**Application To Intervene In Case No. WA-2006-0480, et al.**

In The Matter of the Application of Big Island Water & Sewer Service Commission  
Company for a Certificate of Convenience and Necessity Authorizing  
it to Construct, Install, Own, Operate, Control, Manage and Maintain  
a Water and Sewer System for the Public Located in an  
Unincorporated Area in Camden County, Missouri.

The undersigned, being property owners and residents of Big Island, have a vested interest in this application of Big Island Water & Sewer Company (BIWS) as it concerns not only how it could adversely affect our individual property values but also the safety of our private as well as public drinking water supply for our neighbors.

Furthermore, due to many unclear, misleading and unanswered questions, we are unsure of the position we should take as to whether to support or oppose this application. For example, we have yet to see a copy of the asset transfer agreement and how that was conducted.

We feel the best interests of all residents of Big Island as well as the general public is best served by a knowledgeable, enlightened and participatory citizenry that has full access to ALL the information before it makes a responsible decision that affects the interests of others. At the present time, we do not have a complete understanding of all the issues or future consequences if any, which might result if BIWS is indeed allowed this certification. There have been many violations committed in the past, and we do not want to worry about those kind of problems in the future.

Therefore, as directed and allowed by 4 CSR 240-2.075 Intervention, we the undersigned property owners and residents of Big Island wish to intervene since (1) we have a vested interest to protect our individual property values and private and public drinking water supply; (2) we are unsure of the future responsibilities and or liabilities we might incur under this certification (asset transfer agreement is one) and (3) we believe it best serves the public interest to have all of our concerns and questions answered fully, fairly and truthfully beyond any reasonable doubt before we can decide whether to oppose or support this Application for a Certificate of Convenience and Necessity for BIWS Company.
