ACCESS SERVICES

3. CARRIER COMMON LINE ACCESS SERVICE

The Telephone Company will provide Carrier Common Line Access Service (Carrier Common Line Access) to ICs in conjunction with line side and trunk side Switched Access Service.

3.1 General Description

Carrier Common Line Access provides for the use of Telephone Company common lines by ICs for access to End Users to furnish IC intrastate telecommunications service.

Carrier Common Line Access is provided where the IC obtains Telephone Company line side or trunk side Switched Access Service under this Tariff.

Premium Access is Switched Access Service other than the DNAL BSA provided to IC's under this Tariff which furnish intrastate MTS/WATS.

Nonpremium Access is Switched Access Service other than the DNAL BSA provided to IC's under this Tariff that do not furnish intrastate MTS/WATS. FGA, FGB, BSA-A and BSA-B are not offered for use in terminating FGC or BSA-C originating communications.

3.2 Limitations

- A. A telephone number is not provided with Carrier Common Line Access.
- B. Detail billing is not provided for Carrier Common Line Access.
- C. Directory listings are not included in the rates and charges for Carrier Common Line Access.
- D. Intercept arrangements are not included in the rates and charges for Carrier Common Line Access.
- E. All trunk side connections provided in the same combined access group or BSA will be limited to the same features and operating characteristics.
- F. All line side connections provided in the same combined access group or BSA will be limited to the same features and operating characteristics.
- G. WATS Access Line Service minutes switched at Telephone Company WATS Serving Offices (i.e., originating minutes for outward WATS and WATS-type services and terminating minutes for inward WATS and WATS-type services) shall not be assessed Carrier Common Line Access per minute charges.
- H. Minutes of use associated with the closed end of WATS/800 service are not subject to Carrier Common Line charges. However, when common lines are utilized for the termination of 800 NPAS, Carrier Common Line charges are applicable.

3.3 Undertaking of the Telephone Company

- (MT) A. Where the IC is provided with Switched Access Service, under other sections of this Tariff, the Telephone Company will provide the use of Telephone Company common lines by an IC for access to End Users at rates and charges as specified in Paragraph 3.8, following.
- (CP) B. Where the customer is reselling intrastate MTS/WATS, MTS-type and/or WATS-type service(s), the customer may, at the option of the customer, employ ordinary local business exchange service at generally applicable local business exchange rates under the Telephone Company General and/or Local Exchange Tariffs. Switched Access or Carrier Common Line Access charges under this Tariff will not apply for such access except as set forth in Section 6.7, and Paragraph 3.7, D., following, provided the underlying carrier that provides the MTS/WATS and/or MTS/WATS-type service(s) which are resold pays Switched Access Services charges including Carrier Common Line Access charges for the services which are resold. Such Switched Access Service and Carrier Common Line Access charges paid shall include charges for origination and termination of calls on both ends of the services which are resold. If the customer wishes to obtain special arrangements such as trunk side service connections for such resale, the customer may, at the option of the customer, obtain Switched Access Service under this Tariff as set forth in Section 6, following. Carrier Common Line Access charges will apply for such access as set forth in Paragraph 3.7, D., following.
- (CT) C. When access to the local exchange is required to provide an MTS/WATS-type service using a resold Private Line Service, Switched Access Service Rates and Regulations, as set forth in Section 6, following, will apply. Carrier Common Line Access rates and charges as set forth in paragraph 3.8, following, apply in accordance with the regulations as set forth in Paragraph 3.7, F., following.
- (CT) D. Where a multiline hunt group or trunk group arrangement is made up of (1) Feature Group A, B or D Switched Access Service and (2) local exchange business lines or other access arrangements associated with MTS/WATS, MTS-type or WATS-type services as provided in Paragraph 3.3, B., preceding, Carrier Common Line Access Charges for such combined access arrangements are calculated in accordance with the regulations in Paragraph 3.7, D., following.

3. CARRIER COMMON LINE ACCESS SERVICE-(Continued)

3.4 Obligations of the IC-(Continued)

F. Where Operator Trunk-Coin or Combined Coin and Non-Coin or Operator Trunk-Full Feature Optional Features for sent-paid pay telephone access is provided to the IC and the IC wishes to receive the monies it is due for the monies collected by the Telephone Company from coin pay telephone stations, the IC shall furnish to the Telephone Company at a location specified by the Telephone Company, The IC message call detail for the IC sent-paid (coin) pay telephone calls in accordance with the Telephone Company collection schedule. The IC message call detail furnished shall be in a standard format establishment by the Telephone Company. If no IC message call detail is received from the IC for each bill period established by the Telephone Company, the Telephone Company will assume there were no IC sent-paid (coin) pay telephone calls for the period. In addition, the IC shall furnish a schedule of its charges for sent-paid (coin) calls to the Telephone Company at a location and date as specified by the Telephone Company. Any change in the IC's schedule of charges shall be furnished to the Telephone Company one day after the change becomes effective.

