Service Commission

3.2.1 Resold Exchange Access Lines

REC'D JAN 27 2003

The Company concurs in the rules and regulations applying to and governing Basic Local Exchange telephone service (hereinafter referred to as Exchange Access Lines service) as set forth in the Southwestern Bell Telephone Company Local Exchange and General Exchange tariffs on file with and approved by the Missouri Public Service Commission, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company concurs with Southwestern Bell Telephone Company's regulations, descriptions and scopes of the following Exchange Access Line telephone Services, but not the rates. Rates and specific footnotes for these services are set out in the following pages of this concurrence.

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any such time as it appears that such cancellation is in the best interest of the Company and/or its Customers. The following rates are exclusive of Relay MO E911 where applicable and subscriber line charges and taxes.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.2 Resold Services, cont.

3.2.1 Resold Exchange Access Lines, cont.

A. Main Service

Measured Service

This service is offered to residential and business customers on an individual (one-party) basis where facilities permit. Service consists of a charge for the exchange access line and usage charges as shown in Section 3.2.1. Usage charges below apply to all outgoing calls, except those that are placed to the Company (i.e., Directory Assistance, repair service, business office), toll and authorized local emergency number, and 911.

Applicable Service and Equipment Charges for conversion to or from these services will not apply for existing customers for the first 180 days after the service is initially offered in the customer's serving central office.

Measured Service - Usage Charges

Distance in Miles	Initial Minute Rate	Each Add'l Minute Rate
0-14	\$.04	\$.01
15-28	.05	.02
Over 28	.06	.03

The method of applying usage charges:

- Initial period rates shown above are for connections of one minute or any fraction thereof
- All additional minute rates above are for each additional minute or any fraction thereof that the connection continues beyond the initial period.
- The timing of messages begins when connection is established between the calling telephone number and the called telephone and ends when the connection is terminated at any point

3.2 Resold Services

3.2.1 Resold Exchange Access Lines, cont.

A. Main Service, cont.

Measured Service – Discount Periods

The following percentages will apply to local calls made during the discount periods.

	Mon	Tues	Wed	Thurs	Fri	Sat	Sun
8:00 AM TO 5:00 PM	Day Rate Period Full Rate						
5:00 PM TO 11:00 PM	Evening Rate Period 20% Discount						
11:00 PM TO 8:00 AM	Night Rate and Weekend Rate Period 35% Discount						Evening 20%

- Discounts are applied by discount period to the total number of initial minutes and additional minutes accumulated during the billing period.
- When the application of the discount results in a fractional charge, the amount will be rounded to the nearest cent.
- In cases where a message begins in one rate period and ends in another, the rate in effect at the time the connection is established applies.

4. Metropolitan Exchange Service

a. General

In the Kansas City and St. Louis Metropolitan Exchanges there is a Principal Zone, a group of Metropolitan Calling Area-1 (MCA-1) Zones and a group of Metropolitan Calling Area-2 (MCA-2) Zones.

In the Springfield Metropolitan Exchange there is a Principal Zone and a group of Metropolitan Calling Area-1 (MCA-1) Zones.

The rates specified for each zone in the Metropolitan Exchange entitle the customer to local service within the primary service area specified for that zone.

5. Optional Metropolitan Calling Area (MCA) Service

a. Service Description

- I. Metropolitan Calling Area (MCA) service is available in three distinct areas in Missouri: the St. Louis MCA, the Kansas City MCA, and the Springfield MCA.
- II. The St. Louis, Kansas City, and Springfield Metropolitan Exchanges are included in the respective MCAs. The basic local calling scope for each of these exchanges is the MCA-wide calling scope set forth in Section 3.2.1.A.4 of this tariff.
- III. In selected exchanges, MCA service is an optional service which provides the subscriber with an optional local calling area which includes the respective Metropolitan Exchange and certain customers in other exchanges where MCA service is also available, as described in Section 3.2.1.A.5.c following.
- IV. In each MCA, exchanges and Metropolitan Exchange Zones are grouped into different MCA rate classifications. In the Kansas City MCA, exchanges where Optional MCA Service is available are classified as MCA-3, MCA-4 or MCA-5. In the St. Louis MCA, exchanges where Optional MCA Service is available are classified as MCA-3, MCA-4, MCA-5 or MCA-6. In the Springfield MCA, exchanges where Optional MCA Service is available are classified as MCA-2.

d. Regulations

- I. Unless otherwise specified in these regulations, MCA is offered to all classes and grades of residence and business customers located in an MCA exchange.
- II. Optional MCA Service is not offered in conjunction with Payphone Exchange Access Service or Cellular Service.
- III. MCA is designed and intended for the exclusive use of the end user customers of the Company. MCA is not to be shared, resold or used in any configuration of customer-provided equipment with the intent of reselling the service.
- IV. In situations where multiple access lines share the same working telephone number, if one such line subscribes to MCA service, then all lines must subscribe to MCA service.
- V. In situations where a hunting arrangement between access lines is provided by the Company, no MCA line may be configured to hunt to a non-MCA line.
- VI. Unless otherwise specified, MCA is subject to the Rules and Regulations shown in Section 1 of this tariff.
- VII. The minimum service period for subscription to Optional MCA Service is one month.

VIII. Rate Application

- i. The MCA monthly rates specified in Section 3.2.1.A.6 below, apply on a per-line basis..
- ii. The MCA monthly rates are billed one month in advance.
- iii. Optional MCA rates and charges apply in addition to all other rates and charges paid by the customer for other services of the Company.
- iv. The Measured 1-Party MCA option is only available to customers who also subscribe to Measured 1-Party basic local exchange service.

IX. Nonrecurring Service and Equipment Charges, as specified in Section 3.2.1.A.3 of this tariff, are applicable on a per-line basis when a customer adds or deletes Optional MCA Service, except as follows:

The charge to change a telephone number, specified in Section 3.2.1.A.3 of this tariff, does not apply when a customer deletes Optional MCA Service.

X. When this service is provided in conjunction with Simultaneous Call Forwarding (SCF), customers must pay the optional MCA additive for each SCF call path.

