A. Description (Continued)

1. Feature Descriptions (Continued)

WISSOUR Public Service Commission

Caller ID/Calling Number

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any GREEN HILLS TELEPHONE CORP, calling party may prevent the delivery of the calling party number (CPN) to the called party by dialing an access code immediately prior to placing a call. The access code activates per call blocking. Per call blocking is available at no charge. The blocking of CPN will not be provided on calls originating from public, semi-public or customer-owned and coin operated telephone.

Per line blocking for the delivery of the calling number is available upon request, at no charge, to the following entities for lines over which the official business of the agency is conducted, where an executive officer of the agency registers a need for blocking and provides the required certification to GREEN HILLS TELEPHONE CORP. (a) private, nonprofit, tax exempt, domestic violence intervention agencies and (b) federal, state, and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation repair, and technical capability of that equipment to function in conjunction with the responsibility of the customer. The Company as the no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Customer Originated Trace

Customer Originated Trace enables the customer to initiate an activate of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. The customer is not provided the traced number.

1. Feature Descriptions (Continued)

Customer Originated Trace.

MISSOUR! Only calls from appropriately equipped and technically capable area are traceable using ission

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group, or is Telephone Number identified.

If the customer makes or receives another call after hanging up from the annoying call, prior to activating the trace, Customer Originated Trace will not record the correct number.

Selective Call Acceptance

This feature provides the customer the ability to screen incoming calls against a list of up to thirty-one subscriber-specified directory numbers and then accepts any calls only from those specified directory numbers.

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone numbers to be accepted. When a call is placed to the customer's number from a number not on the screening list, the call receives an announcement indicating that the party he is attempting to call does not wish CANCELLED to receive calls at this time.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number for the fund group, or is telephone number identified.

Selective Call Forwarding

Selective Call Forwarding allows the customer to transfer the letter than another telephone number. A screening list of up to thirty-one numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list.

If the customer also subscribes to Selective Call Rejection and the same telephone number is entered on both screening lists, the Selective Call Rejection features must be deactivated to allow the call to forward.

This feature will not work if the calling line is not referenced to and originated by the ma telephone number, or an identified telephone number that represents all the medical collection of lines such as multi-line hunt groups.

1. Feature Descriptions (Continued)

Selective Call Rejection

MISSOUR: Public Service Commission

This feature provides the customer the ability to prevent incoming calls from up to thirty-one different telephone numbers.

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time.

If the customer also subscribes to Selective Call Forwarding and/or Selective Distinctive Ringing \ Call Waiting and the same telephone numbers appear on those screening lists, Selective Call Rejection will take precedence.

This feature will not work if the incoming call is from a telephone number multi-line hunt group, unless the telephone number is the main telephone number telephone number identified.

Selective Distinctive Ringing \ Call Waiting

Selective Distinctive Ringing \ Call Waiting provides a distinctive magi subscribing customer for calls received from specific telephone number

The customer creates a screening list of up to thirty-one telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern (short, long, short). Calls from telephone numbers not included on the screening list will produce a normal ring.

If the customer subscribes to Call Waiting in Section 2 of this Tariff and a call is received from a telephone number on the Selective Distinctive Ringing \ Call Waiting screening list while the line is in use, the Call Waiting tone will also be distinctive.

When a telephone number on the Selective Distinctive Ringing \ Call Waiting screening list also appears on the Selective Call Forwarding list, the Selective Call Forwarding will take precedence. Likewise, when the same number is shown on the Selective Call Rejection list, the call will be blocked.

A customer's line will not produce a distinctive alert if the calling line is not reference originated by the main telephone number or an identified telephone number than represents all the lines in a collection of lines, such as multi-line hunt groups. APR -1 1997

| GENERAL EXCHANGE SERVICE TARIFFS MISCELLANEOUS SERVICES AND FACILITIES (CONTINUED) | APR 1 1964 |
| X. AUTOMATIC ANSWERING AND RECORDING SERVICE * I. REGULATIONS: | MISSOURI Public Service Comm. |

