TARIFF FORMAT

- A. **Page Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).

2.3 Payment and Credit Regulations, (Cont'd.)

2.3.2 Deposits

The Company reserves the right to examine the credit record of the Customer, using any lawful sources for determining credit standing. If the Customer's financial condition is unknown or unacceptable to the Company, the Customer may be required to provide the Company with a security deposit which the Company may apply against overdue charges. The amount of the security deposit shall be equal to two months' estimated usage but may vary with the Customer's credit history and projected usage. In the case of new applicants for service, the average monthly bill for new subscribers within a customer class will be used to calculate the two months' estimated usage.

The Customer shall be apprized that after one year of service the Account shall be reviewed, and in the event that all amounts due have been paid within the terms and conditions of this tariff, the deposit shall be refunded with interest as required by 4 CSR 240-33.050(4)(B).

Upon discontinuance or termination, the deposit shall be credited, with accrued interest as required by 4 CSR 240-33.050(4)(B), to the charge stated on the final bill and the balance, if any, shall be returned to the customer within twenty-one (21) days of the rendition of the final bill.

If subsequent payment or usage patterns change, the Company may request an increase in or resubmission of the security deposit as appropriate. The Company may also require a security deposit before service is restored (along with the payment of overdue charges) from the Customer whose service has been discontinued for nonpayment of overdue charges. Such security deposit may be based on a new credit history (taking into account the discontinuance of service) and estimates of usage.

The fact that a security deposit has been made in no way relieves the Customer from the prompt payment of bills upon presentation.

2.5 Refunds or Credits for Service Outages or Deficiencies

2.5.1 Interruption of Service

Credit allowances for interruptions of service which are not due to the Company's testing or adjusting, to the negligence of the Customer, or to the failure of channels, equipment or communications systems provided by the Customer, are subject to the general liability provisions set forth in Section 2.6 herein. No credit is issued for outages less than ½ hour in duration. Credit for outages greater than ½ hour in duration is issued for fixed recurring monthly charges only. Outage credits are calculated in thirty minute intervals. The amount of the credit is determined by pro-rating the monthly recurring charge for the time of the outage (in thirty-minute intervals). It shall be the obligation of the Customer to notify the Company immediately of any interruption in service for which a credit allowance is desired by Customer. Before giving such notice, the Customer shall ascertain that the trouble is not within his or her control, or is not in wiring or equipment, if any, furnished by the Customer and connected to the Company's terminal. Interruptions caused by Customer-provided or Company-provided automatic dialing equipment are not deemed an interruption of service as defined herein since the Customer has the option of using the long distance network via local exchange company access.

Credit allowances for interruptions of service billed on a usage basis shall be limited to the rate applicable to the initial period of the call to compensate for re-establishment of the connection.

Original Page 25**SECTION 3.0 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)****3.5 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Tariff No. 4.

Step 1 - Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point.

Step 2 - Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$