3.2 Resold Services, cont.

3.2.1 Resold Exchange Access Lines, cont.

D. Directory Assistance Call Completion

1. General

- a. The Company furnishes, where facilities permit, Directory Assistance Call Completion (DACC) whereby customers may request the completion of local or intraLATA long distance calls to a requested number by either the Directory Assistance operator or the Directory Assistance audio response system that provides the requested directory number. DACC is classified as a noncompetitive service.
- b. The DACC portion of the call may either be billed in the same manner as the DA portion or alternately billed by using a Telecommunications Company Calling Card, billed to a third number or collect.
- c. Business customers may obtain DACC screening at no additional charge. DACC screening gives business customers the option of allowing DACC only on an alternately billed basis from the customer's lines. Where facilities permit, the customer may choose to apply this option to all DACC calls or to intraLATA long distance DACC calls only.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.2 Resold Services, cont.

3.2.1 Resold Exchange Access Lines, cont.

D. Directory Assistance Call Completion, cont.

1. General, cont.

d. The three types of DACC offered are as follows:

Fully-Automated DACC

The customer receives the requested directory number from the automated Interactive Voice System (IVS). The customer accepts DACC from the IVS by depressing "1" from a Touch-Tone telephone during the first DACC announcement and the call completes without operator intervention for completion or billing assistance.

Semi-Automated DACC

The customer receives the requested directory number from the IVS or verbally from the operator. The customer may request DACC by either allowing the IVS to time-out back to the operator to provide call completion, or the operator completes the call following the verbal report.

Person-to-Person DACC

The customer receives the requested directory number from the IVS or verbally from the operator. The customer may request DACC by either allowing the IVS to time-out back to the operator to provide call completion, or the operator completes the call following the verbal report. The operator then completes the call to the individual specified by the customer.

2. Allowances

There are no allowances for DACC, however, the Directory Assistance portion of the call is governed by the appropriate call allowance as stated in Section 3.2.1.3 preceding.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.2 Resold Services, cont.

3.2.1 Resold Exchange Access Lines, cont.

D. Directory Assistance Call Completion, cont.

3. Exemptions

- a. For customers with physical, visual, mental or reading disabilities as described in Section 2.6, the charges for DACC will apply on local and intraLATA toll calls as described in paragraph 2, following.
- b. Calls sent-paid from the exempted line will not be charged for DACC. Calls sent-paid from Pay Telephones will be billed at the appropriate Sent-Paid rate as specified in Section 3.2.1.C. DACC charges billed to the customer's Telecommunications Company Calling Card will be billed at the Fully-Automated Telecommunications Company Calling Card rate as specified in Section 3.2.1.C. DACC charges billed as collect to the customer's exempted line will be billed at the Fully-Automated Collect or Bill to Third Number rate as specified in Section 3.2.1.C. For person-to-person calls, the Person-to-Person rate as specified in Section 3.2.1.C will apply.

E. National Directory Assistance (National DA)

1. National Directory Assistance is a service whereby customers may request listing information for areas outside their LATA or home NPA.
2. Callers access National DA by dialing 1 + 411 or 0 + 411. Only calls made for listings outside the customers' local directory assistance scope are eligible for National DA.
3. The regulations and rates set forth below apply to all calls from customers who request assistance in determining telephone number information of nationwide subscribers as shown in A and B above.
4. The customer will be charged for each listing request made during the call. The National DA rate applies per listing request whether or not a number is provided including requests for numbers which are non-published, non-listed or not found. There are no allowances associated with National DA.
5. There are no exemptions from billing for requests for National DA.
6. Where facilities permit, National DA will be available from Hotel/Motel and Pay Telephones on an alternate billed basis only.

National DA, Sent Paid Request, per call	\$1.02

Loop Protection (1) (per Digital Transmission Loop Arrangement), SB31X	\$140.00	\$328.00

(T)

- (1) Loop protection feature will be provided where fiber optic facilities are available. Special construction charges may apply when fiber optic facilities are not available or are involved in making them available to provide this feature. When requested by the Customers prior to installation, the Special Construction charges may be deferred over a period of 12 and 24 months. The deferred monthly value shall be determined by multiplying the special construction charge by the appropriate annuity factor, as found in Section 17.6.5 of Southwestern Bell's General Exchange Tariff. A charge equal to the remaining payments will be due immediately should the Customers terminate the service prior to completing payment of the deferred charge.

Distinctive Ring	AWXDR	3.09	0.00

(N)

	USOC	Per Successful Activation
Call Trace (8)	NST	6.30

Customers receiving annoying or anonymous calls may request (1) a telephone number change, which will be provided at no charge by Navigator or (2) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the Customer to dial a code (*57) to automatically request that the following information be recorded:

- (a) the originating telephone number
- (b) the date and time of the call
- (c) the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will activate a voice response script and assist the Customer in establishing an open file. Should the Customer decide to prosecute the call originating party, the Customer should contact Navigator for further instructions. Activation of Call Trace never authorizes Navigator to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's line.

Call Trace (8)	NST	6.30

(1)

Customers receiving annoying or anonymous calls may request (1) a telephone number change, which will be provided at no charge by Navigator or (2) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the Customer to dial a code (*57) to automatically request that the following information be recorded:

- (a) the originating telephone number
- (b) the date and time of the call
- (c) the date and time Call Trace was activated.

When Call Trace successfully identifies a calling number, a recording instructs the Customer to call a toll-free number, which will activate a voice response script and assist the Customer in establishing an open file. Should the Customer decide to prosecute the call originating party, the Customer should contact Navigator for further instructions. Activation of Call Trace never authorizes Navigator to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the Customer's line.

FOOTNOTES: For footnotes (1)(3)(4)(5)(6)(7)(8)(9)(18), see Section 3, Page 25.