- The telephone company will furnish:
 - 1. Automatic answering and recording service which provides for the automatic answering of telephones, the transmission of a prepared message to the calling party and the automatic recording of a message from the calling party.
- Automatic answering and recording services are available for use with all exchange and private branch exchange stations where full selective ringing is employed. The services are not available at telephones where semi-selective or non-selective ringing is used.
- The called telephone is disconnected automatically after completion of the period provided by the equipment as follows:
 - Automatic answering and recording service disconnects after recording the incoming message.
- Since the customer and calling parties have exclusive control over the quality and characteristics of speech used in the message recorded, the telephone company has no liability for the quality of, or defects in, the recordings of such messages.
- The customer indemnifies and saves the telephone company harmless against all claims arising from the material transmitted over facilities furnished hereunder, including claims for libel, slander, fraudulent or misleading advertisements, infringement of copyright, or any other claims, and against all claims arising out of any act or omission of the customer or of the calling party in connection with facilities provided by the telephone company.
- The necessary power wiring, power outlets and commercial power for the operation of automatic answering and recording equipment are furnished by the customer, who assumes all responsibility for the safe condition of such wiring, outlets and power.
- When the general telephone service to the public is impaired by the customer's use of these answering services, the Telephone Company shall have the right to require the customer to contract for additional automatic answering and recording equipment and associated central office lines as are needed to adequately serve the customer's requirements or to discontinue the service of the customer in question

Section II

GENERAL EXCHANGE SERVICE TARIFFS RECEIVED OF GREEN HILLS TELEPHONE CORPORATION G. PRIVATE BRANCH EXCHANGE SERVICE JAN |2 0 1981 A. GENERAL MISSOURI 1. Standard Facilities Public Service Comm.

> The rates quoted herein contemplate the use of standard equipment and apply at all business and residence locations; special equipment and arrangements are furnished where practicable at charges, based on costs, determined as outlined under Miscellaneous Equipment in this Tariff.

2. Installation

Regular Service Connection Charges apply for the installation, inside moves or changes of all stations, station equipment, and trunks. Beyond the circuit limit of 250 ft., if not within the same building, the cost of labor and material is chargeable.

A three year contract is required on systems listed under B. 1 and B. 3 of this Part. A five year contract is required for systems listed under B. 2 of this Part.

3. Power Equipment

Power equipment and batteries, for equipment operation, including talking, battery and ringing current, is furnished without additional charge in connection with P.B.X., P.A.B.X.., and Dial Inter-communicating systems. A charge is made for battery equipment used in connection with Manual Inter-communicating or Key Systems. Current necessary to operate the power equipment is provided by the customer at his expense and to meet operating requirements. JAN - 1 1983

P.B.L. Systems Outside the Base Rate Area

When the private branch exchange is located butsi Rate Area, the mileage charges apply as speciffed Charges in this Tarriff.

5. Location of Stations

P.B.X., and P.A.B.X. Stations may be located at any point on the same or other premises of a customer or on the premises of the customer's agents or representatives. Stations located on premises of the customer other than those on which the switchboard is located are offered subject to the availability of circuits and to the requirement that the customer contract for such facilities as are necessary to provide standard operation and transmission.

The station rates quoted herein are for stations located on the same premises as the private branch exchange switch+ board and within 250 feet of the switchboard or main distribution terminal.

Mileage charges, as specified under Mileage Charges in this Tariff, apply in connection with each station not located within the limits set out above.

6. Operating

All operating at the customer's premises is performed at the expense of the customer and must conform with the regulations which the Telephone Company establishes as necessary in order to maintain a proper standard of service.

7. Operators Sets

Operators sets or operators telephones are provided without additional charge in connection with Cordless or Cord type private branch exchange with chboards or with Cordless or Cord type attendants cabinets used with private automatic branch exchanges. JAN = 1 1983

CONFERENCE BRIDGE SERVICE

A. Description of Service

This service allows the end-user to reserve a conference bridge located in the Company's central office for convening a dial-in conference call for up to twenty-four parties. The customer will call the Company's business office to reserve the conference bridge for a specified day and time and will be given a phone number for the conference parties to call at the appointed time.

Up to twenty-four parties may dial into the conference bridge at the appointed time. Local or toll charges from the calling location to the conference bridge number will be applied.

B. Limitations

Only one conference bridge is available so only one party can reserve the bridge at a given day and time.

C. Rates

Use of the conference bridge will be charged on an hourly basis with the following charge applying for each full hour or fraction of an hour that the bridge is in use.

| 1. | Charge for first full hour or fraction | \$10.00 |
|----|--|---------|
| 2. | Charge per hour for each additional hour or fraction | \$ 5.00 |
| 3. | Per attendee fee | \$ 1.00 |

4. No service order charge will apply for reserving the conference bridge.

CONFERENCE BRIDGE SERVICE

(M)

A. Description of Service

This service allows the end-user to reserve a conference bridge located in the Company's central office for convening a dial-in conference call for up to twenty-four parties. The customer will call the Company's business office to reserve the conference bridge for a specified day and time and will be given a phone number for the conference parties to call at the appointed time.