(FC) G. Customers ordering non-joint provided 800 Access Service must provide to the Telephone Company a percent Intrastate-IntraLATA Carrier Common Line report as specified in Section 6, Paragraph 6.9.1, following, for proper rate application of Carrier Common Line charges.

ACCESS SERVICES

3. CARRIER COMMON LINE ACCESS SERVICE-(Continued)

3.4 Obligations of the IC-(Continued)

- F. When the IC uses a line side or trunk side Switched Access Service provided under this Tariff in association with the resale of an IC service that is provided through the use of Dedicated Access Line Service provided under this Tariff (i.e., resale of WATS), the IC will be charged the Carrier Common Line Access Charges in accordance with the regulations as set forth in Paragraph 3.7, D., following, if it reports the following data. The IC shall report the line side or trunk side Switched Access Services involved, the number of resold Dedicated Access Line Services with 2,500 access minutes or more per month, and the IC terminal locations involved as set forth in Section 6, Paragraph 6.7.3, A., B. and C., following.
- G. When the IC uses a Switched Access Service to furnish a service which is defined by the appropriate Regulatory Commission to be an exchange service, the IC may apply for credit to its monthly transitional charges in accordance with the regulations as set forth in Paragraph 3.7, E., following, by reporting the originating and terminating access minutes that both originate and terminate in the same local calling area. The local calling area is determined as set forth in Telephone Company General and/or Local Exchange Service Tariffs and is a geographical area associated with an exchange within which calls may be made without MTS charges. The IC shall report the access minutes for credit on a calendar-month basis, the name of the service and the Regulatory Commission which defines the service as an exchange service.
- H. When the IC notifies the Telephone Company that Switched Access Service is to be used as set forth in Paragraphs 3.4, D., F. and G., preceding, and Paragraph 6.7.3, following, the notification automatically authorizes the Telephone Company the right to audit the IC terminal locations to verify the use of facilities as the IC has reported in Paragraphs 3.4, D., F. or G., preceding, or Paragraph 6.7.3, following, and all of the records, workpapers and backup documentation for each report as set forth in Paragraphs 3.4, D., F. or G., preceding, or Paragraph 6.7.3, following, and contact and review the records of other entities involved to verify the data the IC reports is accurate. All of the records, workpapers and backup documentation for each report furnished to the Telephone Company as set forth in Paragraphs 3.4, D., F. or G., preceding, or Paragraph 6.7.3, following, shall be available for one year from the date of the report and shall be made available during normal business hours at an IC location in the involved LATA upon reasonable request by the Telephone Company in order to permit a review by the Telephone Company auditor or outside auditor under contract to the Telephone Company. 3.5 Payment Arrangements

- A. The Telephone Company will bill the Carrier Common Line Access. The bill day (i.e., the billing date of the bill) in a month for each IC account will be established by the Telephone Company. Payment is due from the IC 31 days after the bill day date (payment date) or by the next bill date (i.e., same date in the following month as the bill date), whichever is the shortest interval, and is payable in immediately available funds. If such payment date is a Saturday, Sunday or holiday (i.e., New Year's Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day, the second Tuesday in November, and a day when Washington's Birthday, Memorial Day or Veteran's Day is legally observed), payment will be due from the IC as follows: If the payment date falls on a Saturday, Sunday or on a holiday which is observed on a Monday, the payment date shall be the first non-holiday day following such Saturday, Sunday or holiday.
- B. Further, if any portion of the Carrier Common Line Access payment is received by the Telephone Company after the payment date as set forth in Paragraph 3.5, A., preceding, or if any portion of the Carrier Common Line Access payment is received by the Telephone Company in funds which are not immediately available to the Telephone Company, then a late-payment penalty shall be due to the Telephone Company. The late-payment penalty shall be the portion of the Carrier Common Line Access payment not received by the payment date times a late factor. The late factor shall be the lesser of:
1. The highest interest rate (in decimal value) which may be levied by law for commercial transactions, compounded daily for the number of days from the payment date to and including the date that the IC actually makes the payment to the Telephone Company, or
 2. 0.000590 per day, compounded daily for the number of days from the payment date to and including the date that the IC actually makes the payment to the Telephone Company.
- (CR)
- C. In the event a billing dispute concerning a month's Carrier Common Line Access billed to the IC by the Telephone Company is resolved in favor of the Telephone Company, any payments withheld pending settlement of the dispute shall be subject to the late-payment penalty set forth in Paragraph 3.5, B., preceding. If the customer disputes the bill on or before the payment date, and pays the undisputed amount on or before

