REBUTTAL TESTIMONY	
OF	
JOHN VAN ESCHEN	
SOUTHWESTERN BELL TELEPHONE, L.P., D/B/A AT&T MISSOURI	
CASE NO. TO-2007-0053	
EXECUTIVE SUMMARY	2

Rebuttal Testimony of John Van Eschen

A. I have a Bachelor of Arts degree in Psychology from the University of Iowa and have a Master of Arts degree in Economics from Kansas State University.

Q. Have you previously testified before this Commission?

A. Yes. I have been employed by the Commission since 1984 and have filed testimony in a variety of cases before the Commission. In particular, I testified on Staff's behalf in Case Nos. TO-2006-0102 and TO-2006-0093, AT&T's 60-day and 30-day petitions where competitive classification was granted to AT&T exchanges.

EXECUTIVE SUMMARY

Q. Please provide an executive summary of your testimony.

A. AT&T should be allowed to retain competitive classification in all currently classified competitive exchanges.

Q. What is the purpose of your rebuttal testimony?

A. In response to the direct testimony of Office of the Public Counsel witness Ms. Barbara Meisenheimer, I will offer more detailed information concerning the level of competition for basic local telecommunications service in Southwestern Bell Telephone, L.P., d/b/a AT&T Missouri's (AT&T's) exchanges granted competitive classification under the 60-day track in Case No. TO-2006-0102. In addition, I plan to provide more detailed information regarding AT&T's rate changes for basic local telecommunications service. I also will file revised Appendices A, B, C and D attached to Staff's Report previously filed in this case; however first I will provide some background information for this proceeding.

Q. Why did the Commission Staff initiate this case?

A. According to Section 392.245.5(6), "...The commission shall, at least every two years, or where an incumbent local exchange telecommunications company increases

1 rates for basic local telecommunications services in an exchange classified as competitive,
2 review those exchanges where an incumbent local exchange carrier's services have been
3 classified as competitive, to determine if the conditions of this subsection for competitive
4 classification continue to exist in the exchange..." The Commission Staff filed a Staff Report
5 in August 2006 after AT&T increased rates for basic local telecommunications services in
6 many of its competitively classified exchanges.

7 Q. What is your understanding of the main issue in this proceeding?

8 A. According to the Joint Motion to Establish Procedural Schedule and
9 Stipulation as to 30-Day Track Exchanges and the direct testimony of Office of the Public
10 Counsel witness Barb Meisenheimer, the remaining issue concerns the appropriateness of
11 maintaining competitive classification for the exchanges granted competitive status under the
12 60-day track.

13 Q. How many AT&T exchanges have competitive classification?

14 A. AT&T has 77 exchanges with competitive classification for residential
15 services and 75 exchanges have competitive classification for business services.
16 Competitive classification was granted to these AT&T exchanges in two proceedings. Case
17 No. TO-2006-0093 pertains to AT&T's 30-day petition and the Commission granted
18 competitive classification to 26 exchanges for residential services and 45 exchanges for
19 business services. Case No. TO-2006-0102 concerns AT&T's 60-day petition and the
20 Commission granted competitive classification to 51 exchanges for residential services and
21 30 exchanges for business services.

22 Q. What criteria must be met for an exchange to continue to qualify for
23 competitive status?

1 A. Missouri statutes allow an incumbent local telephone company to petition for
2 competitive classification within an exchange under two different tracks: a 30-day track and a
3 60-day track. The basic criteria is the same for both tracks in the sense an exchange can
4 qualify for competitive status if it can be demonstrated that at least two nonaffiliated entities
5 in addition to the incumbent local exchange company are providing basic local
6 telecommunications service within the exchange. The statute does place limitations on the
7 type of competition that can be counted under the 30-day track. The conditions that
8 originally qualified an exchange for competition must continue to exist when the Commission
9 completes a review to determine if competition continues to exist.

10 Q. What qualifying criterion was established for competitive status under the 60-
11 day track in Case No. TO-2006-0102?

12 A. The basic qualifying criterion of having two nonaffiliated local voice service
13 providers is still applicable but the 60-day track allows the incumbent local telephone
14 company to petition the Commission for competitive classification within an exchange based
15 on competition from any entity providing local voice service in whole or in part by using its
16 own telecommunications facilities or other facilities or the telecommunications facilities or
17 other facilities of a third party, including those of the incumbent local exchange company as
18 well as providers that rely on an unaffiliated third-party Internet service. The Commission's
19 decision in Case No. TO-2006-0102 recognized local voice service competition from non-
20 affiliated entities that included wireless carriers, VoIP providers using an unaffiliated cable
21 television company's broadband network, and competitive local exchange carriers (CLECs)
22 providing service on either a full facility, partial facility or other resale basis whereby other

Rebuttal Testimony of
John Van Eschen

1 resale is defined as arrangements where the CLEC uses UNE-P or similar commercial
2 wholesale service from AT&T.