Up to twenty-four parties may dial into the conference bridge at the appointed time. Local or toll charges from the calling location to the conference bridge number will be applied.

B. Limitations

Only one conference bridge is available so only one party can reserve the bridge at a given day and time.

C. Rates

1.

Use of the conference bridge will be charged on an hourly basis with the following charge applying for each full hour or fraction of an hour that the bridge is in use.

| 2. | Charge per hour for each additional hour or fraction | \$ 5.00 | |
|----|---|---------|-----|
| 3. | Per attendee fee | \$ 1.00 | |
| 4. | No service order charge will apply for reserving the conference bridge. | | (M) |

LOCAL REACH

GENERAL

A. Service Description

- Local Reach is an optional one way, outward service where, for a monthly recurring flat rate, customers can place calls within their LATA to other customers in exchanges within the Local Reach calling scope, as defined in sub-section C of this section.
- 2. Qualified usage under this plan is intraLATA customer-dialed, sent-paid, non-coin calls originating at a subscriber's access line and terminating at an access line in an exchange within the Local Reach calling scope as defined in sub-section C of this section.
- 3. Calls included in this plan are dialed using a ten-digit local dialing pattern.

B. Service Availability

- This service is furnished subject to the availability of the required telecommunications facilities. Implementation of Local Reach will be simultaneous in Green Hills Telephone Corporation exchanges; therefore the service will be available in all exchanges during the implementation period.
- 2. Subject to the restriction in paragraph B.1 above, service is available to Missouri local exchange customers of Green Hills Telephone Corporation as listed in the Local Exchange Tariff Section.

C. Calling Scope

1. The Local Reach Calling Scope includes all customers exchanges as listed below:

Carrollton
Chillicothe
Metropolitan Kansas City*

| I. SEMI-PUBLIC TELEPHONE SERVICE (Guarantee Pay Station) | MISSOURI Public Service Comm. |

- Semi-public telephone service is an arrangement under which a subscriber station is equipped with a coin collecting device, designed for a combination of subscriber and public usage, and will be furnished, on individual lines only, at the following types of locations.
 - At locations where, in the opinion of the Telephone Company, the installation of a public telephone is not warranted but where there is an appreciable demand for service on the part of transients.
 - b. At locations where there is a collective use of the a relatively stable body of guests, members, employees, 1984 occupants.
 - OMMISSION c. At any location where the demand for service is for introduction of transient and subscriber usage.
- The Telephone Company does not undertake to provide booths for housing semi-public telephones but the subscriber may at his option provide at his own cost suitable booths, shelves or cubicles for such purpose.
- Subscribers to semi-public telephone service are entitled to regular listings in the Telephone Company's official directory and may advertise such numbers for incoming calls and businesss purposes subject to rules and regulations otherwise specified in this tariff.
- Local Messages from Semi-Public Telephones are charged for at the rates shown in the General Exchange Service Tariffs and Toll Messages are charged for at the Telephone Company's established rates. No that charges are applied to connections with the Telephone Company's toll operator, information clerk, repair clerk, business office or any of its duly authorized officials; or to emergency calls to Fire or Man 1 - 1911 Police Departments, within the exchange area.
- 5. Subscribers to semi-public telephone service are required to Publicant HAGE COMMISSION total monthly reciepts from local exchange service equal to the individual line business rate. When the monthly recipts from local service are less than the amount of the guarantee, the subscriber will be billed for the difference. Such bills are subject to the same terms and treatment as bills rendered for other types of local exchange service.

SEMI-PUBLIC TELEPHONE SERVICE (continued)

(Guarantee Pay Station)

- 6. All spurious, mutilated and foreign coins and slugs found in the coin receptacle and all charges for long distance service will be deducted before computing receipts from local service over semi-public telephones.
- Semi-public telephones are subject to the contract period, service connection, move, change and transfer charges and general rules and regulations provided elsewhere in this tariff.
- 8. Local message receipts in excess of the guarantee collected during any collection period are not credited against the deficits for any other collection period. All semi-public telephones furnished to the same subscriber and installed in the same building, or on the same premises, are considered collectively in determining the amount of the guarantee for any collection period.

