RE: Replacement Page to Proposed Tariff of Arrival Communications, Inc.
Docket No. ~~TO~~2000505, File #200000748
TA-2000-505

Dear Mr. Roberts:

Enclosed for filing please find an original and three (3) copies of a replacement Original Page 34 for the proposed tariff of Arrival Communications, Inc. pending in the above referenced docket. With this replacement page, Arrival revises the description of its DSL service to include text changes recommended by Mr. Phil Garcia and Mr. Bill Voight of the Commission's Staff.

Please acknowledge receipt of this filing by date-stamping the extra copy of this cover letter and returning it to me in the self-addressed, stamped envelope provided for that purpose.

Any questions regarding this filing may be directed to my attention at (407) 740-8575.

Sincerely,

Hal Stringer
Consultant to
Arrival Communications, Inc.

SECTION 3 - DESCRIPTION OF SERVICES, (CONT'D)**3.11 Digital Subscriber Line Service**

The Company provides Digital Subscriber Line (DSL) services for data transport at various transmission speeds. Customer's may utilize the Company's DSL service for interconnecting one or more premises or for accessing value-added services including the internet or other online service applications. Service is subject to the availability of facilities and equipment serving the Customer's location(s).

Customers must obtain a DSL Channel for each connection required. DSL Channels connect the Customer's location with a Company's data switching equipment. At the Customer's option and where facilities permit, DSL Channels may be provided as 1) data-only facilities or 2) over the same local exchange facility used by the Customer for LEC-provided voice services

Where connection is made to value-added services including the internet or other online service through the Company's services, the Customer will be responsible for usage or other charges assessed by the internet or online service provider.

Utilization of the Company's DSL Service requires specialized customer premises equipment ("CPE"). Such CPE may be obtained from the Company on a non-regulated basis or from a third party. It is the responsibility of the Customer to obtain the necessary CPE prior to use of service.

Arrival Communications' DSL services are non-switched, local exchange technologies that allow multiple forms of data and video to be carried over standard twisted pair copper wires, or Unbundled Network Elements ("UNEs"), on the local loop between the central office and the end user site. The Company's DSL services do not include access to/from the Public Switched Network ("PSN"). The Company's DSL services provide data connections only and do not assign or otherwise route traffic by use of telephone numbers (e.g., NPA-NXX-XXXX). In the event that Arrival Communications begins to provide service to/from the PSN, Arrival Communications will file tariffs reflecting the rates terms and conditions for such services.