3. CARRIER COMMON LINE ACCESS SERVICE-(Continued)

3.6 Payment of Coin Sent-Paid Monies

The Telephone Company will collect the monies from coin pay telephone stations and will determine and remit amounts due to an IC which is provided Operator Trunk-Coin or Combined Coin and Non-Operator Trunk-Full Feature Optional Features for sent-paid-pay-telephone-access as set forth in Section 6, following.

A. Bill Period Coin Revenue

The Telephone Company will establish a collection schedule for each coin pay telephone station and will collect the monies from the coin pay stations based on this collection schedule. The monies collected based on this schedule during each bill period established by the Telephone Company will be identified by coin pay telephone station and summed to develop the Bill Period Coin Revenue for each coin record day (i.e., the day a record is prepared and dated to show the amount due the IC).

B. Total IC Coin Revenue

The intrastate total IC Coin Revenue will be determined by the Telephone Company based on the IC message call detail received from the IC for each bill period and the IC's schedule of charges for sent-paid coin calls. Such total IC Coin Revenue will be developed each coin record day.

C. Recourse Adjustments

For each coin record day, the Telephone Company will subtract from the total IC Coin Revenue an amount for coin station shortages. Coin station shortages are amounts resulting from unauthorized calling at coin pay telephone stations, use of unauthorized coins (i.e., foreign coins, slugs and improper use of U.S. pennies), unauthorized removal of coins from coin pay telephone stations and coin refunds beyond the Telephone Company's control. Such amount for coin station shortages will be developed by the Telephone Company by multiplying the total IC Coin Revenue for each coin record day by a shortage factor. Such amount will be rounded to the nearest penny. The shortage factor will be determined by dividing the yearly total coin shortage amount by the yearly total coin revenue amount (i.e., total coin revenue equals the coin revenue due under exchange tariffs, state toll tariffs, and interstate toll tariffs). The total coin shortage amount and the total revenue amount will be determined by the Telephone Company through an annual special study.

On the date (payment date) determined by adding 45 days to the coin record day, the Telephone Company will remit payment to the IC for the net IC Coin Revenue.

E. Audit Provisions

Upon reasonable written notice by the IC to the Telephone Company, the IC shall have the right through its authorized representative to examine and audit, during normal business hours and at reasonable intervals as determined by the Telephone Company, all such records and accounts as may under recognized accounting practices contain information bearing upon the determination of coin revenues for which amounts may be payable to the IC. Adjustment shall be made by the proper party to compensate for any errors or omissions disclosed by such examination or audit. Neither such right to examine and audit nor the right to receive such adjustment shall be affected by any statement to the contrary, appearing on checks or otherwise, unless such statement expressly waiving such right appears in a letter signed by the authorized representative of the party having such right and delivered to the other party.

All information received or reviewed by the IC or its authorized representative is to be considered confidential and is not to be distributed, provided or disclosed in any form to anyone not involved in the audit, nor is such information to be used for any other purpose.

3.7 Rate Regulations

A. The transitional charges will be billed per access minute to each IC Switched Access Service provided under this Tariff in accordance with the regulations as set forth in Paragraph 3.7, following.

B. The access minutes which are used to determine the transitional charges will be accumulated using call detail recorded by Telephone Company equipment, except as set forth in Paragraph 3.7, C., following, the FGC, BSA-C and operator and TSPS call detail such as pay telephone sent-paid.

D. Resold Services

1. Scope

Where the customer is reselling MTS and/or MTS-type service(s) on which the Carrier Common Line and Switched Access charges have been assessed, the customer may, at the option of the customer, obtain Feature Group A, Feature Group B or Feature Group D Switched Access Service under this tariff as set forth in Section 6 following for originating and/or terminating access in the local exchange. Such access group arrangements whether single lines or trunks or multiline hunt groups or trunk groups will have Carrier Common Line Access charges applied as set forth in Paragraph 3.8 following in accordance with the resale rate regulations set forth in Paragraph 4, following. For purposes of administering this provision:

Resold intrastate terminating MTS and MTS-type service(s) shall include collect calls, third number calls and credit card calls where the reseller pays the underlying carrier's service charges; and shall include interstate minutes of use.

