2.11 Deposits

2.11.1 The Company reserves the right to examine the credit record of the Customer, using any lawful sources for determining credit standing. If the Customer's financial condition is unknown or unacceptable to the Company, the Customer may be required to provide the Company with a security deposit which the Company may apply against overdue charges. The amount of the security deposit shall be equal to two months' estimated usage but may vary with the Customer's credit history and projected usage. The Customer shall be apprised that after one year of service the Account shall be reviewed, and in the event that all amounts due have been paid within the terms and conditions of this tariff, the deposit shall be refunded in full. If subsequent payment or usage patterns change, the Company may request an increase in or resubmission of the security deposit as appropriate. The Company may also require a security deposit before service is restored (along with the payment of overdue charges) from the Customer whose service has been discontinued for nonpayment of overdue charges. Such security deposit may be based on a new credit history (taking into account the discontinuance of service) and estimates of usage. Interest will be paid on deposits held at the rate of 9% per year.

2.11.2 The fact that a security deposit has been made in no way relieves the Customer from the prompt payment of bills upon presentation.

2.12 Advance Payments

2.13 Interruption of Service

Credit allowances for interruptions of service which are not due to the Company's testing or adjusting, to the negligence or other wrongful act or omission of the Customer, or to the failure of channels, equipment and/or communications systems provided by the Customer, are subject to the general liability provisions set forth in this tariff. Before giving such notice, the Customer shall ascertain that the trouble is not within his or her control, or is not in wiring or equipment, if any, furnished by the Customer. Interruptions caused by Customer-provided, or Company-provided automatic dialing equipment are not deemed an interruption of service as defined herein since the Customer has the option of using the long distance network via LEC access. For purposes of credit computation, every month shall be considered to have 30 days and every day 24 hours. For all Company services no credit shall be allowed for an interruption of continuous duration of less than twenty-four hours. 2.20 Other Rules, (cont'd.)

2.20.6 From time to time, the Company may offer complimentary limited use phone cards (total value not to exceed \$100) to potential business or residential Customers who respond to, or are targeted by advertising or marketing campaigns. The Company may also offer complimentary limited use phone cards to existing or returning Customers as an incentive to retain such Customers. The limited use phone card allows users to originate outbound, direct dialed domestic long distance calls via a toll free access number. All calls are rounded to the next higher full minute or unit. The limited use phone card shall expire on the date specified on the card, or in the absence of a physical card, on the date specified on the marketing material accompanying the complimentary calling service offer.

2.21 Disabled Customer Services

(T,N)

The Company offers discounted or special assistance services for Customers with disabilities.

(N)

2.21.1 All Disabilities

The Residential Customer who has identified himself or herself to the Company as disabled will receive long distance directory assistance calling on any line presubscribed to the Company under that account at no charge. In addition, the disabled Residential Customer who places a call from the presubscribed residential line with the assistance of an operator will receive the operator assistance at no charge. The operator assisted calls placed from such lines will be rated at the plan rate of the presubscribed line. For example, if a disabled Residential Customer subscribes to a plan with unlimited usage and places a domestic call from the presubscribed line with operator assistance, no charges will apply to that call.

(N)

2.21.2 Hearing Impairment Discount

(T)

Intrastate rates for any direct dialed outbound call communicated using a Telecommunications Device for the Deaf (TDD) by a properly certified hearing or speech impaired person or a properly certified Residential Customer equipped with a TDD for communicating with a hearing or speech impaired person from a line presubscribed to the Company will be rated at direct dial rates associated with Plan C rates for Hearing Impaired Customers or Plan C Bundled Service Option rates. Alternatively, if the hearing impaired Residential Customer elects a plan with lower rates, including an unlimited usage plan, the lower rate will apply. Also see the discounts offered to all Residential Customers with disabilities noted above.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.2 Calculation of Distance

Usage charges for all mileage sensitive services are based on the airline distance between the rate center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the applicable rate centers as defined by Telecordia (formerly Bellcore) and on file with the FCC in AT&T FCC Tariff No. 10, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the rate center of the originating and the destination points.

Step 2 - Obtain the difference between the "V" coordinates of each of the rate centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating rate centers of the call.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

3.3.1 Timing for all calls begins when the called party answers the call (i.e. when two way communications are established). Answer detection is based on standard industry answer detection methods, including hardware and software answer detection.

3.3.2 Chargeable time for all station-to-station calls begins when connection is established between calling party and the called party and ends when the calling party hangs up thereby releasing the network connection. If the called party hangs up but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the network, or by an operator.

3.3.3 Minimum call duration for billing purposes is one minute unless otherwise specified in the individual rate schedules of this tariff.

3.3.4 Calls are measured and billed in one minute increments unless otherwise indicated in this tariff. Any partial minute is rounded up to a full minute.

3.3.5 No charges apply to incomplete calls.

A. General Description

When service is used for both interstate and intrastate calling, the MRC applies only once. Additional minutes are available and billed on a per minute basis.

Directory assistance and operator assisted calls are offered at rates specified in Sections 4.3 and 4.4 of this tariff.

If the Customer discontinues Worldwide Saver International, the Worldwide Saver Domestic plan will automatically default to standard LDMTS rates and a notice will be sent on the Customer's bill. The Customer must be presubscribed to the Company as their primary interexchange carrier and remain so to be eligible for this plan. Worldwide Saver Domestic is offered to residential Customers only, and is available where billing and system capabilities exist.

For the Residential Customer who elects pre-paid service, the available balance that may be applied to prepaid presubscribed switched equal access direct dialed intrastate interexchange outbound calling service is the net amount after the Company has deducted Residential Customer-elected charges, e.g., charges for statements of account. The Residential Customer who elects pre-paid service will be notified of the account balance available for calling and the time available for a call by a network recording at the beginning of each call. At the Residential Customer's option, the Residential Customer will also be notified of the available balance for calling at the end of each call. The Residential Customer will receive warning messages as the account balance is nearing depletion. Once the Residential Customer's available balance for calling has been depleted, the Residential Customer will be unable to place a new call, or continue a current call, using the Company's Plan E until the available balance for calling is replenished. The routine depletion and replenishment of the available balance for calling does not constitute suspension of service under this tariff.

3. Minimum Spend Level

When the Customer's billing for applicable charges falls below a minimum level in any full billing period, a shortfall charge will be applied, which is equal to the difference between the Minimum Spend Level (MSL) and the actual contributory billing for that billing period.

Charges that contribute toward meeting the MSL, include but are not limited to: Direct Dialed calls, International calls, Travel Card calls, Away from Home calls, Personal Toll Free calls, Operator Assistance calls and Domestic and International Monthly Recurring Charges. Federal taxes, state taxes, credits, Universal Service Fees, charges billed by other carriers and other surcharges and taxes do not contribute towards satisfying the minimum spend level requirement. Each billing month when the contributory charges are equal to or greater than the MSL, no MSL charge is imposed. If the contributory charges are less than the MSL rate, the difference between the MSL rate and the contributory charges will be a separate charge on the bill.
