SECTION 6 - PRICE LIST –RATES FOR SERVICES PROVIDED TO FORMER TRINSIC CUSTOMERS

(S)

6.1 Network Exchange Bundled Service

6.1.1 General

Matrix offers basic local exchange service to former Trinsic Customers only as part of a bundle or package of telecommunications services. All packages include local service, long distance service (interstate and intrastate toll) and selected custom calling features. Voice Mail and Optional Internet access¹ may be available with some packages at an additional charge. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company. The Company provides Customers with the option of obtaining a Primary Line and Secondary Line per account:

A. Primary Line

The initial residential local exchange access line per account.

B. Secondary Line

The second or additional residential local exchange access line, billed to the same address as the Primary Line, the Secondary Line will share the monthly call allowance with the Primary Line. The Secondary Line does not automatically include or share any Custom Calling Features. Feature packages may be purchased separately.

Should a Customer with both lines opt to disconnect the Primary Line, the remaining Secondary Line will automatically convert to a Primary Line with all features and functionality of such, and at the Primary Line monthly recurring rate.

(S)

¹ Voice mail and Internet access are not regulated by the Commission.

**SECTION 6 - PRICE LIST –RATES FOR SERVICES PROVIDED TO FORMER
TRINSIC CUSTOMERS**

6.1 Network Exchange Bundled Service (Continued)

(S)

6.1.1 General (Continued)

Network Exchange Bundled Service may include the calling features listed below:

These features are offered subject to availability of suitable facilities. Certain features may not be available with all classes of services.

In the event Matrix adds custom calling features to its Network Exchange Bundled Services, such features will be available upon the tariff effective date (where technically feasible) to all new Customers. Existing Customers will be informed of the new features availability but must contact the Company to obtain the new features. Any Service Order Charges, which would normally apply, will be waived.

Call Forwarding - Fixed, Busy Line No Answer - This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding - Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding - Fixed, Busy Line No Answer is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Call Waiting with Caller ID with Name - Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen allowing a Customer to prioritize and or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the callers telephone number will be substituted.

SECTION 6 - PRICE LIST –RATES FOR SERVICES PROVIDED TO FORMER TRINSIC CUSTOMERS

6.1 Network Exchange Bundled Service (Continued)

(S)

6.1.1 General (Continued)

Network Exchange Bundled Service may include the calling features listed below, (Cont'd):

Call Forwarding - Variable - a Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Trace - Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company for action. The Customer originating the trace will not receive the traced telephone number. The results of the trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them.

Call Blocking- Call Blocking allows the Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion.

Distinctive Ring: Distinctive Ring is a feature that allows a Customer to have up to two separate phone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on an incoming call to allow for identification of the number being called. A distinctive call waiting tone is also provided for each telephone number, where facilities permit and Customers subscribe to Call Waiting. Distinctive Ring is offered subject to availability of suitable facilities.

VIP Alert - Allows a customer to program telephone numbers of selected callers, enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone.

**SECTION 6 - PRICE LIST -RATES FOR SERVICES PROVIDED TO FORMER
TRINISIC CUSTOMERS**

6.1 Network Exchange Bundled Service (Continued)

(S)

6.1.1 General (Continued)

Network Exchange Bundled Service may include the calling features listed below, (Cont'd):

Privacy Service- A feature which intercepts calls that are marked "private" and "out of area," or "unavailable" on Caller ID units. When unidentified callers dial the Subscriber's number, they will receive an announcement informing them that the party they are calling does not accept calls from unidentified callers. They will receive a prompt to identify their name or state their intention and the service will then attempt to connect the call. Only if the caller responds will the call be connected. The Subscriber's Caller ID will display the platform number and the name of the service. If the Subscriber chooses not to take the call the caller will hear a message which states the Subscriber is unavailable.

Privacy Service is offered subject to availability of suitable facilities. This service will be provisioned on a line-by-line basis and Customers with more than one line would need to have the service activated on each line if they want the ability to intercept unknown and blocked calls to each line.

Speed Calling - This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID with Name - allows a Customer to see a caller's name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call -including calls that aren't answered by the Customer. Caller ID with Name service requires the use of specialized CPE not provided by the Company. It is the responsibility of the Customer to provide the necessary CPE. In areas where Caller ID with Name is not available, Caller ID, which only displays the incoming telephone number, will be substituted.

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature maybe used on both outgoing and incoming.

SECTION 6 - PRICE LIST –RATES FOR SERVICES PROVIDED TO FORMER TRINSIC CUSTOMERS

6.1 Network Exchange Bundled Service (Continued)

6.1.2 Member to Member Home Edition Service Add -On

Member to Member Service is available to all Former Trinsic Customers of a Network Exchange Bundled Service. Member to Member allows Former Trinsic Customers to call other Former Trinsic Customers without incurring per call usage charges or depleting the bundled minutes call allowance. Calls under the Member to Member option must originate on and terminate to a telephone number presubscribed to a Matrix Network Exchange Bundled Service. Customers are not required to identify Customers in their calling circle. Such identification will be handled by the Company's network.

Member to Member calling between Former Trinsic Customers applies to both intrastate and interstate calling. There is no limit to the number of minutes included in Member to Member.

This service is available with other Matrix services where noted in the description of each service.
