1.6 Description of Switched Access (Cont'd)**1.6.3 Description of Feature Groups**

(N)

The Telephone Company will provide for Switched Access Feature Groups as follows:

Terminating FGB:

Feature Group B (FGB) is accommodated at the Telephone Company's end office switch to receive terminating traffic. FGB, when being received by Telephone Company from the Customer, may be used to access valid NXXs in the Telephone Company's Exchange Area. Since Telephone Company's End Office is equal access, all terminating FGB usage will be subject to equal access rates. A separate trunk group will be established for terminating FGB traffic.

Originating and Terminating FGD:

Feature Group D (FGD), which is available to all Customers, provides trunk-side access to Telephone Company's switch with an associated 101XXXX access code for providers of MTS/WATS and MTS/WATS-type services. Additionally, FGD is provided for originating and terminating communications for Customer provided intrastate communications capability or connections to an interexchange interstate service.

FGD is provided as trunk-side switching through the use of Telephone Company's switch trunk equipment. The switch trunk equipment is provided with answer and disconnect supervisory signaling and wink start pulsing signals except when SS7 Out of Band Signaling is specified.

1.6.4 Jurisdictional Determination

Where necessary to do so, for purposes of determining the jurisdiction of Switched Access traffic, Once the Switched Access service is activated, the following criteria will apply:

- (A) For originating FGD Switched Access services, where jurisdiction can be determined from the call detail, the Telephone Company will bill according to such jurisdiction. For originating FGD usage where the jurisdiction cannot be determined from the call detail, the Customer will provide an interstate percentage (PIU Factor) of originating FGD minutes, as outlined below in (F).
- (B) For terminating FGD Switched Access services, where jurisdiction can be determined from the call detail, the Telephone Company will bill according to such jurisdiction. For terminating FGD usage where the jurisdiction cannot be determined from the call detail, the Customer will provide an interstate percentage (PIU Factor) of terminating FGD minutes, as outlined below in (F).
- (C) For FGB Terminating Switched Access Service, the Customer will provide an interstate percentage (PIU Factor) of FGB terminating minutes. Pursuant to Federal Communications Commission Order FCC 85-115 (adopted April 16, 1985), when the Customer does not have sufficient data to determine jurisdiction, the percent interstate usage is to be developed as though every call that enters the Customer's network at a point within the same state as that in which the called station is situated (as designated by the called station number) is an intrastate communications. Every call for which the point of entry is in a state other than that where the called station is situated (as designated by the called station number) is an interstate communication.

1.7 Application of Charges, Payments and Credits

(N)

1.7.1. General

This Section sets forth regulations for deposits, advance payments, billing, disputes and special construction.

1.7.2. Deposits

The Telephone Company may, in order to safeguard its interests, require a Customer, which has a proven history of late payments to Telephone Company or does not have established credit, to make a deposit prior to or at any time after the provision of Service to the Customer to be held by the Telephone Company as a guarantee of the payment of rates and charges. No such deposit will be required of a Customer which is a successor of a company which has established credit and has not history of late payments to the Telephone Company.

A deposit may not exceed the actual or estimated rates and charges for the Service for a two month period. The fact that a deposit has been made in no way relieves the Customer from complying with the Telephone Company's regulations as to the prompt payment of bills.

After the Customer has established a one-year prompt payment record, such a deposit will be refunded or credited to the Customer account at any time prior to the termination of the provision of the Service to the Customer. If, prior to accumulation a one-year prompt payment record and the provision of Service to the Customer is terminated, the amount of the deposit will be credited to the Customer's account and any credit balance that may remain will be refunded.

1.7.3. Advance Payments

To safeguard its interests, th Telephone Company may also require a customer to make an Advance Payment before Services are provisioned to the Customer. The Advance Payment will not exceed an amount equal to the Non-Recurring Charge(s) and two months' charges for the Service to be provided. In addition, where Special Construction is involved, the Advance Payment may also include an amount equal to the estimated Non-Recurring Charge and/or Labor Charges for the Special Construction and any estimated Recurring Charges for a period to be set between the Telephone Company and the customer. Any Advance Payment will be credited to the Customer's first bill.