Resold intrastate originating MTS and MTS-type service(s) shall not include collect, third number, credit card or interstate minutes of use.

2. Customer Obligations Concerning the Resale of MTS and MTS-type Services

When the customer is reselling MTS and/or MTS-type service as set forth in Paragraph 1, preceding, the customer will be charged Carrier Common Line Access charges in accordance with the resale rate regulations as set forth in Paragraph 4, following, if the customer or the provider of the MTS service furnishes documentation of the MTS usage and/or the customer furnishes documentation of the MTS-type usage. Such documentation supplied by the customer shall be supplied each month and shall identify the involved resold MTS and/or MTS-type services.

The monthly period used to determine the minutes of use for resold MTS and/or MTS-type service(s) shall be the most recent monthly period for which the customer has received a bill for such resold service(s). This information shall be delivered to the Telephone Company, at a location specified by the Telephone Company, no later than 15 days after the bill date shown on the resold MTS and/or MTS-type service bill. If the required information is not received by the Telephone Company, the previously reported information, as described preceding, will be used for the next two months. For any subsequent month, no allocation or credit will be made until the required documentation is delivered to the Telephone Company by the customer.

D. When the customer orders a combined access group to be used in conjunction with the resale of MTS/WATS and/or MTS/WATS-type services as set forth in Paragraph 3.3, D., preceding, subject to the limitations of Carrier Common Line as set forth in Paragraph 3.2, preceding, and the Telephone Company receives the usage information required to calculate the proration of Carrier Common Line as set forth in Paragraph 3.4, F., preceding, the customer will be billed as set forth in Paragraph 1., following. When more than one combined access group is provided in a LATA, the Telephone Company will apportion the resold MTS/WATS and/or MTS/WATS-type services and originating minutes of use among the combined access groups. Such apportionment will be based on the relationship of the originating usage for each combined access group to the total originating usage for all combined access groups in the LATA. The involved resold minutes shall be only intrastate outward MTS, MTS-type, WATS and WATS-type minutes and shall not include collect, third number, credit card or interstate minutes of use.

In order for the rate regulations to apply as set forth in Paragraph 1, following, the combined access group and the resold MTS/WATS and/or MTS/WATS-type services must be provided in the same state in the same LATA, provided by the same Telephone Company and connected directly or indirectly. For those LATAs that have more than one state, the customer shall report the information by state within the LATA.

Each of the combined access groups arranged in a multiline hunt group or trunk group arrangement used by the customer in association with the resold MTS/WATS and/or MTS/WATS-type services must be connected either directly or indirectly to the customers' designated premises at which the resold MTS/WATS and/or MTS/WATS-type services are terminated. Direct connections are those arrangements where the combined access groups and resold MTS/WATS and/or MTS/WATS-type services are terminated at the same customers' designated premises. Indirect connections are those arrangements where the combined access groups and resold MTS/WATS and/or MTS/WATS-type services are terminated at different customer designated premises in the same LATA. Such different customer designated premises are connected by facilities that permit a call to flow from combined access groups to resold MTS/WATS and/or MTS/WATS-type services.

The Telephone Company will apportion the resold originating MTS and/or MTS-type services and originating minutes of use for which the resale credit adjustment applies, among the access groups. Such apportionment will be based on the relationship of the originating usage for each access group to the total originating usage for all access groups in the LATA. For purposes of administering this provision:

Resold originating MTS and/or MTS-type services minutes shall be only those attributable to intrastate originating MTS and/or MTS-type minutes and shall not include collect, third number, credit card or interstate minutes of use.

ACCESS SERVICES

3. CARRIER COMMON LINE ACCESS SERVICE-(Continued)

(CP) 3.7 Rate Regulations-(Continued)

D. (Continued)

The adjustments as set forth following will be computed separately for each combined access group.

