Elyza Hanna Pagulayan
Verizon Business Services
Manila, PHL

Elyza,

Nestle USA in St. Louis, MO continues to expand its technology footprint. We are embarking on a strategic plan that will centralize more of our facsimile services. This effort will eliminate the need for thousands of individual analog phone lines across the country. To successfully implement this project, we will require a 7xxx or 8xxx contiguous range of DID numbers for NPA 314 or 636. The physical address for these numbers will be 801 Chouteau, St. Louis MO 63102.

To accomplish this project, Nestle USA has placed an order with Verizon Business for local telecommunications services for 7xxx or 8xxx contiguous numbers to be put in service by May 1, 2019. If Verizon is not able to acquire these 7xxx or 8xxx contiguous numbers for Nestle USA, it will impact our ability to implement our desired dial plan and adversely affect our ability to upgrade facsimile technology for our users.

The addition of 7xxx or 8xxx contiguous DID numbers will contribute to the simplicity of administrative support, ease of use for our users and cost savings to the corporation.

The point of contact for this request is:

Aaron Durkee