3.2 Resold Services, cont.

3.2.4 Resold General Exchange Vertical Services, cont.

B. Business Rates & Charges, cont.

- (1) The Maximum Service and Equipment Charge per line is \$7.75 and \$15.65 for residential and business, respectively, except when the Simultaneous Call Forwarding service is established.
- (2) This rate is inclusive of the Cancel Call Waiting option where available.
- (3) Speed Calling 8 (business) and Speed Calling 30 (residence) are available only to existing Customers at existing locations.
- (4) If Personalized Ring is ordered at the same time as another EasyOptions® service(s), the higher Service and Equipment Charge is applied.
- (5) Only one Service and Equipment Charge applies when more than one dependent DN is ordered or changed simultaneously.
- (6) Applies in addition to the Service and Equipment Charge for other EasyOptions® services.
- (7) In addition, a Complex Installation/Move Charge of \$12.00 applies.
- (8) Upon request, this service can be removed from a Customer's telephone line.
- (9) Obsolete to existing customers at existing locations.
- (10) Blocking of this service is available free of charge upon request.
- (11) In addition to other applicable limitations described in 47.1.4 of Southwestern Bell's General Exchange Tariff, customers subscribing to ISDN lines, multi-party lines, PBX trunks (including hotel/motel service), lines equipped with three-way calling on a monthly subscription basis, will be restricted from activating Usage Sensitive Three-Way Calling. Three-Way calls for less than eighteen seconds will not be billed.
- (12) The maximum Service and Equipment Charge per line is \$7.75 for residence and \$15.65 for business, respectively, except when the service is ordered in conjunction with The Works®, The BASICSsm or BizSaver. If the service is ordered in conjunction with The Works®, The BASICSsm, or BizSaver, the Service and Equipment Charge are waived.
- (13) This rate applies only when the subscriber also has The WORKS®.
- (14) This rate applies only when the subscriber also has The BASICSsm.
- (15) This rate applies only when the subscriber also has The WORKS® or the BASICSsm.
- (16) Applies to the Call Transfer Disconnect rate when ordered with The WORKS®.
- (17) The Service and Equipment Charge is waived for Call Transfer Disconnect when the customer subscribes to The WORKS® or The BASICSsm.
- (18) Discounts – 5% off tariffed rate for residential.
- (19) Discounts – 10% off tariffed rate for businesses.

At the request of the customer, any one or all of the customer's primary listings, additional listings or other listings associated with the same or different residence telephone service line normally published in the directory will be omitted from the directory but listed in the Directory Assistance records available to the general public.

	<u>Monthly Rate</u>	<u>Service and Equipment Charge</u>
Non-listed Service, Primary, each (NLT)	\$1.74	\$6.00
Non-listed Service, Additional, each (NLA)	1.74	6.00

(I)

(I)

Extra line material may be provided in the alphabetical directory when, in the opinion of the Telephone Company, it facilitates the use of telephone service. An extra line must be directive for the proper placing of telephone calls and not designed for advertising purposes or to show store hours. Ordinarily, an extra line will be provided only when a customer has more than one listed telephone.

	<u>Monthly Rate</u>	<u>Service and Equipment Charge</u>
Business extra line, each (XLL)	\$2.64	\$9.50
Residence extra line, each (XLL)	2.07	6.00

REC'D JAN 27 2003

3.2.5 Resold Miscellaneous Services

The Company concurs in the rules and regulations, including all footnotes thereto, applying to and governing Miscellaneous Services as set forth in the Southwestern Bell Telephone Company General Exchange Tariff on file with and approved by the Missouri Public Service Commission, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company concurs with Southwestern Bell Telephone Company's regulations, descriptions and scopes of the following Miscellaneous Services, but not the rates. Rates and specific footnotes for these services are set out in the following pages of this concurrence.

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any such time as it appears that such cancellation is in the best interest of the Company and/or its Customers.

3.2.6 Resold Digital Link Services

REC'D JAN 27 2003

The Company concurs in the rules and regulations, including all footnotes thereto, applying to and governing the following Digital Link telephone services as set forth in the Southwestern Bell Telephone Company tariff on file with and approved by the Missouri Public Service Commission, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company concurs with Southwestern Bell Telephone Company's regulations, descriptions and scopes of the following Digital Link Services, but not the rates. Rates and specific footnotes for these services are set out in the following pages of this concurrence.

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its Customers.

3.2.7 Resold CO Based Virtual PBX Services

RESOLD CO BASED VIRTUAL PBX SERVICES ARE OBSOLETE EXCEPT FOR EXISTING CUSTOMERS AT EXISTING LOCATIONS.

The Company concurs in the rules and regulations, including all footnotes thereto, applying to and governing Plexar-I® (CO Based Virtual PBX) Services as set forth in the Southwestern Bell Telephone Company General Exchange Tariff on file with and approved by the Missouri Public Service Commission, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company concurs with Southwestern Bell Telephone Company's regulations, descriptions and scopes of the following Plexar-I® (CO Based Virtual PBX) services, but not the rates. Rates and specific footnotes for these services are set out in the following pages of this concurrence.

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any such time as it appears that such cancellation is in the best interest of the Company and/or its Customers.

3.4 Resold Integrated Services CSV/CSD Transport Rates

REGD JAN 27 2003

The Company concurs in the rules and regulations, including all footnotes thereto, applying to and governing Integrated Services as set forth in the Southwestern Bell Telephone Company Integrated Services Tariff (P.S.C.Mo.-No. 41) on file with and approved by the Missouri Public Service Commission, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company concurs with Southwestern Bell Telephone Company's regulations, descriptions and scopes of the following Integrated Services offerings, but not the rates. Rates and specific footnotes for these services are set out in the following pages of this concurrence.

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any such time as it appears that such cancellation is in the best interest of the Company and/or its Customers.

2. Optional Detail Billing

Optional Detail Billing provides individually rated message detail at the customer's request.

- This request must be made in advance of the month to be detailed.
- The detail of local measured messages billed during the current billing cycle are provided on a printed listing.
- The following rates and charges apply for Optional Detail Billing:

Monthly Preparation Charge	\$1.00
Printed Listing (per message charge)	.01

- Applicable Service and Equipment Charge, as specified in the previous section of this tariff, apply for both initiating and terminating this optional service offering.

- (1) Service is only offered where facilities are available.
- (2) Each B Channel configured for CSV/CSD shall constitute a local exchange access arrangement.
- (3) Discount - The discounts for Business Trunk Equivalent charges should be applied at the same rate as the discounts on monthly re-occurrences for the PRI and BRI services in the following sections.