3 Q. Please distinguish the terms full facility basis, partial facility basis and other
4 resale.

5 A. Full facility basis refers to CLECs providing service where the CLEC or its
6 affiliate owns the switch and the lines providing local voice service to the customer. Partial
7 facility basis refers to CLECs providing service where the CLEC or its affiliate owns either
8 the switch or the lines. Other resale basis refers to CLECs providing service where the CLEC
9 leases facilities from the incumbent local telephone company at a negotiated or arbitrated rate
10 or through an arrangement purchased via a commercial agreement. Other resale basis can be
11 distinguished from a pure resale basis. Pure resale is where the CLEC is essentially offering
12 the incumbent telephone company's service under the CLEC's name and rates. The rates a
13 CLEC pays the incumbent local telephone company for a pure resale arrangement are simply
14 discounted retail rates of the incumbent telephone company.

15 Q. Do you wish to make any changes to the Staff Report previously filed in this
16 case?

17 A. Yes. I am revising Appendices A, B, C, and D as attached to Staff's Report.
18 Attached to my testimony are Schedules 1 and 2 which revise Appendix A and Appendix B
19 of the Staff Report. These Schedules summarize the number of lines and the number of
20 competitive local exchange carriers (CLECs) in AT&T's exchanges granted competitive
21 status under the 60 day track. Schedule 1 relates to AT&T's 51 exchanges where competitive
22 classification was granted for residential services under the 60-day track while Schedule 2

1 pertains to AT&T's 30 exchanges where competitive classification was granted for business
2 services under the 60-day track.

3 Schedules 3 and 4 are revised versions of Appendices C and D as attached to Staff's
4 Report summarizing the number of lines and the number of CLECs in AT&T's exchanges
5 granted competitive status under the 30 day track. Schedule 3 relates to AT&T's 45
6 exchanges where competitive classification was granted for business services under the 30-
7 day track while Schedule 4 pertains to AT&T's 26 exchanges where competitive
8 classification was granted for residential services under the 30-day track.

9 Q. Explain what revisions were made to the Appendices contained in Staff's
10 Report.

11 A. Access lines associated with the AT&T affiliates of AT&T Communications
12 Southwest, TCG Kansas City and TCG St. Louis have been removed. Access lines
13 associated with three CLECs solely providing prepaid service were inadvertently included in
14 the list and have since been removed. The three prepaid service providers are FamilyTel,
15 Bulls Eye and Ren-Tel. It should be noted that AT&T affiliates and prepaid providers were
16 not included in the data the Commission reviewed when it originally granted AT&T
17 competitive classification in 2005. The column entitled "Rate Change" was also removed.

18 Q. What is the source for CLEC access line quantities in AT&T competitively
19 classified exchanges?

20 A. This information is based on 2005 Annual Reports submitted by companies
21 providing basic local telecommunications services. A carrier is required to provide line
22 counts on a per exchange basis indicating lines being served as of December 31st of that year.
23 A carrier is expected to report access lines based on how the carrier is serving the lines within

1 an exchange such as on a full facility, partial facility, other resale or pure resale basis. In this
2 instance our most recent Annual Reports on file for companies were submitted on April 15,
3 2006 and reflect lines served as of December 31, 2005. When the Commission granted
4 competitive status to various AT&T exchanges in the Fall of 2005, the Commission was
5 relying on 2004 Annual Reports. The 2004 Annual Reports reflect lines served as of
6 December 31, 2004.

7 Q. Do you wish to expand or supplement any of the information contained in
8 Staff's Report?

9 A. Yes. I will offer four additional schedules (Schedules 5, 6, 7 and 8) that
10 attempt to provide comparisons of how CLEC activity has changed in each of the 60-day
11 track exchanges. This comparison will quantify total CLEC lines and the total number of
12 CLEC providers in each exchange based on the 2004 Annual Report versus the 2005 Annual
13 Report. Schedule 5 is a summary of this comparison for AT&T's residential 60-day
14 competitive exchanges. Schedule 6 is a similar summary for AT&T's business 60-day
15 competitive exchanges.

