

UNION ELECTRIC COMPANY RECEIVED
GAS SERVICE

OCT - 6 1994

Applying to MISSOURI SERVICE AREA

MO. PUBLIC SERVICE COMM.

XI. Disconnection and Reconnection of Service (Cont'd.)

not less than ten (10) days prior to the date of the proposed disconnection or delivered to customer not less than 96 hours prior to such date.

- *2. Single metered multi-dwelling unit residential buildings - At least ten (10) days prior to disconnection of service for nonpayment of a bill or deposit at a multi-dwelling unit residential building at which usage is measured by a single meter, notices of the Company's intent to disconnect will be conspicuously posted in public areas of the building. Such notices will not be required, however, if the Company is not aware that said structure is a single metered multi-dwelling unit residential building or in individual situations where the safety of the Company's employees or agents may be a consideration. If the gas service is heat related, said notice will inform the occupants of their right, under state law, to initiate a receivership procedure.
- *3. Individually metered multi-dwelling unit residential buildings - At least ten (10) days prior to disconnection of service for nonpayment of a bill or deposit at (a) a multi-dwelling unit residential building where each unit is individually metered, but a single customer is responsible for payment for service in all units in the building, or at (b) a residence in which the occupant using the Company's service is not the Company's customer, the occupant(s) shall be given written notice of the Company's intent to disconnect service, provided however, that such notice will not be required unless one (1) occupant has advised the Company or the Company is otherwise aware that he is not the customer. The notice will outline the procedure by which the occupant may apply in his or her name for service of the same character received through that meter. If the gas service for (a) is heat related, said notice will inform the occupants of their right, under state law, to initiate a receivership procedure.

XI. Disconnection and Reconnection of Service (Cont'd.)

C. Residential Customer Contact and Notice of Disconnection

At least 24 hours preceding disconnection of service, the Company will make reasonable efforts to contact a residential customer to advise of the pending action and what steps must be taken to avoid disconnection. Immediately preceding the disconnection of service, the Company employee or agent designated to perform such function will, except in individual situations where the safety of the employee or agent may be a consideration, make a reasonable effort to contact and identify himself to the customer or responsible person at the premises to announce his purpose. When service is disconnected, the Company employee or agent will leave a notice at the premises in a manner conspicuous to the customer that service has been disconnected and the Company address and telephone number where the customer may arrange to have service restored.

*D. Disconnection Hours

Company will disconnect gas service between the hours of 8:00 a.m. and 4:00 p.m. on the date specified on the notice of disconnection or within eleven (11) business days after that.

E. Delay of Disconnection for Medical Reasons

The Company will postpone the disconnection of service to a residential customer for a time not in excess of 21 days if the Company is advised the disconnection will aggravate an existent medical emergency of the customer, a member of his family or other permanent resident of the premises. The Company may require a customer to provide satisfactory evidence that a medical emergency exists.

F. Avoidance of Disconnection of Service

Disconnection of gas service will not be performed if, on or before the date specified in the notice of intent to disconnect, the customer shall:

1. Make good the default by paying such bills for service at a Company office, or by making arrangements satisfactory to Company therefore, or by making or restoring such deposit at a Company office, or by giving Company representatives such access, or by curing such violation of rules and regulations, as the case may be; and
2. Pay at a Company office the expenses incurred by Company in detecting and confirming unauthorized usage or diversion of gas service. Such expenses will include, but not be limited to all unmetered service as estimated by Company, special equipment necessary to detect the violation (such as check meter), equipment necessary to prevent future violations, labor and materials necessary to test, change, move or install new meters or other equipment and the cost of any rebilling, as applicable.
3. Make good the default by paying such bills for service to Company's disconnection personnel, at customer's premises, prior to the time such disconnection work is performed. Upon Company's acceptance of said payment, under the circumstances described in this paragraph (F.3), customer will be billed an additional charge for recovery of the expense of Company personnel traveling to customer's premises, which is shown on Sheet No. 19 Miscellaneous Charges.

Public Service Commission

G. Disconnection of Service Without Prior Notice

Company shall have the right to interrupt service prior notice for reasons of maintenance, health, safety or state of emergency, (including unauthorized interference, diversion or use of service), or in cases where Company is directed to disconnect service by a governmental agency or officer. In such cases Company will make a reasonable effort to inform customer of the reasons for disconnection of service.

*XII. Curtailment of Service Schedule

* A. Priorities of Service:

1. Purpose. The purpose of this rule is to establish the priority of service required to be provided by Company during periods of curtailments caused by natural gas supply deficiencies and/or pipeline capacity constraints.
2. Curtailment. During periods of natural gas supply deficiencies and/or capacity constraints on any part of the Company's distribution system, the Company will curtail or limit gas service to its customers on this part of the distribution system as provided in this Rule. Curtailment may be initiated due to a supply deficiency, a limitation of pipeline capacity or a combination of both. For the purposes of this Rule, interruption of service to a particular customer due to the failure of the customer's transportation volumes to be delivered by the Company does not constitute curtailment under this Rule.
3. Priority Categories. Each customer's requirements shall be classified into priority categories. The priority categories to be utilized by the Company for allocating available gas service, listed in their order of priority with Category 4 being the lowest priority and Category 1 being the highest priority of service to be retained, are listed below. Service will be curtailed for each category on a pro rata basis in accordance with the order of priorities set forth below:

For a Union Electric - Sales Service Supply Deficiency:

Category 1: Sales service to residential customers, public housing authorities, hospitals and other human needs customers receiving firm sales service from the Company.

Category 2: General Service Sales, Assurance Gas Sales and public schools.

DEC 2 1988

A. Curtailment of Interruptible Service**MISSOURI
Public Service Commission**

Company may curtail deliveries of gas to any or all of its Interruptible Service customers at any time and for reasons deemed sufficient to Company.

B. Curtailment of Non-Interruptible Service

Company may curtail deliveries of gas to customers served under any of its non-interruptible service classifications when in its judgment such curtailment is necessary to protect service to the maximum number of customers.

C. Curtailment Impact Minimized

Curtailments of deliveries of gas to both interruptible and, when necessary, firm customers will be made in a manner which will affect the minimum number of customers.

D. Payment for Service Rendered

Any interruption of service shall not relieve customer from any charge for service actually rendered.