FOOTNOTES:

- (1) Rates and charges stated are in addition to those specified for DID, DOD, FX, FSO AND TIE service in this tariff.
- (2) This charge applies only when an additional SI is ordered and installed with an initial SI per customer, per request, per due date, per location.
- (3) Integrated Services Digital CSV/CSD Transport options are not applicable with TIE Service or with Permanent PSD B Channel.
- (4) Only the Integrated Services Digital CSV/CSD Transport elements which are "PRI Service Compatible" can be associated with PRI Service.
- (5) Rates applicable for those FSO/ FX service terminations associated with PRI Service.
- (6) This charge applies only when an additional Universal Termination of the same call type is ordered and installed with the initial Universal Termination per customer, per request, per due date.
- (7) This charge applies only to modifications subsequent to the installation of the initial service.
- (8) FX/FSO, Outward WATS and Common Line 800 Service each require an Integrated Services Digital CSV/CSD Transport Option.
- (9) Allows one packet end point and/or telephone number. In addition, Digital Packet Switching Usage charges apply.
- (10) Loop Protection Feature will be provided where fiber optic facilities are available. Special Construction Charges may apply when fiber optic facilities are not available or unusual expenditures are involved in making them available to provide this feature.
- (11) If a customer's request to upgrade from vendor- specific to National ISDN requires a move to a different PRI serving office, the change is treated as a move and this rate does not apply.
- (12) When a customer requests a change associated with DCA or Backup D Channel, change/rearrange charges specific to those features apply instead of this charge.
- (13) This charge applies when a service component is added subsequent to the initial installation of the PRI Interface. Any service component related installation charges from this tariff are also applicable.
- (14) Discount – 5% for Residential Service and 10% for Business Service. (T)

3.5 Payphone Exchange Access Services

REC'D JAN 27 2003

3.5.1 General

The Company concurs in the rules and regulations, including all footnotes thereto, applying to and governing Payphone Exchange Access Services as set forth in the Southwestern Bell Telephone Company General Exchange Tariff on file with and approved by the Missouri Public Service Commission, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company concurs with Southwestern Bell Telephone Company's regulations, descriptions and scopes of the following Payphone Exchange Access Services, but not the rates. Rates and specific footnotes for these services are set out in the following pages of this concurrence.

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any such time as it appears that such cancellation is in the best interest of the Company and/or its Customers.

3.11 TeleBranchSM Service

3.11.1 General

TeleBranchSM Service is a service whereby a call placed from the originator to a customer's (the TeleBranchSM customer) telephone number (the call-forwarding location) is automatically forwarded by central office equipment to the subscriber's (1) Local Exchange Service, (2) Inward Wide Area Telecommunications Service (800 Service) and Long Distance Message Telecommunications Service or (3) Foreign Exchange Service (FX). Terminating stations must have incoming-call capacity.

3.11.2 Regulations

- A. TeleBranchSM Service is offered subject to availability of suitable facilities and provided no unusual expense is involved.
- B. TeleBranchSM Service is not offered where the terminating station is a coin telephone.
- C. The Company will not provide identification of the originating telephone number to the TeleBranchSM customer.
- D. Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
- E. TeleBranchSM Service is not represented as suitable for satisfactory transmission of data.
- F. TeleBranchSM Service is available when used in connection with interstate or intrastate Long Distance Message Telecommunications Service and interstate or intrastate Inward WATS (800 Service) lines.
- G. TeleBranchSM Service is offered for Local Exchange Service only in those locations where Measured Service is available.
- H. TeleBranchSM Service is provided on the condition that the customer subscribe to sufficient TeleBranchSM features and facilities to adequately handle calls to the TeleBranchSM customer without interfering with or impairing any services offered by the Company.

C. Message Charges

The message charges applicable to remotely forwarded calls shall be comprised of two separate charges: (1) a charge for that portion of the call from the originating station to the call-forwarding location, and (2) a charge for that portion of the call from the call-forwarding location to the terminating station. The respective charge for each portion is as follows:

1. Between the originating station and call-forwarding location. The charge for this portion of a remotely forwarded call shall be the charge specified in this tariff, or any other applicable tariff, for the type of call involved.
2. Between the call-forwarding location and the terminating station. The TeleBranchSM customer is responsible for the measured usage charges specified in 3 below and customer-dialed station-to-station charges or interstate and intrastate charges specified in Navigator's Long Distance Tariff. The aforementioned charges apply to all calls answered at the terminating station, including person-to-person and collect calls, even though such calls might not be accepted at the answering location.

3.13 Customer Alerting Enablement

3.13.1 Description of Service

Customer Alerting Enablement (also known as Message Waiting Indicator) allows residence and business lines to receive an audible alerting tone (intermittent dial tone) transmitted from the central office or a signal which activates a light on the customer's CPE.

3.13.2 Availability of Service

Customer Alerting Enablement is not available on Payphone Exchange Access Service, PBX trunks, Centrex Service or Plexar Service. In order for Customer Alerting Enablement to work, the customer must subscribe to Call Forwarding Busy Line Don't Answer.

3.13.3 Rates and Charges

The following rates and charges apply in addition to the established rates and charges with which this service is associated.

Customer Alerting Enablement (EW5VA)(2)	S&E Charge (1)
Residence	\$7.75
Business	15.65

- (1) Only one Service and Equipment Charge applies when ordered at the same time as Personalized Ring or a Custom Calling Service.
- (2) The EW5VA USOC applies to enabling both audible and visible alerting capability. For audible only, the EW5AX USOC applies. For visible only, the EW5VX USOC applies.

Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service

3.14.1 General

The Company will provide DigiLine Service within a suitably equipped LATA where facilities and equipment are available. This tariff section does not create an obligation for the Company to construct such facilities or equipment for this service. Availability of selected optional features may be dependent upon the DigiLine serving central office switching technology.

3.14.2 Service Description

DigiLine Service is a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) based service which offers two 64 Kilobits per second (Kbps) B channels and one 16 Kbps D channel. One or both B channels may be configured for circuit switching or packet switching (1). Calls over a B channel configured for circuit switching may be either voice or data. The D channel carries out of band signaling for the B channel(s) and may also be configured for packet switching (1). DigiLine Service, when configured for circuit switching, provides access to and from the Public Switched Telephone Network (PSTN). DigiLine Service, when configured for packet switching, provides access to the Public Packet Switched Network (PPSN)(1).

3.14.3 Service Component - Description and Definitions

Additional Call Offering - A non-Electronic Key Terminal Service (EKTS) feature that notifies the user of an additional Circuit Switched Voice call that would normally be cleared because the user's interface is busy. (The method of notification to the end-user is customer premises equipment dependent.)

