Jefferson City, MO 65101

Dear Secretary,

Enclosed herewith for filing with the Missouri Public Service Commission on behalf of Spire Missouri Inc. d/b/a Spire ("Company" or "Spire") are revised tariff sheets, P.S.C. MO. No. 7 First Revised Sheet No. R-30 and P.S.C MO. No. 8 First Revised Sheet No. R-30 in regards to. These revised tariff sheets, have an issue date of March 6, 2019, and an effective date of April 5, 2019. .

Spire is correcting the Combined Space & Water Heating (tankless) Boiler measure energy rating which shows currently in the Company's tariff as Energy Factor (EF) and Uniform Energy Factor (UEF) to reflect the correct rating which should show as Annual Fuel Utilization Efficiency (AFUE). This will match the correct measure (AFUE rating) which in the current tariff is listed in the box above it for Combined Space Heating/ Water Heating (w/tank).

Spire has also removed the term Energy Factor (EF) from the Residential Tariff because the US Department of Energy no longer identifies Energy Factor (EF), but instead recognizes Uniform Energy Factor (UEF) as the standard for High Efficiency Water Heaters. The Company is not requesting additional measures be added to our Energy Efficiency Portfolio and this will not increase its Residential program budget for FY19.

Sincerely,
/s/ Shaylyn Dean
