Re: Bennington Subdivision Lot No. 5

Dear Mr. & Mrs. Hawkins:

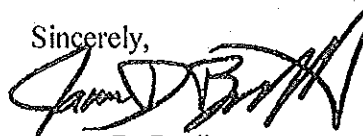

The operation of the water and sewer systems is being transferred to Lincoln County Sewer and Water, LLC. Lincoln County Sewer and Water, LLC currently has before the Missouri Public Service Commission an application to become a regulated utility provider.

To that end, it is necessary to bring the water system in the subdivision into compliance for a regulated water supply company. Beginning in August, 2011, water meters are going to be installed for all users in Bennington. While the application is pending approval by the Public Service Commission, there will be no change in the billing structure. At such time approval is obtained, amount of use will be the basis for monthly water and sewer charges.

Bennington Water, Inc. will be responsible for the installation of the meters and the restoration of the ground. There will be no cost associated with the installation of the meters to you as Bennington Water, Inc. will be responsible. The intention is for all meters to be installed by the end of August, weather permitting.

Thank you for your kind attention in this matter.

Sincerely,

James D. Burlison