E. Liability for Interruptions

The Company will endeavor to maintain continuous service but shall not be liable for loss or damage caused by interruption or failure of service, or delay in commencing service because of accident to, or breakdown of plant, lines or equipment, strike, riot, act of God, or causes beyond Company's control or due to shut down for reasonable periods to make repairs to lines or equipment.

Public Service Commission

*XII. Curtailment of Service Schedule (Con't.)

Customers designated in Categories 3 and 4 and Assurance Gas Sales and Natural Gas Transportation customers in Category 2 will designate a telephone number to be called when curtailment periods are to begin and end. When ordered to curtail by telephone, the customer will discontinue use of gas service as promptly as possible, but no later than two hours after receiving notice to curtail use. Should the customer fail to discontinue service after receiving notice, the Company shall have the right to physically disconnect the service facilities.

The Company shall not be liable for any loss or damage that may be sustained by customers by reason of any interruption and/or curtailment of service. If continuity of fuel supply is required by the customer, the customer should install and maintain whatever stand-by fuel and fuel burning equipment that may be needed.

* B. Unauthorized Use Charges

If during any period of curtailment, any customer (sales or transportation) who takes a volume of gas in excess of the curtailment period volumes authorized to be used by such customer, said excess volumes shall be considered "unauthorized use". The Company shall bill all excess volumes pursuant to the Unauthorized Use Charges, as set forth on the Company's transportation service tariff sheets.

All "Unauthorized Use Charge" revenues billed sales and transportation customers will be considered as gas cost recovery and will be used in the development of the Actual Cost Adjustment (ACA) factor of the Company's Purchased Gas Adjustment (PGA) Clause.

The payment for unauthorized use gas by a customer shall not, under any circumstances, be considered as giving the customer the right to continue to take unauthorized use gas, nor shall such payments be considered as a substitute for any other remedies available to the Company for failure of the customer to curtail the customer's service in compliance with the terms of this tariff.

XV. PILOT PROGRAMS

RESIDENTIAL NATURAL GAS ENERGY EFFICIENCY

Home Energy Performance Pilot

(Joint Program with Electric HEP Pilot)

***PURPOSE**

The purpose of the Home Energy Performance (HEP) Pilot is to (1) identify and implement dual fuel energy saving opportunities identified by an audit that are expected to be cost effective and (2) to perform an evaluation of program implementation and results. The Company's gas and electric energy efficiency programs will co-deliver a pilot program to its combination gas and electric customers under which each gas and electric fuel program measure has a Total Resource Cost (TRC) greater than 1.0 when parsing of measure costs and savings, based on source energy savings, occurs.

AVAILABILITY

Services under this program are only available for single-family homes receiving service under both the Residential Natural Gas Service Rate and the Residential Electric Service Rate 1(M). For single-family homes that are rental properties, services will be available to the Participant requesting the audit (either the tenant or landlord). This pilot program is related to the Missouri Energy Efficient Natural Gas Equipment and Building Shell Measure Rebate Programs tariff and rebates for similar measures from the two programs cannot be combined.

DEFINITIONS

Administrator - Company will administer the program.

Air Changes per Hour (ACH) - A measurement of air infiltration equal to the total volume of air in a home that is turned over in one hour.

Participant - A customer or landlord that contacts the Administrator and requests an audit, as described in the program description.

Participant Cost Test (PCT) - The test of the cost-effectiveness of demand-side programs that measures the economics of a demand-side program from the perspective of the participants in the program.

Qualified Auditor - A participating contractor trained in natural gas equipment utilization systems and commercial and/or residential structures as an integrated whole building system. Residential training, certification, and accreditation are provided by the Building Performance Institute (BPI) and Residential Energy Services Network's (RESNET®). Commercial training and certification are provided by a nationally recognized energy auditor certification organization. Qualified Auditors will be supplied for the program by the Company's implementation contractor.

***XV. Pilot Programs**MISSOURI
Public Service Commission**A. Use Of Financial Markets To Manage Gas Costs****1. Purpose**

The purpose of this Pilot Project is to allow the Company, the Missouri Public Service Commission Staff, and the Office of the Public Counsel to gain experience on a trial basis in the use of financial market instruments such as futures, options, collars and derivatives to manage the risk of gas supply costs.

2. Goals and Objectives

The goals of this Pilot Project are:

- a. To manage the risks of increasing and decreasing prices in the gas market.
- b. To develop a balanced gas supply cost portfolio by diversifying from market-based supply.
- c. To develop awareness of the risks/rewards of financial gas supply cost diversification.
- d. To become experienced with the mechanics of gas financial markets.
- e. To share the results of this Pilot Project with the Missouri gas utility industry subject to any necessary confidentiality protection.

3. General Project Description

For the Pilot Project, the Company will use only that portion of its natural gas distribution system which is connected to Texas Eastern Transmission Corporation, the interstate pipeline in Southeast Missouri (referred to as the Company's "Texas Eastern System").

No more than 50% of the Company's projected gas supply purchases for its Texas Eastern System will be hedged with financial instruments.

UNION ELECTRIC COMPANY GAS SERVICE

Applying to MISSOURI SERVICE AREA

***RESIDENTIAL NATURAL GAS ENERGY EFFICIENCY**
Home Energy Performance Pilot (Cont'd)

DEFINITIONS (Cont'd)

Total Resource Cost Test (TRC) - The test of the cost-effectiveness of demand-side programs that compares the avoided utility costs to the sum of all incremental costs of end-use measures that are implemented due to the program (including both utility and participant contributions), plus utility costs to administer, deliver, and evaluate each demand-side program.

Utility Cost Test (UCT) - The test that compares the avoided utility costs to the sum of all utility incentive payments, plus utility costs to administer, deliver, and evaluate each demand-side program to quantify the net savings obtained by substituting the demand-side program for supply-side resources.

PROGRAM PROVISIONS

HEP is a pilot energy efficiency program focused on a whole house audit approach to educate residential customers about energy use in their homes and to offer information, products, and services to residential customers to save energy. This allows the customer to initiate the process of identifying and installing long-term energy efficiency upgrades and practices. The HEP program itself will have multiple components. In addition, it provides another entryway for customers to take advantage of the Company's entire portfolio of residential energy efficiency solutions. The implementation team will attempt to leverage this program to achieve greater participation in the Company's other residential programs. For example, as warranted, the homeowner, renter, and/or landlord may be encouraged to participate in other natural gas or electric energy efficiency programs offered to residential customers.

