ADVANCED INTELLIGENT NETWORK

50.1 GENERAL DESCRIPTIVE SUMMARY

The Advanced Intelligent Network (AIN) offers a family of optional services designed to provide customers with more flexibility in their use of the Public Switched Telephone Network. These Advanced Intelligent Network Services will be available where appropriate Telephone Company facilities exist.

(RT)
|
(RT)

50.2 DISASTER ROUTING SERVICESM

50.2.1 General

- A. Disaster Routing Service (DRS) enables customers to forward incoming telephone calls placed to multiple telephone numbers at one customer location, en masse, to alternative multiple telephone numbers at one or more alternate locations of the same customer, based on one of three predetermined destination options being activated. Calls may only be forwarded to direct-dial telephone numbers, excluding international numbers. The customer can establish up to three destination routing options; however, only one destination option can be active at any given time. The destination options will be designated as Option 1, 2 or 3. Option 1 will be activated when the service is initially established.
- B. The Telephone Company will provide the customer with a password for each DRS group. For security purposes, the password and the group number will be required to change the destination routing options.
- C. No provisions have been made to execute a customer's Disaster Recovery Service in the event that the customer's switching office is out of service.
- D. Calls will not be forwarded if the central office or other network failures or limitations prevent the call from being delivered to the customer's number in the switch.
- E. The intended use of DRS is to provide continuity for the customer's communications needs in the event of a disaster. Any other use of DRS is beyond the scope of this service and may preclude the service from operating in the manner contemplated.
- F. All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available and do not create an obligation for the Telephone Company to construct such facilities and equipment especially for the provisioning of this service.

ADVANCED INTELLIGENT NETWORK SERVICES

50.2 DISASTER ROUTING SERVICEsm - (Continued)

50.2.2 REGULATIONS - (Continued)

- C. The customer must identify the PIC for any telephone numbers that have no PIC (e.g., direct inward dialing) for calls forwarded to interLATA locations. For other telephone numbers equipped with DRS, the PIC in the central office used for 1+ interLATA traffic will be applicable. The appropriate charges, outlined in the Access Services Tariff are applicable for PIC changes.
- D. The customer is responsible for the payment of charges (e.g., toll charges) for each call between his DRS equipped line and the telephone number to which the call is being forwarded.
- E. The calling party is responsible for payment of regularly applicable charges for sent-paid messages.
- F. It is the responsibility of the DRS customer (forwarding calls to a third party) to obtain the third party's permission prior to the calls being forwarded.
- G. The DRS customer is also responsible for the payment of charges for collect calls if a person at the telephone number to which the calls are forwarded accepts the call.
- H. The customer is required to have sufficient facilities at the forwarded to location(s) to handle the incoming calls without interfering with exchange or toll service. In the event there is any interference with either exchange or toll service, the Telephone Company reserves the right to disconnect the service.
- I. The Telephone Company may, during certain promotional periods waive or discount the monthly rates and/or the nonrecurring charges as provided in this section of the General Exchange Tariff.

50.2.3 SERVICE REARRANGEMENT

(AT)
(AT)

Customers may change the active destination option (Option 1, 2 or 3) after service has been initially established. The active destination option can be changed either by the customer via a mechanized system or by contacting a Telephone Company representative, at no additional charge. Customers may also change their password and review their existing arrangement, via the mechanized system, at no additional charge. Appropriate charges are applicable to other rearrangements as outlined in Paragraph 50.2.6 of this Tariff.

ADVANCED INTELLIGENT NETWORK SERVICES

50.2 DISASTER ROUTING SERVICEsm - (Continued)

50.2.4 LIABILITY

The Telephone Company assumes no liability for forwarding calls to numbers that are inaccurately provided to the Telephone Company by the customer.

50.2.5 APPLICATION OF RATES

A. Service Establishment Charges

This charge is applicable with the original DRS order. It applies per account and per location. If DRS is ordered in conjunction with Intelligent Redirects, only one Service Establishment Charge will apply.

B. Forwarded Telephone Number, Per Telephone Number Equipped

(CT)
(CT)

A nonrecurring charge will apply for installing DRS on each telephone number. If DRS is ordered in conjunction with Intelligent Redirect on the same telephone number(s), only one charge will apply per number.

When the customer subscribes to DRS, they must choose one of the following billing choices for the calls being forwarded:

- 1: A monthly rate, with no per completed call charge, that applies per telephone number equipped, per billing account.
- 2: A monthly rate, with a per completed call charge, that applies per telephone number equipped, per billing account.

(AT)
|
(AT)

The second choice is applicable only when destination routing options 2 or 3 have been activated by the customer. It is not available if the customer subscribes to Intelligent Redirect and DRS services on the same telephone number(s). The monthly rate will vary depending on the quantity of telephone numbers equipped. The monthly rates in the sliding scale, as shown in 50.2.6.B., are applied such that the rates in each band of the scale are applied separately, (i.e., 20 times the 1-20 rate plus 80 times the 21-100 rate, etc.) up to the total quantity of telephone numbers equipped. All of the telephone numbers in a group must be designated as either Choice 1 or Choice 2. If DRS is ordered in conjunction with Intelligent Redirect, these charges will apply only once. The Choice 1 sliding scale will be applied based on the sum of all Choice 1 DRS-equipped telephone numbers plus Intelligent Redirect-equipped telephone numbers, in all groups. The Choice 2 sliding scale will be applied based on the sum of all equipped telephone numbers in all groups. For choice 2 billing, the telephone numbers under Option 1 must be the same as equipped telephone numbers.

C. Group of Telephone Numbers Equipped, Per Group

(AT) A monthly rate and a nonrecurring charge will apply per each group of telephone numbers
(AT) equipped with DRS. The nonrecurring charge will also apply as subsequent groups are added.

D. Rearrangement Charges, Per Rearrangement

(CT) This charge will apply per rearrangement. An example of a rearrangement includes either a
(CT) move, change or addition of an item of service. The addition of a telephone number, equipped with DRS or the addition of a group, will incur a rearrangement charge associated with the establishment of DRS telephone numbers or a group respectively, plus the associated nonrecurring charges for those additions. If DRS and Intelligent Redirect exist on the same account and rearrangements for both are ordered at the same time, this charge will only apply once.

