Mr. Morris L. Woodruff, Secretary and Chief Regulatory Law Judge
Missouri Public Service Commission
200 Madison St.
Jefferson City, MO 65102

*Re: MCImetro Access Transmission Services Corp.'s
Numbering Request for Nestle USA*

Dear Judge Woodruff:

Accompanying this letter is MCImetro Access Transmission Services Corp. d/b/a Verizon Access Transmission Services' ("Verizon Access") application and motion for expedited treatment of its request for Missouri Public Service Commission ("Commission") review and reversal of the North American Number Plan Thousands-Block Pooling Administrator's ("PA") denial of Verizon Access' request for numbering resources to serve Nestle USA in St. Louis, MO.

Pursuant to Commission Rule 4 CSR 240-2.135(2)(B), Verizon Access has designated and filed Exhibits C and D to its Application as "Confidential" because both contain highly competitively sensitive and trade secret information that Verizon Access does not make available to the public in any format. These exhibits – Verizon Access' "Months-to-Exhaust" worksheet and its FCC Form U1 of Form 502 for the St. Louis rate center, respectively – show the number of Verizon Access retail residential and business access lines by NPA-NXX within the rate center.

This sort of disaggregated access line information reveals the number of access lines Verizon Access serves on a very granular and localized geographic and market segment basis. It is costly to develop, and is competitively useful information, which is why all carriers (not just Verizon Access) guard against its public release.

If the information reflected in Confidential Exhibits C and D to Verizon Access' application were to become public, Verizon Access' customers could use it to steer their marketing and pricing strategy in an attempt to gain a competitive advantage over Verizon Access in the marketplace. This is why Verizon Access restricts internal access to this information to a limited subset of employees and does not make it available to the public in any format. It is therefore appropriately treated as "Confidential" under Rule 4 CSR 240-2.135(2)(A)(3)'s protection for "marketing analysis or other market-specific information relating to services offered in competition with others."

Please feel free to contact me with any questions or if the Commission needs any additional information to rule on Verizon Access' Application.

Very truly yours,

POLSINELLI PC

/s/ Anne E. Callenbach

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

In the Matter of the Application of MCImetro Access)	
Transmission Services Corp. d/b/a Verizon Access)	
Transmission Services for Review and Reversal of North)	Case No. _____
American Number Plan Thousands-Block Pooling)	
Administrator's Decision to Withhold Numbering)	
Resources)	

**MCIMETRO ACCESS TRANSMISSION SERVICES CORP.
D/B/A VERIZON ACCESS TRANSMISSION SERVICES'
APPLICATION AND MOTION FOR EXPEDITED TREATMENT**

MCImetro Access Transmission Services Corp. d/b/a Verizon Access Transmission Services (a/k/a OCN 7432 "MCI WORLDCOM COMMUNICATIONS, INC – MO"; hereinafter referred to as "Verizon Access") files this application pursuant to 4 CSR 240-2.060, 4 CSR 240-2.080, 4 CSR 240-28.016, and 47 C.F.R. § 52.15(g)(3)(iv), and respectfully requests that the Missouri Public Service Commission ("Commission") issue an order, on an expedited basis, that reviews and reverses the recent decision of the North American Numbering Plan Thousands-Block Pooling Administrator ("PA") to withhold certain numbering resources from Verizon Access.

The requested numbering resources are necessary to meet the telecommunications needs of Verizon Access' customer, Nestle USA, at its St. Louis location. Nestle USA is embarking on a strategic plan that will centralize its facsimile services and eliminate the need for thousands of individual analog phone lines across the country. Nestle USA requires a specific range of contiguous numbers (specifically, a 7xxx or 8xxx contiguous range of DID numbers for NPA 314 or 636) in order to implement its strategic plan, but the PA rejected Verizon Access' request

for the necessary numbering resources. Verizon Access requests that if the specific resources are not available when the Commission issues its order, that it direct the PA to provide such resources as are available to meet Nestle USA's numbering needs.

In support of its Application, Verizon Access states as follows:

1. Verizon Access is a Delaware corporation with its principal office at One Verizon Way, Basking Ridge, NJ 07920. It may be contacted via its attorney of record reflected in Paragraph 3 below.

2. Verizon Access is duly authorized to conduct business in Missouri,¹ with its fictitious name duly registered with the Missouri Secretary of State.² Verizon Access is a "local exchange telecommunications company," "alternative local exchange telecommunications company" and "public utility" certificated by this Commission³ and duly authorized to provide "telecommunications service" within the state of Missouri, as each of these terms is defined in Section 386.020, RSMo.

3. In addition to the undersigned, all correspondence, pleadings, orders, decisions, and communications regarding this proceeding should be sent to:

Deborah Kuhn
Associate General Counsel
Verizon
205 N. Michigan Ave., 7th Floor
Chicago, IL 60601
312-894-2354
Deborah.kuhn@verizon.com

¹ A certified copy of Verizon Access' Certificate of Good Standing from the Missouri Secretary of State was filed with the Commission on October 21, 2013 in Case No. LO-2014-0102. Verizon Access has since converted from an LLC into a corporation. See MCImetro Access Transmission Services Corp.'s Certificate of Authority from the Missouri Secretary of State, filed with the Commission on November 14, 2016 in File No. LN-2017-0142.