PROGRAM DESCRIPTION

Eligible customers can receive information about signing up for a general audit in several ways, including contacting the dedicated program toll free number or email, the www.ActOnEnergy.com website or attending an event in which the Company's residential energy efficiency programs are featured. Direct mail solicitation will be directed toward eligible customers who have the highest intensity and also highest potential savings opportunities.

***A. Use Of Financial Markets To Manage Gas Costs (Cont'd.)**

The general strategy of the Pilot Project is to use financial instruments to lock in prices on a portion of supply when prices are low compared to historical pricing and provide protection against further increases when prices are high. The Company will have the flexibility to adjust this strategy to react to market conditions.

This Project will be based and evaluated on the effect of the gas prices versus price risk management for gas delivered to the Texas Eastern System. After the end of June, September and December of the Project term, a written report will be provided to the Commission Staff and the Office of the Public Counsel. The written report will describe each trade with a summary of gains and/or losses and will summarize the current status and position of the portfolio. At the end of the initial term of this Project, the effects on gas costs and price risk management will be reviewed and the current status of the program will be reported to the Commission Staff and the Office of the Public Counsel. Also at that time, an accounting will be made of current gains and/or losses (including direct expenses such as, brokerage commissions and exchange fees, but not including internal Company administrative costs) associated with the Project (also referred to as the "Project Costs"). These Project Costs will be distributed equally among all gas sales customers in the Company's Missouri natural gas system, not just to Texas Eastern System customers. All Project Costs will be passed through to gas sales customers via the Actual Cost Adjustment (ACA) mechanism of the Purchased Gas Adjustment (PGA) Clause—Rider A as follows:

Losses

Up to \$40,000	100% passed through to sales customers
\$40,000 to \$265,000	80% passed through to sales customers, 20% absorbed by Company
Over \$265,000	100% absorbed by Company

***PROGRAM DESCRIPTION (Cont'd)**

The customer or landlord contacts the Administrator through email or a phone call to request an audit. Pertinent information is gathered at the time of the contact (e.g., address, account number, name, etc.) and the audit is scheduled. The Participant will pay a fee of \$25.00 for the general audit. The auditor will have the usage data for the home prior to entering the home. The audit is based on the whole house energy savings potential and will include a visual inspection for safety issues and a full visual inspection and assessment of major energy using systems. Some energy efficient measures will be directly installed (e.g., energy efficient lighting, , pipe wrap, showerhead, faucet aerators, etc.) at no additional cost to Participant. The auditor will review usage information, audit findings and recommendations with the Participant at the time of the audit. The Participant will receive a paper copy of the audit. The auditor will recommend energy efficient measures that the Participant can choose to pursue. These measures will include the Company's electric and natural gas program measures and any other appropriate measures identified by the audit.

Some measures may be incented from the HEP; other measures may be part of other Company residential electric and natural gas energy efficiency programs. Recommendations will also include work orders that Participants may give to contractors if the Participant chooses to pursue additional measures associated with the HEP. In some cases, the auditor may determine that it is appropriate to include additional actions such as combustion safety and efficiency testing and/or a blower door test. There is no cost to the Participant for these additional actions when determined appropriate by the auditor.

In order to achieve the desired level of energy savings, approximately 870 audits will be conducted each program year.

EVALUATION PLAN

The evaluation, measurement and verification of the HEP will be performed by an independent, third-party evaluation contractor in conjunction with the evaluation of the electric program of the same name. The overall evaluation objectives will be to provide an impact evaluation including determining gross and net gas savings attributable to the pilot. The evaluation contractor will also provide a process evaluation including measuring Participant satisfaction and determining the viability of expanding the pilot into a standard program. Cost effectiveness tests (TRC, UCT and PCT) will be completed by the evaluator. Report due dates shall be as agreed to in Paragraph 11 of Unanimous Stipulation And Agreement Resolving Ameren Missouri's MEEIA Filing (File No. EO-2012-0142).

*Indicates Change.

***REBATES**

Each Participant will get a rebate per the program details on the Company's website. Program details are available on the Company's website www.ActOnEnergy.com or by calling 1-855-229-1349.

***REBATE CHANGE MANAGEMENT PROCESS**

When existing rebates need to be modified, the implementation contractor will approach rebate changes as an interactive process between implementation contractor's program development team (consisting of local and national engineering resources and program management staff), the Company, the Company's evaluation, measurement and verification contractor and Company stakeholders with the Company making the final decision for modifying rebates that do not require a tariff filing.

The change process is outlined below and is applicable to changes in a program rebate regarding the interaction between the Company or implementation contractor and program Participants.

- 1) Identify need for rebate change regarding the interaction between the Company or implementation contractor and Participants in the programs;
- 2) Discuss proposed rebate change with implementer;
- 3) Discuss proposed rebate change with evaluator;
- 4) Analyze impact on program and portfolio (Cost-effectiveness, goal achievement, etc.);
- 5) Inform the Staff, Office of the Public Counsel (OPC), and the Missouri Department of Economic Development - Division of Energy (DE) of the proposed change and the time within which it needs to be implemented. The Company will provide Staff, OPC and the DE with the analysis that was done, and consider recommendations from them that are received within the implementation timeline (the implementation timeline shall be no less than five (5) business days from the time that the Staff, OPC, and the DE are informed and provided the above-referenced analysis);
- 6) Take timely received recommendations into account and incorporate them where the Company believes it is appropriate to do so;
- 7) Notify and train customer contact personnel (Contact Center, Energy Advisors, Business Center, Key Account Executives, Customer Service Advisors) of the changes;
- 8) Make changes to forms and promotional materials;

REBATE CHANGE MANAGEMENT PROCESS (Cont'd)

- 9) Update program on Company's website www.ActOnEnergy.com;
- 10) Make a filing in File GR-2010-0363 containing updated web pages, if appropriate, updated rebate amounts and specifying the date when the updated rebate amounts were posted on the Company's website www.ActOnEnergy.com.
- 11) Inform customers, program partners, etc.