16 Q. How has CLEC activity changed for AT&T's residential 60-day competitive
17 exchanges?

18 A. Schedule 5 shows that for AT&T's 51 residential competitive exchanges the
19 total number of CLEC lines in these exchanges decreased by 1,542 lines for CLECs
20 providing service either on a full facility, partial facility or other resale basis. CLEC line
21 totals within these 51 exchanges were 19,212 lines using 2004 Annual Report data; however,
22 CLEC lines totaled 17,714 lines based on 2005 Annual Report data.

1 On an exchange-specific basis, 37 out of the 51 exchanges experienced a decrease in
2 the total number of CLEC lines within an exchange. In contrast 14 out of the 51 exchanges
3 experienced an increase in the total number CLEC lines. In terms of the total number of
4 CLECs that are offering service on a full facility, partial facility or other resale arrangement
5 in these exchanges, 21 out of the 51 exchanges saw a decrease in the total number of CLECs
6 providing service within the exchange, 19 exchanges saw an increase in the total number of
7 CLECs, and 11 exchanges maintained the same number of CLECs.

8 Q. How has CLEC activity changed for AT&T's business 60-day competitive
9 exchanges?

10 A. Schedule 6 shows that for AT&T's 30 exchanges with competitive
11 classification for business services, the total number of CLEC lines in these exchanges
12 decreased by 126 lines for CLECs providing service either on a full facility, partial facility or
13 other resale basis. CLEC line totals within these 30 exchanges were 3,626 lines using 2004
14 Annual Report data; however, CLEC lines totaled 3,500 lines based on 2005 Annual Report
15 data.

16 On an exchange-specific basis, 16 out of the 30 exchanges experienced a decrease in
17 the total number of CLEC lines within an exchange. In contrast 13 out of the 30 exchanges
18 experienced an increase in the total number CLEC lines. In terms of the total number of
19 CLECs that are offering service on a full facility, partial facility or other resale arrangement
20 in these exchanges, 16 out of the 30 exchanges saw a decrease in the total number of CLECs
21 providing service within the exchange, 9 exchanges saw an increase in the total number of
22 CLECs, and 5 exchanges maintained the same number of CLECs.

23 Q. What other aspects of Schedules 5 and 6 do you wish to point out?

Rebuttal Testimony of
John Van Eschen

1 A. Based on 2005 Annual Report data each of the 51 AT&T residential 60-day
2 competitive exchanges and each of the 30 AT&T business 60-day competitive exchanges
3 have 3 or more CLECs providing service on a full facility, partial facility or other resale
4 basis.

5 Q. Why is it noteworthy to point out that these exchanges have 3 or more CLECs
6 providing such service on this basis?

7 A. As previously discussed, according to Section 392.245.5 the basic qualifying
8 criteria for competitive status is the presence of at least two nonaffiliated entities in addition
9 to the incumbent local exchange company as providing basic local telecommunications
10 service to customers within the exchange. Simply looking at CLEC activity, the evidence
11 indicates this criteria is met. This observation may minimize Ms. Meisenheimer's criticisms
12 about wireless competition for AT&T's 60-day competitive exchanges since a wireless
13 competitor is not needed to satisfy the required number of competitors offering service in any
14 exchange.

15 Q. Please explain Schedules 7 and 8.

16 A. Schedules 7 and 8 are simply a more detailed list of the specific CLECs used
17 to compile the information in all of the previously described schedules. These schedules list
18 each CLEC that was/is providing basic local telecommunications service on a full facility,
19 partial facility or other resale basis based on 2004 and 2005 Annual Reports. Each CLEC's
20 total number of lines within the exchange is shown based on data from the CLEC's 2004 and
21 2005 Annual Reports. These schedules footnote the access lines served by any CLEC who is
22 providing basic local telecommunications services on either a full facility or partial facility

1 basis. Schedule 7 relates to AT&T's residential 60-day exchanges while Schedule 8 relates
2 to AT&T's business 60-day exchanges.

3 Q. Are any CLECs providing service on a full facility or partial facility basis
4 within AT&T's 60-day competitive exchanges?

5 A. Yes. Among AT&T's 60-day residential competitive exchanges, 15 out of the
6 51 exchanges¹ have a CLEC providing service on either a full or partial facility basis. In
7 regards to AT&T's 60-day business competitive exchanges, none of those exchanges appear
8 to have a CLEC providing service on either a full facility or partial facility basis.

9 Q. Is it possible additional CLECs could be providing service on either a full
10 facility or partial facility basis in any of AT&T's competitively classified exchanges?