1. Combined Access Groups

When combined access groups are provided in a LATA, the following regulations apply:

- a. One intrastate MTS/WATS-type Feature Group A Switched Access Service for each resold intrastate WATS and WATS-type service reported as set forth in Paragraph 3.4, F., preceding, and Paragraphs d. and e., following, will be billed local business exchange service rates as set forth in Paragraph 6.7.3, B.1.a., following.
- b. For MTS/WATS-type Feature Group A provided in a combined access group, the minutes billed will be all the terminating intrastate access minutes and any adjusted originating intrastate access minutes for such combined access groups. The adjusted originating minutes billed will be the originating intrastate access minutes less the reported resold service(s) originating minutes of use.

ACCESS SERVICES

3. CARRIER COMMON LINE ACCESS SERVICE-(Continued)

CP) 3.7 Rate Regulations-(Continued)

D. (Continued)

1. Combined Access Groups-(Continued)

c. Any trunk side Switched Access Service provided on Switched Access Service charges as set forth in Paragraph 6.7.3; B.1.b., following. Carrier Common Line charges will be billed on all the terminating intrastate access minutes and any adjusted originating minutes (i.e., originating minutes less the reported resold service(s) minutes of use).

d. For the first month a combined access group is in service, each associated resold WATS and WATS-type service will be assumed to have 2500 or more originating intrastate minutes of use.

e. After the first month that both the combined access group and the associated resold WATS and WATS-type services are in service, each resold WATS and WATS-type service shall have 2500 or more originating intrastate minutes of use per month on average. If the average originating intrastate usage per service for each resold WATS or WATS-type service group does not equal 2500 originating minutes of use in any month, then for combined access billing purposes, the number of WATS and WATS-type services for which local business exchange service rates will be applicable will be reduced until the average originating intrastate usage per month for the remaining services equals or exceeds 2500 originating intrastate minutes. The number of originating minutes per month per resold WATS and WATS-type service will be developed by adding the resold outward MTS and MTS-type minutes to the resold originating WATS and WATS-type minutes and dividing the resulting sum per service group by the number of services in the group.

2. The adjustment as set forth in Paragraph 1., preceding, will be made to the involved customer account no later than either the next bill date, or the one subsequent to that, depending on when the usage report is obtained.

3. When the resold service(s) usage is shown in hours, the number of hours shall be multiplied by 60 to develop the associated WATS-type and WATS minutes of use. If the resold service(s) usage is shown in a unit that does not show hours or minutes, the customer shall provide a factor to convert the shown units to minutes.

ACCESS SERVICES

3. CARRIER COMMON LINE ACCESS SERVICE-(Continued)

3.7 Rate Regulations-(Continued)

E. (Continued)

Common Line Access access minutes developed by the Telephone Company for the IC account involved will be reduced by the exchange minutes of use reported by the IC. If the Telephone Company determines the reported exchange minutes are not accurate, no adjustment will be made until a new report properly stating the exchange minutes is delivered to the Telephone Company by the IC. The access minutes, adjusted as set forth in this paragraph or any other section of this Tariff, that are billed to the IC in a monthly period shall not be less than zero.

This adjustment will be made to the involved IC account prior to making the adjustments to the IC account as set forth in Paragraphs 3.7, D., preceding, and Paragraph 3.7, F., following.

F. When the IC reports interstate and intrastate use of in-service Switched Access Service, the Carrier Common Line Access access minutes will be adjusted as follows. The Carrier Common Line Access access minutes developed by the Telephone Company will, after adjustment as set forth in Paragraph 3.7, E., preceding, when necessary, be multiplied by the intrastate percentage reported by the IC as set forth in Section 2, Paragraph 2.3.14. The result will, after adjustment as set forth in Paragraph 3.7, D., preceding, when necessary, be used to determine the Carrier Common Line Charges as set forth in Paragraph 3.7, G., following.

G. After the adjustments as set forth in Paragraphs 3.7, D., E. and F., preceding, have been applied, when necessary, to the Carrier Common Line Access access minutes, the charges for the involved IC account will be determined as follows:

1. The access minutes for a Premium Access Carrier will be multiplied by the transitional charge as set forth in Paragraph 3.8, following, to determine the charges.

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE

5.1 General

This Section sets forth the regulations and order-related charges for Access Orders for Switched and Special Access Services. These charges are in addition to other applicable charges as set forth in other sections of this Tariff.

An Access Order is an order to provide the IC with Switched Access Service or Special Access Service or to provide changes to existing services.

