**Subject:** Rate Relief to preserve jobs at the New Madrid Smelter

Dear Missouri Public Swervice Commission:

I am a spouse of a Noranda employee that works at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate compliant. Their jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save their jobs.

Sincerely,

Phil Gerding, Sikeston MO

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

Dear Commissioners,

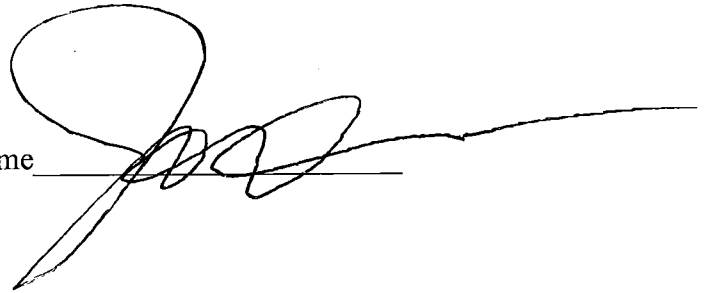

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

*Richard Bidwell*

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

Danny Biggs

Dear Missouri Public Service Commission:

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economic engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs.

Please approve the OPC's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Dear Missouri Public Service Commission:

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OCP) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs .

Please approve the OCP's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs.

Please approve the OPC's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Subj: Electric Rate Relief for Noranda New Madrid Smelter

Dear Missouri Public Service Commission:

I am a resident of Jackson, Missouri, and also have friends who work at the Noranda smelter in New Madrid, Missouri.

I would like for you to know that I support the rehearing and stipulation filed by the Office of Public Counsel (OC) in this case. The jobs of the 900+ employees at the New Madrid smelter support not only the employees and their families, but they also support the local communities and local businesses. The business in which I work would be affected by your decision with regard to this smelter if a rate relief is not granted.

Thank you for your favorable consideration of my request.

Sincerely

Helga Holterman

Dear Missouri Public Service Commission:

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs .

Please approve the OPC's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OCP) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs

Please approve the OCP's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Dear Missouri Public Service Commission:

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OCP) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs

The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OCP) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs

Please approve the OCP's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Dear Missouri Public Service Commission:

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OCP) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs

Dear Missouri Public Service Commission:

I am the spouse of a New Madrid Smelter employee. As a family member of a Noranda employee I have watched closely the Noranda rate design case before the Public Service Commission (PSC). Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant.

The reality and threat of these job losses is extremely important to me because my family relies on the New Madrid smelter for their livelihood. The smelter is the economic engine for the Bootheel. Without the smelter, families and businesses in the region will suffer greatly.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Dear Missouri Public Service Commission:

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs .

\* Please approve the OPC's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

I am a resident of Missouri, and also have friends and/or family who work at the Noranda smelter in New Madrid, MO. I have followed the Noranda rate design case before the PSC. Real jobs are at stake and have already been lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses and prevent future layoffs, or even worse, the closure of the New Madrid smelter. The smelter is an economy engine for the Bootheel and without it families and businesses alike would suffer greatly in this region.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs .

Please approve the OPC's compromise that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,