The Rearrangement Charge is applicable to a change of the Primary Interexchange Carrier (PIC) for DID telephone numbers. In addition, a change to the PIC will incur charges as specified in the Access Services Tariff.

E. Password Reinitialization Charge

This charge applies per customer request each time the Telephone Company initializes the DRS security password, after it has been provided with the initial order.

50.2.6 RATES AND CHARGES - (Continued)

FOOTNOTES:

- (1) This charge is applicable with the original DRS order. It applies per account and per location. If DRS is ordered in conjunction with Intelligent RedirectSM, only one Service establishment Charge will apply.
- (2) Choice 1 and Choice 2 can be provided to the same customer. However, all of the telephone numbers in each group must be all Choice 1 or Choice 2 charges.
- (CT) (3) This charge is applicable only when the customer has selected Choice 2 and has activated destination options 2 or 3. Customers who subscribe to DRS and Intelligent Redirect, on the same telephone number(s), are not eligible for Choice 2.
- (CT) (4) A nonrecurring charge will apply to the move, change or addition of an item of service. For a change to the Primary Interexchange Carrier (PIC) for DID and telephone numbers the charges outlined in the Access Services Tariff will also apply. If DRS and Intelligent Redirect exist on the same account, and rearrangements for both are ordered at the same time, these charges will only apply once.
- (AT) (5) Sliding scale rates applicable only to telephone numbers under the same billing account.

50.3 INTELLIGENT REDIRECTsm

50.3.1 GENERAL

- (AT) A. Intelligent Redirect (IR) enables customers to forward incoming telephone calls placed to multiple telephone numbers at one customer location, en masse, to alternative multiple
(CT) telephone numbers at one or more alternate locations of the same customer, based on
(CT) predetermined options. Calls may be forwarded to direct-dial telephone numbers, excluding international telephone numbers. Intelligent Redirect groups may also include telephone numbers equipped with Disaster Routing Service. Intelligent Redirect offers the following four (routing features that can be ordered separately or in combination with any of the other features or in combination with Disaster Routing Service:

1. Time-Of-Day/Day-Of-Week (TOD/DOW) Routing

This feature enables customers to have their incoming calls forwarded to different telephone numbers based on a predetermined list of TOD/DOW forwarding combinations. Customers may select up to ten different TOD/DOW combinations per group. All twenty-four hours in the day and all seven days in the week must be accounted for. This may be accomplished either by specifying all twenty-four hours in a day and all seven days in a week, or by denoting an "other" category.

2. Specific Date Routing

- (CT) This feature enables customers to have their incoming calls forwarded to different telephone numbers based on the specific date the call is received. Customers may select up to ten different specific dates per group. Calls received on dates other than those specified will be completed based on an "other" category, as provided by the customer. The "other" option is not counted in the ten allowable specific dates. The date will be denoted in terms of the month and the date or the month, date and year.

3. Percentage Allocation Routing

This feature enables customers to have their incoming calls forwarded to different telephone numbers on a percentage basis. Customers may select up to five percentages, in whole numbers, per group. The sum of all percentages must equal 100% for a given group.

50.3 INTELLIGENT REDIRECTsm-(Continued)

50.3.1 GENERAL-(Continued)

A. (Continued)

4. Originating Location Routing

This feature enables customers to have their incoming calls, to a group of telephone numbers, forwarded based on the origination of those calls. Customers may select up to ten screening lists per group. Incoming calls will be forwarded to a single predetermined alternate telephone number, per group, per screening list for calls originated from telephone numbers on the customer's screening list(s). If those calls originated from telephone numbers not on the screening list(s) (including absence of an originating telephone number in the Public Switched Telephone Network), the calls will be completed based on an "other" category, per telephone number, as provided by the customer. There are no limits on the quantity of telephone numbers in the customer's screening list. This feature will only function when the calling party number is delivered in the telephone network.

50.3.2 REGULATIONS

- (RT)
- A. All telephone numbers equipped with Intelligent Redial must be included in one of the customer's groups. A group is a set of telephone numbers that will be forwarded in the same manner i.e., the same features with the same parameters that determine routing for all telephone numbers in a group. Each group must include at least one telephone number. However, a telephone number may only be included in one group. There is no upper limit on the number of telephone numbers in one group.
 - B. Intelligent Redirect is available on telephone numbers associated with business lines or trunks. This service is available for use only with voice applications. It may not be used with data applications (e.g., on-line data transmission) or to avoid toll. Intelligent Redirect will not be provided in connection with Residence, Customer Owned Pay Telephone Service, TeleBranch or Mobile Telephone Service.

ADVANCED INTELLIGENT NETWORK SERVICES

50.4 POSITIVE ID

50.4.1 General

Positive ID enables business customers to restrict illegal or unauthorized entry into their computer systems or voice networks. The service allows business customers to electronically screen incoming calls to either the telephone network or the computer network by specifying on a screening list the telephone numbers from which calls will be accepted. The screening list has a maximum capacity of 500 telephone numbers per equipped line. Authorized callers also can access computer systems or telephone networks with customer-defined Access Codes or Personal Identification Numbers (PIN).

The Access Code allows a calling party (usually an employee) calling from other than their usual authorized telephone number to override the call restriction logic contained on the customer's screening list and gain access to the telephone number equipped with Positive ID. A maximum of 100 Access Codes can be assigned per equipped line. Incoming call from a restricted telephone number will be routed to an announcement and disconnected unless a valid Access Code is used.

50.4.2 Regulations

- A. Each Positive ID customer will have a Customer Administration PIN. This PIN enables the customer to establish or change the list of nonrestricted telephone numbers on the screening list or Access Codes via an Interactive Voice Response system. Customers may also make changes in their screening lists of Authorized Telephone numbers and Access Codes through a PC User Interface software provided by the customer.

The Access Code allows a calling party (usually an employee) calling from other than their usual authorized telephone number to override the call restriction logic contained on the customer's screening list and gain access to the telephone number equipped with Positive ID. A maximum of 100 Access Codes can be assigned per equipped line. Incoming call from a restricted telephone number will be routed to an announcement and disconnected unless a valid Access Code is used.

