TARIFF FORMAT

- A. Page Numbering** – Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new Pages are occasionally added to the tariff. When a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** – Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current Page version on file with the PSCM. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the PSCM follows in its tariff approval process, the most current Page number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:

2.
2.1
2.1.1
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a)
2.1.1.A.1.(a).I.
2.1.1.A.1.(a).I.(i).
2.1.1.A.1.(a).I.(i).(1).

EXPLANATION OF SYMBOLS

- M To indicate a move in the location of text.
- N To indicate new rate or regulation.
- R To indicate reduced rate.

3.2 Features

3.2.1. General

The following features will be available on all lines. Not all features are compatible with certain key sets and PBX systems.

Call Return

Allows a customer to automatically redial the telephone number of the last incoming call to that line, regardless of whether the call was answered, unanswered, or busy. After the recall is activated, and unless the number is blocked as described below, an announcement of the number is provided to the customer, who then has the choice of either continuing the recall by entering a code, or terminating the recall by hanging up. If the redialed number is busy, a distinctive ring alerts the customer when the number becomes available. If the telephone number of the last incoming call has been blocked through the use of a service such as Caller ID Blocking, the number cannot be redialed.

SECTION 3 – SERVICE DESCRIPTIONS AND RATES (CONT'D)

3.2 Features (cont'd)

3.2.1. General (cont'd)

Continuous Redial

Allows a customer to automatically redial the last telephone number dialed. If the called number is busy, the number is redialed for a limited period of time. A distinctive ring alerts the customer when the called number becomes available.

Caller ID

This feature enables the Customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls. When Caller ID is activated on a Customer's line, the CPN of incoming calls are displayed at the called CPE during the first, long silent interval of the ringing cycle.

Per line blocking for blocking of CPN will be available upon request, at no charge, **ONLY** to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to Applicant:

- a) Private, nonprofit, tax exempt, domestic violence intervention agencies,
- b) Federal, state, and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the Customer by dialing an access code immediately prior to placing a call. Line blocking Customer can unblock their CPN information on a per call basis, at no charge, by dialing an access code (*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

SECTION 3 – SERVICE DESCRIPTIONS AND RATES (CONT'D)

The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification Customer will receive an anonymous indicator. This anonymous indicator notifies the Caller ID Customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

Any Customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the Customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the Customer. Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities.