MEASURES

Energy efficient natural gas measures are offered to a Participant via either: a direct install, offering a specific rebate for specific measures, or a combination of both. Eligible measures offered in this program cannot be combined with rebates listed under the Company's Missouri Energy Efficient Natural Gas Equipment and Building Shell Measure Rebate Programs tariff.

***Measures - Direct Install**

- 1) Equipment: Hot Water Measure Kit - installation of one (1) kit which may include: one (1) shower head, two (2) aerators, up to forty (40) feet of pipe wrap.
Rated: 1.5 Gallons Per Minute (GPM)
Rebate: Measures will be direct installed at the Participant's home in conjunction with the audit by the Qualified Auditor.

***Measures - Rebates**

- 1) Building Shell Measures - Residential Home Energy Audit Improvement - purchase and installation of cost effective natural gas energy saving building shell measures as recommended from a Participant's energy audit performed by a Qualified Auditor.
Rated: Measures considered efficiency improvements include:
 1. Ceiling Insulation
 - a. Must be at R19 or less. Participant must install to a minimum of at least R30 and a maximum of R49.
 2. Air Sealing Measures - Reduction in ACH must be at least 0.5 ACH through measures that may include:
 - a. Window weather stripping
 - b. Door weather stripping
 - c. Switch and outlet insulation
 - d. Caulking
 - e. Foam etc.
 3. Windows
 - a. Must install Energy Star qualified windows

MEASURES (Cont'd)

*Measures - Rebates (Cont'd)

Rebate: A rebate is offered to the Participant for each category listed above:

1. Ceiling Insulation - The initial rebate is \$0.008 x sq ft x ΔR (the rebate factor could range from \$0.004 to \$0.012 during the term of the program). The actual rebate amount applicable to each specific measure shall be the rebate amount for that measure that appears on the Company's website www.ActOnEnergy.com on the date that the audit is performed.
2. Air Sealing Measures - The initial rebate is \$42 per ACH reduction (the rebate amount could range from \$21 to \$63 per ACH reduction during the term of the program with a maximum cap of \$264 per home). The actual rebate amount applicable to each specific measure shall be the rebate amount for that measure that appears on the Company's website www.ActOnEnergy.com on the date that the audit is performed. A post installation combustion safety inspection must be completed to receive a rebate for this measure.
3. Windows - The initial rebate is \$12 per Energy Star window installed (the rebate amount could range from \$6 to \$18 during the term of the program) with a minimum of 5 windows and a maximum of 10.

PROGRAM FUNDS

Funding for this program is set forth in the Stipulation and Agreement in Case No. GR-2010-0363. Program funds will be used to cover costs associated with 1) direct installs paid to a qualified implementation contractor, 2) rebates paid directly to program Participants, and 3) administrative costs. Funding for this program will also be supplied by the Company's Residential Electric Energy Efficiency Program.

WEATHERIZATION PROGRAM

PURPOSE

This voluntary Weatherization Program (Program) is intended to assist qualified residential gas customers in reducing their use of energy through weatherization and conservation.

AVAILABILITY

This voluntary Program is available to customers receiving service under the Company's Residential Service Rate and who meet the customer eligibility requirements.

TERMS AND CONDITIONS

- a. Pursuant to the Order issued by the Missouri Public Service Commission (MPSC) in Case No. GR-2019-0077, the Company will provide \$263,000 annually (the Program funds) for a residential weatherization grant program, including energy education, for primarily lower income customers. The Program is administered by the Company.
- b. The Program funds will be distributed to Community Action Agencies operating in the Company's natural gas service territory.
- c. The Program offers grants for weatherization services to eligible customers and will be primarily directed to lower income customers.
- d. The total amount of grants offered to an individual customer for improvements that can be made to their residence will be determined by using the National Energy Audit Tool (NEAT) software or other MDED approved audit tool.
- e. The Company will retain at least two years of post-weatherization usage and payment history for each customer's residence that is weatherized.

A. Experimental Weatherization Program

1. Description and Availability:

In accord with this tariff, and pursuant to the terms and conditions of a stipulation and agreement (pertaining to the experimental weatherization program) filed and approved in Case No. GR-97-393, the Company will provide \$150,000 annually (the program funds) for an experimental residential weatherization grant program, including energy education, for primarily lower-income customers.

2. Purpose:

The program is intended to assist customers through conservation, education, and weatherization in reducing their use of energy and to reduce the level of bad debts experienced by the Company.

3. Terms and Conditions:

- a. The program will offer grants for weatherization services to eligible customers. The program will be primarily directed to lower income customers with high usage and/or bad debts.
- b. The total amount of grants offered to a customer will be determined by the cost effective improvements that can be made to customer's residence, but shall not exceed \$3,000, and is expected to average \$1,750.
- c. The program will be designed by a collaborative composed of representatives of the Company, the Commission Staff, and the Office of the Public Counsel. The collaborative will solicit input from social service agencies and other organizations that provide services to or represent the low-income population in UE's gas service territory. In the event that issues arise where consensus cannot be reached, those issues will be brought before the Commission for resolution.

Residential Pay As You Save® Program

PURPOSE

The objective of the Pay As You Save® Program (Program) is to promote the installation of energy efficient Measures and increase deeper, long-term energy savings and bill reduction opportunities for Participants through a tariffed on bill charge tied to the meter.

DEFINITIONS APPLICABLE TO RESIDENTIAL PAY AS YOU SAVE® PROGRAM ONLY

Analysis - Initial Program visit, walk through and report, Tier 1 upgrades, and customer education.

Assessment - Detailed home performance data collection, analysis of qualifying upgrades, and preparation and one-on-one presentation of Program offer.

Efficiency Upgrade Agreement - Agreement signed by Participants (who own the property) defining customer benefits and obligations, including Service Charges and duration of payments.

Energy Efficiency Plan (Plan) - Prepared by Program Administrator to identify recommended upgrades.

Estimated Life - The expected duration in years of the savings for each individual measure.

Measure - The replacement of less efficient natural gas equipment with high efficient ENERGY STAR® Qualified natural gas equipment and other high efficiency equipment and building shell measures.

Participant - An energy-related decision maker who implements one or more end-use Measures as a direct result of a demand-side program.

Program Administrator - The Company or entity selected by the Company to provide program design, promotion, administration, implementation, and delivery of services.