50.4.2. Regulations

- A. Each Positive ID customer will have a Customer Administration PIN. This PIN enables the customer to establish or change the list of nonrestricted telephone numbers on the screening list or Access Codes via an Interactive Voice Response system. Customers may also make changes in their screening lists of Authorized Telephone numbers and Access Codes through a PC User Interface software provided by the customer.
- B. As an option, the customer may subscribe to one or all of the following Positive ID reports:
 - (1) Successful Attempt Log provides a detail report identifying the NPA/NXX-LINE of calls completed to the Positive ID-equipped telephone number. This report identifies authorized usage from authorized telephone numbers and authorized usage from unauthorized telephone numbers that utilized an authorized PIN. This report is available on a floppy diskette only.
 - (2) Unsuccessful Attempt Log provides a detailed report identifying the NPA/NXX-LINE of unsuccessful attempts to access the Positive ID-equipped telephone number. This report is available on paper or floppy diskette.

The customer is responsible for providing compatible premises equipment in order to utilize the diskette.

50.5 OUTGOING CALL CONTROL

50.5.1 Outgoing Call Control (OCC) allows customers to selectively restrict certain types of calls from originating from their telephone line. Four OCC settings exist which permit OCC customers to allow or calls in each of the following categories:

- Long Distance (including interLATA and intraLATA)
- International
- 900 or 976 calls
- Directory Assistance (local and long distance)

50.5.2 By default, calls will be allowed in all four categories described above. Changes in these settings may be made by using an interactive voice response (IVR) system. There is no charge to the customer to change the OCC settings using the IVR system.

(RT)
|
(RT)

- (FC) 50.5.3 Customers will have a personal identification number (PIN) which may be used under two circumstances:
 - A. The PIN may be used to override the current OCC setting and place a call that is currently restricted.
 - B. The PIN must be used to enter the IVR system to make changes in the OCC settings on a line.
- (FC) 50.5.4 For Long Distance, International and 900/976 categories, OCC customers may enter a limited number of telephone numbers that are allowed, even when calls within the category are restricted. These telephone numbers are entered or deleted using the IVR system.
- (FC) 50.5.5 OCC is available on must business and residence lines, however the service cannot be provided in conjunction with certain complex business services including, but not limited to, Reserve Line, DID, Private Coin, Centrex, Plexar, DigiLine, Select Video and SmartTrunk.
- (FC) 50.5.6 Lines equipped with OCC may not originate sent-paid, operator handled calls, including sent-paid calls using Directory Assistance Call Completion.
- (FC) 50.5.7 OCC is available where facilities permit.
- (FC) 50.5.8 OCC customers may continue to be subject to Long Distance Availability Limits.

51.1 GENERAL

51.1.1 IntelliNumber utilizes the Advanced Intelligent Network and provides a single telephone number for business customers with multiple locations. Customers may use this service to provide a single publicized telephone number for incoming calls to their business that is used regardless of the number and/or location of their satellite or branch locations. Incoming calls to this single telephone number are routed to the appropriate customer location based on the caller's ZIP Code and/or routing option. The customer may select one or a combination of routing options; Time-of-Day/Day-of-Week Routing, Specific Date Routing, Allocation Routing, and Shared Trade Areas.

(RT)
|
(RT)

A. Basic ZIP Code Routing

This basic routing enables the customer to specify the routing of incoming calls, placed to a specific destination telephone number of the appropriate satellite location based on the ZIP or ZIP+4 Codes as used by the U.S. Post Office. In order to utilize this service, the customer is required to establish a geographic trade area for each of their locations. This trade area will consist of a group of one or more ZIP Codes from which calls will be routed to the same customer location/ destination telephone number. One destination telephone number must be specified for each trade area. When incoming calls are made to the IntelliNumber, the Telephone Company will determine the calling party's ZIP+4 Code and route the call according to pre-established trade area routing information. If the incoming call cannot be routed, it will be routed to a default number provided by the IntelliNumber customer

51.1.1 IntelliNumber utilizes the Advanced Intelligent Network and provides a single telephone number for business customers to route incoming calls to their multiple satellite business locations. The incoming calls to the single number are routed to the appropriate satellite locations based on the ZIP or ZIP+4 Codes of the calling party telephone number. The customer receives the Basic ZIP Code Routing, but may also select one or more additional routing options, Time-Of-Day/Day-Of-Week Routing, Specific Date Routing and Allocation Routing, in combination with the Basic ZIP Code Routing. A description of Basic ZIP Code Routing and each of the available routing options is as follows:

A. Basic ZIP Code Routing

This basic routing enables the customer to route incoming calls, placed to a single telephone number, to the destination telephone number of the appropriate satellite location based on the ZIP or ZIP+4 Codes as used by the U.S. Post Office. When incoming calls are received, the Telephone Company will determine the calling party's ZIP+4 Code and route the call according to pre-established routing information from the customer. The basic routing data required from the IntelliNumber customer consists of a list of ZIP Codes and corresponding destination telephone numbers. If the incoming call cannot be routed, it will be routed to a default number provided by the IntelliNumber customer.

B. Time-Of-Day/Day-Of-Week (TOD/DOW) Routing

This additional routing option enables the customer to override Basic ZIP Code Routing logic and have their incoming calls routed to alternate satellite locations during pre-established Time-Of-Day/ Day-Of-Week combinations. TOD/DOW Routing logic may apply on incoming calls to the IntelliNumber telephone number, each satellite/ destination location and default telephone number. Customers may select up to ten (10) TOW/DOW combinations for each IntelliNumber telephone number and each satellite/destination location and default telephone number. All twenty-four (24) hours and seven (7) days of the week must be accounted for by the customer for each IntelliNumber telephone number, each satellite/destination and default telephone number.

51.1 GENERAL - (Continued)

51.1.1 - (Continued)

C. Specific Date Routing

This additional option routes incoming calls to alternate locations when calls are received on certain dates. Calls received on dates not specified will be routed according to Basic ZIP Code Routing (or TOD/DOW Routing if applicable). Specific Date Routing logic may apply on all incoming calls to the IntelliNumber telephone number, each satellite/destination location and the default telephone number. A maximum of ten (10) specific dates may be established by the customer for each IntelliNumber telephone number, each satellite/destination location and default telephone number.

D. Allocation Routing

(CT)
(CT)

This additional option is available to customers with TOD/DOW Routing and/or Specific Date Routing. When either of two routing options apply, Allocation Routing may be used to route calls to 2 - 5 (maximum) alternate destination numbers. The calls are routed to multiple alternate destination numbers based on the percentages established by the customer. The customer must select 2 - 10 percentages in whole numbers.

