SECTION 7 - MISCELLANEOUS CHARGES AND INFORMATION**7.4 Telecommunications Service Priority System** N

The provisioning and restoration of Services will be in accordance with the priority system specified in Part 64, Appendix A of the rules and regulations of the Federal Communications Commission.

The TSP System is a service that provides for the priority provisioning and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP system applies only to NSEP services that can be discreetly identified and provides the Company with a guide to the sequence in which services are to be provisioned and/or restored.

The Executive Office of the President is empowered with the authority to receive, evaluate, and process requests for NSEP TSP services. The Executive Office of the President, through the Office of Priority Telecommunications (OPT) as its administrative branch, makes the priority level assignments and issues the TSP authorization code reflecting the priority assignments associated with the Customer's request. The Customer initiates the request for TSP service from the OPT. The Customer then provides the TSP authorization code, in addition to all other details necessary to complete the order, and submits it to the Company for appropriate action. N