GENERAL EXCHANGE SERVICE TARIFFS CUSTOMER-OWNED PAY TELEPHONE SERVICE

SEP 281992

MESSOUR

Audit Service Commission

A. GENERAL

- 1. Customer-Owned Pay Telephone Service is offered for use with a customer-provided pay telephone instrument. (1) All attachments of Customer-Owned Pay Telephone service to the network must be made pursuant to the rules and regulations set forth in this Tariff.
- 2. Customer-Owned Pay Telephone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment with Selective Class of Call Screening treatment (where available), all outside plant facilities needed to connect the serving central office with the customer's premises and the network interface. These facilities are Telephone Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
- 3. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls from the service point to only those call which are charged to a called telephone, a third number or a Calling Card account.
- 4. In the case of one-way service, intercept treatment will be provided (where available).
- 5. A maximum of one customer-provided pay telephone instrument may be connected to any one Customer-Owned Pay Telephone Service Access Line.
- 6. Selective Class of Call Screening must be provided where-ever available. Any customer who offers Customer-Owned Pay Telephone Service where Selective Class of Call Screening is not available, nonetheless assumes full and complete responsibility for all calls billed to his line.
- 7. Section 4 of this Tariff, General Rules and Regulations, is applicable to the provision of Customer-Owned Pay Telephone Service.
- (1) For purposes of this Tariff, the term "customer" is defined as the party who is responsible for payment of the Customer owned hay Telephone Service Exchange Access Line.

DATE OF ISSUE: September 30, 1992 DATE EFFECTIVE: November 1992.

PAYPHONE SERVICE

JAN 1 5 1997

A. General Regulations (Cont'd)

Public Service Commission

- 10. Installation Charges and the appropriate NID material charge apply when a premises visit is made for the sole purpose of installing a customer requested NID.
- 11. The Company shall not be liable for shortages of coins collected and deposited at the subscriber's equipment. The limit of the Company's liability for end user fraud of whatever nature occurring at or in associations with the subscriber's equipment shall be governed by provisions of this Tariff and rule or regulations of the Missouri Public Service Commission. In case of conflict between the tariff provisions and Commission rules and regulations, the rule or regulations shall prevail.
- 12. Off-Premise Extensions are not permitted.
- 13. Local messages from Payphones are charged at no higher than twenty-five (25) cents for each call. Upon implementation of the FCC rules pre-empting state regulation of payphone rates, this subsection will not apply.
- 14. The Multiline Business Subscriber Line Charge, found in the interstate access tariff, is applicable to all payphone Instrument and CO implemented coin lines.
- B. Responsibility of the Customer
 - The Customer, for the purposes of this tariff, is defined as the Payphone Service Provider.
 - 2. The customer shall be responsible for the installation, operation, and maintenance of the customer-provided instrument, plus all ancillary equipment, such as booths, shelves, lighting, directories, etc., used in connection with this service. The customer is responsible for complying with the requirements set forth in the Americans With Disabilities Act of 1990.

The customer-provided instrument must be registered in compliance with Part 68 of the FCC's Registration Program. In addition, the customer must comply with the Missouri Public Service Commission's Rules and Regulations regarding the use of customer-provided pay telephones.

- 3. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls.
- 4. The customer shall be responsible for obtaining a Certificate of Service Authority (CSA) to provide Payphone Service and for providing proof of said authority prior to installation of service.

- Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
- The network interface is a device that is Telephone Company provided and maintained and is the point where the Customer-Owned Pay Telephone Service terminates and provides for connection to the customer owned pay telephone wiring.
- 10. For Customer-Owned Pay Telephone Service, a network interface will be installed at a location determined by the Telephone Company which is reasonably accessible to the premises to be served by the customer owned pay telephone service.

B. RESPONSIBILITY OF THE CUSTOMER

- The customer shall be responsible for the installation, operation and maintenance of the customer provided pay telephone instrument used in connection with this service.
- 2. The customer shall be responsible for the payment of a Maintenance of Service charge for visits by a Telephone Company employee to the customer's premises when a service difficulty is caused by a customer-provided pay telephone instrument. The Maintenance of Service Charge will apply where the service difficulty is reported by the customer.
- The customer shall be responsible for the payment of all charges for service provided to the customer pursuant to the Company's tariffs.
