SPECIAL EQUIPMENT AND ASSEMBLIES

I. GENERAL

Special equipment and assemblies consist of standard equipment, special equipment, service arrangements, and special promotions for which provision is not otherwise made in this tariff. They will be furnished, when practicable, only if they are not detrimental to services provided for the general public.

II. RATES

A. Computation

1. Rates for special equipment and assemblies are equivalent to the estimated costs of furnishing the special equipment and assemblies.
2. Estimated cost consists of an estimate of the total cost to the telephone company in providing the special equipment and assemblies including:
  - a. Cost of equipment and materials to be used. Added to this cost is sales tax and a supply expense consisting of allocated warehousing and purchasing costs. The allocation is derived from the ratio between total warehousing and purchasing costs to total material and equipment costs.
  - b. Cost of installation. Estimated labor hours are applied toward the appropriate labor rates loaded with allocations to recover supervision, transportation, engineering, general and administrative (G&A), and other associated expenses. Should installation be contracted out, allocations would be added to the contractor's rate to recover supervision, engineering and G&A expenses. These allocations would be applied to a "pure labor" amount, which is a set percentage of the total contractor's rate.

II. RATES (Cont'd)

A. Computation (Cont'd)

2. (Cont'd)

- b. Allocations are recalculated monthly based on twelve month rolling averages. Supervision and Engineering expenses are allocated based on their ratio to the direct labor wages of the applicable work group. G&A expenses are distributed by the ratio of total construction labor to total company labor less G&A labor. This result is then averaged by total construction labor hours.

Transportation allocations, such as Vehicle and Tool expense and Meals and Lodging expense, are averaged by a work group's labor hours. Other allocations, such as non-productive time allocation and a payroll expense allocation (i.e. pensions, insurance, etc.), are based on the ratio of non-productive time to productive time and the ratio of payroll expenses to company labor expenses, respectively.

- c. An amount for return on investment computed on the estimated installed cost of the facilities involved in providing the special equipment and assemblies.
- d. Cost of maintenance. Estimated maintenance materials and labor hours may be included. Associated expenses are also allocated to base labor rates to form a maintenance labor rate to be applied toward the estimated labor hours. Supervision and engineering expenses are applied to the "pure labor" amount if contractors are used.

2. (Cont'd)

- e. Cost of removal and rearrangement. Estimated labor hours for these two functions are multiplied by the same rate as maintenance hours.
  - f. Depreciation on the estimated installed cost of any facilities used to provide the special equipment and assemblies based on the anticipated useful service life of the facilities. "Estimated installed cost" includes cost of equipment and materials to be used plus the estimated cost of installing such facility to include all associated expenses.
  - g. Other factors that may affect the final cost include the cost of debt, the company's debt ratio, the current discount rate and ad valorem taxes.
  - h. Any other directly attributable miscellaneous or unusual items or expenses associated with the particular installation.
3. In the computation of rates for any special assembly, one of the following rate treatments shall be applied with or without a minimum period termination agreement, in accordance with the judgment of the telephone company based on the circumstances involved.
- a. A monthly rental with or without an installation charge.

A. (Cont'd)

58. Beginning February 1, 2007 through **December 31, 2007**, new business customers who are contacted by the Company or who contact the Company and request this promotion when subscribing to Complete Business Bundle or Connection Central Bundle will receive a \$75 bill credit when they also subscribe to High-speed Internet under a two year term commitment. The bill credit will appear on the third month's bill. (C)
59. During the period February 1, 2007 through April 30, 2007, when a business customer subscribes to Connection Central Bundle under a one or two year commitment, the Company will waive all applicable service charges.
60. During the period February 15, 2007 through **June 15, 2007**, new and existing business customers who are contacted by the Company or who contact the Company and request this promotion may be eligible for a one-time bill credit when they subscribe to one or more of the following qualifying services: ISDN-BRI, ISDN-PRI, Frame Relay, ATM, Digilink, Translink, Lightlink, Individual Voice Channels for Custom Access Solutions and Digital Trunking Service. To be eligible, customers must establish a new account or add to an existing account and order a qualifying service(s), with a resulting monthly spend of \$300 or more. Charges for all regulated and non-regulated services (excluding taxes, surcharges and other fees) contribute towards the monthly spend. The bill credit will be issued for the first month's charges for each qualified service added to the customer's account under this promotion. (C)

There is no limit to the number of qualifying services that a customer can subscribe to under this promotion, nor is there a limit to the number of times a customer can order additional qualifying services and qualify for the bill credit during the promotional period.

The first month's service for which credit will be issued will count as the first month of service under the minimum service period or term commitment period. If a customer discontinues service for which credit was issued prior to the end of required service period, credits issued under this promotion will not be rescinded; however, customers who discontinue service prior to the end of the minimum service or term commitment period are responsible for the termination liability charges normally applicable for that service.

To be eligible, the customer must agree to subscribe to Solutions - Residence Package Essential Home Phone Plan.

The initial bill credit will be reflected on the customer's first or second invoice following the customer's acceptance of this offer and will continue for 11 consecutive months thereafter. If a customer discontinues Essential Home Phone Plan prior to the end of the 12 month period, no additional credits will be applied.