11 A. Yes. Any CLEC who has initiated service to customers after December 31,
12 2005 would not show up in Staff's data as providing service in an exchange. Likewise a
13 CLEC providing service without a certificate or tariff will not show up in Staff's data. As an
14 example, Comcast IP Phone, LLC offers what Staff considers to be facility based basic local
15 telecommunications service in several exchanges but does not possess a certificate or tariff.
16 Consequently the company has not submitted an Annual Report to the Commission.²
17 Nevertheless, Staff is unaware that Comcast IP Phone, LLC or any non-certificated, facility-
18 based entity is providing basic local telecommunications service in any AT&T competitively
19 classified exchanges.

¹ The 15 exchanges are Ash Grove, Billings, Cape Girardeau, DeSoto, Dexter, Gray Summit, Hannibal, High Ridge, Imperial, Jackson, Joplin, Maxville, Richmond, Sikeston, and Walnut Grove.

² The issue of Comcast IP Phone, LLC's lack of a certification is being addressed in pending Case No. TC-2007-0111. An affiliated company, Comcast Phone of Missouri, LLC d/b/a Comcast Digital Phone does have a certificate of service authority to provide basic local telecommunications service and a tariff to provide switched access services. Comcast Phone of Missouri, LLC d/b/a Comcast Digital Phone has submitted a 2005 annual report to the Missouri Commission. Based on this information and discussions with company officials, Comcast IP Phone, LLC is the retail provider of basic local telecommunications service to customers.

Rebuttal Testimony of
John Van Eschen

1 Q. If the remaining exchanges as listed above do not have a CLEC providing
2 service on a full facility or partial facility basis, can the exchange still qualify for competitive
3 classification?

4 A. Yes. In Case No. TO-2006-0102, AT&T's 60-day proceeding, the
5 Commission determined an exchange can qualify for competitive classification based on the
6 presence of a competitor providing service by leasing facilities from the underlying carrier
7 through an interconnection agreement or a commercial agreement. As previously discussed, I
8 refer to such arrangements in Staff's Report and this testimony as an "other resale"
9 arrangement.

10 Q. Do you have any response to Ms. Meisenheimer's statements concerning
11 AT&T's rate changes?

12 A. Yes. I am providing additional information regarding AT&T's rate
13 adjustments for basic local telecommunications service. Specifically I want to identify the
14 rate levels and how these rates have changed over time in order to place some perspective on
15 AT&T's rate adjustments during the past year. Schedules 9 and 10 identify the respective
16 residential and business rate levels for AT&T's basic local telecommunications service at the
17 time of competitive classification and subsequent rate adjustments. Schedules 11 and 12
18 identify the respective residential and business basic local telecommunications service rates
19 since 1985 for residential rates and 1986 for business rates.

20 Q. What points do you wish to make regarding these schedules?

21 A. Some rates have decreased since competitive classification was granted. A
22 second point is that AT&T's current rates for basic local telecommunications service are
23 similar to the rates applied by AT&T over 20 years ago.

Rebuttal Testimony of
John Van Eschen

1 AT&T has been granted competitive status for 21 exchanges³ in Rate Group A for residential
2 services and 19 exchanges⁴ in Rate Group A for business services. AT&T applies the same
3 rates to all Rate Group A exchanges regardless of whether an exchange has competitive
4 classification. Schedules 9 and 10 show flat rate, one-party residential and business basic
5 local telecommunications service rates for Rate Group A exchanges have decreased since
6 AT&T was granted competitive status. For example, the monthly rate for Rate Group A
7 residential flat rate one-party service was \$7.29 prior to competitive classification and is
8 currently is \$7.15. The corresponding monthly rate for business flat rate one-party basic local
9 telecommunications service in Rate Group A exchanges was \$16.25 prior to competitive
10 classification and is currently \$15.93. In this respect, this information may conflict with Ms.
11 Meisenheimer's statement on page 9, lines 18-21, where she was unable to identify any basic
12 local services in any competitive exchanges where AT&T lowered the price after it was
13 granted competitive status in either the 30-day or 60-day petitions.

14 A second point is that Schedules 7 and 8 indicate flat rate, single party rates in effect for
15 AT&T's four rate groups during the past 20 years have remained relatively stable. For
16 example simply comparing the rates of over 20 years ago with today's rates, the overall rate
17 changes range from -.65 to +\$.95 for residential rates and from -\$1.17 to +\$4.20 for
18 business rates. This information is illustrated in the following table:

³ Among these 21 Rate Group A exchanges, 15 exchanges were granted competitive status for residential services in the 60-day proceeding (Antonia, Archie, Ash Grove, Billings, Clever, Farley, Grain Valley, Gray Summit, Herculaneum-Pevely, Hillsboro, Marionville, Portage Des Sioux, San Antonio, Walnut Grove, and Ware) and 6 exchanges were granted competitive status for residential services in the 30-day proceeding (Advance, Bell City, Delta, Pocahontas-New Wells, Smithville, and Wyatt).

