## An ounce of prevention...

**A list of simple maintenance tips to help you avoid costly plumbing repairs.**

- Fix leaky faucets promptly. In addition to wasting about 20 gallons of water daily, a leak could ruin your faucet set.
- Do not rinse fats or cooking oils down the drain. Liquid fats solidify in the cold drain pipes and create clogs.
- Do not use caustic liquid drain openers on a drain that is completely clogged. It can severely damage your pipes.
- Periodically drain several gallons of water from your water heater. This removes sediment from the bottom of the tank to increase heating efficiency and prolong tank life.