(AT)

E. Shared Trade Areas

This option allows the IntelliNumber customer to specify multiple locations/destination telephone numbers within a single trade area for the IntelliNumber calls to be routed. When this option is selected, the trade area is referred to as a shared trade area. The IntelliNumber customer will specify the ZIP Codes and locations/destination telephone numbers for the shared trade area.

When a shared trade area is established, percent allocation logic will be used to distribute the incoming IntelliNumber calls to the various locations/destination telephone numbers specified by the customer. A destination telephone number/location can be associated with its own separate trade area as well as be included in a shared trade area. The customer may specify up to a maximum of 100 locations/destination telephone numbers for a given shared trade area, with a percentage specified for each location. Percentages must be in whole numbers and all percentages for a shared trade area must total 100%.

51.2.9 IntelliNumber offers several features options as described below:

1. Number Prompt is a play and collect announcement for calls with a calling Party Number (CPN) that instructs the caller to input a CPN in order that the call may be routed to a location instead of going to the default number.
2. Default Announcement is a customer-specific announcement for the customer's default calls. The availability of this feature is subject to announcement capacity in the central office.
3. Trade Area Screening provides an option allowing the customer to define a subset of a metropolitan area by NPA/NXX as their served territory. The purpose of Trade Area Screening is to route originating calls from outside of the customer's served territory to a Southwestern Bell Telephone IntelliNumber announcement so the customer does not have to expend resources to handle those calls. This makes it feasible for customers that do not serve a portion of the metro area to still implement and advertise IntelliNumber.

INTELLINUMBERsm

51.3 APPLICATION OF RATES

51.3.1 IntelliNumber

A monthly rate and a nonrecurring charge will apply for each telephone number equipped with IntelliNumber. This rate element includes a service establishment charge to create and maintain the IntelliNumber.

(CT) 51.3.2 IntelliNumber, Per Trade Area

(CT) This monthly rate will apply to each trade area in the customer's data base.

(CT) 51.3.3 IntelliNumber Number Change

A nonrecurring charge is applicable when there is a customer initiated IntelliNumber telephone number change.

51.3.4 ZIP Code Mapping

(CT) This nonrecurring charge applies per trade area to the initial development of the customer's data base of ZIP codes and their destination telephone number. It applies to all of the customer's locations/trade areas when the customer required ZIP Code routing includes any six-to-nine digit ZIP Codes. This charge is also applicable to all of the customer's trade areas when an existing customer with only five-digit ZIP Code routing changes one or more of their locations to include six-to-nine digit ZIP Codes.

51.3.5 ZIP Code Mapping Changes

(CT) This nonrecurring charge applies per trade area when there is a customer-initiated change or addition to ZIP Codes in the customer data base for an existing customer location/trade areas for customers that have ZIP Code routing that includes either 5 or 6-9 digit routing.

51.3.6 ZIP Codes Refresh

(CT) This nonrecurring charge applies per trade area when there is a synchronization, at the customer's request, of the most recent U.S. Post Office ZIP Codes with the customer's data base. Refresh charges apply to all existing customer trade areas if the customer chooses to refresh their database.

51.3 APPLICATION OF RATES-(Continued)

51.3.7 Customer ZIP Code Reload

This per reload nonrecurring charge will apply when there is a customer-initiated change or addition to existing Basic ZIP Code Routing data. It applies one time for all changes made at the same time.

(AT) 51.3.8 IntelliNumber Feature Options

(AT) A monthly rate and nonrecurring charge will apply for each option, per telephone number,
(AT) equipped with IntelliNumber.

(FC) 51.3.9 Additional Routing Options

(RT) A monthly rate and nonrecurring charge will be applicable to each routing option. This
(RT) applies when a routing option is established initially and when the routing option is increased to include telephone numbers not previously included.

(FC) 51.3.10 Additional Routing Logic Change Charge

(CT) This nonrecurring charge applies when the customer modifies the additional routing logic that already exists, e.g., a TOD/DOW entry is changed at a satellite location that currently has TOD/DOW routing. One nonrecurring charge will apply if all customer-initiated changes occur at the same time per additional routing option, per occurrence. An occurrence is defined as a change to an existing telephone number, satellite/destination telephone number, and/or default telephone number.

This charge does not apply to a change in the Primary Interexchange Carrier (PIC). A change in the PIC will incur the appropriate charge outlined in the Access Services Tariff.

51.3.7 Customer ZIP Code Reload

This per reload nonrecurring charge will apply when there is a customer-initiated change or addition to existing Basic ZIP Code Routing data. It applies one time for all changes made at the same time.

51.3.8 Additional Routing Options

A monthly rate and nonrecurring charge will be applicable to each routing option, per IntelliNumber telephone number, each destination telephone number and default telephone number to which the routing number is applied. This applies when a routing option is established initially and when the routing option is increased to include telephone numbers not previously included.

51.3.9 Additional Routing Logic Change Charge

This nonrecurring charge applies when the customer modifies the additional routing option data for the existing IntelliNumber telephone number, satellite/destination location and/or default telephone number, e.g., a TOD/DOW entry is changed at a satellite location that currently has TOD/DOW routing. One nonrecurring charge will apply if all customer-initiated changes occur at the same time per additional routing option, per telephone number, e.g., IntelliNumber telephone number, satellite/ destination telephone number, and/or default telephone number.

This charge does not apply to a change in the Primary Interexchange Carrier (PIC). A change in the PIC will incur the appropriate charge outlined in the Access Services Tariff.

51.3.10 Charge Per Completed Call Routed

A usage sensitive charge will apply for each completed call routed using IntelliNumber. All such calls are billed at the same rate level based on the total number of routed and completed calls billed on one customer's bill during a billing month.

