

**William L. Voight**

## **Summary of Work Experience**

**1974-1985**     **United Telephone Company.** I began my telephone career on February 4, 1974 as a central office equipment installer with the North Electric Company of Gallion, Ohio. At that time, North Electric was the manufacturing company of the United Telephone System. My duties primarily included installation of all forms of central office equipment including power systems, trunking facilities, operator consoles, billing systems, Automatic Number Identification systems, various switching apparatuses such as line groups and group selectors, and stored program computer processors.

In 1976 I transferred from United's manufacturing company to one of United's local telephone company operations – the United Telephone Company of Indiana, Inc. I continued my career with United of Indiana until 1979, when I transferred to another United Telephone local operations company – the United Telephone Company of Missouri. From the period of 1976 until 1985, I was a central office technician with United and my primary duties included maintenance and repair of all forms of digital and electronic central office equipment, and programming of stored program computer processors. United Telephone Company is today known as Sprint Communications Corporation.

**1985-1988**     In 1985 I began employment with **Tel-Central Communications, Inc.**, which at that time was a Missouri-based interexchange telecommunications carrier with principal offices in Jefferson City, Missouri. As Tel-Central's Technical Services Supervisor, my primary duties included overall responsibility of network operations, service quality, and supervision of a technical staff. Tel-Central was eventually merged with and into what is today Worldcom.

In conjunction with Tel-Central, I co-founded **Capital City Telecom**, a small business, "non-regulated" interconnection company located in Jefferson City. As a partner and co-founder of Capital City Telecom, I planned and directed its early start-up operations, and was responsible for obtaining financing, product development, marketing, and service quality. Although Capital City Telecom continues in operations, I have since divested my interests in the company.

**1988-1994** In 1988 I began employment with **Octel Communications Corporation**, a Silicon Valley-based manufacturer of Voice Information Processing Systems. My primary responsibilities included hardware and software systems integration with a large variety of Private Branch eXchange (PBX), and central office switching systems. Clients included a large variety of national and international Local Telephone Companies, Cellular Companies and Fortune 500 Companies. Octel Communications Corporation is today owned by Lucent Technologies.

**1994-Present Missouri Public Service Commission**
