#### **SECTION 6 - MISCELLANEOUS SERVICES**

#### 6.1 Presubscription

Presubscription is the process by which end user customers may select and designate to the Company an IXC to access, without an access code, for intrastate toll calls. This IXC is referred to as the end user's presubscribed long distance carrier.

End users may select one of the following options at no charge:

- Indicate a primary IXC for all of its lines,
- Indicate a different IXC for each of its lines.

Only one IXC may be selected for each line or lines terminating in the same hunt group.

End users may designate that they do not want to presubscribed to any IXC. The end user must arrange this designation by directly notifying the Company's business office. This choice will require the end user to dial an access code (101XXXX) for all interstate calls.

After the end user's initial selection of a predesignated IXC or the designation that they do not want to presubscribed to any IXC, for any change in selection after conversion to Equal Access in the serving end office, the following nonrecurring charge applies.

N	onrecurring Charge
	\$ 5.00

Per Telephone Exchange Service line or trunk

#### **Local Calling Areas**

Geographically-defined Local Calling Areas are associated with each Exchange Access Service. Company's local calling areas will mirror the exchanges of Southwestern Bell Telephone Company, CenturyTel, Spectra and Sprint Missouri as those exchanges are identified below or in the respective tariffs of those companies.