5.1.1 Ordering Conditions

A customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

The customer shall provide all information necessary for the Telephone Company to provide and bill for the requested service. In addition to the order information required in Paragraph 5.2, following, the customer must also provide:

- Customer name and premises address(es).
- Billing name and address (when different from customer name and address).
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

The Telephone Company will establish a service date when the customer has provided an Access Order that contains the information as required for each respective service described in this and other sections of the tariff. The date on which the service date is established is considered to be the Application Date. The Telephone Company will provide a firm order confirmation to the customer and will advise the customer of the application Date and the Service Date.

Orders for FGA and BSA-A Switched Access Service must be in multiples of 30 busy-hour minutes of capacity.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE

5.1 General

This Section sets forth the regulations and order-related charges for Access Orders and Planned Facilities Orders for Switched and Special Access Services. These charges are in addition to other applicable charges as set forth in other sections of this Tariff.

An Access Order is an order to provide the IC with Switched Access Service or Special Access Service or to provide changes to existing services. A Planned Facilities Order is an order to make facilities available on an established activation date for an IC's future Access Service needs.

For purposes of ordering Access Service, an End User who orders Access Service will be considered to be an IC and will be required to provide the same information that a non-End User IC must provide when placing an order.

5.1.1 Ordering Conditions

An IC may order any number of services of the same type (e.g., Feature Group, interface group, facility type, etc.) between the same locations (i.e., the IC terminal location and end office, Hub or End User's premises) on a single Access Order or Planned Facilities Order.

The IC shall supply all the necessary information to provide service, e.g., IC name and terminal location, End User's name and location, facility interface, etc. All details for a particular order must be identical except for those for multipoint services. The minimum order requirements are set forth in Paragraphs 5.2 and 5.4, following.

Orders for Feature Group A Switched Access Service must be in multiples of 30 busy-hour minutes of capacity.

Dedicated Access Line Special Access Service must be ordered for use with a Feature Group C or D Switched Access Service which is in service on order.

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.1 General-(Continued)

5.1.2 Provision of Other Services-(Continued)

B. With the agreement of the Telephone Company, the items listed in Paragraph A., preceding, may subsequently be added to the order at any time, up to and including the service date for the Access Service. When added subsequently, charges for a design change as set forth in Paragraph 5.2.2, C., following, will apply when an engineering review is required.

CANCELLED

C. Additional Engineering is not an ordering option, but will be applied to an Access Order when the Telephone Company determines that Additional Engineering is necessary to accommodate a customer's request. Additional Engineering will only be required as set forth in Paragraph 13.1, following. When it is required, the customer will be so notified and will be furnished with a written statement setting forth the justification for the Additional Engineering as well as an estimate of the charges. If the customer agrees to the Additional Engineering, a firm order will be established. If the customer does not want the service or facilities after being notified that Additional Engineering of Telephone Company facilities is required, the order will be withdrawn and no charges will apply. Once a firm order has been established, the total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10 percent.

SEP 30 1991
BY R.S. 2
Public Service Commission
MISSOURI

The regulations, rates and charges for Additional Engineering are as set forth in Paragraph 13.1, following, and are in addition to the regulations, rates and charges specified in this Section.

5.1.3 Special Construction

The regulations, rates and charges for special construction are set forth in Section 14, following, and are in addition to the regulations, rates and charges specified in this Section.

5.2 Access Order

An Access Order is used by the Telephone Company to provide to an Access Service as follows:

- Switched Access Services as set forth in Section 6, following,
- Special Access Services as described in Section 7, following,
- Other Services as set forth in Paragraph 5.1.2, preceding

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.1 General-(Continued)

5.1.2 Provision of Other Services-(Continued)

B. With the agreement of the Telephone Company, the items listed in Paragraph 5.1.2, A., preceding, may subsequently be added to the order at any time, up to and including the service date for the Access Service or the activation date for the Planned Facilities. When added subsequently, charges for order modifications as set forth in Paragraph 5.2.2 or 5.4.5, following, will apply.

5.1.3 Special Construction

Special Construction as set forth in Section 14, following, is not an ordering option, but may be applied to either an Access Order or a Planned Facilities Order to accommodate an IC request. The IC will be notified that Special Construction Charges will apply. Such charges and liabilities are in addition to the regulations, rates and charges specified in this Section.

If the IC agrees to the Special Construction, a firm order will be established. If the IC does not want the service after being notified that Special Construction is required, the order will be withdrawn and no charges will apply unless the IC has requested a quotation.

CANCELLED

5.2 Access Order

An Access Order is used by the Telephone Company to provide to an IC Access Service as follows:

- Switched Access Services as set forth in Section 6, following,
- Special Access Services as described in Section 7, following, and
- Other Services as set forth in Paragraph 5.1.2, preceding.