⁴ Among these 19 Rate Group A exchanges, 12 exchanges were granted competitive status for business services in the 60-day proceeding (Archie, Ash Grove, Billings, Chaffee, Farley, Gray Summit, Hillsboro, Linn, Marionville, Montgomery City, Portage Des Sioux, and Ware) and 7 exchanges were granted competitive status for business services in the 30-day proceeding (Antonia, Clever, Grain Valley, Herculaneum-Pevely, Marble Hill, Scott City, and Smithville).

Rebuttal Testimony of
John Van Eschen

Rate Group ⁵	Residential		Business	
	1985	Current	1986	Current
A	\$7.80	\$7.15	\$17.10	\$15.93
B	\$9.35	\$10.00	\$23.75	\$24.30
C	\$10.05	\$11.00	\$25.55	\$26.81
D	\$11.60	\$12.00	\$34.20	\$38.50

1
2 Q. Do you have any comments about Ms. Meisenheimer's criticisms concerning
3 the lack of wireless provider information for this review?

4 A. As noted in Staff's Report, Staff limited its review to CLEC activity. Staff is
5 unaware of any conditions changing the presence of a qualifying wireless carrier in any
6 AT&T competitive exchange. Staff is unaware of any wireless provider withdrawing service
7 from any exchange. In addition Staff is unaware of any changed conditions that would make
8 it a toll call to reach a wireless subscriber residing in the same exchange. Moreover, no
9 specific evidence has been presented suggesting any wireless carrier's service has changed to
10 no longer allow an AT&T competitively classified exchange to qualify for competitive status.
11 Staff has made a very limited independent analysis of whether wireless providers have been
12 directly assigned telephone numbers within the local calling area of each competitive 60-day
13 exchange. Based on information released by NeuStar, the administrator for telephone
14 numbers within North America, twelve exchanges⁶ fail to show nonaffiliated wireless
15 providers with directly assigned telephone numbers in the exchange's local calling area.
16 Nevertheless a wireless provider may indirectly be assigned telephone numbers in these
17 exchanges through Type 1 connections. Type 1 connections allow a wireless provider to
18 indirectly receive telephone numbers through the incumbent local telephone company. In

⁵ All of AT&T's exchanges in Rate Groups B, C, and D have competitive status for both residential and business services while some of the exchanges in Rate Group A have been granted competitive status for either residential and/or business services.

⁶ The twelve exchanges are: Ash Grove, Billings, Clever, Farley, Grain Valley, Greenwood, Linn, Marionville, Montgomery City, Richmond, St. Clair, and Walnut Grove.

Rebuttal Testimony of
John Van Eschen

1 such situations, NeuStar's information identifies the incumbent local telephone company
2 rather than the wireless carrier as the entity assigned the telephone numbers. At this time
3 Staff has been unable to verify if AT&T has Type 1 connections with any nonaffiliated
4 wireless carrier in the local calling scopes of these twelve exchanges.

5 Despite this lack of verification that a nonaffiliated wireless provider is providing service in
6 60-day competitive exchanges such verification is unnecessary. As previously discussed, for
7 all of AT&T's exchanges granted competitive status under the 60-day track, at least 3 or
8 more qualifying CLECs are providing service in each 60-day competitive exchange. Such
9 evidence would allow a 60-day competitive exchange to qualify for competitive status
10 regardless of whether wireless providers are providing service in the exchange.

11 Q. Do you have any additional comments?

12 A. Yes. Schedule 13 attempts to provide a brief description of the CLECs
13 providing service in AT&T's competitively classified exchanges. This schedule provides
14 basic information on how the CLEC provides service, when the CLEC was authorized to
15 offer service in Missouri, the case number for granting the CLEC a certificate of service
16 authority, and any other noteworthy facts regarding the CLEC's operations.

17 Q. What is your recommendation for the Commission in this proceeding?

18 A. I recommend the Commission retain competitive classification for all AT&T
19 exchanges with competitive classification.

20 Q. Does this conclude your testimony?

21 A. Yes, it does.

¹ CLEC information combines CLEC lines served on a full-facility basis (lines where the CLEC or its affiliate owns the switch and the lines), partial-facility basis (lines where the CLEC or its affiliate owns either the switch or the lines), and other-resale basis (lines where the CLEC leases facilities from the ILEC at a negotiated or arbitrated rate or an arrangement purchased via a commercial agreement). CLECs solely providing prepaid service or lines served through a pure resale arrangement are not included in this table.
