LOCAL PLUS®

Missouri Public
Service Commission

REC'D OCT 30 1998

48.1 GENERAL

A. Service Description

1. Local Plus is an optional one way, outward service where, for a monthly recurring flat rate, customers can place calls within their LATA to other customers in exchanges within the Local Plus calling scope, as defined in sub-section 48.1.C of this section.
2. Qualified usage under this plan is intraLATA customer-dialed, sent-paid, non-coin calls originating at a subscriber's access line and terminating at an access line in an exchange within the Local Plus calling scope as defined in sub-section 48.1.C of this tariff.
3. Calls included in this plan are dialed using a seven-digit or 10-digit local dialing pattern.

B. Service Availability

1. This service is furnished subject to the availability of the required telecommunications facilities. Implementation of Local Plus will be phased in over a period of time; therefore the service may not be available in all exchanges during the implementation period.
2. Subject to the restriction in paragraph B.1 above, service is available to Missouri local exchange customers of Southwestern Bell Telephone Company as listed in the Local Exchange Tariff Section 1.3. Service will not be offered to SWBT local exchange customers served by a switch located in another state.

C. Calling Scope

The Local Plus Calling Scope includes all customers in all exchanges within the same LATA as the subscribing telephone line. In addition, the Local Plus calling scope for the Kansas City LATA includes the Kansas portion of the Kansas City Metropolitan exchange.

VOICE DIAL

AUG 25 1995

48.1 SERVICE DESCRIPTION

- 48.1.1 VOICE DIAL is a voice recognition feature that allows residential and business customers to originate a telephone call by speaking a phrase or the name of the person or place they want to call. VOICE DIAL will recognize and match the spoken input with the voice directory, established previously by the customer, and dial the appropriate telephone number.
- 48.1.2 VOICE DIAL includes a voice directory of phrases or names for each customer. The voice directory includes the phrases or names as they are spoken by the customer, the corresponding telephone number to each phrase or name and the recorded phrases or names for playback to the customer as the appropriate number is being dialed. The playback function is required so the customer can verify that the correct call is being dialed. The voice directory can be accessed via the implicit and explicit access modes as described in Paragraph 48.3, following.
- 48.1.3 VOICE DIAL is compatible with either Touch-Tone or rotary services. The customer will be able to continue to originate telephone calls by dialing via the usual Touch-Tone or rotary dialing methods.
- 48.1.4 VOICE DIAL offers multiple language voice prompts. The customer has an option to choose between either of two languages (English or Spanish) at the time the service is ordered. The default language will be English. The customer may change the choice of language voice prompts after the installation of service.
- 48.1.5 The customer will also have the option to establish a shared voice directory that can be accessed from two different telephone lines at the same location. Both telephone lines are required to have the same billing name.

C. Use Restrictions

1. Local Plus is not offered in conjunction with services designed to forward calls in mass including but not limited to Simultaneous Call Forwarding, TeleBranch Service, Disaster Routing Service and Intelligent Redirect or similar services that might be offered under other names or by other companies.
2. Local Plus is sold in conjunction with and solely for use on Local Exchange Telephone Service access lines and trunks.
3. Local Plus may only be used for the communications of a single end user. It may not be used to aggregate the communications of multiple end users for resale (including but not limited to, arrangements using services such as Simultaneous Call Forwarding or TeleBranch to aggregate calling capability for resale or to provision communications services for others).
4. This tariff shall only be effective as long as the use restrictions and the rules and regulations in this tariff remain in effect for all users (including any exchange telecommunications company or other company reselling this service, and their customers.) In the event any of these use restrictions or rules and regulations are held not to apply to all such users, upon notification by the Telephone Company to the Commission, this tariff shall not be available except to existing subscribers of the service at existing service levels at existing locations. SWBT shall also have the right to withdraw this service offering in its entirety.

D. Multiline Accounts

With the following exceptions, Local Plus subscribers are not required to purchase Local Plus on all access lines of a multiline account. Exceptions are as follows:

1. In cases where a single working telephone number is used for multiple access lines, if Local Plus is purchased for one line in the arrangement, it must be purchased for all of the lines.
2. Within a multiline hunting arrangement, if one access line is subscribed to Local Plus, all lines must be subscribed to Local Plus.