Program Partner - A retailer, distributor, or other service provider that the Company or the Program Administrator has approved to provide specific program services through execution of a Company-approved service agreement.

Property Notice - Attached by the Program to property records outlining benefits and obligations associated with the upgrades. In jurisdictions in which the Program cannot attach a Property Notice to property records, and in any case where a subsequent tenant is executing a rental agreement, Property Notice form must be signed by successor customer or purchaser indicating they accept benefits and obligations associated with the upgrades at the location before the sale or rental of the property.

- *d. This program will continue until March 31, 2000 provided that funding for the program continues to be recovered through rates. Company will submit a report on the program to the Commission Staff and the Office of the Public Counsel once a year no later than sixty (60) days after the end of each year of the program. Each report will address the progress and effectiveness of the program, and provide an accounting of Company funds spent on the program.
- e. The Company will monitor the usage and payment history of each customer participating in the program for two years after the customer's residence is weatherized under the program. Upon completion of the experimental program, the Company will perform an evaluation of the program.
- f. The cost of the grants and the actual costs incurred by the Company in administering the program, which administrative costs are to be reimbursed within limits as described below, shall be funded from utility revenue received by Company in an annual funding amount of \$150,000 per each year of the program period. The Company will collect the revenue to fund the program through a monthly charge of 12.00 cents (the Weatherization Program Charge). At the conclusion of the program period, the Company shall make the appropriate filing with the Commission to discontinue the collection of this Weatherization Program Charge.

GAS SERVICE

Applying to MISSOURI SERVICE AREA

Residential Pay As You Save® Program (Cont'd.)

DEFINITIONS APPLICABLE TO RESIDENTIAL PAY AS YOU SAVE® PROGRAM ONLY (Cont'd.)

Owners Agreement - A separate required document indicating the owner's obligations (if Participant is not the building owner).

Project - Scope of work determined by the Program based on home characteristics, program data collection, and analysis.

Qualifying Project - Project scope of work meeting Program criteria (Project cost, including Program Partner pricing, Program fees, and interest, is equal to or less than 80% of the estimated post upgrade cost savings from all major fuel sources, over 80% of the upgrade Estimated Life).

Service Charge - Monthly charge assigned to the premises recovering Program costs for upgrades, fees, any required taxes, cost of capital for financing of three percent (3%), or costs for customer-caused repairs as described in section 4.

AVAILABILITY

The Program is available to qualifying customers receiving service under the Residential Service Rate up to the financed amounts.

In order to qualify as a Participant, customers must either own the building or the building owner must sign an Owner Agreement agreeing to not remove or damage the upgrades, to maintain them, and to provide Property Notice of the benefits and obligations associated with the upgrades at the location to the next owner or customer before the sale or rental of the property.

Projects that address upgrades to existing buildings deemed unlikely to be habitable or to serve their intended purpose for the duration of Company's cost recovery will not be approved unless repairs are made by the building owner that will extend the life through the Company's cost recovery period. If a building is a manufactured home, it must be built on a permanent foundation and fabricated after 1982 to be eligible.

PROGRAM DESCRIPTION

The Company will hire a Program Administrator to implement this Program. The Program Administrator will provide the necessary services to effectively implement the Program.

1. Participation: To become a Participant in the Program, a customer must: 1) request from the Company an analysis of qualifying upgrades, 2) sign the Efficiency Upgrade Agreement and implement any Qualifying Project that does not require an upfront payment from the Participant as described in section 2(c).

Residential Pay As You Save® Program (Cont'd.)

PROGRAM DESCRIPTION (Cont'd.)

1. Participation: (Cont'd.)
 - a. The owner must agree to have a Property Notice attached to their property records through either i) Owners Agreement if the Participant is not the owner or ii) as part of the Efficiency Upgrade Agreement if the Participant is the owner.
 - b. Failure to obtain the signature on the Property Notice form, of a successor customer who is renting the premises or a purchaser, indicating that the successor customer received Property Notice will constitute the owner's acceptance of consequential damages and permission for a tenant or purchaser to break their lease or sales agreement without penalty.
 - c. The customer authorizes the use of energy usage history (from the utility or utilities of all major fuel sources) by the Program Administrator in order to true up its energy analysis and determine qualifying recommendations.
2. Energy Efficiency Plans: The Company will have its Program Administrator or Program Partner perform an assessment and prepare a Plan identifying recommended upgrades to improve energy efficiency and lower energy costs.
 - a. **Net savings:** Recommended upgrades shall be limited to those where the annual Service Charge, including program fees and applicable charges for capital, are no greater than 80% of the estimated annual savings to a participating customer based on current retail rates for all major fuel sources, including electric and propane savings as well as natural gas.
 - b. In cases of co-delivery, program administration costs and financed project costs will be allocated to the natural gas and electric budgets, respectively.
 - c. **Copay option:** In order to qualify a Project that does not meet the criteria for a Qualifying Project, customers may agree to pay the portion of a Project's cost that prevents it from qualifying for the Program as an up-front payment to the Program Partner. Company will assume no responsibility for such up-front payments to the Program Partner.
3. Analysis fee: The Company will not recover Analysis fee costs from participants through a Service Charge. Analysis fee costs will be treated as Program Administrative costs.

GAS SERVICE

Applying to MISSOURI SERVICE AREA

Residential Pay As You Save® Program (Cont'd.)

PROGRAM DESCRIPTION (Cont'd.)

4. **Service Charge:** The Company will recover the costs for its investments including any fees as allowed in this tariff through a monthly Service Charge assigned to the premises where upgrades are installed and paid by the current Participant or any future successor occupying that location until all Company costs have been recovered. The Service Charge will also be set for a duration not to exceed the greater of i) the length of a full parts and labor warranty or ii) 80 percent (80%) of the estimated life of the upgrades, and in no case longer than twelve years, except in cases discussed in section 4. The Service Charge and duration of payments will be included in the Efficiency Upgrade Agreement.
 - a. **Cost Recovery:** No sooner than 45 days after approval by the Company or its Program Administrator, the Participant shall be billed the monthly Service Charge as determined by the Program. The Company will bill and collect the Service Charge until cost recovery is complete except in cases discussed in section 4. Prepayment of Service Charges will not be permitted.
 - b. **Eligible Upgrades:** All upgrades must have Energy Star certification, if applicable.
 - c. **Ownership of Upgrades:** During the period of time when the Service Charge is billed to customers at locations where upgrades have been installed, the Company will retain ownership of the installed upgrades. Upon completion of the cost recovery, ownership will be transferred to the building owner.
 - d. **Maintenance of Upgrades:** Participating customers and building owners (if the customer is not the building owner) shall keep the installed upgrades in place, in working order, and maintained per manufacturer's instructions for the duration of the cost recovery. Participating customers shall report the failure of the installed upgrades to the Program Administrator or Company as soon as possible. If an upgrade fails, the Company is responsible for determining its cause and for repairing the equipment in a timely manner. If the owner, customer, or occupants caused the damage to the installed upgrades, they will reimburse the Company as described in section 4.
 - e. **Termination of Service Charge:** Once the Company's cost recovery is complete, Company will discontinue the Service Charge, except as described in section 4(g).