51.3 APPLICATION OF RATES-(Continued)

51.3.11 Charge Per Completed Call Routed

- (RT)
- A. A usage sensitive charge will apply for each completed call terminated using IntelliNumber. All such calls are billed at the same rate level based on the total number of routed and completed calls billed on one customer's bill during a billing month.
 - B. As an option, the customer may elect to pay a discounted rate based on a 3-year or 5-year contract term.
 - 1. A minimum billing charge applies per month for a minimum number of Completed Calls for the duration of the contract term. If the actual number of calls completed for a particular billing month falls below this minimum, the number of Completed Calls that are billed will be increased to equal the minimum requirement. The minimum number of Completed Calls will be computed as follows:
 - a. For the first month's bill, only the actual number of calls completed will be billed.
 - b. For the second through twelfth months' bills, the minimum number of calls will equal to 50% of the average of the actual call usage for all billing months preceding the current billing month back to the first bill rendered since the contract start date.
 - c. For the thirteenth month's bill through the last bill, the minimum number of calls will equal to 50% of the average of the actual call usage for the first 12 billing months of service for this contract term.
 - 2. Termination charges will be applicable if the customer disconnects the entire service. The termination charges will be billed as a lump sum and will be calculated as follows:
 - a. Determine the minimum number of calls to be billed based on applicable billing for the month preceding the service disconnection. Calculate a per call monthly charge total by multiplying the appropriate per call tariffed rate times this minimum number of calls.
 - b. Multiply the per call monthly charge total from step 2.a times the number of months remaining until the contract expiration date.
 - c. Determine the annuity factor for the remaining months left in the contract. This factor is based on the discount rate as specified in Section 17 of this tariff.
 - d. Multiply the results of steps 2.b and 2.c to determine the termination liability amount.

- (1) A monthly rate and nonrecurring charge applies to each additional routing option established initially per each IntelliNumber telephone number, each satellite/destination telephone number and default telephone number to which the routing option is applied. These charges apply whenever there is an additional telephone number added, e.g., satellite telephone number, to an existing routing option such as Specific Date Routing.
- (2) This charge applies for customer-initiated subsequent changes to the data for each existing IntelliNumber telephone number, each satellite/destination telephone number and/or default telephone number per each additional routing option that is changed. This charge does not apply to changes in the Primary Interexchange Carrier (PIC). PIC changes will incur the appropriate charge outlined in the Access Services Tariff.
- (3) All routed and completed calls are billed at the same rate level based on the total number of calls billed on one bill during a billing month.

PLEXAR[®] EXPRESS

52.1 GENERAL

- 52.1.1 Plexar Express is an optional central office-based communications system available to business customers. Plexar Express is provided through an arrangement of exchange access lines, Plexar Express stations and station line facilities, switching equipment, customer facility group and other facilities located on Telephone Company premises. A Plexar Express customer can control the number of simultaneous incoming and outgoing telephone calls through the quantity of Plexar Express exchange access lines to which they subscribe.
- 52.1.2 Plexar Express rates and charges provide for Plexar Express stations, including standard features, station line facilities(1) (which include the outside plant facilities), Tie Trunk Terminations and optional features. Plexar Express Access Lines are billed at the recurring rate equivalent to a Flat Rate PBX Trunk specified in the Local Exchange Tariff.
- 52.1.3 A Plexar Express System may consist of multiple customer premises locations when all Plexar Express stations are served by the same serving central office.

(CT) (1) Station line facility rates specified in this tariff are not applicable to stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.

PLEXAR[®] EXPRESS

52.1 GENERAL - (Continued)

52.1.4 Feature Array

A. Standard Features

The following standard features are available with each Plexar Express Station subject to the serving central office capability:

- Call Forwarding - Busy Line - All Calls

Automatically forwards incoming or station-to-station calls to a preselected telephone number, when the called Plexar Express station is busy.

- Call Forwarding - Don't Answer - All Calls

Automatically forwards incoming or station-to-station calls to a preselected telephone number, when the called Plexar Express station does not answer after a predetermined number of ringing cycles.

- Call Forwarding - Variable

Automatically forwards incoming calls to a Plexar Express station line within as well as outside the Plexar Express system.

- Call Hold

Allows a Plexar Express station user to hold one call for any length of time provided that neither party goes on-hook, through the use of a feature activation code that is dialed after a switchhook flash.

- Call Pickup

Allows a Plexar Express station user to answer any call within an associated preset pickup group.

52.1 GENERAL - (Continued)

52.1.4 Feature Array - (Continued)

A. Standard Features - (Continued)

- Call Transfer - All Calls

Allows a Plexar Express station user to transfer any established call to another telephone number within or outside the Plexar Express system. While the access line(s) may still be in use, the Plexar Express station user is then free to accept another call. The station user is prohibited from using this feature to avoid toll charges.

- Direct Inward Dialing (DID)

Allows an incoming call to reach a Plexar Express station line without attendant assistance.

- Direct Outward Dialing (DOD)

Allows a Plexar Express station to gain access to the exchange network without attendant assistance.

Issued: March 30, 1998

Effective: May 1, 1998

PLEXAR[®] EXPRESS

52.1 GENERAL - (Continued)

52.1.4 Feature Array - (Continued)

A. Standard Features - (Continued)

- Hunting - Basic

Provides hunting for an idle line starting with the called station and ending with the last station in the prearranged group, completing the call to the first idle line encountered.

- Station-to-Station Dialing (Intercom)

Allows a Plexar Express station user to directly dial other station lines within the same Plexar Express system without attendant assistance.

- Three-Way Calling

Allows a Plexar Express station user to add a third party to any established call for a three-party conference, without the assistance of an attendant.

- Touch-Tone Dialing

All station lines are equipped for Touch-Tone dialing.

PLEXAR[®] EXPRESS

52.1 GENERAL - (Continued)

52.1.4 Feature Array - (Continued)

B. Optional Features

The following Optional Features are available with Plexar Express at the rates and charges provided herein, subject to the serving central office capability.

- Assume Dial Nine

Provides for systemwide configuration that allows access to the Public Switched Telephone Network without the need to dial nine.

- Call Waiting / Cancel Call Waiting

Call Waiting allows a Plexar Express station user who is engaged in a telephone conversation to be alerted that an incoming call is attempting to reach that station user. The called station line can retrieve the waiting call by placing the existing call on hold and answering the waiting call. Cancel Call Waiting allows the station user to deactivate Call Waiting on the station line for the duration of one call.

- Calling Name Delivery

Enables the terminating customer to identify the calling party by a displayed name before the call is answered. The displayed name is the name associated with the Calling Party Number. Calling Name Delivery subscribers must provide, and connect, their own compatible customer premise equipment to process the Calling Name Delivery transmission.