When placing an order for Access Service, the IC must provide, at a minimum, the following information:

- For Switched Access Service, the IC must specify the number of busy-hour minutes of capacity (BHMC) from the IC terminal location to the end office by Feature Group and by type of BHMC. In addition, for Feature Group A, the IC must specify whether the ordered capacity is for foreign dial tone service, second dial tone service or switched private network service. This information is forwarded to the Circuit Administration Center (CAC) for networking design, then back to the IC for specifying the Interface Group Supervisory Signaling and Local Switching options.

Issued: DEC 29 1983

Effective: JAN 0 1 1984

By R. D. BARRON, Vice President-Missouri Southwestern Bell Telephone Company St. Louis, Missouri

No Supplement to this tariff will be issued except for the purpose of canceling this tariff.

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When placing an order for Access Service, the IC must identify itself as a certified LEC, a certificated IXC, or an ESP for the services being ordered and provide, at a minimum, the following information:

- (AT) - For the DNAL Switched Access BSA, the customer shall specify the designated customer premises, the channel interface and the line side or
- (AT) trunk side Switched Access BSA to be associated with the DNAL.
- (AT) - For FGA and BSA-A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone office). The first point of switching shall be selected in accordance with the provisions set forth in Section 2, Paragraph 2.1.2.A., and cannot be an end office served by an RSS or RSM because all traffic originating from or terminating at a remote switching office must switch through its host office. The customer shall also specify the directionality of the service, the Local Transport and Local Switching features desired. The IXCs or LECs must also specify whether the ordered lines or capacity is for FX/ONAL or MTS/WATS-type service. The customer shall also specify
- (AT) which MTS/WATS-type FGA or BSA-A lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.
- The customer shall also specify that the FX/ONAL is to be provided with an extension to a different LATA, if applicable. When such an extension is specified on the order, the customer must also specify the customer-designated premises within the LATA of the Switched Access Feature Group A
- (AT) service, at which the FGA or BSA-A extension is to be terminated.
- (AT) For FGB or BSA-B Switched Access Service, the customer shall specify the number of trunks, directionality of the service, the entry switch and the Local Transport and Local Switching features desired. The first point of switching cannot be an end office served by an RSS or RSM because all traffic originating or terminating at a remote switching office must switch through its host office. When an end office is the specified entry switch, the Telephone Company will work cooperatively with the customer to determine whether direct trunking of the service to the end office is necessary. Direct trunking to an end office will be installed when a customer orders features that can only be provided through direct trunking.

ACCESS SERVICES

5. ORDERING OPTIONS FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

- Directory Assistance Service is ordered in the same Access Service and requires the same information.
- For Special Access Service, the IC must specify the IC terminal location and End User's premises or Hub, the type of service (e.g., Narrowband 1, Voice Grade 3, High Capacity 1, etc.) and the facility interface combination. When ordering to a Hub, no interface combinations are required but Hub functions must be specified. For multipoint services, the facility interface at each End User's premises may be different, but they must all work in combination with a common facility interface at the IC terminal location.
- The IC must always specify how Special Access Service is to be used so that the Telephone Company may determine the appropriate application of the Special Access Service Surcharge. The surcharge and its applications are described in Section 7, Paragraph 7.4.2, following.
- For Dedicated Access Lines, the IC must specify the End User's premises, the type of facility (i.e., two-wire or four-wire), the type of calling (i.e., originating or terminating) and the type of supervisory signaling. When the necessary screening functions are not provided at the End User's serving wire center, the IC may specify, with the agreement of the Telephone Company, a specific foreign serving wire center where capacity exists.

5.2.1 Access Order Service Date Intervals

Access Service is provided with one of the following Service Date Intervals:

- Standard Interval
- Negotiated Interval
- Short Notice Interval

ACCESS SERVICES

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

When ordering FGB or BSA-B capacity to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements. Traffic estimates to end offices served by remote switching offices should be uniquely identified and not included in traffic estimates to the host. The traffic type must also be specified using the same categories as described in Paragraph 6.1.1, following, to enable efficient provisioning and billing functions.

For FGC, FGD, BSA-C and BSA-D Switched Access Service, the customer shall specify the number of busy-hour minutes of capacity (BHMC) from the IC terminal location to end offices (including those served by an RSS or RSM), by Feature Group or BSA and traffic type. The Telephone Company shall design and determine the routing, including the selection of the entry switch in accordance with Section 6, Paragraph 6.8.2, following. This information is used to determine the number of transmission paths as set forth in Section 6, Paragraph 6.8.5, following. The customer then specifies the Local Transport and Local Switching features.

