

Earn a **cash rebate** for your new, high efficiency air conditioner. **Increase your comfort and reduce your energy bills.**

SERVICES YOU COUNT ON

- Does your central air conditioning or heat pump system need replacing?
- Do you want to upgrade to a more efficient system?
- Are you building a new home and wanting the most energy efficient equipment available?

The Empire District Electric Company can help you afford a high efficiency central air conditioning or heat pump system through its High Efficiency Residential Central Air Conditioning Rebate Program. Not only will you receive a rebate, you will also enjoy the benefit of higher efficiency equipment which could mean reduced electricity consumption and lower cost.

Install a new system and rebates will cover a portion of the incremental cost of the higher efficiency equipment:

Equipment Rating*	Rebate Amount
SEER of 15 to 15.9	\$400
SEER of 16 to 16.9	\$450
SEER of 17 or higher	\$500

*SEER (seasonal energy efficiency ratio) measures how efficiently a residential central cooling system (air conditioner or heat pump) will operate over an entire cooling season. A higher SEER reflects a more efficient cooling system.

For more information regarding specific requirements and the rebate documentation, visit the Empire website at www.empiredistrict.com and select Smart Energy Solutions, High Efficiency AC Rebate Program. You may also contact Kelly Chenoweth at 417-625-5100 or 800-639-0077.

Rebates are available on a "first-come, first-served" basis, as long as funds last, to Missouri residential customers of The Empire District Electric Company, to owners of residential rental property, and to builders of homes in Empire's Missouri service territory.