- Calling Number Delivery

Provides for the transmission of Calling Party Number (CPN) on incoming calls to the customer's access line(s). When the equipped line is on-hook, the CPN is transmitted across the line during the silent interval between the first and second ring. Calling Number Delivery customers must provide, and connect, their own compatible customer premises equipment to process the CPN transmission.

PLEXAR EXPRESS

52.1 GENERAL - (Continued)

52.1.4 Feature Array - (Continued)

B. Optional Features

- Message Waiting Indication(1)

Provides the Plexar Express station user with an audible alerting tone (intermittent dial tone) from the customer's serving central office and/or a signal which activates a visual indication on the station set indicating waiting messages. The associated voice message service is not a part of the Plexar Express system.

(AT)

- Routed Numbers

This feature routes calls to a Plexar System telephone number to an answering point at the customer location. Plexar Routed Numbers include the Plexar telephone number and the routing facility. Calls must be routed within the customer's common block. Customers may request Routed Numbers in quantities that do not exceed either 1) the customer's current in service Plexar station capacity or 2) the customer's Plexar station capacity that is in service 6 months following installation of a new Plexar system. Customers must convert 50% of their Routed Numbers to Plexar stations within 36 months of when they were first established as Routed Numbers. Customers must convert 80% of their Routed Numbers to Plexar stations within 60 months of when they were first established as Routed Numbers. Customers who do not meet these percentages will have the Routed Numbers, that exceed the percentages listed previously, disconnected and made available for other customer's use. Plexar station numbers can only be assigned as Routed Numbers once and can not be reinstated as Routed Numbers following disconnection.

(AT)

- Speed Calling

Allows a station user to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The customer may select a speed calling list that accommodates 30 or 50 stored numbers.

- Toll Restriction

Restricts the completion of originating calls to those within the local calling scope associated with the Plexar Express serving central office as defined in the Local Exchange Tariff.

- (1) Visual message waiting indication cannot be provided on stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services tariff. These stations may be equipped with the audible alerting tone only (MW71X).

52.2 RULES AND REGULATIONS

52.2.1 The following terms used in this section shall mean:

Plexar Express Station: Consists of two rate elements, the appropriate station rate and station line facility rate(1). The combined rate elements comprise all facilities, including intercommunication, outside plant facilities and standard features from the Plexar Express dial switching equipment located on the Telephone Company premises.

Off-Premises Station: Off-Premises stations consist of two rate elements, the Off-Premises station rate and applicable private line charges. An Off-Premises station is used when a customer chooses to have a station be part of a system located in a central office other than the normal serving central office for that station's location.

Tie Line Terminations: Tie Line Terminations apply when terminating either analog, digital or other tie line arrangements into the Plexar Express system. Tie Line Terminations apply when linking a Plexar Express system with other Plexar systems or other customer provided premises communication systems.

52.2.2 Plexar Express service is available only where the necessary facilities exist.

52.2.3 Plexar Express Station Line Facilities are charged in mileage bands as measured in air miles from the station location to the customer's normal serving central office. The station line facility rates are applicable to all Plexar Express stations(1), except Off-Premises stations. The station line facility rate applies to Plexar Express stations in excess of the number of Plexar Express access lines. In no case shall the credit applied for station line facility rates exceed the number of station line facility rates billed.

52.2.4 Directory listings will be furnished in accordance with regulations set forth in Section 6 of this tariff.

52.2.5 All Plexar Express stations will be equipped with the Standard Features specified in Feature Array, 52.1.4.A, preceding.

(1) Station line facility rates specified in this tariff are not applicable to stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.

PLEXAR[®] EXPRESS

52.2 RULES AND REGULATIONS - (Continued)

- 52.2.8 Plexar Express stations shall have available the calling scope associated with the Plexar Express serving central office as defined in the Local Exchange Tariff.
- 52.2.9 A Plexar Express Off-Premises station will be furnished the same service as a Plexar Express Basic station, where equipment and facilities are available. Private Line rates and charges as specified in Section 2 of the Private Line Service Tariff apply to Off-Premises stations instead of station line facility charges.
- 52.2.10 A Plexar Express customer may be served by the same serving central office (referred to as normal serving office) or a different serving central office than the one in which they are located. If service is provided from a serving office other than their normal serving office, the rates and charges specified in this tariff section are applicable, in addition to the rates, charges, terms and conditions of Foreign Service Office (FSO)/Foreign Exchange (FX) Services specified in Section 9 of the General Exchange Tariff and Section 2 of the Private Line Service Tariff.
- 52.2.11 The customer may move Plexar Express service within the state, where facilities permit, subject to the appropriate nonrecurring charges and any other charges specified in this tariff resulting from the customer's requirement (i.e., overtime hours, special construction). The contract will not be affected unless the move causes the 35% maximum station fluctuation to be reached as specified in paragraph 52.3.6. Station Line Facility rates may change due to distance charges.
- 52.2.12 Service Connection charges will be applied in accordance with the regulations set forth in Section 19 of this tariff.
- 52.2.13 When a customer requests a special offering or modification of standard service offering, it will be furnished whenever possible if not detrimental to any of the services or equipment of the Telephone Company. Such special service offerings or modifications of standard service offerings will be furnished at additional charges.
- 52.2.14 Departmental billing reports will be furnished in accordance with the regulations set forth in Section 13 of this tariff.
- 52.2.15 Use of Plexar Express service for other than administrative purposes by the customer of record is prohibited.

PLEXAR[®] EXPRESS

52.2 RULES AND REGULATIONS - (Continued)

52.2.16 Caller ID Interaction: The Southwestern Bell Telephone calling party, whether they subscribe to Caller ID Services or not, may prevent the delivery of calling party name and/or number to the called party by dialing an access code (*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If a calling party activates blocking, the calling party name and/or number will not be transmitted across the station line, including calls within and outside the Plexar Express group. Instead, Caller ID customers will receive an anonymous indicator. The anonymous indicator notifies the Caller ID customer that the calling party has elected to block the delivery of the telephone number or calling party name.

An originating caller's Calling Party Name and/or Number may not be displayed at the called party as set forth in Section 47, paragraph 47.2.18 of this tariff.

