Re: WA-2006-0484  
WA-2006-0480

JUL 10 2006

July 03, 2006

Missouri Public  
Service Commission

As one of the (9) original complainants in case # WA-2006-0082 against Folsom Ridge LLC, and since it is my intention to do everything within my means to insure that the residents on Big Island, Roach Mo., have available a safe, healthy, reliable and realistically priced water and sewer system which is properly operated maintained and administered, I hereby wish to apply for intervener status in case #WA-2006-0480, Big Island Water and Sewer Company's request for certification by the Missouri Public Service Commission.

Further, I wish to state that I am vehemently opposed to the certification of this applicant, in that the ownership and principles of this new entity are for all practical purposes the same as the owners and principles of Folsom Ridge LLC, against whom the original 9 complaints were filed.

While I believe that the certification and regulation of an entity to operate the water and sewer system on Big Island is a likely solution to the many years of problems and concerns beginning when Folsom Ridge LLC purchased the island property and began construction, I feel very strongly that the entity must be technically qualified, experienced in such matters and have an impeccable and proven track record. I don't feel that Big Island Water and Sewer Company meet any of these criteria.

Finally, I certainly feel that proper procedures are necessary in matters of this nature. Now however, since the first documented complaints were filed in this case, approximately (11) months have passed, I have accumulated a 4" stack of papers and correspondence (hopefully all proper and legal) but not one statement or even one word has had anything to do with the issues raised by the complainants. It seems to me that the procedural activities border on procrastination and could even be considered delay tactics. I trust that the real issues in this matter will be addressed in the immediate future.

Sincerely,

  
Joseph J. Schrader