1.7 Application of Charges, Payments and Credits (Cont'd)

(N)

1.7.4. Payment of Charges

- (A) The Telephone Company shall bill for all charges incurred, applicable taxes, and credits due the Customer for Service. Access bills will conform to current industry guidelines as established by the Ordering and Billing Forum (OBF) in the CABS – BOS Output Specifications and will be updated in a timely manner as these guidelines change.
- (B) Customer will receive their bills in paper format unless otherwise specified. Additional charges apply for bills requested in non-paper format. Alternate bill media formats available are:
 - 1. Magnetic tape;
 - 2. FTP file; or
 - 3. Cartridge
- (C) Bills are due when rendered regardless of the media utilized.
- (D) All bills to the Customer are due (Payment Due Date) 30 days after the bill date or by the next bill date (i.e., same date in the following month as the bill date), whichever is the shortest interval. In the event the Customer does not remit payment in immediately available funds by the payment date, Service may be discontinued as specified in this Tariff.
- (E) If the entire amount billed is not received by the Telephone Company in immediately available funds by the Payment Due Date, an additional Late Payment Charge as described later in this Tariff may apply.
- (F) If such payment date would cause payment to be due on a Saturday, Sunday or Holiday (i.e., New Year's Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day, the second Tuesday in November and a day when Washington's Day, Memorial Day or Columbus Day is legally observed), payment for such bills will be due from the Customer as follows:
 - (a) If such payment date falls on a Saturday or on a Holiday that is observed on Tuesday, Wednesday, Thursday or Friday, the payment date shall be the last non-Holiday day preceding such Saturday or Holiday.
 - (b) If such payment date falls on a Sunday or on a Holiday that is observed on a Monday, the payment date shall be the first non-Holiday day following such Sunday or Holiday.
- (G) If the Telephone Company becomes concerned at any time about the ability of a Customer to pay its bills, the Telephone Company may require that the Customer pay its bills within a specified number of days less than 25 days after the date of the invoice and make such payments in cash or the equivalent of cash.
- (H) Adjustments for Service discontinued in any billing period beyond the minimum period will be prorated to the number of days based on a 30-day month. The Telephone Company will, upon request, and if available, furnish such detailed information as may reasonably be required for verification of any bill.

1.7 Application of Charges, Payments and Credits (Cont'd)**1.7.5. Minimum Period**

The minimum period Access Service is provided and charges are applicable is one month. For discontinuances of Service, all applicable charges for the one-month period will apply. All applicable Non-Recurring Charges for the Service will be billed in addition to the Minimum Period Charge.

1.7.6 Disputes

If a customer disputes any portion of the charges and withholds payment of such disputed amounts, the customer must notify the Company in writing by the due date of the disputed bill, identifying the amount, reason and rationale of such dispute. At a minimum, the customer must pay all undisputed amounts due by the due date. The failure to submit a written dispute by the due date will not preclude the customer from thereafter submitting a dispute or seeking a billing adjustment for any charges which have been paid.

The Telephone Company will assess or credit late payment charges on disputed amounts to the Customer as follows:

1. If resolved in favor of the Telephone Company and the Customer has paid the disputed amount on or before the payment due date, no late payment charges will apply.
2. If resolved in favor of the Telephone Company and the Customer has withheld the disputed amount, any payments withheld pending settlement of the dispute shall be subject to the late payment charge as specified in this Tariff.
3. If resolved in favor of the Customer and the Customer has withheld the disputed amount, the Customer shall be credited for each month or portion thereof that the late payment charge may have been applied. In the event the Customer has paid the late payment charge, a credit will be granted to the Customer for the late payment charge paid on disputed amount.

(N)

1.7.5. Minimum Period

The minimum period Access Service is provided and charges are applicable is one month. For discontinuances of Service, all applicable charges for the one-month period will apply. All applicable Non-Recurring Charges for the Service will be billed in addition to the Minimum Period Charge.

1.7.6 Disputes

If a Customer does not give the Telephone Company written notice of a dispute with respect to the Telephone Company's charges within 60 days of the payment due date, such invoice shall be deemed to be correct and binding on the Customer.

If a Customer provides Telephone Company with a written notice of a dispute within 60 days of the payment due date, Customer must also provide sufficient documentation to support the claim within 10-working days from the Telephone Company is notified of the dispute.

This documentation must include:

1. A clear and full explanation of the basis of the dispute,
2. The account number under which the bill has been rendered,
3. The date of the bill, and details sufficient to identify the specific amounts and items in dispute.