Customers may, at their option, order FGD or BSA-D by specifying the number of trunks desired between the customer's premises and an entry switch. When ordering by trunk quantities to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements.

When a customer orders FGD or BSA-D Switched Access Service, the capacity ordered in an Access Tandem Network must be ordered in either BHMCs of trunks and cannot be mixed. When ordering FGD or BSA-D trunks with SS7 Signaling, in addition to the other information listed in Section 5, the customer shall specify the switching point codes and trunk circuit identification codes. The customer must also identify the Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service link associated with the FGD or BSA-D trunk group.

(CP)

Customers may, at their option, order FGD by specifying the number of trunks desired between the customer's premises and an entry switch. When ordering by trunk quantities to an access tandem, the Telephone Company may request an estimate of the amount of traffic the customer will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements.

When a customer orders FGD Switched Access Service, the capacity ordered in an Access Tandem Network must be ordered in either BHMCs or trunks and cannot be mixed.

(CP)

- Remote switching office to host relationships are provided to all customers by the Telephone Company. This information is contained in the Southwestern Bell End Office Profile report.

5.2 Access Order-(Continued)

When ordering FGB capacity to an access tandem, the customer must also provide the Telephone Company an estimate of the amount of traffic it will generate to and/or from each end office subtending the access tandem to assist the Telephone Company in its own efforts to project further facility requirements. Traffic estimates to end offices served by remote switching offices should be uniquely identified and not included in traffic estimates to the host. The traffic type must also be specified using the same categories as described in Section 6.1.1(E), following, to enable efficient provisioning and billing functions.

- For Feature Group C and D Switched Access Service, the customer shall specify the number of busy-hour minutes of capacity (BHMC) from the IC terminal location to end offices (including those served by an RSS or RSM), by Feature Group and traffic type. The Telephone Company shall design and determine the routing, including the selection of the entry switch in accordance with Section 6.5.2, following. This information is used to determine the number of transmission paths as set forth in Section 6.5.5, following. The customer then specifies the Local Transport and Local Switching options.
- Remote switching office to host relationships are provided to all customers by the Telephone Company. This information is contained in the Southwestern Bell End Office Profile report.

5. ORDERING FOR SWITCHED AND SPECIAL ACCESS SERVICE-(Continued)

5.2 Access Order-(Continued)

- (MT) For 900 Access Service, customers must have LATA-wide Switched Access Service and shall specify the LATAs that they wish to receive originating 900 Access Service calls from, the 900-NXX codes that are to be activated in a given LATA and the desired due date of the order. 900 Access Service calls originating in LATAs which the customer has not ordered will be blocked.
- (AT) 1+900 Access Service will be combined with either FGB, FGC, FGD, BSA-B,
- (MT) BSA-C or BSA-D Switched Access Service. The customer shall designate which FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service trunk groups are to be associated with 900 Access Service. However, when FGD or BSA-D
- (AT) Switched Access Service becomes available in an end office, 1+900 Access Service traffic originating from that end office must be provided with FGD
- (MT) or BSA-D Switched Access Service.
- (MT)
- (AT) 0+900 Access Service is available only when combined with 1+900 Access
- (AT) Service provided with FGD or BSA-D.

Information regarding 900 Access Service Screening Offices is contained in the Southwestern Bell End Office Profile report. Customers wishing to receive this report may obtain ordering information from the Reference to Technical Publications section of Southwestern Bell's Tariff, FCC No. 73.

For 800 Number Portability Access Service (NPAS), direct routing will be provided from SSP equipped end offices, i.e., end offices equipped to provide customer identification. All 800 traffic originating from end offices not equipped to provide customer identification will require routing to an access tandem where the customer identification function is available. Information regarding 800 NPAS identification function is contained in the Southwestern Bell End Office Profile report. Customers wishing to receive this report may obtain ordering information from the Reference to Technical Publications Section of Southwestern Bell Telephone Company's Interstate Tariff, FCC No. 73.

800 NPAS requires FGD or BSA-D Switched Access Service. The customer shall designate which originating FGD or BSA-D Switched Access Service trunk groups are to be associated with 800 NPAS. Calls originating from an Area of Service in which the Customer has not ordered sufficient originating FGD or BSA-D Switched Access Service will be blocked.