48.3.1 Implicit Access Mode-allows the customer to originate a call automatically by speaking a phrase or name from their voice directory. Using Implicit Access, the customer will hear the dial tone followed by a beep which will indicate that the customer can originate the call by speaking the name or phrase on their voice directory.

When a shared directory has been established, both telephone numbers of a shared directory will be able to simultaneously access the Implicit Access Mode.

48.3.2 Explicit Access Mode-allows the customer to enter an access code with an optional Personal Identification Number (PIN), whenever the customer goes off hook and hears a dial tone, to activate the following functions:

- A. Add Name - allows the customer to add names, phrases or telephone number entries in the VOICE DIAL directory.
- B. Delete Name - allows the customer to delete names, phrases or telephone number entries in the VOICE DIAL directory.
- C. Review Name - allows the customer to hear the names, phrases and telephone numbers contained in the VOICE DIAL directory.
- D. Change Language - allows the customer to select the desired language (i.e., English or Spanish) for the VOICE DIAL prompt messages.
- E. Establish/Change Personal Identification Number (PIN) Authorization Code - allows the customer to establish and/or change their security PIN. The customer has the option of establishing a PIN to be used for access to the explicit access mode feature.

When a shared directory has been established, only one telephone line will be able to activate these functions at a time.

The service combination of Local Plus service with a digital facility under this promotion will be referred to as a Digital Plus arrangement.

(CT)
(CT)

1. The monthly price for Local Plus under this promotion is \$45 for non-MCA subscribers. (Since Optional MCA customers do not receive an additional Local Plus discount, the rate shown on Sheet 5 of this tariff applies). It is in effect for the duration of the contract. Local Plus must be purchased on all trunk equivalents (capable of originating outgoing messages) of a digital facility per trunk group, with a minimum of 10. A maximum of 15 facilities per customer may be equipped with Digital Plus arrangements.
2. Subscribers under the Digital Plus promotion may also be eligible for promotional pricing of their Digital Loop, SuperTrunk or SmartTrunk Services. See the General Exchange Tariff, Section 38 Sheets 10, 10.1 and 14 (Digital Loop Service and SuperTrunk), and the Integrated Services Tariff, Section 2, Sheet 6.02 (SmartTrunk).
3. If a customer disconnects either Local Plus or a digital facility prior to the contract expiration, the customer is liable for a termination payment. The payment is equal to the number of months the customer had Local Plus at the Digital Plus rate times the difference between the full tariff rate and the discounted rate, for each channel disconnected. Additional termination liability applies for Super Trunk, Smart Trunk and Digital Loop Service.
4. New Digital Plus arrangements must be added within six months of the start date of the contract.

B. Multiple Line Business Promotion: For a period of time beginning June 1, 2000, and ending June 30, 2000, discounted rates are available to business Local Plus customers who purchase Local Plus on more than one line.

1. The discounted monthly rates during this period are \$35 per line equipped with Local Plus when purchased in quantities of 2 to 10 and \$25 per line equipped with Local Plus when purchased in quantities of 11 or more. The rate for the first line remains the normal tariffed rate.

AREAWIDE NETWORKING

49.1 DESCRIPTIVE SUMMARY

- 49.1.1 AreaWide Networking is a service that improves the interlocation networking capabilities of customers connected to Southwestern Bell Telephone Company (SWBT) central offices. AreaWide Networking allows a customer having multiple locations and/or multiple telecommunication systems to establish a uniform dialing environment and/or remote access to network facilities.
- 49.1.2 AreaWide Networking uses the public switched network to provide capabilities and features typical of a virtual private network. Interlocation transport through the public network and/or private dedicated facilities is provided to end-users with a Private Branch Exchange (PBX), key system, Plexar[®], Centrex or an individual exchange access line. AreaWide Networking has available two types of standard service: a Dialing Plan Service option and a Remote Access to Facilities option. These standard service options can be purchased where SWBT facilities and equipment are available.
- 49.1.3 AreaWide Networking requires customers to subscribe to the basic SWBT exchange services (i.e., Digital Loop Service, Plexar[®], single business line, etc.) in addition to the AreaWide Networking service, in order to provide the networking capabilities described above.
- 49.1.4 Optional expanded local calling scopes and optional toll-free calling scopes available to other SWBT business and end user customers are also available to AreaWide Networking customers at the applicable rates and charges as specified in the appropriate tariffs of the Telephone Company. The rates, charges and regulations in this section are in addition to those specified in this and other Telephone Company tariffs (e.g., Local Exchange, Long Distance Message Telecommunications, etc.).