The Telephone Company will assess or credit late payment charges on disputed amounts to the Customer as follows:

1. If resolved in favor of the Telephone Company and the Customer has paid the disputed amount on or before the payment due date, no late payment charges will apply.
2. If resolved in favor of the Telephone Company and the Customer has withheld the disputed amount, any payments withheld pending settlement of the dispute shall be subject to the late payment charge as specified in this Tariff.
3. If resolved in favor of the Customer and the Customer has withheld the disputed amount, the Customer shall be credited for each month or portion thereof that the late payment charge may have been applied. In the event the Customer has paid the late payment charge, a credit will be granted to the Customer for the late payment charge paid on disputed amount.

(N)

1.7 Application of Charges, Payments and Credits (Cont'd)

(N)

1.7.7 Late Payment Charges

Bills are considered past due 30 days after the bill date or by the next bill date (i.e., same date as the bill date in the following month), whichever occurs first, and are payable in immediately available funds. If the Telephone Company does not receive the entire amount billed, exclusive of any amount disputed by the Customer, within 30 days after the bill date in funds that are immediately available to the Telephone Company, then a late payment charge will apply to the unpaid balance. The late payment charge will be:

1 and ½% (.015) per month and applied for each month of portion thereof that an outstanding balance remains.

If the undisputed amount of an invoice should remain unpaid more than 30 days past its payment due date, i.e., 60 days past the payment due date, the Telephone Company shall have the right, in its sole discretion, to take any or all of the actions set forth in this Tariff with regard to refusal and discontinuance of service and collections pursuant of charges outstanding.

In the event that a billing dispute is resolved in favor of the Customer, no late payment charge will apply to the disputed amount and the Customer will receive a credit equal to any overcharged amount. The late payment charge shall be applicable to all amounts resolved in favor of the party owed.

Late Payment Charges applicable to End User ordering of Access are as provided for in the Telephone Company's Local Services Tariff.

(N)

1.7.8. Special Construction Charges

Subject to the arrangement of the Telephone Company and to all of the regulations contained in this Tariff, Special Construction of facilities may be undertaken on a reasonable efforts basis at the request of the Customer. Special Construction is that construction undertaken and characterized by one or more of the following:

1. Where facilities are not presently available and there is not other requirement for the facilities so constructed; or are of a type other than that which the Telephone Company would normally utilize in the furnishing to the Services; or
2. Where facilities are to be installed over a route other than that which the Telephone Company would normally utilize in the furnishing of its Services; or
3. Where facilities are requested in a quantity greater than that which the Telephone Company would normally construct; or
4. Where installation is to be on an expedited basis; or on a temporary basis until permanent facilities are available; or installation involving abnormal costs; or in advance of its normal construction schedules.

Where the Telephone Company furnishes a Service on a Special Construction basis, charges will be based on the costs incurred and may include:

1. Non-recurring type charges;
2. Recurring type charges;
3. Termination liabilities; or
4. Combinations thereof.

The agreement for Special Construction will ordinarily include a minimum Service commitment based upon the estimated Service life of the facilities provided.

If any additional access rate elements that are billable become allowable with the Special Construction (i.e., direct trunk connection into the Telephone Company's Switch), and are not currently in Telephone Company's Tariff, they will be incorporated into the Tariff and approved by the appropriate regulatory body prior to the Special Construction being provided to the Customer. Other charges relating to the Special Construction will be negotiated and agreed to between the Customer and Telephone Company on an Individual Case Basis (ICB)

4. Switched Access Service Rates and Charges

Example:

Telephone Company is providing Service in the according to the following arrangement. The equivalent of an "End Office" switch is located in its territory. Telephone Company's end user's are serviced off of that switch. If the Telephone Company's end users place an intrastate long distance call, the call is routed to the Company's Interexchange Carrier or the end user's designated Interexchange Carrier. From there, it is carried to the Interexchange Carriers Point of Presence. Telephone Company does not provide for direct Trunked Tandem connection at this time for long distance carriers.

