1. Availability of Facilities and Equipment

- a. The Company's obligation to furnish exchange and toll service is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary pole lines, circuits, and equipment.
- b. The installation and restoration of services shall be subject to the regulations set forth in this Tariff and the Company's Facilities for Intrastate Access Tariff, concerning the Telecommunications Service Priority (TSP) System.

2. Interruptions of Service

- a. In the event of an interruption to the service not due to the negligence or willful act of the customer or customer premises equipment, an allowance will be made if the interruption continues for more than 24 hours from the time it is reported to or detected by the Company.
- b. The allowance will be limited to the prorated portion of the monthly rate or guarantee for the service or portion thereof made inoperative. No other liability shall in any case attach to the Company in consideration of such interruptions.

3. Liability

 - 1) If the initial installation is defective or if service is interrupted otherwise than by the negligence or willful act of the customer or due to customer premises equipment, an allowance at the minimum rate for the telephone facilities and class of service at the time of the installation or interruption shall be made for the time such outage continues after notice and demand to the Company unless such outage is due to the inside wiring or customer provided equipment. - b. In the case of interruption to any interexchange service (Private Lines, WATS, etc.), allowance for message toll service used by the customer during the period of interruption, will be made at the regular message toll rates.
- c. While the Company's local exchange access line service may be used by the customer for dial-up access, the advertised speeds of the customer's modem may not be attainable with this service and are not guaranteed by the Company. The Company will assure, however, that its local exchange access lines meet the standards outlined in 4CSR 240-32.060.

4. Directory Errors and Omissions

- a. The Company's liability for damages on account of interruptions to service due to errors or omissions in directory listings will be limited to a pro rata abatement of the charge for such of the customer's service as is affected, the maximum abatement not to exceed one-half the service charges for the period from the date of issuance of the directory in which the mistake occurred to the date of issuance of a new directory containing the proper listing.

No liability shall attach to the Company by reason of any defacement or damage to the customer's premises resulting from the existence of the Company's facilities and associated wiring on such premises, or by the installation or removal thereof, unless such defacement or damage is the result of the sole negligence of the Company.

C. Use of Service and Facilities

1. Ownership and Use of Regulated Services

- a. Coin-operated, public, semi-public or pay telephone equipment, and wiring and facilities furnished by the Company to provide transmission service on the premises of a customer are the property of the Company. - a. Customer telephone service, as distinguished from public and semi-public telephone service, is furnished only for use by the customer, the customer's family, employees or business associates, or persons residing in the customer's household, except as the use of the service may be extended to persons temporarily subleasing a customer's residential premises. The Company has the right to refuse to install customer transmission service or to permit such service to remain on premises of public or semi-public character when the instrument is so located that the public in general or patrons of the customer may make use of the service. At such locations, however, transmission service may be installed, provided the instrument is so located that it is not accessible for public use.

3. Use of Party Line Service

- a. Applications for party line service are accepted by the Company with the understanding that each customer will so use the service as not to interfere with an equitable proportionate use of the service by the other customers on the same line. When the duration or number of local messages sent or received by a party line customer is so great as to prevent an equitable proportionate use of the line by other customers on the line, the Company shall have the right to require the customer to contract for a higher grade of service, or to discontinue the service of the customer in question. The Company reserves the right to limit the continuous use of a party line for a local message to five minutes.

4. Tampering with Equipment

- a. The Company may refuse to furnish or may deny transmission service to any person, firm or corporation on whose premises is located any telephone equipment owned by the Company which shows any evidence of tampering, manipulation, or operation, or use of any device whatsoever, for the purpose of obtaining telephone service without payment of the charges applicable to the service rendered.

6. Use of Profane Language, Impersonation of Another, Fraudulent Intent

7. Governmental Objections to Service

O. Post Billing Toll Block

1. General

Post Billing Toll Block (PBTB) is a process whereby the Company will initiate toll blocking on high risk accounts which have unpaid balances. A grace period will be given to the customer to respond to the toll block. This service is designed to minimize the Company's network exposure from uncollectible amounts and to act as an enhancement to the late payment treatment process. If payment is not received the normal late payment treatment process will continue. This process will be accomplished where the Company is technically capable. (C)

2. Description

a. A risk level assessment process determines customers with high risk accounts and is based as a result of either Credit Scoring for new customers or Behavioral Scoring (Company payment history) for existing customers.

1) Risk level assessment is categorized for new customers via Credit Scoring whereby the Company will be provided a credit score through the use of a third party credit reporting service. A credit score is computed on the inquiry date by utilizing a credit scoring model plus information contained in the customer's credit files. The customer's score is delivered by the National Credit Bureau at the time of service application. Credit Scoring allows the Company to assign a low, medium or high credit risk rating to all new customer accounts.

(a) A high risk level assessment is assigned to new customers having the following criteria:

- Collection judgements
- Charge (Written) off accounts
- Outstanding collection accounts
- Various degrees of delinquency history from 30-180 days, and not paid in full or current at time of scoring