49.2 SERVICE AVAILABILITY

- 49.2.1 SWBT will provide AreaWide Networking service from any SWBT exchange to another SWBT exchange within a geographic service area known as a Local Access and Transport Area (LATA), where facilities and equipment are available. The customer is responsible for designating an Interexchange Carrier(s) (IXC) for AreaWide Networking calls which terminate outside the LATA boundary. Calls terminating inside the LATA boundary will incur toll charges, when applicable. This tariff section does not create an obligation for SWBT to construct such facilities or equipment for this service.

49.3 STANDARD SERVICE

49.3.1 Option I - Dialing Plan Service

A. Enables the AreaWide Networking customer to provide an abbreviated and customized dialing plan for intra and interlocation calls and provides a platform on which to add an array of optional features. Dialing Plan numbers may consist of exchange access lines, PBX/Key system stations, Plexar^R stations or Centrex stations that have access to a Dialing Plan. The public switched network is used to complete calls between AreaWide Networking-equipped station users of the same customer that are served by different telecommunications systems (i.e., PBX, Plexar^R, Centrex, etc.). There are two types of Dialing Plan configurations available

1. Location Code Dialing Plan: Enables the AreaWide Networking customer to have extension numbers that consist of a leading dialing digit(s), followed by from one to seven digits of the end-user's North American Numbering Plan (NANP) telephone number. This Dialing Plan choice permits duplication of the extensions among locations served by different switches. The customer is not limited to 10,000 AreaWide Networking stations in this configuration. This location code can only be used by callers from within the AreaWide Networking customer's network.
2. Extension Number Portability Dialing Plan: Enables the AreaWide Networking customer to have an extension number that is independent of the North American Numbering Plan number. When an end-user moves from one location to another, the North American Numbering Plan number may change but the assigned AreaWide Networking extension number can remain the same. This extension code can only be used by callers from within the AreaWide Networking customer's network.

(RT) B. The AreaWide Networking service customer must subscribe to a Dialing Plan on a minimum of
(AT) ten stations. The subscriber may designate which of the stations at each location will become
(AT) part of the Dialing Plan Service.

49.3.2 Option II - Remote Access To Facilities

- A. Allows the AreaWide Networking customer to provide access to dedicated facilities established at designated AreaWide Networking locations.
- B. Access to the facility group(s) in the customer's AreaWide Network is gained by dialing a seven or ten digit North American Numbering Plan telephone number.
- C. The Remote Access to Facilities option provides the customer with access to dedicated facilities but does not include the rates and charges which apply for the actual facilities. These facilities must be ordered out of the appropriate tariffs.