4. Service Charge: (Cont'd.)

- k. **Repairs:** (Cont'd.) effectively, the Company will waive remaining Service Charges. If the Company determines the occupant or building owner, as applicable, did damage or fail to maintain the upgrades in place as described in section 4(d), it will seek to recover all costs associated with the installation, including any fees, incentives paid to lower Project costs, and legal fees. The Service Charge will continue until Company's cost recovery is complete as long as the upgrades continue to function. Company will not guarantee perfect operation of installed upgrades in every circumstance, and any suspension or waiver of unbilled Service Charges shall not entitle the Participant or owner to any refund or cancellation of previously billed Service Charges.

MISSOURI ENERGY EFFICIENT NATURAL GAS EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS

APPLICATION

The Missouri Energy Efficient Natural Gas Equipment and Building Shell Measure Rebate Programs (Program) is designed to encourage more effective utilization of natural gas by encouraging cost effective energy efficiency improvements through the replacement of less efficient natural gas equipment with high efficient ENERGY STAR® Qualified natural gas equipment and other high efficiency equipment and building shell measures.

Rebates are being offered on a limited basis for a portion of the cost of Measures purchased by Participants.

DEFINITIONS

ACH - Air Changes per Hour: ACH represents how many times per hour the air volume inside the living space is naturally replaced by outside air due to air leaks. ACH measurements vary according to the "air-tightness" of the building shell.

Administrator - Company will administer the Program through a contractor experienced in energy efficiency rebate programs.

AFUE - Annual Fuel Utilization Efficiency: Energy efficiency rating measure determined, under specific testing conditions, by dividing the energy output by the energy input. It is a measure of the heat actually delivered by a furnace to the structure compared to the heat potential in amount of fuel supplied to the furnace. For example, a furnace that has a 92% AFUE rating converts 92% of the fuel supplied as heat to the structure - the other 8% is lost as exhaust. This information is available on every furnace sold in the United States.

CUSTOM REBATE - The rebate program will make available custom rebates to low income multifamily properties for the installation of any natural gas related energy efficiency improvement that does not qualify for a prescriptive rebate. The maximum allowable rebate per customer is \$25,000.

EEAG - Energy Efficiency Advisory Group: Includes representatives from the Company, the Commission Staff, Office of the Public Counsel (OPC), and the Division of Energy. The EEAG will function as an advisory group for this Program.

Applying to MISSOURI SERVICE AREA

*** MISSOURI ENERGY EFFICIENT NATURAL GAS
EQUIPMENT REBATE PROGRAM**

APPLICATION:

The Missouri Energy Efficient Natural Gas Equipment Rebate Program (Program) is designed to encourage more effective utilization of natural gas by encouraging energy efficiency improvements through the replacement of less efficient natural gas equipment with high efficient ENERGY STAR® Qualified natural gas equipment and other high efficiency equipment and measures.

Rebates are being offered on a limited basis for a portion of the cost of ENERGY STAR® Qualified programmable thermostats, residential ENERGY STAR Qualified natural gas furnaces, and commercial ENERGY STAR Qualified natural gas utilization equipment, as well as other high efficiency equipment and measures, purchased by Participants. Company's participation in such financial incentives is limited to the Program Funding (Funds) allocated for that purpose by the Residential and Commercial Energy Efficiency Collaboration (RCEEC) pursuant to the Stipulation and Agreement approved by the Missouri Public Service Commission in Case No. GR-2007-0003.

DEFINITIONS:

Administrator - Company will administer the Program.

Participant - A customer, who is being served under either the Company's Residential or General Service natural gas rate class, is located in Missouri and elects to purchase energy efficient gas saving equipment as described in the Measures. For purposes of receiving rebates under this Program, a Participant is defined as a person, firm, organization, association, corporation, or other entity that implements Measure(s), submits Rebate Form and documentation.

Retailer - Any retailer which has agreed to sell ENERGY STAR® Qualifying or other high efficient natural gas equipment, or provider of energy efficiency services, associated with the Measures.

AFUE - Annual Fuel Utilization Efficiency: Energy efficiency rating measure determined, under specific testing conditions, by dividing the energy output by the energy input. It is a measure of the heat actually delivered by a furnace to the structure compared to the heat potential in amount of fuel supplied to the furnace. For example, a furnace that has a 92% AFUE rating converts 92% of the fuel supplied as heat to the structure - the other 8% is lost as exhaust. This information is available on every furnace sold in the United States.

*VOLUNTARY ELECTRONIC BILL
RENDERING AND PAYMENT PROGRAM1. AVAILABILITY

This program will be made available on a voluntary basis to customers who are billed under the Company's Residential Service Rate or General Service Rate provided customer has access to a personal computer and the Internet.

2. GENERAL DESCRIPTION

Subject to program participant's affirmative election, this program will permit the Company to deliver to program participants, including participants in the Company's Budget Bill Plan, an electronic image of a bill through the use of the Internet, instead of mailing or hand delivery of a bill. The Company has partnered with CheckFree Corporation to allow participants in the program the option of viewing and paying their monthly energy bills via the Internet. Under this voluntary program, qualified customers with access to a personal computer and the internet will enroll with CheckFree Corporation. As part of the enrollment process, the customer will choose a login identification number and a password as a means to prevent others from viewing the customer's bills. The customer will also agree to certain terms and conditions of CheckFree as set forth in the enrollment material.

