MISSOURI  
Public Service Commission

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 8 and 9 would be 8.1.
- B. Sheet Revision Numbers - Revision numbers also appears in the upper right corner of each page. These numbers are used to determine the most current version on file with the Missouri Public Service Commission. For example, the 3rd revised Sheet 8 cancels the 2nd revised Sheet 8.
- C. Paragraph Number Sequences - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level.

Bps

Broadband Circuits

Circuits with a capacity greater than DS1 capacity or 1.544 Mbps.

Bulk Rounding

Qwest uses "Bulk Standard Rounding" to convert from the fourth decimal place to full cents. Bulk Standard Rounding rounds:

- up the amount billed for a call to the second decimal place, if the third and fourth decimal places of a call charge are equal to, or exceed, \$0.0050, and
- down the amount billed for a call to the second decimal place, if the third and fourth decimal places of a call charge are less than \$0.0050.

The difference between the billed charge and the actual call charge, negative or positive, is applied to the next call, and such call's actual charges plus such difference are Bulk Standard Rounded in the same manner to determine the billed charge for such call. Qwest repeats this process for all calls.

Carrier Recognized Holidays

The following days are recognized as holidays for billing purposes: New Year's Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day, except as otherwise specified herein.

Customer

Those services that contribute towards the overall commitment but are not discountable according to the master discount schedule (ie. Qwest Total Advantage). These services will continue to receive discounts as designated in individual service contracts. Contribution levels will be based on Monthly Recurring Charges (MRCs) for these services.

3.6 Prepaid Calling Card Service

The service enables business and residential customers to place prepaid long distance telephone calls. Customers access the Company's network using a 1-800 access code arrangement. A voice prompt will instruct the caller to dial the called telephone number and authorization code displayed on the card. Upon validation of the information, the call will be completed.

Service is available in all locations throughout Missouri, subject to the availability of facilities. Customers may access this service seven (7) days per week, twenty four (24) hours per day. Customers may subscribe to the service by purchasing a prepaid card from the Company or an authorized representative. Charges for use of the Company's facilities will be deducted from the Customer's prepaid account balance as the card is used. Prepaid calling cards will be valid until the Customer's prepaid balance is completely depleted or until the expiration date displayed on the card, whichever occurs first. Callers receive a verbal notification stating the account balance each time the card is used.

Service is offered on a first come, first serve basis and may be subject to technical limitations. Service is provided to the holder of the card. All calls are charged against a prepaid calling card which has a sufficient balance to cover the amount of the call in process. Under some arrangements, callers may utilize a commercial credit card to increase a prepaid balance or renew the prepaid card. Failure of the card holder to maintain a positive balance or to input the authorization code of another valid prepaid calling card may result in the disconnection of a call in process; an announcement will advise the caller immediately prior to the disconnection of the call.