49.4 OPTIONAL SERVICE FEATURES

49.4.1 Option I - Dialing Plan Service

- A. Automatic Selection of Facilities (ASF): Routes calls originated from an AreaWide Networking customer to private or public facilities for efficient management of outgoing calls. The following options are available:
1. On-Network Based Routing: Provides the ability to select the facilities/carriers (i.e., interexchange carriers) to route calls within the AreaWide Networking network. For intra-location and intraLATA calls, the Public Network Facilities will be used (unless other facilities are identified). For interLATA calls the AreaWide Networking customer must specify the facilities/carriers over which the calls will be routed.
 2. Off-Network Based Routing: Provides the ability to select the carriers to route calls outside the AreaWide Networking network. For intraLATA calls, the Public Network Facilities will be used (unless other facilities are identified). For interLATA calls, the AreaWide Networking customer must specify the facilities/carriers over which the calls will be routed.
- B. Additional options available to both On-Network and Off-Network Based Routing include:
1. Numbering Plan Area (NPA) Based Routing: Allows the AreaWide Networking customer to specify up to ten terminating NPAs, including an "other" option. If the NPA of the called party number does not match any of the specified NPAs, the call will be routed using the type of facilities and carrier specified by the "other" option.
 2. Time-Of-Day /Day-Of-Week (TOD/DOW) Routing: Routes calls using the specified route (i.e. type of facilities and carrier) based on the TOD/DOW. The AreaWide Networking customer can specify up to ten different TOD/DOW routing options, including the "other" option. If the current TOD/DOW does not match any of the specified TOD/DOW options, the call will be routed using the "other" option.
 3. Specific Date/Day of Year Routing: Routes calls based on a specific date or day of year. The AreaWide Networking customer can specify up to ten different date routing options including the "other" option. If the current date does not match any of the specified options, the call will be routed using the "other" option.
 4. Percentage Allocation Routing: Routes calls based on pre-set percentage allocation. Five different percentages can be specified and the sum of the specified percentages must equal 100. For each percentage, the AreaWide Networking customer specifies the type of facilities and carrier to be used to route calls.

49.4.1 Option I - Dialing Plan Service-(Continued)

C. Centralized Access to Private/Public Facilities: Allows AreaWide Networking-equipped stations to access facility groups consisting of private or public facilities established at centralized locations for the purpose of calling outside the AreaWide Networking network (i.e. off-network). Access to the centralized facilities is provided by dialing an abbreviated access code of one or more digits. Security is ensured by verifying the Calling Party Number of the User trying to access the centralized facilities or through the use of authorization codes. This feature also allows the customer to specify the routing preferences for calls transported over these centralized facilities.

(RT)

(RT)

(FC)

D. Link Extension: Provides the additional facility and central office hardware required to provide AreaWide Networking service from a central office other than the customer's normal serving central office within a Local Access and Transport Area (LATA). This option is available to customers located in an AreaWide Networking equipped or non-equipped serving central office.

(RT)

(RT)

E. Work At Home: Allows the telephone of the AreaWide Networking customer's employee to use the AreaWide Networking Dialing Plans on a call-by-call basis. The employee dials the appropriate digits which enables the employee's line to operate with AreaWide Networking features. Incoming calls to the employee's work extension are forwarded to the employee's telephone and applicable toll charges will apply to these calls.

49.4.1 Option 1 - Dialing Plan Service-(Continued)

- C. Centralized Access to Private/Public Facilities: Allows AreaWide Networking-equipped stations to access facility groups consisting of private or public facilities established at centralized locations for the purpose of calling outside the AreaWide Networking network (i.e. off-network). Access to the centralized facilities is provided by dialing an abbreviated access code of one or more digits. This feature also allows the customer to specify the routing preferences for calls transported over these centralized facilities.
- D. Function Codes: Allows the AreaWide Networking customer to define and use special uniform dialing codes based on a location, job function, etc., or any combination of criteria. Access codes for function numbers cannot overlay with location codes or any other access codes for other features.
- E. Link Extension: Provides the additional facility and central office hardware required to provide AreaWide Networking service from a central office other than the customer's normal serving central office within a Local Access and Transport Area (LATA). This option is available to customers located in an AreaWide Networking equipped or non-equipped serving central office.
- F. Outgoing Call Screening: Allows the AreaWide Networking customer to restrict the calling privileges of calls originated from AreaWide Networking stations based upon the privilege classes defined by SWBT. An additional option available with Outgoing Call Screening is:
 - 1. Authorization Code Override: Allows an AreaWide Networking user to override privilege class restrictions associated with an AreaWide Networking station with an authorization code that has been assigned to a particular AreaWide Networking user.
- G. Work At Home: Allows the telephone of the AreaWide Networking customer's employee to use the AreaWide Networking Dialing Plans on a call-by-call basis. The employee dials the appropriate digits which enables the employee's line to operate with AreaWide Networking features. Incoming calls to the employee's work extension are forwarded to the employee's telephone and applicable toll charges will apply to these calls.