² A copy of the registration of the fictitious name Verizon Access Transmission Services was filed with the Commission on December 23, 2005 in Case No. LN-06-276.

³ The Commission most recently expanded Verizon Access' certificate of service authority in its September 25, 2008 order in Case No. TA-2009-0083.

4. As mentioned above, this Application is prompted by Nestle USA's strategic plan for centralizing its facsimile services and eliminating the need for thousands of individual analog phone lines across the country. This plan requires a 7xxx or 8xxx contiguous range of DID numbers for NPA 314 or 636. Nestle USA placed an order with Verizon Access for the 1,000 contiguous DID numbers with a planned in-service date of May 1, 2019. See **Exhibit A** hereto, which is a true and correct copy of Nestle USA's March 13, 2019 letter to Verizon Access, explaining Nestle USA's business needs.

5. If Nestle USA cannot obtain the requested 1,000 contiguous DID numbers, it will impact its ability to implement its desired dial plan and adversely affect its ability to upgrade its facsimile technology. See Exhibit A.

6. Because Verizon Access lacked a 1,000 block of contiguous DID numbers with which to meet Nestle USA's needs, on March 13, 2019, it submitted a request to the PA for a contiguous 7xxx block in the St. Louis, Missouri rate center, along with the necessary Months to Exhaust and Utilization Certification Work Sheet. A true and correct copy of Verizon Access' request is attached hereto as **Exhibit B**. The accompanying months-to-exhaust worksheet, which is trade secret and confidential, is attached hereto as **Confidential Exhibit C**. As required by 4 CSR 240-28.016, Verizon Access' FCC Form U1 of Form 502, which is also trade secret and confidential, is attached as **Confidential Exhibit D**.

7. On March 13, 2019, the PA denied the request on the grounds that Verizon Access had not met the utilization and/or months-to-exhaust criteria established by the Federal

Communications Commission (“FCC”). A true and correct copy of the PA’s decision is attached hereto as **Exhibit E**.

8. Verizon Access seeks the Commission’s direction to overturn the PA’s decision to withhold numbering resources, as Verizon Access has now exhausted all other available remedies designed to conserve numbering resources. The Commission has previously overturned decisions of the PA upon facts similar to those in this Application.

9. A state commission may overturn the PA’s decision based on the commission’s determination that the carrier has demonstrated a verifiable need for the requested numbering resources and has exhausted all other available remedies. *See* 47 C.F.R. § 52.15(g)(4). Similarly, the FCC has held that “a carrier should be able to get additional numbering resources when there is a verifiable need due to the carrier's inability to satisfy a specific customer request.” *See* Third Report and Order and Second Order on Reconsideration, *In the Matter of Numbering Resource Optimization; Implementation of the Local Competition Provisions of the Telecommunications Act of 1996; Telephone Number Portability*, 17 FCC Rcd 252 (rel. Dec. 28, 2001) at ¶ 64 (“12/28/01 Order”). State commissions are permitted to grant such requests provided they are for customers seeking contiguous blocks of numbers, rather than “vanity numbers.” *Id.*

10. In this case, Nestle USA requires a 7xxx or 8xxx contiguous range of DID numbers for NPA 314 or 636. Granting this application will benefit the public interest because it will ensure the availability of adequate numbering resources for Nestle USA to implement the strategic centralization of its facsimile services and better enable it to serve its customers.

11. Verizon Access respectfully requests that the Commission act upon this Application within ten (10) business days. Verizon Access has acted expeditiously to engage

counsel and file for the requested relief, and the FCC has recognized the importance of timely state commission action:

[W]e recognize that in many instances, the failure to address a request for additional numbering resources can impair a carriers' ability to stay in or expand business. We therefore direct states to act on carrier requests for a safety valve as expeditiously as possible. Although we do not establish a specific time limit for states to act on these requests, we believe that, in most instances 10 business days from receipt of a request that the state determines to be sufficiently detailed and complete will be sufficient time to review and act upon safety valve requests.⁴

12. This Application satisfies the requirements of 4 CSR 240-28.016 by providing all required documentation outlined therein.

13. Verizon Access does not have any pending or final unsatisfied judgments or decisions against it from any state or federal agency, which involves customer service or rates, which action, judgment or decision has occurred within three (3) years of the date of this Application.

14. Verizon Access does not have any annual report or assessment fees that are overdue in Missouri.

15. Verizon Access seeks expedited treatment and requests that the Commission act on this request within ten (10) business days, so that Verizon Access will have enough time to file a new request with the PA for the release of the numbering resources described herein.

WHEREFORE, Verizon Access respectfully requests that the Commission overturn the PA's previous determination in this matter within ten (10) business days, and instruct the PA to release the numbering resources necessary to meet the needs of strategic plan that will centralize Nestle USA's facsimile services and eliminate the need for thousands of individual analog phone lines across the country. Verizon Access further requests that if the specific resources are not

⁴ See 12/28/01 Order at ¶ 66.

available when the Commission issues its order, that it direct the PA to provide such resources as are available to meet Nestle USA's numbering needs.

Respectfully submitted,

POLSINELLI PC