The figure below provides the various access elements associated with this arrangement relating to switched access charges:

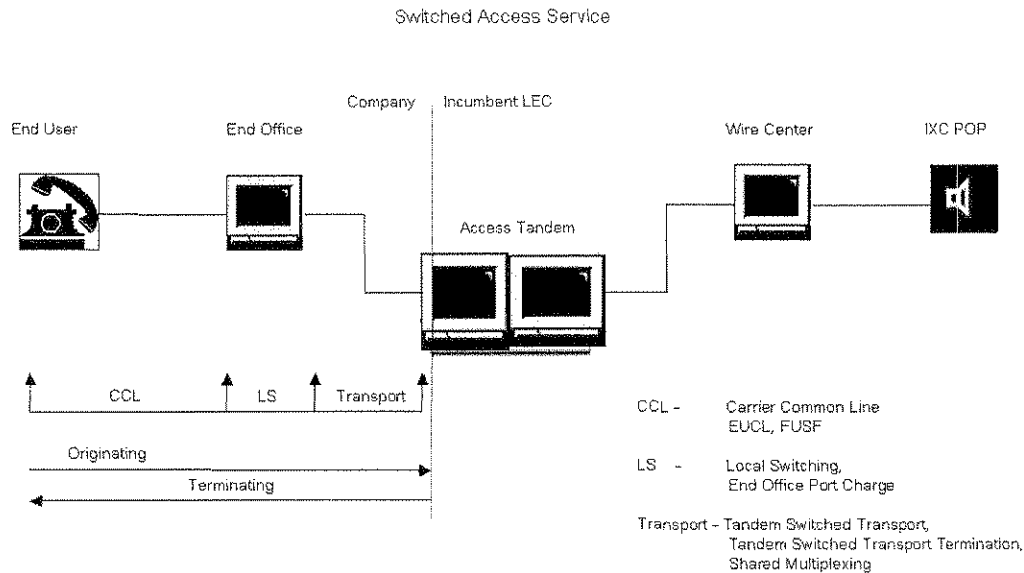

Figure 1 - Switched Access Rate Elements

Rates contained in this tariff are subject to subsequent adjustment, effective retrospectively, in the event the Commission or a court subsequently authorizes Telephone Company to correct its rates pursuant to pending motions, or petitions for reconsideration or waiver, or in the event of any other adjustment to an order of the Commission or a court.

4.1.2. Transport**Tandem Switched Transport**

Tandem-Switched Transport consists of the circuits used in common by multiple customers from the LEC's access tandem to the Telephone Company's end office. The Tandem-Switched Transport Rate includes a Tandem-Switched Transport – Termination rate, a Tandem-Switched Transport rate and a Shared Multiplexing rate as follows:

1. The Tandem-Switched Transport – Termination element is a usage rated, per minute Rate to recover costs incurred at the ends of the transmissions links.
2. The Tandem-Switched Transport element is usage rated and distance-sensitive, i.e., a per access minute per airline mile rate. The rate recovers costs of the transmission facilities, including intermediate transmission circuit equipment, between the end-points of the circuits.
3. For Tandem Switched Transport, a Shared Multiplexing Rate will be assessed to all minutes of use between the LEC's Access Tandem to the Company's end office. The Shared Multiplexing rate recovers multiplexing costs on the end office side of the tandem.

3.1 Special Access Services

(T)

The following services are offered where technically and operationally feasible.

3.1.1 Charter Business[®] Optical Ethernet Services

(T)

General

Charter Business[®] Optical Ethernet Services provide transparent optical network connectivity of point-to-point, point-to-multipoint or multi-point to multi-point configurations. The typical topology for Optical Ethernet is a standard fiber build using shared backbone bandwidth. A premium is charged for redundant/diverse access and dedicated backbone bandwidth. Charter Business[®] Optical Ethernet Services are certified using technical specifications and testing approved by the Metro Ethernet Forum (MEF). The service has an expectation of low Frame Delay, Frame Delay Variation and Frame Loss Ratio

Optical Ethernet Service Types and Descriptions

- a. Ethernet Private Line (EPL) provides a point-to-point Ethernet transport solution. EPL does not allow for service multiplexing as a dedicated UNI (User Network Interface) is used.
- b. Ethernet Virtual Private Line (EVPL) – EVPL provides a point-to-multipoint (hub and spoke) Ethernet transport solution that allows for service multiplexing (more than one Ethernet Virtual Circuit can be supported at the UNI). The service meets the Metro Ethernet Forum (MEF) specification for an EVPL service and is MEF 9 and MEF 14 certified.
- c. Ethernet Local Area Network (E-LAN) – E-LAN provides a private metro “LAN” Ethernet network, providing the ability to share bandwidth between multiple Ethernet locations. The service connects a dedicated channel of bandwidth to a single customer that is shared among the customer's locations. These locations may exchange traffic via the shared connection as required. For example, any port could send information to any other port (any-to-any) or multiple ports could send all of their traffic to a single port. The service meets the Metro Ethernet Forum (MEF) specification for an E-LAN service and is MEF 9 and MEF 14 certified.