49.5 SERVICE REGULATIONS-(Continued)

- (MT) 49.5.4 Unique requests for special or modified service arrangements will be evaluated for potential implementation and furnished, whenever possible, if not detrimental to this or other services of the Telephone Company. Such requests will be provided at additional charges based on the cost incurred.
- 49.5.5 This service shall not be shared or jointly used except as specified in Section 37 (Shared Tenant Service) of the General Exchange Tariff. Regulations applicable to the prohibition of the resale of Local Exchange Service, as specified in Paragraph 17.5.1 of Section 17 of the General Exchange Tariff, shall also apply to the provisioning of AreaWide Networking.
- (MT) 49.5.6 When multiple serves are activated on the same line, certain services may take precedence over others.

49.6 SERVICE TERMS

- 49.6.1 The customer shall select a service term for a Standard Service Option of AreaWide Networking of either month-to-month, 12, 24, 36, 48, or 60 continuous months. If the month-to-month service term is selected, all rates (recurring and nonrecurring) are subject to any approved rate changes. If a service term other than the month-to-month term is selected, the customer will be required to sign a contract. During the course of the contract, rates (recurring and nonrecurring), excluding optional features, are not subject to Telephone Company initiated rate changes.
- 49.6.2 All AreaWide Networking service components have a minimum service term of one month.
- 49.6.3 Installation charges for AreaWide Networking are normally paid in full at the time of installation. When requested by the customer prior to installation, this charge may be deferred over the service term, but may not to exceed the service term selected. This optional deferred payment is not offered for customers selecting the Month-to-Month service term.

Refer to Section 17 (Rules and Regulations Applying to All Customer's Contracts) of the General Exchange Tariff for appropriate annuity factors utilized in deferring these charges. This optional deferred payment is not offered for customers selecting the Month-to-Month service term.

49.7 ADDITIONS

49.7.1 Additions to service under the 12, 24, 36, 48 or 60 month service terms can be added to the existing contract, and can be coterminous with the original contract. On coterminous additions, apply the followings rates: if more than 90 days remain on the contract, apply rates equivalent to those of the original term; if less than 90 days remain, additions must be made under month-to-month option. Additions to service under the month-to-month plan can be made at any time.

49.8 OPTIONS AVAILABLE UPON EXPIRATION OF THE SERVICE TERM

49.8.1 Upon expiration of the service term, the customer may:

49.8 OPTIONS AVAILABLE UPON EXPIRATION OF THE SERVICE TERM-(Continued)

49.8.1 Upon expiration of the service term, the customer may:- (Continued)

- B. Continue service by selecting a new service term of 12, 36, 48 or 60 months for the AreaWide Networking service at the then current rates. The new service will commence on the day following the expiration of the previous service term. The new rate will not be subject to Telephone Company initiated rate changes for the duration of the service term. The customer will be required to sign a new contract for the service term selected.
- C. Discontinue the service.

49.9 RENEWAL OF SERVICE PRIOR TO EXPIRATION OF THE SERVICE TERM

49.9.1 The customer may, at his option, prior to the expiration of the existing service term, terminate the contract without incurring termination charges provided a) the customer signs a new contract at prevailing rates for a term at least 12 months longer than the time remaining in the original contract b) continues with an equivalent service arrangement (i.e., current system size), and c) agrees to pay an amount equal to the present worth of the remaining deferred installation and nonrecurring charges incurred on the original contract. These charges may be deferred over the new contract term by applying current annuity factors, as specified in Paragraph 49.6.3, preceding, for the new term.

49.10 DISCONNECTION OF SERVICE PRIOR TO THE EXPIRATION OF THE SERVICE TERM

49.10.1 Disconnects The Entire Standard Service Option 1 (Dialing Plan Service)

- A. In the event the AreaWide Networking customer disconnects the entire Standard Service Option I, the customer will be required to pay a termination charge. This charge will equal the present value of the remaining monthly payments for the Standard Service Option I (Location Code or Extension Number Portability Dialing Plan) charges. The customer will also be required to pay a termination charge based on the present value of the remaining payments for the applicable standard service per station charges. The number of stations subject to the charge will be 65% of the maximum contracted station quantity installed during the duration of the contract.
- B. In addition, the present worth of any installation and nonrecurring charges that have been deferred must be paid in full. The customer's contract specifies the discount rate that will be used under this condition.
