is activated on a Customer's line, the CPN of incoming calls are displayed at the called CPE during the first, long silent interval of the ringing cycle.

- b) Federal, state, and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the Customer by dialing an access code immediately prior to placing a call. Line blocking Customer can unblock their CPN information on a per call basis, at no charge, by dialing an access code (*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A Customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (*67 on their touch tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification Customer will receive an anonymous indicator. This anonymous indicator notifies the Caller ID Customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.