Service Features

The Charter Business[®] Optical Ethernet service offers full duplex connectivity between sites with speeds ranging from 10Mbps up to 10Gbps, scalable in 10Mbps increments. Specific equipment is used at the customer premises to be MEF compliant. The following Optical Ethernet Service features are option specific and should be specified on the service order:

- Option 1: Protected Ethernet service - dual protect paths, route diversity, dual entrance facilities in to each location, and redundant electrical components or circuit cards
- Option 2: Unprotected Ethernet service – single optical path from core network facility to customer location

1.9 Special Access Services

(N)

The following services are offered where technically and operationally feasible.

1.9.1 Charter Business® Optical Ethernet Services**General**

Charter Business® Optical Ethernet Services provide transparent optical network connectivity of point-to-point, point-to-multipoint or multi-point to multi-point configurations. The typical topology for Optical Ethernet is a standard fiber build using shared backbone bandwidth. A premium is charged for redundant/diverse access and dedicated backbone bandwidth. Charter Business® Optical Ethernet Services are certified using technical specifications and testing approved by the Metro Ethernet Forum (MEF). The service has an expectation of low Frame Delay, Frame Delay Variation and Frame Loss Ratio

Optical Ethernet Service Types and Descriptions

- a. Ethernet Private Line (EPL) provides a point-to-point Ethernet transport solution. EPL does not allow for service multiplexing as a dedicated UNI (User Network Interface) is used.
- b. Ethernet Virtual Private Line (EVPL) – EVPL provides a point-to-multipoint (hub and spoke) Ethernet transport solution that allows for service multiplexing (more than one Ethernet Virtual Circuit can be supported at the UNI). The service meets the Metro Ethernet Forum (MEF) specification for an EVPL service and is MEF 9 and MEF 14 certified.
- c. Ethernet Local Area Network (E-LAN) – E-LAN provides a private metro “LAN” Ethernet network, providing the ability to share bandwidth between multiple Ethernet locations. The service connects a dedicated channel of bandwidth to a single customer that is shared among the customer’s locations. These locations may exchange traffic via the shared connection as required. For example, any port could send information to any other port (any-to-any) or multiple ports could send all of their traffic to a single port. The service meets the Metro Ethernet Forum (MEF) specification for an E-LAN service and is MEF 9 and MEF 14 certified.

Service Features

The Charter Business® Optical Ethernet service offers full duplex connectivity between sites with speeds ranging from 10Mbps up to 10Gbps, scalable in 10Mbps increments. Specific equipment is used at the customer premises to be MEF compliant. The following Optical Ethernet Service features are option specific and should be specified on the service order:

- Option 1: Protected Ethernet service - dual protect paths, route diversity, dual entrance facilities in to each location, and redundant electrical components or circuit cards
- Option 2: Unprotected Ethernet service – single optical path from core network facility to customer location

3.1 Special Access Services (Cont'd) (T)**3.1.2. Charter Business[®] Ethernet** (T)

Charter Business Ethernet provides transparent network connectivity of point-to-point, point-to-multipoint or multi-point to multi-point configurations via the Company's hybrid fiber-coax (HFC) network which may provide an HFC only private network solution or may be intermixed with Optical Ethernet endpoints.

3.1.3. Charter Business[®] Optical Transport Service (T)

A secure private connection delivers high-quality fiber-optic service between two or more sites. A private connection delivers transmission speeds ranging from TDM (DS1, DS3) to high-end SONET (OC3, OC12, OC48), and wavelength services.

3.1.4. Rates and Charges (T)

	<u>Monthly</u>	<u>Non-Recurring</u>
Optical Ethernet Services (Rates and Charges are arranged on Individual Customer Basis)

3.1. Special Access Services (Cont'd)

(T)

3.1.5. Leased Line Service

(T)

A leased line is a private, dedicated point-to-point connection between a Company Point of Presence (POP) and another point on the Company's network specified by the Customer. Leased line service may be provided to Customers on a statewide basis, based upon the location of the Company's facilities, with transmission speeds of either DS1 (1.5444 Mbps), DS3 (44.736 Mbps), OC3 (155.52 Mbps), OC12 (622.08 Mbps) and OC48 (2,488.32 Mbps). A local access line may be necessary to connect the Customer network or premise with the Company POP. Rates and charges are on an Individual Case Basis (ICB).