Additional End Point/Telephone Number (1) - A Packet Switched Data (PSD)-D or On Demand PSD-B option that provides an additional end point (terminal equipment identifier) or telephone number. Up to eight packet end points/telephone numbers may be activated with the PSD-D or On Demand PSD-B Network Rate Element.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Analog Member in a Hunt Group - This feature provides for an analog interface in a DigiLine Hunt Group.

Automatic Callback - This feature enables the customer to place a call to the telephone number of the last incoming call, whether or not the call was answered or the number is known. The user can dial an activation code or press a feature button to request that the network place the call. If the telephone number of the last incoming call is busy, equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This feature cannot be activated for calls originating from a line that is forwarded or from a line or trunk not associated with a telephone number, e.g., a multiline Hunt Group.

Automatic Recall - This feature enables the customer to automatically redial the last outgoing telephone number by dialing an activation code or pressing a feature button to request that the network place the call. When the recalled telephone number is busy, equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed.

Basic Electronic Key Terminal Service (Basic EKTS) Feature Package - A Circuit Switched Voice option that enhances normal telephone use. It consists of: Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Message Waiting Indicator, Speed Call Long or Speed Call Short, and Three-Way Conference Calling. A Basic EKTS terminal supports only one Call Appearance per telephone number.

Basic Rate Interface - Provides the central office hardware, software and a 144 Kbps facility required to provide DigiLine Service.

Bridged Call Exclusion - A Basic EKTS and CACH EKTS feature that allows a user to prohibit other stations from picking up a call on hold or bridging onto a call that is active at that terminal.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Bridging - A Basic EKTS and CACH EKTS feature that allows the user to join an active call by pressing the active call appearance button and going off hook. This establishes a three-way call. This feature is different from basic three way calling because the third party initiates the bridge to the active call. Bridging is inhibited if Bridged Call Exclusion is activated on a terminal engaged in the active call. Only one additional shared call appearance user may bridge to an active two-way call. Bridging cannot be activated on an existing three-way call.

Call Appearance - A button on an electronic telephone set that serves as a telephone number designation or appearance. A single telephone number can appear on multiple electronic telephone sets and/or multiple times on the same electronic set. A visual indicator identifies the status of the Call Appearance (e.g., the lamp may flash for an unanswered call, blink for a call that has been placed on hold, remain dark for an idle call appearance, or remain steady for the currently active call).

Call Appearance Call Handling Electronic Key Terminal Service (CACH EKTS) Feature Package - A Circuit Switched Voice option that allows multiple telephone numbers and Call Appearances. Other service features included with this package are: Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Intercom, Key System Coverage for Analog Lines, Message Waiting Indicator, Speed Call Long or Speed Call Short, and Three-Way Conference Calling. (Additional Call Offering is inherent with this feature.)

Call Forwarding Don't Answer - A feature that directs incoming calls to a preselected telephone number when the called telephone number is not answered after a customer specified number of rings.

Call Forwarding Interface Busy - A feature that permits calls reaching a busy telephone number to be redirected to another telephone number.

Call Forwarding Variable - A feature that allows a user to redirect incoming calls to another telephone number.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

8525 Riverwood Park Drive, P.O. Box 13860, North Little Rock, AR 72113-0860

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Call Pickup - This feature allows a user to answer an incoming call to another party's telephone in the same user pickup group.

Call Transfer Disconnect - This feature allows a DigiLine customer to transfer a call to another telephone number and then hang-up, leaving the two remaining parties connected. The DigiLine customer would then be free to accept another call. The DigiLine customer is prohibited from using this feature to avoid toll.

Calling Number Delivery - This feature provides the user who is receiving a call with the telephone number of the calling party.

Caller ID - This feature provides the user who is receiving the call with the telephone number of the calling party and the name associated with that telephone number. (Upon special request from a customer, the Company will configure this feature to provide the telephone number or the name, instead of both. This modification is provided at the same rate as the standard Caller ID feature.)

Closed User Group (1) - A Packet Switched Data feature that provides a mechanism for creating private networks that restrict packet data communication between group members and non members. It includes the following features: Closed User Group with Incoming Access, Closed User Group with Incoming Calls Barred, Closed User Group with Outgoing Access, and Closed User Group with Outgoing Calls Barred.

Closed User Group with Incoming Access (1) - A Packet Switched Data feature that enables terminals belonging to a Closed User Group to receive incoming calls from terminals outside of the Closed User Group.

Closed User Group with Incoming Calls Barred (1) - A Packet Switched Data feature that permits the subscribed terminals to originate virtual calls to terminals having the same Closed User Group, but precludes the reception of incoming calls from terminals in the same Closed User Group.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Closed User Group with Outgoing Access (1) - A Packet Switched Data feature that enables terminals belonging to a Closed User Group to originate outgoing calls to terminals both within and outside of the Closed User Group.

Closed User Group with Outgoing Calls Barred (1) - A Packet Switched Data feature that permits the subscribed terminals to receive virtual calls from terminals having the same Closed User Group, but prevents the terminals from originating virtual calls to terminals in the same Closed User Group.

Customer Originated Trace - This feature allows a customer to initiate an automatic trace of the last circuit switched call received by dialing an activation code or pressing a feature button. If the trace is successful, equipment will record the incoming call detail (not the conversation). The results of the trace will not be provided to the customer directly. For further action to be taken, the customer is required to contact Navigator Customer Care during normal business hours.

Delayed and Abbreviated Ringing - A Basic EKTS and CACH EKTS feature that alerts a terminal for a predetermined interval (abbreviated ringing) before ringing another designated EKTS terminal (delayed ringing). The customer can choose from several options for the type of audible and/or visual alerting to be given at each station.

Detailed Call Report - Provides customers subscribing to the Measured Usage Option a monthly report detailing all completed local circuit switched calls during the billing period.

DigiLine Service Area - a geographic area consisting of one or more DigiLine equipped exchanges and/or zones.

Distinctive Ringing - This feature provides distinctive alerting for up to six specific telephone numbers.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Fast Select (1) - A Packet Switched Data feature that allows a user to send a maximum of 128 bytes of data in call setup and clearing packets. There are two modes, Fast Select and Fast Selection With Restriction. The user must request the Fast Select facility in the call request packet when more than 16 bytes of user data is desired in the call setup and clearing packet.

