

Statement of Qualifications

David Moody

I currently hold the position of President, Summit Natural Gas of Missouri, Inc.

I began my natural gas career in March 1978, in an entry level position with Peoples' Natural Gas in Garden City, Kansas. My early experience was as a technician performing many customer service activities, including all sizes of residential, commercial and industrial services, and utility compliance activities. I quickly advanced in this career entering management in 1985. I continued my management career at Peoples until 1996 when I became a sales manager with Aquila Energy Marketing. In 1998, I was appointed Director of Operations for Peoples Natural Gas in Colorado.

In 2001, I joined Summit Utilities, Inc. in Colorado as a District Manager in the Northern District. At the time, Summit served 1,300 customers. And I helped it grow to over 20,000 customers including new properties in Missouri.

In 2005, I assumed duties as Vice President of Operations which included supervision of all the Customer Service and Field Operations personnel in Colorado and Missouri, setting safety principles, serving as a member of the gas purchasing committee, and serving as compliance and policy lead. I have helped create new O&M, safety, emergency, transmission/distribution integrity, public awareness, and Demand Side Management plans as well as recommending changes to applicable tariffs.
