SECTION 3 - DESCRIPTION OF SERVICE

3.1 Timing of Calls

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the customer uses and service options subscribed to. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when either party "hangs up."

3.2 Start of Billing

For billing purposes, the start of service is the first day on which service is available for use by the customer. The end of service date is the last day or any portion of the last day for which service was provided by Carrier.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier. Service furnished by Carrier is not part of a joint undertaking with such other carriers. Any special interface equipment of Carrier and other participating carriers shall be provided at the customer's expense.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of other carriers' tariffs. The customer is responsible for taking all necessary legal steps for interconnecting his customer-provided terminal equipment or communications systems with Carrier's. The customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

3.4 Terminal Equipment

Carrier's service may be used with or terminated in customer provided terminal equipment or customer provided communication systems, such as teleprinters, handsets, or data sets. Such terminal equipment will be furnished and maintained at the expense of the providing customer. The customer is responsible for all costs at their premises, including personnel, wiring, electrical power, and the like incurred in the use of Carrier's service. When such terminal equipment is used, the equipment shall comply with the generally accepted minimum protective criteria standards of the telecommunications industry.

3.5 Calculation of Distance

Usage charges for all intrastate calls are based on flat rates and are not mileage sensitive.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the telecommunications industry.

Formula:
$$\frac{\sqrt{(V1 - V2)^2 + (H1 - H2)^2}}{10}$$

3.6 Minimum Call Completion Rate

The customer can expect a call completion rate of not less than 99% (number of calls completed/number of calls attempted) for Feature Group D (1+) services.