Company will provide the customer's account data to CheckFree, which will in turn format this data into a bill layout that closely resembles the customer's current paper bill. CheckFree will then present the bill to the customer via the Internet. CheckFree will also provide the customer a means to pay the bill via the Internet. However, customers may continue to pay the bill via all payment options available to those not participating in the program

3. CUSTOMER COST

Neither the Company nor CheckFree will require the customer to pay any fee for participation in this program.

4. TERM

Customers may terminate participation in this program at any time.

**MISSOURI ENERGY EFFICIENT NATURAL GAS
EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS (cont'd)**

DEFINITIONS (cont'd)

ENERGY STAR® - A voluntary labeling program designed to identify and promote energy efficient products to reduce energy expenses and greenhouse gas emissions. ENERGY STAR® is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy.

Measure - The replacement of less efficient natural gas equipment with high efficient ENERGY STAR® Qualified natural gas equipment and other high efficiency equipment and building shell measures.

Participant - A customer who is being served under either the Company's Residential or General Service natural gas rate class, is located in Missouri, and elects to either purchase or agrees to receive energy efficient gas saving equipment as described in the Measures. For purposes of receiving rebates under this Program, a Participant is defined as a person, firm, organization, association, corporation, landlord, contractor or other entity that implements Measure(s) and submits a rebate form(s) and documentation.

Qualified Auditor - A nationally recognized contractor trained in natural gas equipment utilization systems and commercial and/or residential structures as an integrated whole building system. Residential training, certification, and accreditation are provided by the Building Performance Institute (BPI) and Residential Energy Services Network's (RESNET®). Commercial training and certification are provided by nationally-respected energy auditor certification organizations. Approved Energy Auditors are found by calling the Company at 1-800-552-7583 or on the internet at <http://www.ded.mo.gov/asp/energy/auditors.htm> or <http://www.bpi.org/locator-tool/find-a-contractor>.

Rebate Range Sheet - The list of Measures to be offered to Participants along with the minimum and maximum rebate level permitted for each Measure.

Retailer - Any retailer which has agreed to sell ENERGY STAR® Qualifying or other high efficient natural gas equipment, or provider of energy efficiency services, associated with the Measures.

AVAILABILITY

The Program is voluntary. A Participant may receive rebates, for the quantities listed for each Measure, each calendar year. Rebates must be redeemed through the Administrator. High Efficiency and ENERGY STAR® Equipment availability may vary by each Participating Retailer throughout the Company's territory.

Residential rebates apply only to Residential customers, or their landlords purchasing Measures listed as Residential in the Rebate Range Sheet.

UNION ELECTRIC COMPANY GAS SERVICE

Applying to MISSOURI SERVICE AREA

**MISSOURI ENERGY EFFICIENT NATURAL GAS
EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS (cont'd)**

AVAILABILITY (cont'd)

General Service rebates apply only to General Service customers purchasing Measures listed as Business in the Rebate Range Sheet.

Program details regarding the interaction between the Company or Program Administrators and Participants in the Program, such as available Measures, Measure ranges, availability of the Program, eligibility, and application and completion requirements may be adjusted through the change process as presented below. Those details, additional details on each Measure, and other details such as process flows, application instructions, and application forms will be provided on the Company's website AmerenMissouri.com/naturalgas, or by calling toll free 1-800-552-7583

CHANGE PROCESS

The change process is applicable to changes in a Measure detail regarding the interaction between the Company or Program Administrators and Participants in the Measures.

1. Identify need for Measure detail change regarding the interaction between the Company or Program Administrators and Participants in the Measures;
2. Discuss proposed change with implementer;
3. Analyze impact on Program and portfolio (Cost effectiveness, goal achievement, etc.);
4. Inform the Staff, Office of the Public Counsel, and the Missouri Department of Economic Development - Division of Energy (DE) of the proposed change, the time within which it needs to be implemented, provide them the analysis that was done and consider recommendations from them that are received within the implementation timeline (the implementation timeline shall be no less than five business days from the time that the Staff, Office of the Public counsel, and the DE are informed and provided the above-referenced analysis);
5. Take timely received recommendations into account and incorporate them where the Company believes it is appropriate to do so;
6. Notify and train customer contact personnel (Contact Center, Energy Advisors, Business Center, Key Account Executives, Customer Service Advisors) of the changes;
7. Make changes to forms and promotional materials;
8. Update Program website;
9. Provide updated web pages and, if appropriate, updated list of Measures and rebate amounts to Staff; and
10. Inform Participants, Trade Allies, etc. Company will also continue to discuss and provide information on ongoing Program and portfolio progress at quarterly regulatory stakeholder update meetings.

EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS (cont'd)**

The terms of the rebate(s) are as follows:

***Residential Measures**

- 1) Equipment: Thermostat - purchase and installation of one (1) unit.
Rated: Programmable.
Rebate: Twenty five dollars (\$25) or 50% of the equipment cost, whichever is lower.
- 2) Equipment: Natural Gas Furnace (Tier 1) - purchase and installation of one (1) unit.
Rated: High efficiency AFUE rated 92% to 95.9%.
Rebate: Owner Occupied: One hundred and fifty dollars (\$150).
Landlord: Two hundred dollars (\$200). The rebate for a landlord under this program is considered a pilot. This pilot will allow a landlord to receive a maximum of ten (10) rebates for this measure per year or 10% of their total number of rental units, whichever is higher.
Term: This rebate will end when the new DOE standard takes effect.
- 3) Equipment: Natural Gas Furnace (Tier 2) - purchase and installation of one (1) unit.
Rated: High efficiency AFUE rated 96% or higher.
Rebate: Owner Occupied: Two hundred and fifty dollars (\$250).
Landlord: Three hundred dollars (\$300). The rebate for a landlord under this program is considered a pilot. This pilot will allow a landlord to receive a maximum of ten (10) rebates for this measure per year or 10% of their total number of rental units, whichever is higher.
Term: This rebate will end when the new DOE standard takes effect.
- 4) Equipment: Natural Gas Boiler (Tier 1) - purchase and installation of one (1) unit.
Rated: ENERGY STAR® Qualified high efficiency AFUE rated from 85-89.9%.
Rebate: Owner Occupied: One hundred dollars (\$100).
Landlord: One hundred fifty dollars (\$150). The rebate for a landlord under this program is considered a pilot. This pilot will allow a landlord to receive a maximum of ten (10) rebates for this measure per year or 10% of their total number of rental units, whichever is higher.

