- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Missouri P.S.C. For example, 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Missouri P.S.C. follows in its tariff approval process, the most current page number on file with the Missouri P.S.C. is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.

MISSOURI4.4 Rate Period Charges

4.4.1 Rate periods - ATN offers two rate periods. Peak and Off-Peak rate periods apply to Rate Plan II. The rates apply for all days of the week including holidays. The Peak rate period is 8:00 AM to 6:59 PM, seven days a week. The Off-Peak rate period is all other time periods. For New Year's Day (January 1), Independence Day (July 4), Labor Day, Thanksgiving Day and Christmas Day (December 25), the Off-Peak rate applies.

4.4.2 Charges for Rate Plan II are determined by the time of day rate periods and minutes of use within each rate period. The rate period is determined by the time and day of call origination at the customer's location. Calls initiated during one time period and ending during a different period will be billed for the usage during each time period at the rates applicable to that time period.

4.5 Method of Computing Charges

Charges for each call are totaled by rate period. If the computed charges include a fraction of a cent, the fraction is rounded up to the next whole cent (e.g., \$1.426 would be rounded up to \$1.43).