52.2.17 In addition to the provision of the General Exchange Tariff, the Telephone Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a name and/or telephone number which the calling party has requested to be omitted from the telephone directory or by the disclosing of such name and/or telephone number to any person. The Telephone Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a name and/or telephone number which the calling party or the Caller ID customer finds erroneous, offensive, embarrassing, or misleading for any reason, including but not limited to the way in which the calling party's name has been abbreviated. The Telephone Company shall not be liable for any claims for damages caused by a telecommunications utility's failure to transmit the privacy to the called party when such indicator has been passed to the telecommunications utility by the Telephone Company.

52.3 PAYMENT PLANS

52.3.1 The Plexar Express Payment Plan offers the customer two options for payment. They are as follows:

- (CT)
- A. Fixed Monthly Rate Plan: Under this plan the customer pays a fixed monthly rate for a specified contract term. The customer may choose a 12, 24, 36, 48 or 60 month contract. During the course of the contract, fixed rates (recurring and nonrecurring) are not subject to Telephone Company initiated rate increases.
 - B. Month-to-Month Plan: Under this plan the customer elects to pay month to month. Month-to-month rates (recurring and nonrecurring) are subject to Telephone Company initiated rate changes.

52.3.2 All nonrecurring charges specified within this tariff can be converted into monthly charges to be paid over the length of any contract term for initial and subsequent installations of service. Annuity factors utilized in deferring these charges are specified in Section 17 of this tariff.

52.3.3 Additions to service under the two plans specified in paragraph 52.3.1, preceding, can be added to the existing agreement.

Fixed monthly rate plan additions can be coterminous with the original contract or for a shorter term. Additions to service under the Month-to-Month plan can be made at any time.

52.3.4 With prior Telephone Company agreement, service under these plans may be transferred from one customer to another at the same location for a Supersedure Fee as identified in paragraph 52.4.5, following. The new customer assumes all obligations under the existing contract. Changes and additions to the assumed service can be made after the first day of service has been assumed.

52.3 PAYMENT PLANS (cont'd)

52.3.5 All charges specified in this tariff, excluding those that are rate referenced from other tariffs, are covered under the Plexar Express payment plans. All other rates and charges not specifically covered in this section are not included. Plexar Express access lines are not included in these payment plans.

52.3.6 For Service Term Agreements which become effective on or after April 27, 2005:

- Termination liability applies if a customer, (a) disconnects the entire service: (b) disconnects more than 35% of the highest number of stations attained during the duration of the contract. The number of stations disconnected that exceeds this allowable number is the net terminated stations.
- The termination charge is calculated as follows:
 - (1) Under the conditions listed above, subtract the allowable 35% station fluctuation from the contracted station quantity installed during the duration of the contract. This number is multiplied by
 - (2) The monthly Plexar Express Station charge, plus the Station Line Facility charge (AT)
relevant for that customer's contract term, -multiplied by (AT)
 - (3) The number of months of the contract not being fulfilled, multiplied by
 - (4) Fifty percent (50%)
- In addition, the remainder of any installation and nonrecurring charges that have been deferred must be paid in full. Payment of the termination charge does not release the customer from other previous amounts owed to the Company.

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM

53.1.1 General Information

SmartPayment PlanSM (SPPSM) is an alternative billing option. The SPP allows customers to pre-pay their monthly charges for certain services for a three or five year service period (Initial Service Period). SPP will be offered with the services listed in Paragraph 53.1.2 following.

53.1.2 Services Available for SPP

The following services are available for SPP:

Flat Rate Business Lines
Analog Trunks
Plexar[®] - Exchange Access Line
SmartTrunkSM - Interface
Digital Loop Service - Digital Transmission Loop Arrangement

53.1.3 Regulations

- A. The following rules and regulations are in addition to other rules and regulations as stated in this or other Southwestern Bell Telephone Company (SWBT) Tariffs.
- B. The full payment will be due 30 days from the SPP effective date. When full payment is not received by the due date, the SPP agreement is considered null and void and the services under the SPP agreement will be billed under month-to-month billing back to the SPP agreement effective date.
- C. At the end of the Initial Service Period, the customer must either extend the Initial Service Period for one twelve month term, establish a new Initial Service Period, start month-to-month billing or disconnect the service.

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM - (Continued)

53.1.3 Regulations - (Continued)

- D. The SPP payment will not change as a result of a SWBT initiated rate increase, however, when a Local Exchange Rate Group Reclassification occurs, as set forth in the Local Exchange Tariff, an adjustment for the remaining term of the SPP agreement will be made. Also, an adjustment will be made for any rate decrease. When the adjustment results in an amount due SWBT the full payment will be due 30 days from the effective date of the reclassification. When the adjustment results in an amount due the customer an adjustment will be made in the customer's next monthly bill statement.
- E. One time charges, as set forth in SWBT tariffs, apply as appropriate to all services under SPP.
- F. Optional services may not be placed under the SPP agreement. Optional services may be added, changed or disconnected in accordance with the rules and regulations that apply to the optional service as set forth in SWBT tariffs and will be billed monthly.
- G. As a condition to providing service under the SPP, a customer will be required to sign a SPP agreement.

53.1.4 Changes to SmartPayment Plan

- A. Prior to the expiration of the Initial Service Period or Extended Service Period, as described in Paragraph 53.1.5 (Extension of Initial Service Period), the customer may convert existing SPP services to a new SPP Initial Service Period provided the new Initial Service Period is equal to or greater than the original Initial Service Period. The new SPP payment will be the SPP payment as defined in Paragraph 53.1.11 less the present value of the existing SPP agreement.
- B. If a customer requests existing SPP service to be converted to a monthly rate basis at any time prior to the expiration of the Initial Service Period or Extended Service Period, the request will be treated as a discontinuance of service and the customer will receive a SPP Discontinuance Settlement as defined in Paragraph 53.1.10.

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM - (Continued)

53.1.5 Extension of Initial Service Period

- A. The customer may elect to extend the SPP Initial Service Period for one additional 12 month service period (Extended Service Period) at the SPP rates in effect at the time of the request for extension.
- B. The customer must provide SWBT with a written notice of intent to extend an existing SPP Initial Service Period no later than 90 days prior to its expiration. The full payment for the Extended Service Period will be due thirty days from the effective date of the extension.
- C. If the customer elects not to extend the SPP or does not notify SWBT of its intent to extend, the customer's service will automatically be billed under month-to-month billing at the tariffed rates in effect at the time the SPP Initial Service Period expires.
- D. At the end of an Extended Service Period, the customer's service will automatically be billed under month-to-month billing at the tariffed rates in effect at the time the Extended Service Period expires unless the customer negotiates a new SPP Initial Service Period or terminates service.