Applying to MISSOURI SERVICE AREA

MISSOURI ENERGY EFFICIENT NATURAL GAS EQUIPMENT REBATE PROGRAM (cont'd)

- * Upon receipt of a properly completed rebate form and associated documents, the Administrator will issue a check to the Participant. The following rebates may be paid to each Participant.
- 1) Energy Star[®] rated programmable auto set back thermostats - a rebate of twenty five dollars (\$25) or 50% of the cost of the purchase of one (1) thermostat, whichever is lower.
 - 2) Residential Energy Star[®] rated natural gas furnace - a rebate of two hundred dollars (\$200) for the purchase and installation of one (1) Energy Star[®] rated furnace unit, or 50% of the cost in lieu of any rebate listed above, whichever is lower.
 - *3) Commercial Energy Star[®] rated natural gas utilization equipment - a rebate of four hundred seventy five dollars (\$475) for the purchase and installation of one (1) Energy Star[®] rated natural gas utilization equipment or 50% of the cost, whichever is lower.

PROGRAM FUNDING

- * To fulfill rebates the RCEEC has allotted total funding of one hundred thirteen thousand three hundred dollars (\$113,300).
- * The initial allocations of the Funds are as follows:
 - * Six thousand dollars (\$6,000) for Energy Star[®] rated programmable auto set back thermostats.
 - * Eighty three thousand dollars (\$83,000) for Energy Star[®] rated residential natural gas furnace installations.

MISSOURI ENERGY EFFICIENT NATURAL GAS EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS (cont'd)

CHANGES IN MEASURES OR REBATES

Company may offer the Measures contained in Company's Rebate Range Sheet. The offering of Measures not contained within Company's Rebate Range Sheet must be approved by the Commission. Not all Measures listed in the Rebate Range Sheet will be offered at all times. The actual Measures being offered, and rebates available to Participants, will be listed on Company's website, AmerenMissouri.com/naturalgas. The Measures and rebates being offered are subject to change - Participants must consult AmerenMissouri.com/naturalgas for the list of currently available Measures. The website will expressly state in conspicuous language that the Measures and rebates are subject to change.

REBATES

Each Participant will receive a rebate check from the Administrator within six (6) to eight (8) weeks after the completed Rebate Form is submitted with proper documentation. Rebate Forms, applications and protocols are available on the Company's Website AmerenMissouri.com/naturalgas or by calling Ameren Missouri at 314-342-1111 or 800-552-7583.

PROGRAM TERM

The Program will conclude on December 31, 2022 or at the time new rates go into effect as a result of a general rate proceeding, whichever occurs first. All installations of Measures must occur before the conclusion date of the Program to qualify for a rebate. All rebate forms for this Program must be submitted and post-marked not later than one month after the conclusion date of the Program.

UNION ELECTRIC COMPANY GAS SERVICE

Applying to MISSOURI SERVICE AREA

*MISSOURI ENERGY EFFICIENT NATURAL GAS
EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS (cont'd)

Residential Measures (cont'd)

- 5) Equipment: Natural Gas Boiler (Tier 2) - purchase and installation of one (1) unit.
Rated: ENERGY STAR® Qualified high efficiency AFUE rated 90% or higher.
Rebate: Owner Occupied: One hundred and fifty dollars (\$150).
Landlord: Three hundred dollars (\$300). The rebate for a landlord under this program is considered a pilot. This pilot will allow a landlord to receive a maximum of ten (10) rebates for this measure per year or 10% of their total number of rental units, whichever is higher.
- *6) Equipment: Natural Gas Tank Storage Water Heater - purchase and installation of one (1) unit greater than or equal to 20 gallons and less than or equal to 55 gallons.
Rated: High efficiency with an EF rating greater than or equal to 0.67.
Rebate: One hundred and twenty-five dollars (\$125)
- 7) Equipment: Ceiling Insulation
Rated: Customer's existing ceiling insulation must be at R19 or less as verified and documented by an insulation contractor. Customer's contractor must install to a minimum rating of R30 to a maximum of R49.
Rebate: \$0.008 x sq ft x ΔR with a maximum rebate of two hundred dollars (\$200).
- 8) Equipment: Wall Insulation
Rated: Customer's existing wall insulation must be at R0 as verified and documented by an insulation contractor. Customer's contractor must install to a minimum rating of R11.
Rebate: \$0.058 x sq ft x ΔR with a maximum rebate of four hundred dollars (\$400).
- 9) Equipment: Hot Water Measure Kit - installation of one (1) kit which may include: one (1) shower head, two (2) aerators, ten (10) feet pipe wrap.
Rated: 1.5 Gallons Per Minute (GPM)
Rebate: Measures will either be free or discounted to eligible customers, at the discretion of the Company, via at least one distribution method such as an on-line store.

Applying to MISSOURI SERVICE AREA

***MISSOURI ENERGY EFFICIENT NATURAL GAS
EQUIPMENT AND BUILDING SHELL MEASURE REBATE PROGRAMS (cont'd)**

Residential Measures (cont'd)

10) Equipment: Building Shell Measures - Residential Home Energy Audit Improvement - purchase and installation of cost effective natural gas energy saving equipment and building shell measures as recommended from a customer's energy audit performed by a Qualified Auditor which are not included in other residential natural gas measures listed in this Program.

Rated: Measures considered efficiency improvements include:

1. Ceiling Insulation
 - a. Customer's existing ceiling insulation must be R19 or less. Customer must install to a minimum of at least R30 and a maximum of R49.
2. Wall Insulation
 - a. Customer's existing wall insulation must be at R0 as verified and documented by an insulation contractor. Customer's contractor must install to a minimum rating of R11.
3. Air Sealing Measures - Reduction in ACH must be at least 0.5 ACH through measures that may include:
 - a. Window weather stripping
 - b. Door weather stripping
 - c. Switch and outlet insulation
 - d. Caulking
 - e. Foam etc.
4. Duct Sealing Measures - Reduction in CFM50 must be at least 50 CFM50
5. Hot Water Measure Kit - which may include:
 - a. Faucet aerators
 - b. Low flow shower heads
 - c. Hot water pipe wrap

*Indicates Change.
