CUSTOM CALLING AND CUSTOM LOCAL AREA SIGNALING SERVICE

C. DESCRIPTION OF SERVICES: (Continued)

10. Call Transfer: Allows users to transfer a call to another directory number and then drop out of the call, leaving the users connected. Customers must have Three-Way Calling and User Transfer Station Options to use this feature.
11. Call Waiting: This feature informs a customer who is on an established call that a third party is trying to call. An incoming call which arrives at a busy line receives audible ringing instead of a busy tone. The called party is alerted by a tone that is only available to the called party.
12. Call Waiting-Cancel: This feature allows a customer to prevent, on a per call basis, an incoming call from Call Waiting on their line. Income calls to the station receive a busy signal. This feature ensures that Call Waiting indication ones to not interrupt important calls or disrupts data transmissions.