Fast Select Acceptance (1) - A Packet Switched Data feature that allows a user to receive a call request packet with up to 128 bytes of user data. The user may also respond with a call connect or clear request packet with up to 128 bytes of user data, depending on the type of Fast Select requested in the call request packet.

Flow Control Parameter Negotiation (1) - A Packet Switched Data feature that permits the customer's CPE and central office switch to communicate and agree upon what fundamental PSD language will be used during a data transmission. This feature allows the calling data transmission equipment to select a window or packet size in the call request packet and the called data transmission equipment to accept the transmitted values, reject the call or select new transmission values. The action occurs automatically with each call.

Hunt Group for CSD - This feature provides for a predefined search (circular, linear or uniform) for an idle directory number to which a Circuit Switched Data call can be offered.

Hunt Group for CSV - This feature provides for a predefined search (circular, linear or uniform) for an idle directory number to which a Circuit Switched Data call can be offered. Directory numbers subscribing to hunting may not have multiple Call Appearances.

Hunt Group for PSD (1) - A Packet Switched Data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Hunt Group Transfer for CSD - This feature transfers Circuit Switched Data calls that terminate to a Circuit Switched Data Hunt Group to a backup Circuit Switched Data Hunt Group

Incoming Calls Barred (1) - A Packet Switched Data feature that prohibits a data terminal from accepting incoming calls.

Intercom - This feature allows a CACH EKTS user to call other terminals in the CACH EKTS group with one or two-digit dialing or by activating a button on the CACH EKTS set.

Integrated Services Digital Circuit-Switched Voice (CSV)/Circuit Switched Data (CSD) Transport Option - Provides for the circuit switched local use of the PSTN. Only the Integrated Services Digital CSV/CSD Transport Option noted DigiLine Service Compatible in Section 3.4 can be associated with DigiLine Service.

Key System Coverage for Analog Lines - This feature allows an analog station set to share calls with a CACH EKTS set.

Link Extension Equipment - Provides the additional central office hardware required to provide DigiLine Service to a customer located outside a DigiLine Service Area or as a FSO/FX arrangement.

Link Extension Facility - A 144 Kbps facility that extends from the customer's normal serving central office to their designated DigiLine serving office. This rate element is only applicable when the customer's exchange is not located within a DigiLine Service Area and the customer is served from a designated DigiLine serving office.

Local Charge Prevention (1) - This feature prevents virtual packet calls from being charged to the data terminal equipment (DTE). All virtual packet calls originated from the DTE will have to be reversed charged. All incoming calls signaling reverse charging will be cleared.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Logical Channel (1) - A Packet Switched Data communication path which allows two-way simultaneous transmission of data packets through the network.

Message Waiting Indicator - This feature provides the user of a message service with either a visual and/or audible indication that a message is waiting.

Multiple B-Channel Terminals on a BRI - This capability allows a user to place more than two B channel terminals on a BRI. Because there are only two B-Channels on a BRI, only two terminals can use the B channels simultaneously. The maximum number of terminals is eight per BRI. These terminals can use the B-Channels, D-Channel or a combination. When there are two users on a BRI, it would be possible for one user to engage both B channels and, thus, leave the other user without access to a B-Channel. To prevent this from occurring, Associated Groups may be defined. The first user is assigned to one Associated Group and the other user is assigned to a second Associated Group. Each Associated Group is allowed access to one B-Channel at any particular time. Both users are allowed access to the D channel. These capabilities are available without additional charge.

On Demand PSD B Channel (1) - Allows a B-Channel to be used for Packet Switched services on a per call basis. When the B-Channel is not being used for Packet Switched Data, it can be used for Circuit Switched Calls. It includes the following features: Up to 127 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection.

Outgoing Calls Barred (1) - A Packet Switched Data feature that prohibits a data terminal from sending outgoing packet calls.

Permanent Packet Switched Data (PSD) B-Channel (1) - Packet switching virtual circuit over a B channel (up to 64 Kbps) using X.25 Packet Switched Data. It includes the following features: up to 127 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Permanent Virtual Circuit (1) - This feature allows the transfer of packet data without the need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

PSD D-Channel (1) - Packet switching virtual circuit over a D-Channel (up to 9.6 Kbps) using X.25 Packet Switched Data. It includes the following features: up to 15 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection. The customer is provided one end point and one telephone number at no additional charge.

Remote Access To Call Forwarding - This feature allows a customer at a remote location to activate/deactivate the Call Forwarding features. If a DigiLine station Customer Premises Equipment is equipped with feature buttons and feature status lamps, the call forwarding status lamp lights when Call Forwarding is activated using remote access.

Reverse Charge (1) - A Packet Switched Data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.

Reverse Charge Acceptance (1) - A Packet Switched Data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.

Secondary Only Telephone Number - A circuit switched option that allows any telephone number, other than a primary telephone number, to be assigned to a DigiLine station. A Secondary-Only Telephone Number does not have to be a primary telephone number at another station. A DigiLine station can have one, or more, Secondary Only Telephone Numbers. Each Secondary-Only Telephone Number can have multiple Call Appearances. A Secondary-Only Telephone Number can be shared among the same DigiLine customer's DigiLine stations.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

Issued: February 20, 2007 By Louis F. McAlister, President Effective: March 21, 2007
Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Selective Call Forwarding - This feature allows a customer to forward selected calls to another telephone number. A screening list of up to six numbers is created by the user via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list. If the user also subscribes to Selective Call Rejection and the same telephone number is entered on both screening lists, the Selective Call Rejection feature must be deactivated to allow the call to be forwarded. This feature will not work if the incoming call is from a telephone number in a multi-line Hunt Group unless the telephone number is the main number of the Hunt Group, or is the telephone number identified.

Selective Call Rejection - This feature allows a customer to reject calls from up to six different telephone numbers. When a call is placed to the user's number from a number on the screening list, the caller receives an announcement indicating that the party he/she is attempting to call does not wish to receive calls at this time. If the user also subscribes to Selective Call Forwarding and/or Distinctive Ringing and the same telephone numbers appear on those screening lists, Selective Call Rejection takes precedence. This feature will not work if the incoming call is from a telephone number in a multi-line Hunt Group unless the telephone number is the main number of the Hunt Group, or is telephone number identified.

Six-Way Conference Calling - A Circuit Switched Voice option that allows the user to set up a conference call for up to six parties.

