Service Commission

SUBJECT ; A Plea to Reject Application for Certification
Of Big Island Water and Sewer Company

Reference: Case No. WC-2006-0480

Attention: Honorable Colleen Dale
Secretary Chief Regulatory Law Judge

As an intervener in the referenced case , I am submitting a plea to reject the Application for certification of the Big Island Water and Sewer company to Construct,install,own,operate,control,manage and maintain a water and sewer System in an unincorporated area on BigIsland in Camden County,Missouri.

My plea is supported by many violations of Folsom Ridge who is the Developer on Big Island. Namely, improper installation of both water and Sewer lines, unauthorized operation of a utility system and changes in Agreements with home owners. As a home owner I don't know what I can Believe as so many changes of agreements have taken place. My request that my plea for rejection be granted and that an independent would provide the operation of sewer and water system and would be under the guidelines of the public service commission.

Respectfully Submitted,

Joseph Geary Mahr
Homeowner, Big Island
