2.8.4 Fractional Charges

Charges for a fractional part of a month (which follows a full month) are calculated by counting the number of days remaining in the billing period after service is furnished or has been discontinued. The number of days remaining in the billing period are counted starting with the day after the service was furnished or discontinued. Divide that figure by thirty days. The resultant fraction is then multiplied by the monthly charge to arrive at the fractional monthly charge.

**4.5 Fidelity Debit Card Service**

Fidelity Debit Card Service allows Customers to place direct dialed calls between locations within the United States served by the Company. Customers access the Company's network by dialing a toll-free number or other access dialing sequence and entering a Personal Account Code. The Company's system informs the Customer of the Available Usage Balance remaining in his/her Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance on the Customer's account on a real time basis as the call progresses.

Customers purchase a Debit Card which assigns each Customer a Debit Account, provides each Customer with a Personal Account Code and lists instructions for accessing and using Carrier's service. Debit cards are available in varying denominations.