Speed Call Long - This feature allows a user to dial a preassigned number by pressing the feature button assigned to speed calling and dialing two digits, or via an interactive dialing sequence. This feature allows for up to thirty numbers in the speed call list.

Speed Call Short - This feature allows a user to dial a preassigned number by pressing the feature button assigned to speed calling and dialing one or two digits, or via an interactive dialing sequence. This feature allows for up to six or ten numbers in the speed call list, depending on the serving office.

Three-Way Conference Calling - A Circuit Switched Voice feature that allows the user to establish a conference call for up to three parties.

3.14 DigiLine Service, cont.

3.14.3 Service Component - Description and Definitions, cont.

Throughput Class Negotiation (1) - A Packet Switched Data feature that allows the calling data terminal, to negotiate a lower throughput class other than the pre-assigned standard network default.

Throughput Class Selection (1) - A Packet Switched Data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200 (B-Channel only).

3.14.4 Technical Specifications

- A. Technical equipment guidelines for ISDN customer access to DigiLine serving offices are found in SR-NWT-002661, ISDN Basic Rate Interface Generic Guidelines for Customer Premises Equipment. This document may be obtained from:

Telcordia Document Register
455 South Street, Room 2J-125
Morristown, NJ
Telephone: 1-800-521-2673

- B. DigiLine Service is designed to all relevant International Telecommunications Union-Telephony (ITU-T) standards.
- C. The transmission characteristics of DigiLine Service support 64 Kbps Clear Channel Capability.
- D. Due to technical limitations, some analog optional features (such as, but not limited to, Call Waiting) may not work properly when a customer chooses to combine an analog local exchange access service with a DigiLine Service arrangement.
- E. When DigiLine Service is provided from a central office other than the customer's normal serving office, calls to 911 Emergency Number Service originated over the DigiLine Service may route to a different answering point than 911 calls originating from access lines served by the customer's normal serving office. If so routed, the different answering point may not have the information available to respond as efficiently as possible.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

3.14 DigiLine Service, cont.

3.14.5 Regulations

- A. The following regulations apply in addition to those in other Company tariffs. Where other regulations apply on a per line basis, they shall be interpreted to apply per channel.
- B. DigiLine Service requires compatible registered CPE under FCC Part 68.
- C. For use of the PSTN, only those Integrated Services Digital CSV /CSD Transport Options noted as DigiLine Service Compatible can be used with DigiLine Service.
- D. Resale of DigiLine Service is prohibited.
- E. Upon subscribing to DigiLine Service, the customer may be required to change his existing telephone number.
- F. DigiLine Service is physically provisioned from the DigiLine serving office designated by the Company. The Company will determine a customer's designated serving office based on the location and capacity of DigiLine equipped central offices.
 - 1. If the customer's normal serving office is located within a DigiLine Service Area, the customer may be provided DigiLine Service from the designated DigiLine serving office at the rates and charges listed in Section 3.14.11 following and FSO or Link Extension Equipment and Link Extension Facility charges will not apply.
 - 2. If the customer's normal serving office is not located within a DigiLine Service Area, the customer may be provided DigiLine Service from a DigiLine equipped central office in a DigiLine Service Area within the customer's LATA, if agreed to by the Company. In such cases, the charges for the Link Extension Equipment and Link Extension Facility specified in Section 3.14.11 will apply in addition to the other charges for DigiLine Service.

3.14 DigiLine Service, cont.

3.14.5 Regulations, cont.

F. Cont.

3. If, in case 1. preceding, a new central office becomes the designated DigiLine serving office for a customer's location, their existing DigiLine Service will continue to be provided from their original DigiLine serving office if technically possible. If necessary, the Company may require that the customer move the existing DigiLine Service to the new designated serving office and, in conjunction therewith, waive the move charges. Such a move may require the customer to change telephone numbers(s). If the move to the new designated serving office is at the customer's request, the provisions and charges specified in this tariff for moves will apply.
4. In case 2., preceding, when a central office is equipped so that the customer's normal serving office becomes part of a DigiLine Service Area, the customer's DigiLine Service may be moved from their original DigiLine serving office to the customer's new designated DigiLine serving office. Such a move may require the customer to change telephone number(s), and in conjunction therewith, the Company will waive the provisions and charges for moves specified in Section 3.14.7 of this tariff. The Link Extension Equipment and Link Extension Facility charges will no longer apply once the customer's DigiLine Service is moved. However, if agreed to by the Company, the customer may request that their DigiLine Service not be moved to the new designated serving office. In such case, the Link Extension Equipment and Link Extension Facility charges will continue to apply.

3.14 DigiLine Service, cont.

3.14.5 Regulations, cont.

G. Caller ID

1. Caller ID is offered on a subscription basis, which requires the customer to order the service. Where Caller ID is available, any calling party, whether they subscribe to Caller ID or not, has per call blocking capability. The calling party may prevent the delivery of their calling name and/or number to the called party by dialing an access code (*67 on their Touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the name and/or number will not be transmitted across the line. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator indicates to the Caller ID customer that the calling party has elected to block delivery of the telephone number.

Line Blocking for the delivery of the calling name and/or number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where an executive office of the agency registers with the Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling name and/or number will not be transmitted from a line equipped with this capability.

PBX customers are responsible for providing per line blocking on their own PBX. The Company will transmit the anonymous indicator received from the PBX customer. The blocking of the calling name and/or number will not be provided on calls originating from Payphone Exchange Access Service.

3.14 DigiLine Service, cont.

3.14.6 Moves

- A. A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within the Southwestern Bell Service Area in Missouri, except as described in the following paragraphs.

3.14.7 Supersedures

DigiLine Service may be transferred to a new customer at the same premises upon written concurrence of the Company. The customer to whom service is transferred must accept all past indebtedness, liabilities, provisions and equipment configurations in effect for the previous customer at the time of the transfer.

3.14.8 Suspension of Service

- A. Customer-initiated suspension of service is not offered for DigiLine Service.
- B. Company-initiated suspension of service (Section 1.30) requires application of the business restoration charge per D-Channel configured for Packet Switched Data (1) and per B-Channel.

