## TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the Tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4<sup>th</sup> revised Sheet 14 would cancel the 3<sup>rd</sup> revised Sheet 14. Because of various suspension periods, deferrals, etc. that the Commission follows in its Tariff approval process, the most current sheet number on file with the Commission is not always the Tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
  - 2.1.1.A.1.(a).I.(i).
  - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a Tariff filing is made with the Commission, an updated check sheet accompanies the Tariff filing. The check sheet lists the sheet contained in the Tariff and gives the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated on the check sheet with an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The Tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

### SECTION 3 - DESCRIPTION OF SERVICES AND RATES

#### 3.1 Timing of Calls

##### 3.1.1 When Billing Charges Begin and Terminate for Phone Calls

The chargeable time for a long distance call is determined by the duration of the call. Chargeable time begins when connection is established between the calling station and the called station. When the called party picks up is determined by hardware answer supervision, in which the local telephone company sends a signal to the switch or the software utilizing digital format or audio tone detection. In any case, an unanswered call will not be billed. Chargeable time ends when the calling station hangs up or otherwise terminates the call. If the called station hangs up or otherwise terminates the call but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Underlying Carrier's operator.

##### 3.1.2 Billing Increments

For calls for the 1010-123 Dial-Around Service, and the UniendoAmérica and LíneaPaís® Plans are billed in the following increments:

Call duration for billing purposes is 1 minute for a connected call. Customers will not be billed for calls of 6 seconds or less. After the first 6 seconds of a call, the customers will be billed for 1 minute. Calls beyond 1 minute are billed in one-minute increments.

##### 3.1.3 Per Call Billing Charges

Billing will be rounded up to the nearest penny for each call.

##### 3.1.4 Uncompleted Calls

There shall be no charge for uncompleted calls.

SECTION 3 - DESCRIPTION OF SERVICES AND RATES, (CONT'D.)

3.4 Service Offerings, (Cont'd.)

3.4.2 Dial-Around Code 10-15-688 AMETEX

A. General

Ametex 10-15-688 dial-around code is a communications service that allows customers to place long distance calls from their home telephone number or business number to international and domestic destinations.

B. Service Availability

Ametex 10-15-688 is available 24 hours a day, 7 days a week from residential and some small business phones located within the Continental United States. The service is not available to place calls from hotels, prisons, cellular phones, large businesses and pay phones.

C. Credit Allowances for Interruptions

Credit is applicable to the portion of the call that is interrupted due to cut off, poor transmission or one way transmission. Ametex will not grant credit for reaching the wrong number. The customer will receive credit on a per minute basis [in this case it is for the full amount of the first ten minutes], but there will be no credit issued for calls over ten minutes. There will only be one allowance granted per phone number per month.

To receive proper credit, the customer must notify immediately the company about the trouble experienced [e.g. cut off, noisy circuit], and the approximate time the call was made. The customer service representative will validate the complaint by revising the ANI's calling history. The customer can contact us at the designated customer service number of Ametex, or at the designated customer service number of the Company's Billing Agent as published on the clients' monthly telephone bill.

Credit allowances do not apply for interruptions not reported to the Company or to interruptions due to failure of power, equipment or systems not provided by Americatel.

SECTION 4 - MISCELLANEOUS CHARGES

4.1 Directory Assistance

A Directory Assistance Charge applies to all calls made from points within the State to Intrastate Directory Assistance. This charge applies whether or not the Directory Assistance bureau furnishes the requested telephone number (e.g. where the requested telephone number is unlisted, non-published, or no record can be found).

Per Directory Assistance Call: \$1.00

4.23 Public Pay Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any domestic pay telephone, not presubscribed to the Company, used to access the Company's services. The Public Pay Telephone Surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any re-originated call (i.e., using the "#" symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Public Pay Telephone Surcharges charges by the Company are found in the individual service offerings described in this Tariff.
