Re: Application For Certificate Of Authority of Multiband, Inc.

To the Honorable Commissioners of the Missouri Public Service Commission:

We are in receipt of the Commission's Staff Recommendation dated April 6, 2006, and AT&T Missouri's comments dated April 21, 2006. Please be advised that Multiband has no objection to entering into a standard interconnection agreement with AT&T Missouri should Multiband require any use of AT&T's facilities on a going forward basis. However, Multiband does object to making its certificate conditional. Multiband is a small company and its management does not believe it is appropriate or serves the public interest if a large competitor such as AT&T Missouri is able to dictate the terms of Multiband's competitive offerings to consumers in the State of Missouri.

Thus, Multiband respectfully requests the Commission issue its order consistent with the staff recommendation, and that Multiband's certificate to provide shared tenant services be approved without conditions or restrictions.

Very truly yours,

R. Lynn Beckemeier MO Bar No. #23087