3.14.9 Special DigiLine Service Requests

DigiLine Service will be furnished at the rates contained in this tariff section, provided facilities are available. Where facilities are not available or unusual expenditures are involved in making them available, the customer may be required to pay additional charges (See Section 1.28) to cover the unusual expenditure, or to contract for services beyond the service term or both.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.14 DigiLine Service, cont.

3.14.10 Rate Application

A. General

1. If the customer cancels an order for service before installation of the equipment and facilities is complete, the customer agrees to pay all expenses incurred by the Company before receipt of notice of cancellation. This charge shall not exceed all charges which would have applied had the service been installed.
2. DigiLine customers may elect to spread the payment of all installation and nonrecurring charges through a series of equal monthly payments not to exceed a period of 12 months. An amount of five dollars (\$5.00) will be applied to the first monthly payment for each installment billing arrangement. This charge will only apply once when multiple orders are issued for one customer, at one location, with one due date.

B. Integrated Services Digital CSV/CSD Transport Option – Usage Options

1. DigiLine Service provides for usage of the PSTN on either a Flat Rate or Usage Sensitive basis per BRI. The Flat Rate Usage charge applies per B-Channel activated for CSV/CSD. Customers opting for the Usage Sensitive Option must select a usage package which applies on a per BRI basis. Customers may not combine a Flat Rate Option with a Usage Sensitive Option on the same BRI. (Note that the customer's choice of a Flat or Measured CSV/CSD Option does not restrict the choice of PSD options.) (1)
2. The customer may opt to switch usage options or usage packages upon notification to the Company. Billing under the newly selected usage option or usage package will commence with the beginning of the customer's next billing period. The Change a Network Rate Element charge will apply for customers switching usage options or usage packages.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

3.14.10 Rate Application, cont.

C. Distance Sensitive Rates and Calling Scopes

1. The application of any distance sensitive rates for services associated with DigiLine Service (e.g., toll rates, private lines, etc.), will be based upon the V & H coordinates of the customer's DigiLine serving office or the customer's normal serving office, if requested by the customer and if the office has the technical capability.
2. The local calling scope and the optional calling plans available for DigiLine customers will be determined by the customer's DigiLine serving office or the customer's normal serving office, if requested by the customer and if the office has the technical capability.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.15 Digital Packet Switching Usage (1)

3.15.1 Digital Packet Switching Usage provides for use of the Company's Public Packet Switched Network. This service is limited to customers who have purchased a Packet Switched Data option for the Company's Basic Rate Interface (BRI) or Integrated Services Digital Network (ISDN) based service. Digital Packet Switching Usage is not available on a stand alone basis.

3.15.2 Definitions

Detailed Report - Provides a printout of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by customer account.

Kilosegment - A segment is a means of measuring the volume of transmitted information. The segment size is the number of octets of call user data contained in a packet segment. The standard Company segment size is 64 octets. The number of segments in a packet is determined by dividing the number of octets of call user data in a packet by 64 and rounding up. A Kilosegment is one thousand segments.

Packet Directory Number - This is the "E-164 address" associated with packet capability on the customer ISDN-based service. The number identifies customers originating calls on the Packet Switching Network.

Packet Switching Network - Consists of the packet switches and interswitch facilities within a LATA.

Session - The time that common control network facilities are allocated to a specific switched call. It begins with call set up and continues until the common control network facilities are released for reuse by the network.

Summary Report - Provides a monthly total, on paper only, of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by either user identification or originating city.

- (1) Packet Switching is obsolete and only available at existing installations at existing locations for existing customers, with the exception of B-Channel Package that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.15 Digital Packet Switching Usage, cont. (1)

3.15.3 Rules and Regulations

The following rules and regulations are in addition to the rules, regulations, and rates in other Tariffs:

- A. The customer will be responsible for all charges to their packet directory number.
- B. The Company reserves the right to determine the facilities used to provide service and to modify or change such equipment and facilities.
- C. No credit will be made for interruptions due to negligence or failure of customer-provided equipment.
- D. The printed reports will be provided to the customer via first-class U.S. Mail Service unless otherwise agreed upon between the customer and the Company.

3.15.4 Rate Application

	<u>USOC</u>	<u>Nonrecurring Charge</u>
Printed Reports		
- Summary Report, each (2)	SU2++	\$100.00
- Detailed Report, each (2)	BDT	200.00
		<u>Rate (4)</u>
Call Establishment (3)		
- Call Set-Up, per set up		0.005
Character Transmission Charge		
- Per kilosegment (5)		0.20

- (1) Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.
- (2) A charge applies per report type, each occasion a particular report is generated for the customer.
- (3) When the interface is provisioned with the Permanent Virtual Circuit optional feature, this charge applies to the initial session only.
- (4) These charges can be paid by either the originating end or the destination end. Note that the destination end may be a non-customer of the Company.
- (5) For billing purposes, fractional kilosegments are rounded to the next higher whole kilosegment.

Navigator Telecommunications, LLC.

SECTION 3 - RATES - SOUTHWESTERN BELL SERVICE AREAS, CONT.

3.16 Digital Customer Alerting Service (1)

3.16.1 This service provides the capability of activating and deactivating an alerting tone on subscriber lines served from suitably equipped end offices. The alerting tone is provided in the form of a stutter dial tone and serves as notification that some type of action is warranted (i.e., a message is waiting for retrieval). This service is limited to customers who have purchased a Packet Switched Data option for the Company's Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) based service. Digital Customer Alerting Service is not available on a stand alone basis.

3.16.2 Rules and Regulations

The following rules and regulations are in addition to the rules, regulations, and rates in other sections of this tariff:

- A. This service is subject to the availability and operational limitations of the equipment and facilities.
- B. Temporary suspension of service is not available.
- C. The Company reserves the right to determine the facilities used to provide service and to modify or change such equipment and facilities.

3.16.3 Rates and Charges

	USOC	Per Minute Rate (2)	Service Charge (3)
Customer Alerting Connect Time, per minute	ACW	\$0.15	\$224.00

- (1) Packet Switching, which is a required component of Digital Customer Alerting Service is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.
- (2) For the purpose of billing, a minimum connect time of 1/30 of a minute is billed on all calls. When the actual duration is longer than 1/30 of a minute, fractional minutes of use will be rounded to the next 1/60 of a minute. The connect time is for activation/deactivation of the message waiting indicator on subscribers' lines.
- (3) This charge applies per Customer Alerting customer.