53.1.6 Additions to Existing SPP

- A. Additions to an existing SPP can be made. The payment for the addition will be the sum of the addition's monthly payments less a prepayment offset as defined in Section 53.1.11 for the remaining Service Period of the existing contract.
- B. The rates and charges in effect at the time of the service addition will apply in calculating the monthly payments.
- C. The full payment for the addition is due 30 days from the effective date of the addition.
- D. There is no limit to the number of additions that can be made during the SPP Service Period.

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM - (Continued)

53.1.7 Moves to a New Location

- A. When a customer moves their service under the SPP from one service location to another and the monthly rates are not affected, no adjustment to the existing SPP payment is required. The customer will be responsible for all applicable nonrecurring charges set forth in SWBT tariffs for services that are under the SPP.
- B. When a customer moves service under SPP from one service location to another and the monthly rates are affected, a price adjustment for the remaining term of the agreement will be made. The adjustment will be based on the monthly rates for the new location's Rate Group that were in effect prior to any SWBT initiated rate increase. When the adjustment results in an amount due SWBT, the full payment will be due 30 days from the date the service location was changed. When the adjustment results in an amount due the customer, an adjustment will be made on the customer's next monthly bill statement.
- C. When the customer moves service under the SPP outside SWBT's service area, the move will be treated as a reduction to the existing SPP and the rules in paragraph 53.1.8, following apply.

53.1.8 Reductions to Existing SPP

- A. The customer can disconnect SPP services and not terminate the agreement provided the remaining services do not fall below 80% of the number initially placed under the SPP agreement. The SPP Discontinuance Settlement calculation in Paragraph 53.1.10, for the services disconnected will be used to calculate any settlement.
- B. When the customer disconnects SPP services and the services remaining under the SPP agreement are between 50% and 79% of the number initially placed under the SPP agreement, the customer will be allowed a 90 day grace period prior to termination of the agreement. During the 90 day grace period the customer may add services that will bring the total quantity in-service to at least 80% of the services under the initial SPP agreement. The 90 day grace period cannot extend beyond the ending date of the SPP agreement term.
- C. When the number of services provided under the SPP agreement fall below 50% of the initial SPP agreement the SPP agreement will be terminated and the customer will receive a SPP Discontinuance Settlement as set forth in paragraph 53.1.10, following.

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM - (Continued)

53.1.9 Conversions to New SWBT Services and Upgrades in Service

- A. If a comparable new service becomes available during the SPP Service Period the customer will be able to convert their existing service to the new service under the existing agreement.
- B. The tariffed rate for the new service that is in effect at the time the service is changed will be used to calculate an adjustment to the initial SPP payment. All nonrecurring charges associated with the new service's installation will apply.
- C. Upgrades to a different SWBT service will require a new SPP agreement. The existing SPP agreement will be discontinued.
- D. If the upgrade in service includes a service term that is as least along as the remaining term of the SPP agreement, the balance of the SPP payment may be applied to the new service.
- E. If the upgrade in service is to a month to month service or if the term is less than the remainder of the SPP agreement, the customer will receive a SPP Discontinuance Settlement as defined in Paragraph 53.1.10.

Issued: July 13, 1998

Effective: September 13, 1998

Original Sheet 6

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM - (Continued)

53.1.10 SPP Discontinuance Settlement

A. Customers requesting to discontinue the SPP agreement prior to the expiration of the Initial Service Period or customers who fail to keep the terms of the agreement, may be due a Settlement.

B. The Settlement for an Initial Service Period will be calculated as follows:

$$\begin{matrix} \text{(Prepaid)} & & \text{(Months} & & \text{Initial*)} & & \text{(Administrative)} \\ \text{(Amount)} & - & \text{(Expired} & \times & \text{Tariff)} & - & \text{(Charge)} \\ & & \text{(} & & \text{Rate)} & & \end{matrix} = \text{Settlement}$$

C. In the event the customer requests to discontinue the SPP contract during the Extended Service Period a Settlement will be calculated as follows:

$$\begin{matrix} \text{(Extended)} & & \text{(Extended} & & \text{)} \\ \text{(Service)} & & \text{(Service} & & \text{Initial*)} & & \text{(Administrative)} \\ \text{(Period)} & - & \text{(Period} & \times & \text{Tariff)} & - & \text{(Charge)} \\ \text{(Payment)} & & \text{(Months} & & \text{Rate)} & & \\ \text{(Amount)} & & \text{(Expired} & & \text{)} & & \end{matrix} = \text{Settlement}$$

D. The administrative charge will be equal to the charge to initiate or terminate detailed billing as shown in Paragraph 1.2.2 G of the Local Exchange Tariff.

*If a rate is decreased during the service period of the SPP agreement, the rate reduction will be applied to the number of expired months the reduced price was in effect.

General Exchange Tariff
Section 53
Original Sheet 7

PAYMENT PLANS

53.1 SMARTPAYMENT PLANSM - (Continued)

53.1.11 SPP Payment and Prepayment Offset

- A. The SPP payment is the sum of the SPP service's tariffed monthly rates and charges for the agreement period less a prepayment offset. The prepayment offset is the difference between the monthly payments for the SPP agreement service period and the present value of the monthly payments for the agreement service period.
- B. The prepayment offset will be calculated using the authorized discount rate in Section 17 of the General Exchange Tariff as follows:

(Tariffed Rate X Number of Services) = Monthly Payment

$$\begin{array}{rcl}
 \text{(Sum of } & \text{(The present value of an annuity due)} & \\
 \text{(Monthly } & \text{(for the monthly payments at the } & \\
 \text{Payments)} & \text{authorized discount rate for the } & = \text{ Prepayment} \\
 & \text{(appropriate number of months } & \text{Offset} \\
 & & \text{)} & \\
 \end{array}$$

- C. The authorized discount rate, once established for an agreement, will not change during the term of the agreement.
